14th Congress.] No. 411. [2d Session.

PLAN TO INSURE THE ANNUAL SETTLEMENT OF PUBLIC ACCOUNTS, AND A MORE CERTAIN ACCOUNTABILITY OF THE PUBLIC EXPENDITURES.

COMMUNICATED TO THE SENATE, DECEMBER 9, 1816.

In obedience to the resolution of the Senate of the 20th April last, requiring the Secretaries of the Departments to report jointly to the Senate, in the first week of the next session of Congress, a plan to insure the annual settlement of the public accounts, and a more certain accountability of the public expenditure in their respective Departments, the undersigned have the honor to report:

That, in order to comply with the requisitions of the resolution, and to satisfy the just expectations of the Senate, it is necessary to inquire into the causes of the delay in the annual settlement of accounts, and the want of sufficient certainty in the accountability of the respective Departments, upon which the resolution is predicated.

An attentive review of the principles upon which the several Departments of the Government were originally organized, and of the changes which have successively been made in that organization, appears to be necessary at the threshold of this investigation.

By referring to the laws for organizing the several Departments of the Government, they will be found to be extremely general in their terms, leaving the distribution of the duties and powers of the Secretaries in a considerable degree to executive regulation. The law organizing the Treasury Department, however, specifically refers to that Department the settlement of all public accounts. The pecuniary embarrassments by which the Government was pressed at that period, requiring a system of the most rigid economy in the public disbursements, could not fail to give peculiar force to the idea that the Department charged with the replenishment of the treasury should have a direct control over the public expenditure. Under the influence of this idea, all purchases for supplying the army with provisions, clothing, supplies in the quartermaster's department, military stores, Indian goods, and all other supplies or articles for the use of the War Department, were, by executive regulation, directed to be made by the Treasury Department.

The first important change which was made in the organization of the War Department was effected by the act of the 8th of May, 1792, which created the office of Accountant of that Department, and referred to that officer the settlement of all accounts relative to the pay of the army, the subsistence of the officers, bounties to soldiers, expenses of the recruiting service, and the incidental and contingent expenses of the Department. The accounts settled by the Accountant were to be certified quarterly, and sent to the accounting officers of the Treasury for their revision. This act continues with the Treasury Department the power of making for the War Department the purchases before enumerated.

On the 30th of April, 1798, the Navy Department was created. From the organization of the Government to this date, the Secretary of War executed the orders of the President in relation to the navy. On the 16th of July, in the same year, the office of Accountant of the Navy was created, and the settlement of all accounts in the Navy Department was referred to that office. On the same day the power of the Treasury Department to make contracts for the War Department was rescinded, and all the accounts of that Department were thenceforward to be settled by the Accountant.

The power of revision, both as to the accounts of the War and Navy Departments, was, and still is, reserved to the accounting officers of the Treasury. This power, however, from the period that the primary settlement of the accounts of the War and Navy Departments was withdrawn from the Treasury, ceased to be useful, and has been preserved merely for the sake of form. In the Treasury, balances or debts admitted on settlement are paid only upon the report of the Auditor, confirmed by the Comptroller, whose decision is final. In the War and Navy Departments, the sums reported by the Accountants to be due to individuals are paid, without waiting for the revision of the accounting officers of the Treasury. This practice, which has been adopted in some measure from necessity, is not believed to be incompatible with the provisions of the law requiring that revision. The Accountants of the War and Navy Departments are required to transmit, quarterly, all the accounts which have been settled to the

Treasury Department for final revision. It could not have been the intention of Congress that an officer, or an individual to whom money was found to be due by the report of the Accountant of either of those Departments, should wait for payment not only until the expiration of the quarter, but until his accounts should be re-examined by the Auditor of the Treasury, and also by the Comptroller.

The delays to which this course would necessarily have led must have produced a state of confusion which, in a short period, could not have failed to obstruct all the operations of the Government. On the other hand, it is manifest that, from the moment payments were made upon the settlement of the Accountants, before the revisionary power of the Treasury officers was exercised, revision became useless. The leading feature of the organic laws of the Departments, that the settlement of the public accounts should exclusively rest with the Department which was charged with the replenishment of the treasury, was substantially abandoned. The form, indeed, was preserved, but the vital principle was extinguished.

It is probable that more importance was attached to this principle by those who presided over the primary organization of the Departments than it intrinsically merits. The power of the accounting officers, whether belonging to the Treasury Department, or to those in which the disbursements are made, to enforce economy in any branch of the public service, must necessarily be extremely limited.

In disbursements for the pay, subsistence, and clothing of the army, whilst rations are furnished by contracts, the most rigid economy may be easily enforced. In the quartermaster's department, and where provisions are supplied by a commissariat, the accounting officers can exercise but a very limited control. The principal reliance of the Government for economy in those Departments must be upon the integrity of the persons employed. Over the contingent disbursements of the War and Navy Departments, which in time of war are considerable, and which in all Governments are extremely liable to abuse, the accounting officers have still less control. For economy in that branch of the public service the heads of those Departments must be responsible to the nation. From this view of the subject, it appears not to be so important that the public accounts should be settled in the Treasury Department as that they should be promptly and finally settled.

Whatever diversity of opinion may exist upon this subject, it is believed that there can be none upon the propriety of either returning to the principle upon which the Departments were originally organized, of referring the settlement of all public accounts immediately to the Treasury Department, or of finally settling the accounts of the War and Navy Departments without the intervention of the accounting officers of the Treasury. The former has the recommendation of unity and simplicity in theory, and it is believed that no serious inconvenience will result from it in practice. The latter would insure the prompt and final settlement of the accounts of the several Departments, but might possibly lead to the establishment of different principles in the settlement of the public accounts in the respective Departments. Under judicious regulations, it is believed that the prompt and final settlement of the public accounts may be as effectually secured by the former as by the latter modification.

Whichever modification may be adopted, an increase in the number of the accounting officers appears to be indispensable. From the year 1792, when the office of Accountant of the War Department was created, to the year 1798, when all the accounts of the War Department were referred for settlement to that officer, the military force of the United States was not so extensive as the present military peace establishment. The duties assigned the Accountant at the former period were, as has already been stated, the settlement of all accounts relative to the pay of the army, the subsistence of officers, bounties to soldiers, expenses of the recruiting service, and the contingent expenses of the War Department. The services required by that act are believed to be sufficient to give full employment to one accounting officer. By the act of 1798, the settlement of the accounts relative to the subsistence of the army, the quartermaster's department, the clothing department, the purchase of arms and munitions of war, and to the Indian Department, was referred to the Accountant of the War Department.

The additional duties imposed upon the Accountant by this act have been so great that some of the accounts of the War Department nearly of the same date remain still unsettled. It is, therefore, confidently believed that the duties imposed upon the Accountant by this act require the undivided attention of another accounting officer.

In contemplation of the law, the Comptroller of the Treasury revises all the accounts of the Government for the purpose of correcting the errors, both of fact and of law, which may have been committed by the accounting officers to whom their settlement is in the first instance committed. He is likewise charged with the superintendence of the collection of the revenue arising from duties and tonnage, and directs the collection, by suit, of all debts due to the United States. It has been already stated that the revision of the accounts settled by the Accountants to the War and Navy Departments by this officer has always been merely nominal. The enumeration just given of the extent and variety of the duties imposed upon him will satisfy every reflecting mind that they must continue to be so. Should this officer be relieved from the superintendence of the collection of imposts and duties, and of suits for the recovery of debts due the United States, by the assignment of those duties to another officer, still it is believed he would not be able to revise all the accounts of the Government, so as to be in fact the check upon the auditing officers which the law contemplates. When the office of Comptroller was created, and the duties of that officer were prescribed, the Auditor of the Treasury was the only accounting officer whose acts he had to revise. At present, he has to revise the settlements made by three accounting officers, and, according to the plan which it is the duty of the undersigned to propose, in order to insure the annual settlement of the public accounts, there will be five auditing or accounting officers whose acts are to be revised. From this view of the subject, the appointment of an additional Comptroller appears to be indispensable.

It has been previously stated that the mass of business thrown upon the Accountant of the War Department by the act of the 16th of July, 1798, has produced an arrearage in the settlement of the accounts of that Department almost coeval with that date. This observation was intended to apply to the accounts appropriately belonging to the Department, arising from the administration of the military establishment. But the accounts of the Indian Department, without a solitary exception, have remained unsettled from that date to the present period. This has resulted from the fact that the Secretary at War is substantially the auditor of all the Indian accounts. It is also his duty to inquire into and decide upon all claims exhibited by the citizens of the United States for property stolen or destroyed by the Indian tribes to whom annuities are payable, and, where they are proved to his satisfaction, to direct compensation to be made to the injured party out of the annuity payable to the offending tribe. These duties, together with the examination of the contingent expenses of the Department, which must also receive his special sanction, if duly attended to, would leave him no time to devote to the more important and appropriate duties of his station. The consequence has been that the Indian accounts have remained unsettled, and must continue so until a different organization of the Departments shall be effected.

It is obvious to the mind of every reflecting man that the duties imposed upon the Secretary of War in relation to the Indian Department have no rational connexion with the administration of the military establishment. From the view which has been presented, it is conceived that the public interest requires that the Secretary of War should be relieved from further attention to those duties. It then becomes necessary to inquire whether those duties can, consistently with the public interest, be assigned to either of the other Departments. An examination

into the duties required of those Departments, it is confidently believed, cannot fail to produce the most decided conviction that no additional duties ought to be imposed upon them under their present organization. On the other hand, there is good reason to believe that the public interest would be promoted by relieving those Departments of several branches of the public service at present committed to their respective charges.

The retrenchments which, with great advantage to the public interest, might be made in the duties now imposed upon the Secretaries of the respective Departments and the General Post Office, would furnish ample employment for the head of another independent Department.

An appropriate assignment of duties to the chief of the new Department would embrace the Territorial Governments, the Indian Department, the General Post Office, roads and canals, and the Patent Office, and such other branches of the public service as may be deemed expedient. But the defects in the organization of the existing Departments are not the only reasons why the public accounts are not annually settled.

The want of power to compel those to whom the collection or disbursement of the public money has been confided to render their vouchers and settle their accounts when required has largely contributed to swell the list of unsettled accounts. The power of dismissing from office for misfeasance or non-feasance in office, especially with the collecting officers, is sufficiently coercive as long as the conduct of the officer will bear examination, and powerfully contributes to keep him in the line of his duty. But when the settlement of his accounts must expose his guilt, and especially when he has been dismissed from office, this coercion entirely ceases. With disbursing officers, and particularly in the military establishment, this mode of coercion is much more feeble. In that department, too, there is the strongest reason for the adoption of the most vigorous measures to bring to a prompt and final settlement those who have been intrusted with the disbursement of money, particularly in the quartermaster's and paymaster's departments. Until the accounts of the quartermaster general of an army or of a military district are settled, it is impossible to settle the accounts of the deputies and assistants, the barrack-masters, forage-masters, and wagon-masters employed with the same army, or in the same district. The same observation applies to the pay department. Until the deputy paymaster general settles his accounts, or at least until he renders his vouchers, none of the district or assistant district paymasters, or regimental paymasters, can settle their accounts. This observation applies to the several grades in both departments. Thus a single officer, who knows himself to be a public defaulter, may, by standing aloof, and by procrastinating the decision of law after suit is brought, prevent for years the settlement of the accounts of other officers who may be solicitous to adjust them.

It is the peculiar province of the Legislature to apply appropriate remedies for every evil disclosed by the practical operations of the Government. The one now under consideration, taken in connexion with the inability of the accounting officers to settle annually the public accounts, has produced more serious consequences to the national treasury than every other united. The conviction on the part of an officer that his accounts cannot or will not be settled for years presents a certain degree of impunity to embezzlement, and powerfully tempts to the commission of it. The necessity of resorting to an action at law to enforce the settlement of accounts, or to recover money embezzled by an officer, ought to be avoided, if it can be done consistently with the provisions of the constitution. In some of the States this necessity is avoided, the public money retained by a revenue officer being collected by execution issued by the State treasurer. If this or a similar principle could be acted upon by the United States, embezzlement would not be frequent.

In conformity with these preliminary observations, the undersigned respectfully propose that it is expedient—

First. That another independent Department of the Government be organized, to be denominated the "Home Department." That the Secretary of this Department shall execute the orders of the President in relation to

1. The Territorial Governments.
2. The national highways and canals.
3. The General Post Office.
4. The Patent Office.
5. The Indian Department.

Secondly. That the primary and final settlement of all accounts be made in the Treasury Department; and that the organization of that Department be modified so as to authorize the appointment of

1. Four additional Auditors.
2. One additional Comptroller.
3. One Solicitor.
4. That the mint establishment be placed under the direction of the Treasury Department.

Thirdly. That the office of Accountant of the War and Navy Departments and of the Superintendent General of Military Supplies be abolished.

Fourthly. That the survey of the coast be confided to the Navy Department.

According to the modifications here recommended, the

First Auditor will be charged with the settlement of the public accounts accruing in the Treasury Department.

Second Auditor will be charged with the settlement of all accounts relative to the pay and clothing* of the army, the subsistence of the officers, bounties and premiums, the recruiting service, and the contingent expenses of the War Department.

Third Auditor will be charged with the settlement of all accounts relative to the subsistence of the army, the quartermaster's department, the hospital department, and the ordnance department. Both of these Auditors will keep the property account connected with those branches of service in the War Department confided to them respectively.

Fourth Auditor will be charged with the settlement of all accounts relative to the Navy Department; and the

Fifth Auditor will be charged with the settlement of all accounts relative to the State and Home Departments.

The First Comptroller, being relieved from directing and superintending the recovery by suit of all debts due the Government, will revise all accounts settled by the First and Fifth Auditors.

Second Comptroller will revise all settlements made by the Second, Third, and Fourth Auditors.

The Solicitor of the Treasury will be charged with the recovery of debts due the Government, according to the forms prescribed by law.

It is probable that experience will suggest the propriety of making changes in the distribution of duties among the accounting officers of the Treasury. In order that they may be done with facility, and as they shall be discovered to be necessary, it is respectfully recommended that the whole subject be left to executive regulation.

With this organization of the Departments, the check contemplated by the revision of the Comptroller will be as effectual as it can be made. Money will then be paid in all the Departments upon the settlement of an Auditor only after it has been revised and approved by a Comptroller.

* By late regulations, the pay and clothing appropriations are in fact considered as one appropriation.

If the Departments shall be thus organized and vested with sufficient power to compel all officers employed in the collection or disbursement of the public money to render their vouchers and settle their accounts, the annual settlement of the public accounts will be insured, and a more certain accountability established in the respective Departments.

If the officer intrusted with the recovery of money improperly detained by public officers were authorized to issue an execution for the sum appearing to be due, either upon settlement, or upon the failure to settle when called upon for that purpose, and that the execution so issued should be satisfied by the distress and sale of all the delinquent's property, and that of his securities, one of the most formidable obstacles to the annual settlement of the public accounts would be surmounted.

It is believed that there is no constitutional objection to the adoption of this principle in relation to the officers of the Government who improperly withhold the public money. Under the law imposing the direct tax, the collector, on default of payment, is authorized to make the amount due by the levy and sale of the defaulter's property. In this case, there is on the part of the defaulter nothing but a breach of the general implied obligation which every citizen owes to the community to contribute to the wants of the state in proportion to the property which he possesses. This breach may frequently be the result of inevitable necessity, and but seldom brings his integrity in question. In the case of the delinquent officer there is, in most cases, a direct breach of special confidence involving the odious charge of peculation or embezzlement. Is there any reason why the remedy of the Government should be more summary in the former than in the latter case? Is there not, on the contrary, a clear distinction between the two cases entirely in favor of the tax defaulter? Can it be considered more important to the community that the revenue should be rigidly collected, than that it should be faithfully and honestly disbursed? Has the difference in the remedy arisen from the consideration that the one has withheld from the Government a hundred cents which he ought to have paid, whilst the other has embezzled a thousand dollars of the public money thus summarily collected? There can be no doubt that the different remedies in the two cases have resulted from the want of sufficient reflection, and not from design. The subject is now presented to the view of the Senate, and no doubt is entertained that that enlightened body will satisfy the demands of reason and of justice. It may be proper to observe that the principle now recommended has been applied by the laws laying direct taxes to the collectors of the internal revenue. The Legislature, in relation to that class of officers, has even authorized the arrest and imprisonment of collectors who fail to collect, or neglect to pay after collection, and the seizure and sale of the property, real and personal, of his securities during their imprisonment. As the principle has already been applied to cases arising out of the collection of the revenue, it is respectfully conceived that reasons more cogent call for its application to the disbursing officers of the Government. The different rules established in relation to those two classes of officers, if persevered in, cannot fail to present the idea that the Government is more astute in devising means to raise and collect revenue than in enforcing a faithful application of it when collected.

JAMES MONROE,
WM. H. CRAWFORD,
GEO. GRAHAM, *Acting Sec. of War.*
B. W. CROWNINSHIELD.

The Hon. JOHN GAILLARD, *President pro tempore of the Senate.*
DECEMBER 6, 1816.

14th CONGRESS.] No. 412. [2d SESSION.

CANALS FROM HUDSON RIVER TO LAKES ERIE AND CHAMPLAIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 11, 1816.

To the honorable the Senate and House of Representatives of the United States in Congress: The representation of commissioners of the State of New York, in behalf of the said State, respectfully showeth:

That the Legislature of the said State in April last passed an act to provide for the improvement of their internal navigation, (of which act we take the liberty of transmitting herewith a copy.) In this it will be seen that a board of commissioners is constituted, and that, among other duties enjoined upon them, they are required to make application to the Government of the United States for cessions, grants, or donations of lands or money, for the purpose of aiding in opening a communication, by means of canals, between the navigable waters of Hudson river and Lake Erie, and the said navigable waters and Lake Champlain. To fulfil this requisition, then, is the object of this address.

Next to the establishment and security of the right to self-government, we flatter ourselves that no subject requiring legislative interference can be found more interesting than the one which we are charged to lay before your honorable body; and we venture to solicit your favorable consideration of it, in full confidence that an enlightened public spirit may justly give to it such a measure of patronage as cannot fail to produce signal benefits to the nation.

The benefits to be acquired by the United States from the construction of these canals will most obviously and immediately affect their pecuniary and their political interests. More remotely, indeed, they will exert a favorable influence upon every object embraced within the scope of an enlightened and paternal policy. If we consider the extent and fertility of our territory northwest of the Ohio, the large proportion of it which yet remains unsold, the disposition and the ability which our eastern fellow-citizens possess to purchase and to improve it, we cannot be insensible of the great pecuniary advantage which would result from opening to them a safe, easy, and economical passage into that territory. Every dollar saved to them in the expenses of removing thither would operate to enhance the value of the public lands, and, at the same time, to hasten their settlement; and it is obvious that a canal from the Hudson to Lake Erie would save a large portion of these expenses. The number of persons to be affected by this consideration cannot be accurately stated. It certainly would not be small. We are well assured that, in the

course of one year since the war, more than twelve thousand new settlers, almost exclusively from the East, have established themselves within the limits of this State, west of the Genesee river.

Whatever adds to the value of all that land produces must increase the value of land itself. To a country which depends upon a distant market for the sale of its surplus productions, it is of great importance to afford every possible facility of transportation; for all that is taken from the expense of transportation is added to the value of the articles transported, and, by cheapening the rate of carriage, many articles are rendered valuable which would otherwise be worthless. Moreover, if habit or the necessary accommodation of life requires that such a country should consume foreign goods to the amount of all its surplus productions, it is evident that the landholder there enjoys a twofold benefit in every increased facility of transportation. Perhaps the whole of the country between the great lakes, the Mississippi, and the Ohio—certainly the greater part of it—would derive from the completion of our principal canal greater advantages for distant communication than any country so far inland has hitherto enjoyed, and incomparably greater than that country can ever derive from any other means. Regarded, then, merely as a measure of pecuniary wisdom, we trust your honorable body will make such an appropriation in favor of it as will insure its accomplishment.

But considerations of a political nature seem to us most urgently to recommend the construction of these canals. The great influence exercised over the Western Indians, even in our own territory, by the subjects of a foreign Government, we have always had numerous reasons to wish destroyed. This influence depends materially upon establishments erected for the promotion of the fur trade. Any measure that would open, between one of our seaports and the region where furs are collected, a road in all respects preferable to any other, besides drawing to our own citizens a profitable commerce, would tend eventually to the subversion of that influence, and, in the mean time, offer to us important facilities for controlling it.

The trade carried on between our country and the Canadian provinces is already considerable, and is rapidly growing. The fruits of the earth from the southern shores of Erie and Ontario, and from the borders of Champlain, find their way to the ports of our northern neighbors cheaper than they can to any which offers a market of our own, and are there exchanged for the various commodities of foreign countries. This trade is, indeed, profitable to many of our citizens who engage in it, but it is much more so to the British. Subject to their control, they direct it to the advancement of all their public interests; and it is no mean instrument of that advancement. It is evidently the vital spirit of their internal navigation, which it cannot fail to exalt into a consequence that may hereafter greatly affect us. Would not the prosecution of our projects to complete effect result immediately in giving to citizens of the United States the entire profits of this trade, and to Government all the security and influence connected with a thickly settled frontier, and a most decided superiority of shipping on the lakes?

Nothing can be more certain than that the continuance of our Union is essential to our freedom. The means of this continuance are to be found only in the strength of our common interests. Whatever extends and consolidates these interests, they must be of distinguished importance to Government; and can any thing be imagined more efficaciously conducive to these objects than opening to distant sections of our country the means of easy and profitable intercourse? Virtuous and enlightened men among us have long delighted themselves with looking forward to the period when a canal communication between the Hudson and Lake Erie would afford to half the United States more ample means of promoting every social interest than have heretofore, in any country, been furnished by the accomplishment of any human enterprise.

The advantages of canals were not entirely unknown to ancient Governments. Among them, the wisest and most powerful executed works of this kind in every direction through their territories, for the purposes of agriculture, commerce, and war. The vestiges of many of these are still discoverable; and they are doubtless to be reckoned among the most impressive memorials that remain of ancient greatness. When we recollect the instrumentality which canals have formerly exhibited in collecting the blessings of wealth, strength, and a crowded population for every country through which they passed, and see those very countries, by the neglect and ruin of them, reduced to their original barrenness, can we suppress a conviction of their immense utility? But it is not alone from history, and the faint traces of them which have survived the lapse of many centuries, that the advantages of these improvements are to be known. There are proofs more conclusive; our own times furnish them. In contemplating the present state of Europe, it is impossible not to be struck with the number and extent of her canals; and we perceive that they abound most in those countries where the wants of the social state and the means of power have been most diligently explored, and are most profoundly understood. We see them there enabling extensive empires to hold in speedy administration to every public object all the resources of their most remote sections, and, at the same time, increasing those resources prodigiously, by the economical exchanges of which they are the occasion. Experience is always a safe guide; it is especially to be trusted when it has been acquired in the midst of difficulties and dangers, and has been sanctioned by the wisdom of different nations. If, then, in the pressing exigencies of recent events, when every power of national defence and annoyance has been exerted, when all the capacities of men, as individuals, and in political combination, have been remarkably evolved, we observe in that quarter of the globe a perpetually growing attention to the subject of canals, is it not expedient, is it not wise, for us to engage in making them? No country is more susceptible of all their benefits than ours; none of large extent presents fewer impediments to their construction. They constitute improvements peculiarly fit for a republic. They contribute equally to the safety and opulence of the people, and the reputation and resources of the Government. They are equally desirable in reference to the employments of peace and the operations of war. In whatever light they are viewed, they seem to combine the substantial glories of the most splendid and permanent utility.

But if the execution of those of which we are the advocates be impracticable, or would involve an expense disproportionate to their value, they can have no claim upon the favor of the National Legislature. On these topics we entertain no doubts. The minute examination which has been made this season, under our superintendence, of all the lands which these canals will traverse, has convinced us that an expenditure not exceeding ten millions of dollars would be sufficient to perfect them. Shall they remain unattempted? The State of New York is not unaware of her interests, nor disinclined to prosecute them; but where those of the General Government are united with hers, and seem to be paramount, she deems it her duty to ask for their assistance. Wherefore, in her behalf, we solicit your honorable body to make such an appropriation, in lands or money, to aid in the construction of these canals, as you, in your wisdom, may think reasonable and just.

By order and in behalf of the said commissioners, at a meeting held in Albany on the 10th November, 1816.

DE WITT CLINTON, *President.*

AN ACT to provide for the improvement of the internal navigation of this State. Passed April 17, 1816.

1. *Be it enacted by the people of the State of New York, represented in Senate and Assembly*, That Stephen Van Rensselaer, De Witt Clinton, Samuel Young, Joseph Ellicott, and Myron Holley, be, and they are hereby,

appointed commissioners to consider, devise, and adopt such measures as may or shall be requisite to facilitate and effect the communication, by means of canals and locks, between the navigable waters of Hudson river and Lake Erie, and the said navigable waters and Lake Champlain; and, in case of the resignation or death of any of the said commissioners, the vacancy thereby occasioned shall be supplied by the Legislature, in the manner in which Senators of the United States from this State are directed to be chosen.

2. *And be it further enacted*, That the said commissioners shall choose one of their number to be president of their board, and shall appoint a fit person for their secretary, who shall be allowed and paid such salary as the said commissioners shall deem proper and reasonable; and the president of the said board of commissioners shall have power to call a meeting of the same whenever, in his opinion, the public interests require it; and the said board may adjourn from time to time, to meet at any time and place they may deem most conducive to the public good; and further, the said commissioners shall have power to employ such and so many agents, engineers, surveyors, draughtsmen, and other persons, as, in their opinion, may be necessary to enable them to fulfil and discharge the duties imposed upon them by this act, and to allow and pay the said agents, engineers, surveyors, draughtsmen, and other persons, for their respective services, such sum or sums as may be adequate and reasonable.

3. *And be it further enacted*, That it shall be the duty of the said commissioners, as soon as may be after the passing of this act, to cause those parts of the territory of this State which may lie upon or contiguous to the probable courses and ranges of the said canals to be explored and examined, for the purpose of fixing and determining the most eligible and proper routes for the same, and to cause all necessary surveys and levels to be taken, and accurate maps, field-books, and draughts thereof to be made; and further, to adopt and recommend proper plans for the construction and formation of the said canals, and of the locks, dams, embankments, tunnels, and aqueducts which may be necessary for the completion of the same, and to cause all necessary plans, draughts, and models thereof to be executed under their direction.

4. *And be it further enacted*, That the said commissioners, or a majority of them, shall be, and they are hereby, authorized and required to make application, in behalf of this State, to the Government of the United States, and of such States and Territories as may be benefited by the said canals, or either of them, to the proprietors of lands through or near which the said canals, or either of them, may or may be proposed to pass, to all bodies politic and corporate, public or private, and to all citizens or inhabitants of this or any other of the United States, for cessions, grants, or donations of land or money, for the purpose of aiding in the construction or completing of both or either of the said canals, according to the discretion of the several grantors or donors, and to take to the people of this State such grants and conveyances as may be proper and competent to vest a good and sufficient title in the said people to the lands so to be ceded or granted as aforesaid; and, for the purposes above mentioned, it shall be the duty of the said commissioners to open books of subscription in such and so many places as they may think necessary and expedient, and under such rules and regulations as they may from time to time establish; and further, it shall be their duty to ascertain whether, to any and to what amount, and upon what terms, loans of money may or can be procured, on the credit of this State, for the purposes aforesaid.

5. *And be it further enacted*, That it shall be the duty of the said commissioners to make, or cause to be made, with as much accuracy and minuteness as may be, calculations and estimates of the sum or sums of money which may or will be necessary for completing each of the said canals, according to the plan or plans which may be adopted and recommended by them for the construction or formation of the same, and to cause the said calculations and estimates, and all surveys, maps, field-books, plans, draughts, and models authorized and directed by this act, or so many thereof as may be completed, together with a plain and comprehensive report of all their proceedings under and by virtue of this act, to be presented to the Legislature of this State within twenty days after the commencement of the next regular annual session thereof.

6. *And be it further enacted*, That the treasurer shall, on the warrant of the comptroller, pay to the order of a majority of the said commissioners, out of any moneys in the treasury not otherwise appropriated, any sum or sums not exceeding twenty thousand dollars, and for which the said commissioners shall account to the comptroller of this State.

7. *And be it further enacted*, That the act entitled "An act to provide for the improvement of the internal navigation of this State," passed the 8th day of April, 1811, and the act entitled "An act further to provide for the improvement of the internal navigation of this State," passed June 19, 1812, be, and the same are hereby, repealed.

STATE OF NEW YORK, SECRETARY'S OFFICE, ALBANY, *November* 13, 1816.

I certify the preceding to be a true copy of an original act of the Legislature of this State on file in this office.

R. TILLOTSON, *Secretary of State.*

14th CONGRESS.] No. 413. [2d SESSION.

ROAD THROUGH THE CHICKASAW NATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 11TH DECEMBER, 1816.

SIR: DEPARTMENT OF WAR, *December* 5, 1816.

In pursuance of the resolution of the House of Representatives of the 4th instant, I have the honor to transmit the report of the commissioners appointed to mark and survey a road from Reynoldsburg, on the Tennessee river, through the Chickasaw nation. No expenses in relation to this road were to be paid by this Department, except the compensation of the commissioners, who were to be allowed six dollars per day whilst employed on this service.

As no claim has been presented to this Department by the commissioners on account of their services, nothing has as yet been paid.

I have the honor to be, with great respect, sir, your obedient servant,

GEORGE GRAHAM, *Acting Secretary of War.*

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

SIR: REYNOLDSBURG, TENNESSEE, *May* 15, 1816.

In obedience to a commission we had the honor to receive from your excellency, dated the 28th of December last, appointing us to view and survey a road from Reynoldsburg, on Tennessee river, to intersect the Natchez road at some point in the Chickasaw nation, in conformity to a treaty made for that purpose with the Chickasaw nation of Indians, dated the 5th day of August, 1815, we, in company with James Brown and Chigcuttaha, commissioners appointed on the part of the Chickasaw nation, have performed that duty.

The enclosed plat of the road will show the different bearings and watercourses. We have caused the road to be run generally on high dry ground; have opened a bridgeway, caused it to be measured, and the miletrees regularly numbered. The road is level and well watered; but little causewaying and bridging will be necessary to make it as good a road as any in the western country.

We intersected the Natchez road near the south end of the Chickasaw Old Town, distance from Reynoldsburg one hundred and twenty-nine miles. In surveying this road we passed through a rich and fertile country, particularly the waters of the Mississippi and Mobile. The road at present is uninhabited, except twenty-four miles at the south end; the fertility and situation of the country will admit of a number of good settlements on the road for the accommodation of travellers; some of those stands are already marked by the Indians, who intend settling immediately. The advantages arising from this road to the citizens of the western part of Tennessee, Kentucky, Ohio, and the Territories, are obvious; it ought to be opened as soon as practicable.

As Congress is about voting an annual fund for the purposes of internal improvements, we are of opinion none could be better bestowed than the sum necessary to complete this road, as a number of the citizens of the United States are so much interested. We are of opinion that the sum of $2,600 will be sufficient to make it a good road without any further expenses to Government; and we believe that if the General Government authorizes the opening, it will be done with promptness; but should it be left to the Legislature of Tennessee, their first session will not be before September, 1817, and, as other States and Territories are equally interested with Tennessee, the appropriation to the amount necessary is doubtful.

We have the honor to be your excellency's obedient servants,

THOMAS JOHNSON,
MICHAEL DICKSON.

The Hon. WM. H. CRAWFORD, *Secretary of War.*

14th CONGRESS.] No. 414. [2d SESSION.

NATIONAL UNIVERSITY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 11, 1816.

Mr. WILDE made the following report:

The committee of the House of Representatives, to whom was referred so much of the President's message as relates to the subject of a national university, report to the House, as the result of their deliberations, a bill for the erection and endowment of such an institution:

The committee, pursuant to usual forms, might perhaps, without impropriety, regard this as a sufficient performance of their duty, and, after presenting the bill without comment, have left it to find its appropriate place among others, and to receive or be denied consideration, according to the opinion entertained of its consequence and urgency. But the number of communications relative to the subject, which, though they have received attention, seem to have escaped it because they have not been definitively acted on, may possibly expose the House to a censure more serious than that of merely neglecting the successive recommendations of several Chief Magistrates—a censure as injurious as unjust, yet not unbecoming that body to prevent, by making as soon as possible some disposition of a question that ought to be determined on account of its frequent occurrence, even though it should not otherwise be thought particularly interesting.

No room will be then afforded for even supposing the National Legislature indifferent to an object admitted by most persons to be desirable, and by many believed to be now both practicable and expedient. Justice will be done to the representatives of the people, without detracting any thing from executive merit; that confidence which is the chief strength of our Government will be preserved, and public opinion, enlightened by discussion, expressing itself at length decisively on the proposed measure, will either require its adoption, sanction its rejection, or acquiesce in its postponement, until the necessity becomes more obvious, or the difficulties that oppose it can be more easily removed.

Your committee, therefore, have ventured to suggest some of the reasons which recommend the present as a favorable time for investigating, and perhaps also for adopting, the plan they have proposed.

Among these, the prosperous state of our finances, leaving a large unappropriated surplus, the probability of a long continued peace, the flourishing condition of our capital, and the facility with which a portion of the public property within it might now be advantageously disposed of, so as at once to increase the convenience of the city and support the proposed institution, may fairly be enumerated.

Besides, the information heretofore collected has enabled the committee to report at an early period, and it is believed that the present session (though inevitably a short one) will not present so many objects of great difficulty or deep interest as entirely to exclude others of a more tranquil and less obtrusive character, to which it is possible a portion of time might be profitably devoted.

The acquisition of a scientific and literary reputation, not unworthy of their naval and military renown, can never be beneath the ambition of a people, since the most durable of all glory is that of exalted intellect. The world is still a willing captive to the spells of ancient genius; and the rivalry of modern empires will be perpetuated by their arts and their learning, the preservers of that fame which arms alone may indeed win, but can never keep. Any

measure which contributes, however remotely, to give American literature a rank and a name among mankind, cannot therefore be regarded with indifference by our citizens; and every effort towards that end must be witnessed at the present moment with unusual satisfaction, since it will present the interesting spectacle of a young nation bending its whole strength to the pursuit of true greatness, and anxious to emulate all that is amiable in peace as well as all that is noble in war. That the institution contemplated will have a happy influence on the harmony of our country and the unity of our national character, has been often supposed, and your committee feel inclined to anticipate effects no less happy from its operation on the genius of our people. If American invention, unassisted as it has been, already excites the astonishment of Europe, what may not be expected from it when aided and encouraged? And why should not aid and encouragement be yielded by institutions like the present, founded and endowed by the munificence of the state? In our own day we have seen them work wonders in physical science, even when directed by a stern, jealous, and exacting Government, which, while training the mind to be quick, dexterous, and daring, darkened its vision and circumscribed its flight. Is it here alone they would be impotent, where no depth could be hidden from its glance, no height forbidden to its wing? But your committee, fearful of exhausting your patience, forbear to extend this report by arguments which it is easier to multiply than to withhold; for the same reason they refrain from answering objections which could not be stated without injury, since, in replying to them, force and perspicuity must be sacrificed to conciseness. Nor can such a course be required where it is intended merely to present a general result, not the particular process of reasoning by which that result has been obtained. Your committee, however, desire it to be understood that they have not declined examining any objection which occurred to them, and, though some have been found which it must be confessed are not without difficulty, all are thought capable of a satisfactory answer.

Under a conviction, therefore, that the means are ample, the end desirable, the object fairly within the legislative powers of Congress, and the time a favorable one, your committee recommend the establishment of a national university, and have directed their chairman to submit a bill and estimates for that purpose.

Estimate of the value of lots and squares belonging to the United States, as furnished by communications from the superintendent of the city.

Four thousand building lots of 5,265 square feet each, and about 2,000 feet front on the waters of the Potomac river, (Eastern branch) valued at - - - -	$750,000
Squares 1 to 6 proposed to be laid off into building lots, containing in the whole 816,000 square feet, or 155 standard lots, valued at - - - - -	200,000

But the latter amount is the only one which it is supposed could be speedily realized.

Estimate of the expense of buildings for the National University, on a plan susceptible of extension, but calculated for the present to answer for 160 *persons.*

1. Habitations for the principal and six professors, two buildings 75 by 54 feet, $30,000 each, -	$60,000
2. Lodgings for 160 students, refectory, (temporarily in the basement story,) fuel and provision, cellars, and servants' apartments, 265 by 46 feet, - - - -	75,000
3. Lecture rooms at the southwest angle, steward's apartment, &c., 75 feet square, -	45,000
4. Planting and enclosing, - - - - - -	20,000
	$200,000

14th CONGRESS.] No. 415. [2d SESSION.

COMPENSATION OF MEMBERS OF CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 18TH DECEMBER, 1816.

Mr. JOHNSON, of Kentucky, made the following report:

The committee to whom was referred the consideration of the expediency of repealing or modifying the law passed at the last session relative to the compensation of members of Congress ask leave to report.

The power vested in Congress by the constitution of providing for the pay of its own members is doubtless a delicate trust, and it might have been apprehended, as well from the nature of the subject, as from former experience, that the most judicious exercise of that trust would not be exempt from some degree of public animadversion. The committee, however, cannot perceive, either in the increase of compensation provided by the late act, or in the mode of making that compensation, cause of excitement or alarm adequate to the effects which are understood to have been produced. The addition which this law has made to the public expenditure is not considerable, and, if it had been created by other measures of Government, would not probably, of itself, have been thought worthy of great attention. And the change in the mode of compensation, even if it be not attended with real and manifest advantages, does not still appear to be wrong so clearly and in such dangerous measures as to furnish grounds for any high degree of public inquietude. The committee, therefore, cannot but be of opinion that the law in question has not been considered without some mixture of misapprehension of its principles and objects, and that a more accurate knowledge of its

provisions, and more mature reflection on its design and tendency, if they should not end in a conviction of its usefulness, would yet result in a different and far more moderate estimate of its probable evils. It would not become the committee to claim any infallibility for the body of which they are members, nor to take it for granted that every law which it may pass must necessarily be a wise and wholesome act of legislation. Human errors and imperfections find their way into all bodies; and there is, doubtless, existing in the judgment of the community a power under whose revision this and other acts of Government must and ought to pass. If, however, on a review of this subject, the House should still be of opinion that the law in question, or some equivalent provision, has become essentially necessary for the useful exercise of the powers of Government, and for the safety, security, and honor of the people themselves, its members may still hope that in not hastily departing from it they will be justified by the enlightened sense and generous sentiments of the nation. The abandonment of a measure, which, according to their most conscientious conviction, is intimately connected with the general good, would be no mode of obtaining favor with the American people.

If, in passing the law in question, the House of Representatives discharged any portion of its duty, it acted upon general and public principles, with an entire disregard to the convenience of its own members any further than their convenience was supposed to be connected with the public service. It treated the question, not as one between themselves and the public, but as exclusively of public and national concern. It regarded it as a subject of general policy by which the nation, and the nation only, was to be affected; as much so as any other act of legislation whatever. Any imputation so gross as to impeach its conduct in this essential particular, a feeling of self-respect must compel the House to pass over in silence, and its members must rely on their known character as members of the Government, and as citizens of the community, to disprove it. The House would not presume to judge whether its services, in the various and important matters upon which it has acted, have deserved any consideration or respect from the public; but for those services, such as they are, it has not sought nor would accept any reward which could be measured out to it in a mere pecuniary compensation. And while the members of the House would certainly not think of claiming any merit for passing the law in question, any more than for the discharge of what they thought their duty in any other case, the committee do not see that they have any cause for taking humiliation upon themselves on account of having passed an act which they believed would be essentially useful to the country, but which they must have foreseen would be exposed itself, and might expose its authors, to misapprehension and misrepresentation of all sorts. Holding offices in the immediate gift of the people, of short duration, and at a time when the people were soon to exercise, in most districts, their accustomed privilege of a new election, if these offices had been objects of their regard, and if they had permitted personal considerations to influence their conduct, it is obvious that all such considerations pointed to a course different from that which they pursued. They must have known that no measure could be more easily misconstrued and perverted to the purposes of obloquy and reproach. The committee cannot yet believe that a faithful discharge of duty, in the face of these probable consequences, is to be reckoned among dangerous political errors.

At the commencement of this Government it was, of course, among its first measures to fix by law, agreeably to the requisition of the constitution, the pay of members of Congress. In the old Congress, under the confederation, the members were paid, not out of the national treasury, but by the States which they represented. The rates of compensation were different in different States. Some States paid to their delegates eight dollars a day; others six; others less; and one State, at least, paid them by an annual provision of six hundred pounds sterling. It was natural to recur to these precedents when the subject was taken up by the first Congress under this constitution. Taking, as a just and obvious standard by which to regulate the amount of compensation, the average of the rates which had been paid by the different States to their delegates in the old Congress, it was found that such average amounted to somewhat more than six dollars a day. The compensation was accordingly fixed at six dollars a day by the law of 1789.

As it was foreseen that the depreciation of money or the increased expense of living might render this provision inadequate, the law was limited in its duration, in order that it might be considered and altered, if necessary, at a future period. The subject was again brought before Congress in 1796, by the expiration of the former law. On this occasion, as the committee have learned, (and, indeed, as some of them remember,) there was much diversity of opinion in the House of Representatives. Some members wished them to change the mode from a daily sum to an annual allowance. Others preferred to retain the existing mode, but to increase the sum; and a committee of the House reported in favor of increasing the daily pay to eight dollars, assigning for reason a proportionate increase in the price of all commodities and the expense of living since the passage of the first act. Those who opposed this augmentation admitted it would be reasonable if the price of commodities and the expense of living should keep up; but they hoped the rise would be temporary, and that money would soon resume, in relation to the expense of living, its former value. The proposition to increase the pay was lost by one or two votes only, and a law passed establishing the former rate.

The state of things existing in the Government and in the country from 1796 to the close of the late war furnishes obvious reasons to account for the circumstance that during that period no attempt was made to raise the pay of members of Congress. In the mean time, the seat of Government had been transferred to the city of Washington; and the expense of living, instead of returning to its former rate, as was expected by some, has gone on increasing progressively, until money, in relation to the means of life, does not retain more than half its former value. In other words, if six dollars a day was no more than a reasonable provision in the cities of Philadelphia and New York eight-and-twenty years ago, twelve dollars would not be more than a reasonable and equal provision in the city of Washington at the present time. Forty years ago, as has been stated above, some of the States paid their delegates in Congress eight dollars a day; and yet it never was supposed, during the Revolution or afterwards, that the people of the United States had made unreasonable or exorbitant provision for their public agents. But unless the early history of the country was marked by great extravagance in this particular, the rate of six dollars a day, fixed by law of the first Congress, was no more than a moderate and necessary allowance at that time, because it was no more than the average of what all the States had found it necessary to pay to their respective delegates during the Revolution.

The only question then is, whether there has been, in truth, such a change in the country in the value of money and the expense of living as to render that provision, which was no more than sufficient in 1789, insufficient in 1816. It is a truth, plain to all whose experience or information enables them to judge, that so great has been the change in the foregoing particulars which eight-and-twenty years have produced, that it is not incorrect to estimate the expenditures necessarily attached to a seat in Congress at twice their former amount. This change has not been confined to the condition of members of Congress. It has extended all over the country, and as well the National Government as every State Government has been obliged to provide for it in a proportionate increase in the salaries of its public officers.

The statute book of this Government exhibits a constant and progressive increase of compensation in all the departments of Government, with the exception of the Legislature and the Supreme Judiciary. On the recom-

mendation of the Executive, or its branches, the Legislature has repeatedly augmented the provisions for that Department, patiently raising the pay of clerks and of writers far above that of its own members, without agitating either itself or the country with any question about its own compensation. From the heads of Departments to the lowest clerkships in the public offices, a general augmentation has obtained throughout. A long enumeration of instances is not necessary; one may suffice. When members of Congress were first paid six dollars a day, the salary of the Attorney General was $1,500 a year. This salary has since been increased to $3,000; and the Executive has, at the present session, found it necessary to recommend a still further increase, as essential to the public service. If the duties of that officer have increased, so have the duties of members of Congress, in at least an equal proportion; and which of the two stations requires the greatest sacrifice of private pursuits may be easily discerned.

At the time of passing the late act it was found, upon inquiry, that, from the organization of the Government to the commencement of the thirteenth Congress, (1813,) Congress had, on an average of all the years, been in session one hundred and fifty-nine days in a year. For eight years, ending with the thirteenth Congress, (1815,) it had been in session, on an average, one hundred and sixty-five days in each year. An easy computation will show that, supposing Congress to sit hereafter as many days within the year as it has usually done heretofore, the present amount of compensation, including travel and attendance, will exceed the amount received for travel and attendance under the former law thirty-eight per centum. After the lapse of eight-and-twenty years, then, Congress has for the first time increased the pay of its members. It has increased it about one-third, and no more; although, within the same period, it has been called upon to raise, and has raised, the compensation of nearly all other officers of Government in a far greater proportion.

This enhancement of other compensations is not adverted to for the purpose of showing that Congress has been as favorable to others as itself, or that it has made itself the latest object of its own bounty. In neither case has it supposed itself to be bestowing bounty, or conferring favor. It has sought only to make such provisions as the public interest demanded. But the circumstance is referred to as furnishing evidence of the necessity of the late law, by showing that a similar necessity had been found to exist in other cases; and that, by that law, Congress had done nothing for its own members which executive recommendation, and its own opinion of propriety, with the general concurrence of public sentiment, had not compelled it to do, at an earlier period, and in ampler measure, for other officers of Government.

The State Legislatures, from the same necessity of complying with the change of circumstances, have made corresponding changes in the salaries of the officers of their Governments; and it may not be inapplicable to recent occurrences to remark that the members of these Legislatures have, in almost every State, increased, in many doubled, in some trebled their own pay during the period in which the compensation to members of Congress has remained at its original rate. As far, also, as the committee can learn, this increase of pay to members of State Legislatures has, in most instances, taken place in the same session in which it was voted.

Objections have been made to the manner of compensation introduced by the law of the last session. It has been said to have created salaries. If by this it is intended that the law allows to every member a defined and certain sum, without any deduction for absence or omission of duty, it is not a correct representation. Such deductions are provided for by the law as completely as under the former mode. It has already been observed that a difference of opinion has long existed on this point; and it still exists. When the law of 1796 was passed, there were those who thought it advisable to change the mode then in practice, and to adopt the example of an annual allowance, which had been formerly set by a very respectable State. There have been, and still are, those who are not without fear that an augmentation of the daily pay, if it should not in fact tend, in some cases, to the protraction of the session, might produce an evil of equal magnitude, by subjecting the Legislature to such an imputation.

Nor is it at all true that the inconvenience of attending a session of Congress is always in proportion to its length. The season of the year in which the session is holden may be as material as its duration. The length of the journey to the seat of Government is the same in both cases, and both cases require an entire breaking off of all private engagements, and an exclusive devotion to public business. It may be added, also, that, while compensation was computed by the day, as the sessions would naturally be longest in times of war, the greatest expense would fall on the treasury, when it could bear it with the least convenience. Thinking, however, that the measure of augmenting the compensation was itself a necessary one, and that the form, if not the best, was a fair subject of experiment, the House did not forbear to adopt it from difference of opinion in regard to the manner. It passed the law in its present form, in the hope that good would result from the change of mode, and with the knowledge that, if such should not be the consequence, the former mode could be easily and at any time again adopted.

There now remain some other topics connected with this subject which the committee would submit to the consideration of the House.

Of all the powers with which the people have invested the Government, that of legislation is, undoubtedly, the chief. In addition to its own important ordinary duties, the Legislature is the only power which can create other powers. Departments with all their duties, and offices with all their emoluments, can emanate from the Legislature alone. Over the most numerous branch of the Legislature, therefore, the people have retained the power of frequent election; and with this branch alone they have trusted the original exercise of the right of taxation. The members of the House of Representatives are the special delegates and agents of the people in this high trust. They, and they alone, proceed immediately from the suffrage of the people; they, and they alone, can touch the mainspring of the public prosperity. They are elected to be the guardians of the public rights and liberties. Can the people then have any greater or clearer interest than that the seats of these their representatives should be honorable and independent stations, in order that they may have the power of filling them with able and independent men? Is it according to the principles of our Government that the legislative office should sink in character and importance below any office, even the highest, in the gift of the Executive? Or can any thing be more unpropitious to the success of a free representative Government than that the representatives of the people should estimate any thing higher than their own seats, or should find inducements to look to any other favor than the favor of their constituents?

It would be a most unnatural state of things in a republic if the people should place greater reliance anywhere else than in their own immediate representatives; or if, on the other hand, representatives should revolve round any other centre than the interests of their constituents. Through their representatives the direct influence and control of the people can alone be felt. In them the rays of their power are collected; and there can be no better criterion by which to judge of the real influence of the people in the Government, than by the degree of respectability and importance attached to the representative character. Evil, indeed, to the republic will that time be, should it ever arrive, when representatives in Congress, instead of being agents of the people to exercise an influence in Government, shall become instruments of Government to influence the people.

It is probably the necessary tendency of government that patronage and influence should accumulate wherever the executive power is deposited, and this accumulation may be expected to increase with the progress of the Government and the increasing wealth of the nation. To guard, as far as possible, against the effect of this on the Legislature, the constitution has prohibited members of Congress from holding, while members, any office under

executive appointment. But it has not restrained them from resigning their seats to accept such appointments, nor from accepting them after their term of service has expired; nor has it prohibited the grant of such offices to their relations, connexions, or dependants. There are hundreds of offices in the gift of the Executive, which, as far as pecuniary emolument is concerned, are preferable to seats in Congress. Indeed, there are none, except of the very lowest class, which in that respect are not preferable.

Is it for the interest of the people that their representatives should be placed in this condition? Is it expedient that better service should be commanded for any other department than for the hall of legislation? Or admitting that offices of high trust and responsibility in the State—such as will be commonly regarded less from motives of pecuniary emolument than from the love of honorable distinction and devotion to the public service—should possess more attractions than the legislative office; is it still fit or expedient that subordinate places in Government, such as have no recommendation but the salaries and perquisites belonging to them, should have the same influence? And yet not only is it well known that persons at every election decline being candidates for the Legislature, but the Government has not been without instances in which members of either House have relinquished their seats in the Congress of the United States to accept offices of a very low grade. Can the public interest require the establishment of a habit of filling such places by candidates taken from the legislative body? Or what is the value to the people of the right of representation if they have nothing to give which their representatives will not relinquish for even the smaller appointments of the executive power? It cannot but tend more, one would think, to the permanent safety of the republic that no such hopes or motives should exist; that there should be no inducements of this nature either to an unfaithful and compliant discharge of official duty, or to a more indirect but not less pernicious exercise of the influence of a public character and a public station.

The geographical extent of the United States furnishes a case out of all analogy with any thing which has heretofore existed either in any State Government or the Government of any other country. There are members of Congress who reside more than a thousand miles from the seat of Government. A great proportion live at more than half that distance. If these members are accompanied by their families to a session of Congress, even the present compensation, with the strictest economy, does not defray their expenses. To live within the means provided for them, they must come as exiles from their own homes; they must abandon not only all private pursuits, but the enjoyment of all domestic relations, and live like strangers and temporary lodgers in the metropolis of their own country. How far it is wise in Government to demand of those who enter its service this sacrifice of all social feelings, those who have the deepest knowledge of our nature are most competent to judge. It is a sacrifice which will not ordinarily and for any length of time be made by such as have the dearest and strongest ties to their country, and the greatest possible stake in its prosperity.

One further observation is obvious. If an adequate provision be not made for members of Congress, the office will fall exclusively into the hands of one or the other of two descriptions of persons: either of the most affluent of the country only, who can bear the charges of it without any compensation, or of those who would accept it, not for the compensation legally belonging to it, but from the hope of turning it to account by other means. A reasonable allowance, neither extravagant on the one hand nor parsimonious on the other, would seem to be the best security against these various evils. Influenced by these considerations, Congress was at the last session of opinion that the compensation to members had become inadequate. The committee are still of the same opinion. In many cases it was not equal to the expense incurred by individuals in their attendance on the Legislature; and in all cases it must be presumed that the labor and intelligence bestowed on the discharge of his official duties by an able and faithful member of Congress could not but yield a much more profitable result if employed in private pursuits.

If the view which the committee have taken of this subject be not altogether an erroneous one; if great changes in relation to the value of money and the price of living have taken place in the country; if it has been found necessary to provide for this change by an increase of the compensation of other officers throughout the General and State Governments; and, more than all, if it be desirable to maintain the constitutional importance of the legislative office; to open to the people a wide field for the selection of representatives; to put at their command the best talents in their respective districts; and to enable them to retain the services of those whose knowledge and experience have best fitted them to promote their interests and maintain their rights, then the object of the law in question was not only a useful but a highly important and commendable object.

In regard to the mode of accomplishing that object, it has not been, and is not, easy to reconcile opinions. On the whole, the committee are of opinion that, under all the circumstances, it is advisable to provide that the increase of pay should be made in the form of an addition to the former daily allowance. They therefore recommend that, in lieu of all other compensations, there be paid to members of Congress and delegates of Territories —— dollars per day for their actual attendance, and —— dollars for every twenty miles' travel to and from the seat of Government; and they report a bill for that purpose.

14th Congress.] No. 416. [2d Session.

ADMISSION OF MISSISSIPPI INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 23D OF DECEMBER, 1816.

Mr. LATTIMORE made the following report:

The committee to whom was referred, on the 9th instant, the memorial of the Legislative Council and House of Representatives of the Mississippi Territory, praying for the admission of said Territory into the Union as an independent State, with its present limits, respectfully submit the following report:

The Mississippi Territory contains, according to a census lately taken under an act of the Legislature, and furnished by the Secretary of said Territory, 75,512 souls; of whom 45,085 are free white persons, 366 free people of color, and 30,061 slaves. By the articles of agreement between the United States and the State of Georgia, it is stipulated that this Territory shall be admitted into the Union as a State when it shall contain sixty thousand free inhabitants, or at an earlier period if Congress shall deem it expedient. Hence it appears that its admission at this time depends, not upon the claim derived from the above-mentioned agreement with Georgia, but upon a liberal policy on the part of the United States. It would seem to be superfluous in your committee to recommend that considerations of a deficiency of numbers be waived in this case, seeing that the House of Representatives have passed three bills, at different periods, for the admission of this Territory, when its population was much smaller than it is at this time.

But it becomes a question, whether the object of the memorialists can be ultimately attained, or ought to be attained, in the way in which it is asked. It will be readily perceived that your committee allude to the objection to the extent of the Territory in question, which the memorialists pray may be embraced within the limits of a single State. Whether such a measure might, in any possible contingency, affect the general interest of the Union, it is possible that a difference of sentiment may exist. Your committee presume that it is not required of them to discuss this question, as it is one on which every member of the House will form an opinion for himself. They will, however, beg leave barely to remark, that they cannot believe a State of such unprecedented magnitude as the one contemplated by the memorialists can be desirable to any section of the United States. In relation to the interest of the Territory itself, it may be more within the province of your committee to give their opinion, with the facts upon which it is formed.

It is deemed unnecessary to calculate how many square miles, or how many millions of acres, the Mississippi Territory contains, as its size is sufficiently apparent from a mere glance at the map. But there are other circumstances of a local nature which are not so obvious to the House, and which, therefore, the committee will proceed to state.

There are in this Territory three principal settlements, which lie, as to their relative positions, somewhat in a triangular form, viz: one, immediately below the thirty-fifth degree of latitude, on the Tennessee river; another, immediately above the thirty-first degree, on the Mississippi; and the other, also immediately above the thirty-first degree, on the Mobile. From the settlement on the Tennessee to that on the Mississippi, the distance is about four hundred miles, all of which is a wilderness, excepting so far as it is settled by the Chickasaw and Choctaw Indians, by whom these immense regions are claimed. From the settlement on the Mississippi to that on the Mobile, the distance is nearly three hundred miles. Here the Indian claim is extinguished; but the intermediate settlements from Pearl river, eastwardly, are insulated and of small extent. From the settlement on the Mobile to that on the Tennessee, the distance is about three hundred miles also; and here, too, the Indian claims are now extinguished to the whole of this extensive and interesting tract of country, which will, no doubt, soon exhibit a flourishing settlement, extending from the Tennessee river to the Gulf of Mexico. Between the Tennessee and the Mississippi settlements, and between the Mississippi and the Mobile settlements, there is not, and probably never will be, any commercial intercourse whatever; but between the Mobile and the Tennessee settlements, such an intercourse cannot fail to take place when the intervening country shall be settled, and its fine navigable streams explored and improved.

The whole Mississippi Territory formed into a single State would not only be very inconvenient to a vast majority of those of its inhabitants whose duty or interest might call them to the seat of Government, but would also prove, in the opinion of your committee, too extensive for its Executive to suppress internal disorders in all parts, and repel external invasions at all points, with necessary promptness, energy, and effect. But another objection to an entire admission of the Territory arises from the want of a continuity of settlement and a reciprocity of interest between its distant parts. The former of these defects might, perhaps, be merely inconvenient; but the latter could not fail to be a permanent source of real evil to the legislative councils of the country, and, of consequence, to the community at large. Your committee need not express their apprehensions in detail, as the House will readily conceive how naturally jealousies would arise, and collisions ensue, amongst the representatives of a people inhabiting different regions, having distinct local interests, and entertaining opposite views. There is much cause to fear that, in such a state of things, sectional feelings would prevail over principles of justice, and local policy over the general good.

From the above view of the subject, your committee are of opinion that the Mississippi Territory should be divided by a north and south line, for the purpose of erecting the same into two separate and independent States. In proposing this measure, they feel no little reluctance in doing it, in opposition to the wishes of a great portion of the people of the Territory; and this reluctance would be more difficult to overcome, but for the consideration that there is, on the other hand, a great portion also of the same people who are in favor of the measure proposed. This is, probably, a question on which these people would never agree amongst themselves; and hence the necessity of the parental interposition of the General Government to decide it for them in such a way as may be best adapted to their local interests, and not incompatible with the interest of the United States. But, in recommending a division of this Territory, your committee beg leave to suggest such a plan of division as will not probably retard the admission of either part beyond the period at which its inhabitants would be entitled to a State Government, in virtue of the agreement between the United States and the State of Georgia.

As there is already west of the line of division which will be proposed a population that would be entitled to one representative in Congress, on the federal principle of representation, and according to the present apportionment, your committee respectfully recommend the immediate admission of this western part of the Territory, and the establishment of a separate Territorial Government for the eastern part, until it also may be entitled, on the same principle, to the rights of a State.

With respect to the line of division, it is natural that the citizens of the Territory should, according to their respective local situations, entertain a variety of conflicting opinions, and cherish a diversity of opposite hopes. It was a question of some difficulty with your committee; and their decision is the result of a disposition to do equal justice to the present inhabitants, to provide for the convenience of future settlers, and to promote the interest of the whole. The line which the committee propose for the consideration of the House is designated in the two bills which they have prepared for the purposes herein recommended, and which they ask leave to report.

14th Congress.] No. 417. [2d Session.

CONTESTED ELECTION OF JOHN SCOTT, DELEGATE FROM MISSOURI.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 31, 1816.

Mr. Taylor, of New York, made the following report:

The Committee of Elections, to whom was referred the petition of Rufus Easton, contesting the election of John Scott, who is returned as the delegate from the Territory of Missouri, and praying to be admitted to a seat in his stead, have had the same under consideration, and report:

That, at the last election in said Territory, the petitioner and the said John Scott were opposing candidates. The whole number of votes counted, cast up, and arranged by William Clarke, Governor of the Territory, as having been given at the said election for delegate to Congress, and upon which his certificate was founded, was 3,647, of which 1,816 were given for John Scott, and 1,801 for the petitioner, and 30 for other persons.

The petitioner stated the following objections in writing to the election and return of John Scott as delegate from said Territory:

1st. That, according to all the votes given at the election on the first Monday in August, 1816, counting those legally returned and such as were not returned within the times prescribed by law, or were rejected, he has a majority of fifteen votes over his opponent, John Scott. To prove which, he refers the honorable Committee of Elections to the abstract of votes returned to the Governor, according to the act to regulate elections in that Territory, (being document marked B,) and to the depositions of S. A. M. Carter, Andrew Kinkaid, Clement B. Penrose, and John Cunningham.

2d. That, according to the abstract of votes legally and illegally made to the Governor, the said Rufus Easton has a majority of seven votes over the said John Scott, considering the copy of the paper from Coté-sans-Dessein, in the county of St. Charles, certified by the clerk of that county to be a true copy, on the 18th September, 1816, more than a month after the abstract of votes from that county had been filed in the Executive office, not to be an abstract of votes, but a nullity, as it certainly is; to prove which, the honorable Committee of Elections are referred to the seventh section of the act of the Territory entitled "An act to regulate elections," which provides "that, previous to any votes being received, the judges and clerks shall severally take an oath or affirmation" in the form therein prescribed. The deposition of Isaac Best, one of the persons who pretended to act as judge, proves that "one Baptist Roy was the only person who acted with him as judge, and that a person of the name of Frereault acted as clerk, and no other; and that neither of the judges nor the clerk was sworn." The act requires that there should be three judges and two clerks to hold an election; "that the poll shall be opened at eight o'clock in the forenoon, and closed at six in the afternoon; that the persons who shall administer the oaths shall cause an

entry thereof to be prefixed to the poll-books in words to the following effect: I do hereby certify that ——— judges and ——— clerks of the election, held in the township of ———, in the county of ———, on the ——— day of ———, in the year one thousand eight hundred and ———, were severally sworn as the law directs previously to entering on the duties of their office; which certificate shall be subscribed by the person administering the said oaths or affirmations, and be considered as a part of the record of the said elections." The act further requires that each clerk shall furnish himself a poll-book of the election; and, at the close of the polls, the names of the electors contained upon the poll-book shall be counted and set down in writing at the foot of the column in which they are entered, and the number of votes cast up and arranged, and set down in writing at the foot of the poll-book, and shall be signed by the judges, and countersigned by the clerks, &c. And, further, that the electors shall vote *by ballot*, (see sections 4, 5, 6, 7, 8, 9, 10, and 13 of the act to regulate elections.) None of these requisites were complied with at Coté-sans-Dessein; which is not only proven by the return of the persons pretending to hold an election there, but by the deposition of Joseph Roy, that "two persons acted as judges, and another person did the writing; that the polls were opened at 11 A. M. and closed at 2 P. M.; that one Charles Relle refused to vote for any person, but was forced to do so by the judges, who sent a paper to bring him before them." The depositions of François Denoyer and Joseph Morin prove that the judges put on the list the names of persons as voting for Mr. Scott who did not vote, and who were not in the township on the day of the election: and the depositions of Peter Powell and Asa Williams prove "that George Evans, *alias* Avans, and Jesse Avans, whose names appear on the list as voting for Mr. Scott, had not been in the Territory eight months prior to the day of election; and that the votes were given by word of mouth." The act of Congress requires a residence of one year. By the deposition of Baptiste Pineau, it appears he was out hunting on the day of election, and yet his own, or son's name, who is about seventeen or eighteen years old, is listed as voting for Mr. Scott. Joseph Morin's deposition proves that he was absent on the day of election, that his name was listed as voting for Mr. Scott without his consent or approbation; and that the name of Joseph Rivard, *fils*, (junior,) who is only eighteen or nineteen years of age, is listed as voting for Mr. Scott.

Notwithstanding all the defects apparent upon the face of the paper relating to the election at Coté-sans-Dessein, and although the same had been rejected by a majority of the justices and clerk of the court, authorized by the fifteenth section of the before-mentioned act regulating elections "to make the abstract of votes for delegate to Congress, which, being signed by the judges or justices, and clerk, or any two of them, shall be deposited in the clerk's office, and a copy thereof, certified under the official seal of such clerk, shall be transmitted by express to the Governor of the Territory; and it shall be the duty of the Governor, within thirty days after the expiration of the time allowed for making county returns, to cast up and arrange the votes from the several counties, or such of them as may have made returns, for each person voted for as delegate to Congress, and shall, immediately thereafter, issue his proclamation, declaring the person having the highest number of votes to be elected as delegate to represent the Territory in the House of Representatives of the United States, and to grant a certificate thereof, under the seal of the Territory, to the person so elected:" and although the abstract of votes for delegate to Congress from the county of St. Charles had been made and sent to the Governor on the 17th day of August, 1816, after all the returns which had been made from the other counties, it appeared, according to those abstracts, that Rufus Easton had a majority of seven votes, the Governor nevertheless refused him a certificate of his election, although, according to law and common justice, he was entitled to it. The said John Scott, taking with him a certain George Ferguson and James Brady, proceeded to the county of St. Charles, and there requested of the clerk a copy of the election return of Coté-sans-Dessein. The clerk made out a copy of the paper to be found in the third page of document B, and described under "Note." "The following return was received at the Executive office (delivered by James Brady) on the 18th September," 1816; and the said John Scott requested the clerk to fold it and direct it to the Governor of the Territory: and the clerk directed it to "His Excellency William Clarke, Esq., St. Louis;" for which copy the clerk was paid by the said John Scott or his order, and the copy was taken in the night from the clerk's office by the said Ferguson or Brady; all of which facts appear by the deposition of William Christie, junior, Esq., clerk: on which paper there appears the name of Rufus Easton, with one other name under it, and the name of John Scott, with twenty-three other names under it; which paper was not, and is not, an abstract of votes, and the Governor had no power, legal authority, or right to make use of it as such.

3d. That, according to the abstract of votes certified agreeably to law, and returned to the Governor of the Territory of Missouri, according to the statute in that case provided, the said Rufus Easton has a majority of *fifty-one* votes over his opponent, John Scott, which appears from a copy of the said abstracts contained in document marked B; that in the county of Lawrence the clerk has made the abstract of votes from that county himself, sent the original to the Governor, and not a copy, which he had no authority to do; and that, no abstract of votes having been made, signed by the judges or justices, and clerk, or any two of them, deposited in the clerk's office, and a copy thereof certified under the official seal of the clerk, the Governor had no authority under the law to count the votes given in that county.

The above objections are submitted to the honorable Committee of Elections by Rufus Easton, to show that he has been arbitrarily and erroneously deprived of a right secured to him by law, in the granting of a certificate of election by the Governor of the Territory of Missouri to John Scott as the delegate of that Territory.

The said Rufus Easton wishes it understood by the honorable committee, that, by laying these objections before them, he will not be prevented or precluded at any stage of the examination from making other statements, and exhibiting other proofs and documents in support of his right.

RUFUS EASTON.

DECEMBER 19, 1816.

By the twenty-third section of the act to regulate elections in the said Territory, it is enacted, in the following words, "that at all elections to be held in pursuance of this act the electors shall vote by ballot." It was intended by the Legislature to insure to each elector the privilege of a secret vote, to enable him more independently to exercise the elective franchise. The committee know of no authority competent to compel an elector to disclose the name of the candidate for whom he voted. But without such disclosure it is in vain to inquire into the qualification of an elector with a view to purge the polls. It would become important only as it related to the conduct of the judges of the election: they are clothed with full power to examine upon oath, and adjudge every elector presenting himself to vote either qualified or disqualified; they may admit or reject him. They are liable to punishment if they knowingly receive an improper vote, or conduct themselves in any respect with partiality. The committee are of opinion that their adjudication as to the qualification or disqualification of electors under the law of the Territory should be final.

The committee, therefore, overruled so much of the objections of the petitioner as related to the qualifications of the electors, and decided that they would not investigate the same, nor inquire for whom they respectively voted. Of the 3,647 votes above mentioned, there were given in the township of Coté-sans-Dessein 23 for John Scott,

and 1 for the petitioner. The votes of this township were unanimously rejected by the committee, for a variety of causes, among which are the following:

1. The election was held *viva voce.*
2. But two persons acted as judges, and neither of them was sworn.
3. But one person acted as clerk, and he was not sworn.
4. The votes were rejected by the justices whom the clerk took to his assistance in making out the abstracts to be forwarded to the Governor. They were sent to the Governor in an irregular manner, and the paper called a "return" appeared upon its face to be defective in many important particulars.

The committee having rejected these votes, there was left a majority of seven votes in favor of the petitioner. It was then contended by the petitioner that he was entitled to the certificate of election, and ought forthwith to be admitted to a seat, instead of John Scott, for the following reasons submitted by him in writing:

"The fifteenth section of the 'Act to regulate election' in that Territory, declares 'that, on or before the fifteenth day after the day of election, or sooner in case all the returns be made, the clerk of the court of common pleas of the county, taking to his assistance two judges of the court of common pleas or justices of the peace, or one of each, shall proceed to open the several returns which have been made to his office, and make abstracts of votes in the following manner: The abstract of votes for delegate to Congress shall be on one sheet, and the abstract of votes for representatives shall be on another sheet, (separate from the sheet on which the abstract of votes for delegate is contained,) and, being signed by the judges or justices, or any two of them, shall be deposited in the clerk's office; and a copy thereof, certified under the official seal of such clerk, shall be transmitted by express to the Governor of the Territory, or to the person exercising the government thereof; and it shall be the duty of the Governor, or person exercising the government for the time being, within thirty days after the expiration of the time hereinbefore allowed for making county returns, to cast up and arrange the votes from the several counties, or such of them as may have made returns, for each person voted for as delegate to Congress, and shall immediately thereafter issue his proclamation declaring the person having the highest number of votes to be elected as delegate to represent this Territory in the House of Representatives of the United States, and to grant a certificate thereof, under the seal of the Territory, to the person so elected.' The duty enjoined upon the Governor is to cast up and arrange the votes from the several counties, or *such of them as may have made returns*, for each person voted for as a delegate to Congress, and *shall immediately* thereafter issue his proclamation declaring the person having the highest number of votes to be elected as delegate to represent the Territory in the House of Representatives of the United States, and to grant a certificate thereof, under the seal of the Territory, to the person so elected. It is not the duty of the Governor to *cast up and arrange votes* not returned to him according to the provisions of that section of the law. The votes meant or intended to be cast up are such as are contained in the abstracts made by the justices and clerk, or any two of them, from the several returns of the election from the different townships to the clerk's office of the county, as contained in the poll-books, which abstracts shall have been *deposited in the clerk's office, and a copy thereof certified under the official seal of the clerk, and transmitted by express to the Governor.* He is not empowered or required to cast up votes contained in the return made to the clerk's office, nor ought he to cast up votes contained *in a paper which is not an abstract;* indeed, he has no authority to do it. It is upon a copy of the abstracts of votes *certified under* the official seal of the clerk, and transmitted by express to the Governor within the time prescribed by law, and upon that alone, that he is called to act. He cannot make abstracts of votes himself, nor ought he to receive any made by others not authorized to make abstracts; and if he sanctions such unwarrantable acts by casting and arranging under the law the votes they are supposed to contain, he violates a law which ought rigidly to be carried into execution, and tramples upon the rights of the community.

"There can be no doubt that, by the *abstracts* sent to the Governor, Rufus Easton had the *highest number of votes.* The Governor counted for Rufus Easton 1,800 votes, and for John Scott 1,793, besides those supposed to be contained in the paper from Coté-sans-Dessein, which is rejected; it is a nullity. It was then the bounden duty of the Governor, enjoined upon him by law, sanctioned by his own signature, to have granted a certificate of election to the said Rufus Easton. This the Governor refused to do, as will appear from a notice and request served on him the 24th September last. And for this injury what is the remedy? It is not to be found in the Territorial Government, where public opinion has scarcely any influence upon a Territorial Governor.

"There is a maxim founded on the principles of universal justice, that 'there is no wrong without a remedy, and no right but what may be enforced.' From my own experience in life, I am inclined to believe the maxim would be much more correct and true if it should read *there should be no wrong* without a remedy, and no right but what *ought to be enforced.* And how is this wrong to be righted, and the remedy enforced, but by making the person entitled to the certificate of election the sitting member? I have been told that it is the parliamentary practice of Great Britain, that when a person has been wrongfully returned, the person who ought to have been returned is entitled to become the sitting member, and leave it to the opposite party to contest. The distinction is a plain one. In cases where the person returned comes rightfully by the certificate of election, there he ought to keep his seat till it is shown that he is not entitled to it; but where the person comes wrongfully by the certificate, in such cases he is not entitled to it; it is the property of another, the seat belongs to another, and that other ought not to be kept out of it upon a mere supposition. The parliamentary rule of practice of Great Britain would have very little weight or influence with me should I be called upon to decide, except when founded on the immutable principles of justice. But if I am correct as to what their practice is in this particular, it is the practice of right, and so far it ought be regarded as a practice fit to be adopted into a republican Government. I would listen to the rules and practice of Great Britain, and adopt them if just and reasonable, and reject whatever might be the offspring of injustice and oppression.

"The present case is perhaps a *novel* one—a case without a parallel and without a precedent. It is not a case like that of Isaac Williams and Isaac Williams, junior, or Charles Turner and Charles Turner, junior. In these two cases the decision of the question of fact as to the votes being given for one and the same person decided the whole contest; and had the question there been made, Who ought to have been returned? the result would have been the same. The question, Who ought to be the sitting member? could not be decided without determining in the same instant who was entitled to the seat. And in the case of Kelly and Harris it does not appear from the record of proceedings that the point was made.

"The case under consideration is altogether of a different character. It is *a territorial case*, not likely to occur or happen under any Government where public opinion has its proper influence, which will always correct the evil and enforce the remedy.

"The question here, Who ought to have been returned? is a separate and distinct question—one that can be decided without determining or touching the main question. It is one which will as nearly as can be expected give the remedy. It is a question, if the returning officer erred, What ought the House of Representatives to do? Will not the immediate representatives of a free, independent, and enlightened people, whose laws, maxims, and practice are founded on the universal and unchangeable principles of justice, correct the error, and place the party in

the situation he ought to have been placed under the law? It is simply a question to be decided from the abstracts of votes returned into the Executive office according to law."

The committee, being of opinion that the application of the petitioner ought not to be granted, proceeded in the investigation. The sitting delegate objected against the poll in the township of Maniteau, in the county of Howard, because the votes were given *viva voce*. This objection was not supported by evidence, and is not apparent from an inspection of the poll. In the township of St. Charles, in the county of St. Charles, he objected—

1st. That the votes were not cast up and arranged by the judges of the election, as the law directs.

2d. That the votes were not counted.

3d. That the same magistrates acted as judges of the election, and as assistants to the clerk in making his returns.

The first and second objections were altogether unsupported by evidence, and the third was overruled by the committee. The election law does not prohibit judges of the election acting as assistants to the clerk in making his returns to the Governor.

In the townships of Saline and Big river, in the county of St. Genevieve, he objected against the returns: in the first, because the return appears blank, as neither the judges nor clerk signed it; because it is otherwise informal; and because it appears to have been only a poll-book, stating "Easton 19, Scott 14," without designating for delegate to Congress. In Big river township, because it is not certified that the clerks were sworn; that the only evidence showing when the election was held is to be inferred from the date of the qualification of the judges. The only evidence in support of these objections was an extra-official note or memorandum thereof made by the clerk of the county of St. Genevieve on the abstracts sent by him to the Governor. The committee considered this evidence altogether insufficient to establish the objections. If the facts existed as alleged by the sitting delegate, they might have been proved by the official copies of the poll-books on file in the office of the clerk. He further objected against the poll in the township of St. Michael, in the same county, because it was closed at two, instead of six o'clock P. M. No proof was adduced in support of this objection.

In the township of Bellevue, in the county of Washington, he objected against the poll, because the votes were given *viva voce*, and because one of the judges of the election administered the oath of office to himself. Neither of these objections was proved to the satisfaction of the committee.

In the township of Concord, in the same county, he objected against the poll, because the votes were not written or extended at length in the return of the judges of the election, but were set down informally, and because the votes were given *viva voce*. These objections were, in the opinion of the committee, altogether unsupported by the evidence.

The committee then proceeded to consider the objections made by the petitioner. In the township of Cinque Hommes, in the county of St. Genevieve, the petitioner objected against the poll—

1st. Because William Tucker was appointed a judge of the election by Barnabas Burns, a justice of the peace, or by the other two judges, whereas, by law, it was the duty of the justice himself, *being present*, to act in that capacity.

2d. Because the votes were not cast up and set down *in writing*, as the law directs, but stated in figures only.

Both these objections were overruled by the committee. As to the first, for aught that appears, Mr. Justice Burns may not have been present at the opening of the election, or, if present, he may have refused to serve as a judge, although he had the power of acting in that capacity. Tucker having been appointed a judge by nomination, the committee presumed that, in the words of the law, "there was no person present to act as judge."

The second objection is satisfactorily proved by an official copy of the original poll-book, certified by the county clerk; it appears that the return is stated *in figures* "for Rufus Easton 16, for John Scott 107." In the election law, it is enacted that "the number of votes given to each person shall be *set down in writing* at the foot of the poll-book." In this particular, the words of the act were not literally complied with, but the variance relates only to form. No ambiguity is produced thereby, and, as far as the committee can discover, no injury is done to either party. In the township of Breton, in the county of Washington, the petitioner objected against the poll, because John Rice Jones, one of the judges, was appointed by the other two judges, when the place ought to have been filled by John Briskey, a justice of the peace, who was present at the election. This objection was overruled, for the reasons stated in relation to the first objection made to the poll in the township of Cinque Hommes.

In the township of German, in the county of Cape Girardeau, the petitioner objected to the return—

1st. Because the clerks of the election were not sworn.

2d. Because there is no certificate of the clerks being sworn prefixed to the poll-book, as required by law.

The first objection was not supported by any affirmative evidence. The second was overruled by the committee. Although the certificate is not made according to the letter of the law, yet a majority of the committee, being of opinion, from inspecting a certified copy of the original poll, that the clerks were in fact sworn, decided against rejecting the return.

The committee having thus disposed of the objections above mentioned, an application was made by the sitting delegate for further time to procure copies of the poll-books from the several townships in the counties of St. Genevieve, Cape Girardeau, New Madrid, Lawrence, and Arkansas, for the purpose of proving that the polls in the several townships in which majorities had been given for the petitioner had been kept in an irregular manner; that the judges in the township of Tywapity had closed the polls before six o'clock; and that, in many instances, the returns were defective upon the face of them.

The election was held throughout the Territory of Missouri on the 5th day of August last. The Governor having granted to the sitting delegate a certificate of his election, the petitioner, on the 24th of September last, served upon him a notice of his intention of contesting his election. On the 28th of the same month, the sitting delegate notified the petitioner of the times and places at which he proposed taking depositions to support his election, commencing on the 12th of October last, and ending on the 4th of February next. Five months have nearly elapsed since the election in the said Territory, and more than three since the sitting delegate was notified by the petitioner that his election would be contested. The committee were of opinion that sufficient time had been allowed to procure copies of the poll-books from every township in the Territory, and that the application of the sitting delegate for further time ought not to be granted; thereupon it was contended by the sitting delegate that, by rejecting the votes in the township of Coté-sans-Dessein, the candidate would become entitled to a seat who had not a majority of voices in his favor, and therefore the election should be set aside, and a new one ordered. The committee did not concur in this opinion.

Upon a view of the whole premises, the committee respectfully submit the following resolutions:

Resolved, That John Scott is not entitled to a seat in this House as delegate from the Territory of Missouri.

Resolved, That Rufus Easton is entitled to a seat in this House as delegate from the said Territory.

[NOTE.—This report was recommitted, and additional facts reported; see No. 421.]

14th Congress.] No. 418. [2d Session.

ALTERATION OF THE FLAG OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 2, 1817.

Mr. Wendover made the following report:

The committee appointed to inquire into the expediency of altering the flag of the United States beg leave to report:

That they have maturely examined the subject submitted for their consideration, and are well aware that any proposition essentially to alter the flag of the United States, either in its general form, or in the distribution of its parts, would be as unacceptable to the Legislature and to the people as it would be incongenial with the views of the committee.

Fully persuaded that the form selected for the American flag was truly emblematical of our origin and existence as an independent nation, and that, as such, it has received the approbation and support of the citizens of the Union, it ought to undergo no change that would decrease its conspicuity, or tend to deprive it of its representative character. The committee, however, believe that a change in the number of States in the Union sufficiently indicates the propriety of such a change in the arrangement of the flag as shall best accord with the reasons that led to its adoption, and sufficiently point to important periods of our history.

The original flag of the United States was composed of thirteen stripes and thirteen stars, and was adopted by a resolution of the Continental Congress on the 14th of June, 1777. On the 13th of January, 1794, after two new States had been admitted into the Union, the National Legislature passed an act that the stripes and stars should on a day fixed be increased to fifteen each, to comport with the then number of independent States. The accession of new States since that alteration, and the certain prospect that at no distant period the number of States will be considerably multiplied, render it, in the opinion of the committee, highly inexpedient to increase the number of stripes, as every flag must in some measure be limited in its size, from the circumstance of convenience to the place on which it is to be displayed, while such an increase would necessarily decrease their magnitude, and render them proportionably less distinct to distant observation: this consideration has induced many to retain only the general form of the flag, while there actually exists a great want of uniformity in its adjustment, particularly when used on small private vessels.

The national flag being in general use by vessels of almost every description, it appears to the committee of considerable importance to adopt some arrangement calculated to prevent in future great or expensive alterations. Under these impressions, they are led to believe no alteration could be made more emblematical of our origin and present existence, as composed of a number of independent and united States, than to reduce the stripes to the original thirteen, representing the number of States then contending for and happily achieving their independence; and to increase the stars to correspond with the number of States now in the Union, and hereafter to add one star to the flag whenever a new State shall be fully admitted.

These slight alterations will, in the opinion of the committee, meet the general approbation, as well of those who may have regretted a former departure from the original flag, as of such as are solicitous to see in it a representation of every State in the Union.

The committee cannot believe that, in retaining only thirteen stripes, it necessarily follows they should be distinctly considered in reference to certain individual States, inasmuch as nearly all the new States were a component part of, and represented in, the original States; and inasmuch, also, as the flag is intended to signify numbers, and not local and particular sections of the Union.

The committee respectfully report a bill.

14th Congress.] No. 419. [2d Session.

LIBRARY OF CONGRESS.

COMMUNICATED TO THE SENATE, ON THE 6TH JANUARY, 1817.

Mr. Fromentin, from the Joint Library Committee, made the following report:

That, in pursuance of the duty devolving upon them to purchase books for the library of Congress, they have bought, during the recess, the books, a catalogue of which, with the prices and the names of the persons from whom they were bought, is annexed.

By a reference to the accounts rendered by Joseph Nourse, Register of the Treasury, and acting as agent of the Joint Library Committee, which are annexed to, and the committee pray may be considered as part of their report, it appears that, since the last account rendered, there was paid, at different times, by order of the Joint Library Committee, a sum of $3,074 09, leaving in the hands of the agent of the Library Committee, subject to their order, an unexpended balance of $1,526 61. The committee have now under consideration several proposals, which, when finally acted upon, shall have employed the whole of the appropriation made in 1812.

The committee further report that they have given direction for the following periodical (both literary and political) publications to be regularly sent to the library as soon as published, to wit:

The Edinburgh and Quarterly Reviews, republished in New York.

The British Review,
The Annual Register,
The Analytical Review,
Cobbett's Political Register, } published in Great Britain.
The North American Review, published in Boston.
The Portfolio,
The Analectic Magazine,
Walsh's American Register, } published in Philadelphia.
The Portico,
The Weekly Register, } published in Baltimore.
The National Register,
The Daily National Intelligencer,
The Historical Register, } published in Washington.

All the above periodical works now are, or will soon be, completed from the beginning of publication to the present day.

Of not exactly the same character, but yet liable to the same annual expense, are the following works, (if it be deemed advisable to complete the publications of this description which are now deposited in the library,) to wit:

The Transactions of the American Philosophical Society.
The Transactions of the Royal Society of London.
The Transactions of the Irish Academy.
Bath Society's papers.
Transactions of the Society of Arts.
Mémoires de l'Académie des Sciences.
Mémoires de l'Institut de France.
Delaplaine's Repository.
Cobbett's State Trials.
Public Characters.

General catalogues, published every year in Great Britain, in Leipsic, and in Paris; to which may be added works of merit, to be subscribed for occasionally, and which will require a disposable fund to be used on the emergencies created by the publication of such works either in this country or in Europe.

In order the better to promote the views of Congress in establishing a congressional library, and the more securely to provide for, as far as attainable, a proportionately equal application of the library fund to the several branches of human knowledge, and thereby stamp the congressional library with that degree of usefulness contemplated in its establishment, the committee invite the chairmen of the several committees in both Houses to furnish the Library Committee with a list of such books or indexes as may be deemed by them more particularly to refer to the business devolving upon each respective committee.

The committee have, moreover, directed to be placed in the library a box, where may be deposited, by the members of both Houses, the titles of such books as they may be desirous to procure.

The collection of law books now in the library is as valuable and as complete as it is possible to have expected it to be, considering the time at which the books were purchased; but the many late publications which have appeared since, both in this country and in Europe, and the indispensable necessity of laying open all possible sources of the most extensive information on that head, have induced your committee to propose to Congress to appropriate a sum of $3,000 for the completion of that particular department of the library of Congress.

The law appropriating $1,000 per annum for the purchase of books for the library of Congress has expired. The committee beg leave to report a bill making a further appropriation of $1,500 per annum for five years.

In revising the laws passed by Congress concerning the library, the committee observed that no provision had ever been made to extend to the heads of Departments the privilege of using the books in the Congress library on the same terms on which members of Congress are permitted to use them. In the bill making a further appropriation for the purchase of books, the committee have inserted a section to remedy that omission.

14th Congress.] No. 420. [2d Session.

REPEAL OF THE POWER EXERCISED BY THE PRESIDENT TO TRANSFER APPROPRIATIONS FROM ONE OBJECT TO ANOTHER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 6, 1817.

Sir: Treasury Department, *January* 1, 1817.

Your letter of the 31st ultimo, enclosing a resolution of the House of Representatives of the 30th ultimo, directing the Committee of Ways and Means to inquire into the expediency of repealing so much of the act "further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments," passed the 3d of March, 1809, as authorizes the President of the United States to transfer appropriations, has been received.

In giving my opinion upon the subject-matter of the resolution, it may be proper to state the causes which led to the adoption of the law, embracing the provision which is contemplated to be repealed by the resolution. Antecedent to that period the appropriations were, by some of the Departments, considered as an aggregate sum to be applied, without distinction in their accounts, to every branch of service embraced by the appropriation. In the Navy Department, for instance, there was but one account opened in the Treasury books, because the requisitions made by the Department were drawn for the Navy Department generally, and the sums thus drawn were applied

to the naval service, without regard to the amount which had been specifically appropriated for the different branches of the service within that Department.

In changing this practice, the necessity of giving the power to transfer from one head of appropriation to another, according to the exigencies of the service, was foreseen. This power was given to the President; and, in order to furnish to Congress the information which it was deemed essential to possess, every transfer of appropriation, together with the application of the money so transferred, was required to be communicated to Congress during the first week of their session thereafter. If no transfers were made, Congress knew the maximum applied to each head of appropriation. If transfers were made, they obtained information equally interesting and useful to them in providing for the wants of the succeeding year. The transfers disclosed to them those branches of the service, in each Department, where the appropriations had been redundant, as well as where they had been deficient. They obtained, without inquiry, a knowledge of the application of the sum transferred, as well as of the sum originally designated for that object. This was the desideratum intended to be obtained by the adoption of that measure.

By reducing the heads of appropriation, the necessity of exercising the power of transfer will, no doubt, be considerably diminished. During a period of peace, and after the naval and military establishments have remained for a considerable time without alteration as to organization or force, it is probable that it will be but rarely exercised. It is believed, however, that a full consideration of the subject will lead to the conviction that the power ought to be retained in peace as well as in war. A change in our relations with a foreign state, during the recess of Congress, which would render it prudent to concentrate the regular force in any section of the country, would increase the expense of the quartermaster's department beyond the regular appropriation. Expenses incurred under such circumstances must generally be discharged as they are incurred. This could not be effected without the power of applying the redundancies of other appropriations to meet the deficits produced by such an emergency.

There does not appear to be any necessity for extending this power to the permanent appropriations of the land or naval service. The appropriations for arming the militia, for the armories, and for arms and military stores, and for the permanent increase of the navy, may with great propriety be exempted from the operation of this power. It is to the current expenses of the land and naval force authorized to be kept in service during the year that this power should be confined. Within those limits it is not believed that the power can be exercised to the injury of the nation. Without this power, the War and Navy Departments would be compelled to make ample estimates for every branch of the service, as a deficiency in any one might be productive of serious consequences. The idea that economy will be enforced by repealing the provision will, I am confident, be found to be wholly illusory. Withdraw the power of transfer, and the Departments will increase their estimates. In some branches of the service there will be redundancies, in none will there be deficiencies. These redundancies, continuing from year to year, will be more likely to excite to profusion in those branches of the service than if they were transferred to the appropriations which were insufficient. The law, as it now stands, furnishes those whose duty it is to appropriate the money and superintend its application with all the information which is necessary to the execution of that high trust. By reducing the heads of appropriation, the labor of keeping the accounts of the Treasury, as well as of the other Departments, and in the settlement of accounts, will be greatly diminished. This reduction, however, as before stated, will not supply the place of the power of transferring from one branch of the service to another. It may be proper to observe that the power of transfer is applicable only to the War and Navy Departments.

I have the honor to be, very respectfully, sir, your most obedient servant,

WM. H. CRAWFORD.

The Hon. WILLIAM LOWNDES,
Chairman of the Committee of Ways and Means.

14th CONGRESS.] No. 421. [2d SESSION.

CONTESTED ELECTION OF JOHN SCOTT, THE DELEGATE FROM MISSOURI.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 10, 1817.

Mr. TAYLOR, of New York, made the following report:

The Committee of Elections, to whom was recommitted their report of the 31st of December last, with instructions "to receive evidence that persons voting for either candidate were not entitled to vote in the said election," report the same to the House, with the following additional facts and statements:

The general notice served by the petitioner on the sitting delegate on the 24th of September last is in the following words: "Sir: Take notice that I shall take the depositions of witnesses, before some proper authority, to be read in the House of Representatives of the United States at the next session of Congress, for the purpose of establishing my right to a seat in that body as a delegate from the Territory of Missouri," &c.

On the next day the petitioner served on the sitting delegate a special notice of taking testimony in the townships of St. Charles and Coté-sans-Dessein, in the county of St. Charles, and in the township of Bon Homme, in the county of St. Louis, for the purpose of proving that the judges of the election in the latter township "improperly refused to count a number of legal votes given for him;" and in the other townships "for the purpose of proving that no legal election was held; that a sufficient number of judges did not attend; that the judges were not sworn; that no clerks were appointed; that no poll-book was kept; and that no votes were legally taken." It was upon the evidence taken in pursuance of this special notice that the committee rejected the votes from the township of Coté-sans-Dessein. On the 28th of September last the sitting delegate served on the petitioner a general notice, in the same form with that first received by him from the petitioner, concluding in the following words: "Which depositions, at each of those places and days, will be taken for the purpose of proving that the elections in each of the townships for a delegate to the Congress of the United States from the Territory of Missouri were not held on the first Monday of August last past according to law, in the following particulars, to wit: that a place in each township had not been named for holding such election agreeably to law; that the elections were not held at

the places appointed for holding the same in each of the townships; that no notice of such election, and of the times and places of holding the same, had been given by the respective sheriffs; that the polls were not opened according to law in the several townships; that no judges of election had been appointed by the circuit courts; that no judges of election were chosen by the people, and that none officiated, or were sworn, according to law; that no clerks were appointed or sworn, no poll-books kept, and no legal votes given to you; that illegal votes were given for you as delegate, and legal votes given for me as delegate were rejected by the judges; that the oaths of the judges and clerks are not prefixed to the poll-books; that the poll-books have not been signed by the judges and clerks; that the returns have not been made of votes legally taken for me, and improper votes have been admitted, and the votes counted, for you; that the polls have not been opened, and the votes counted by the clerks and two justices; and that the voters have not been permitted to give in their votes freely, and many wishing to vote for me have been, by threats and violence, prevented from so doing."

No notice was given by either party of the names of the electors objected against for want of qualifications; nor was either party notified by the other that the particular qualifications of the electors would be investigated; nor were the names of the magistrates stated before whom depositions were to be taken.

The sitting delegate contends that he considered himself authorized, under his general notice, to examine witnesses to every point of objection which he might find himself able to support in the course of the investigation; and the petitioner alleges that he did not suppose an investigation into the qualifications of the electors, and the persons for whom they voted, to be admissible; that the only case in which that inquiry had been made in his behalf related to the votes in the township of Coté-sans-Dessein, which was done without his instruction or consent.

In the case of Joseph B. Varnum, a representative from the State of Massachusetts, whose election was contested at the first session of the fourth Congress, the Committee of Elections, (we adopt the words of their report,) "as well from the difficulty of the case, as from a desire to have uniformity in proceedings of this kind, were induced to pray the instructions of the House as to the kind of specification that shall be demanded of the petitioner, and the manner in which the evidence shall be taken."

Upon this application, after several days' debate in the Committee of the Whole, the House resolved "that the names of the persons objected to for want of sufficient qualifications ought to be set forth prior to the taking of the testimony."

The rule prescribed in this resolution was adopted by the committee in the case of McCoy and Porterfield at the last session of Congress, and, as far as your committee are advised, has been uniformly adhered to. It is important, not only to the parties, but to this House, that it should be preserved.

The committee were therefore of opinion that the evidence taken in pursuance of the before-mentioned general notices ought not to be received. If the House concur with the committee in this opinion, it follows that no evidence has been submitted by either party enabling the committee to investigate the qualifications of the electors.

The committee are further of opinion that evidence cannot be procured in season to enable the committee to investigate the qualifications of the electors during the present Congress. From Howard county, on the north, to Arkansas, on the south, as the roads run, is about eight hundred miles. The settlements extend west of the Mississippi from fifty to one hundred and seventy miles. The Territory is divided into nine counties and about fifty townships.

In addition to the difficulties arising from the extent of territory, the law of Missouri prescribes no mode of taking evidence in cases of contested elections for delegate to Congress; nor is there any territorial authority to compel the attendance of witnesses for that purpose. The great distance of the Territory from this place renders it impracticable, even if the power should be granted, to send for the persons whose evidence is considered essential for the purpose of examination before the committee.

The committee, therefore, respectfully submit to the House the following resolution:

Resolved, That the Committee of Elections be discharged from the further investigation into the qualifications of the said electors.

14th Congress.] No. 422. [2d Session.

UNIFORM SYSTEM OF BANKRUPTCY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 13, 1817.

To the honorable the Senate and House of Representatives of the United States: The petition of the Chamber of Commerce of the city of Philadelphia respectfully represents:

That your petitioners have observed with great satisfaction that the subject of general and uniform regulations of the estates of insolvents has engaged the attention of Congress.

Your petitioners cannot feel indifferent on an affair of so much importance, and by which every part of the community may be more or less benefited. We have long experienced the inefficiency, and, in many instances, the destructive effects of the State laws in the facility which they afford to fraudulent debtors to conceal and embezzle the property of their creditors, and to individual creditors of attaching and sacrificing those portions of the debtor's property which happen to be out of the State where he resides; while judgments, executions, and partial assignments generally absorb all that is within his reach. Thus estates, which would by an early and effectual surrender and judicious management have yielded respectable dividends, are sacrificed and frittered away to satisfy the demands of particular and favored creditors, while all those of a different character sustain a total loss.

Your petitioners beg leave also respectfully to represent, that the dread of imprisonment and of the harassing misery of continual responsibility operates in a very powerful manner on the apprehensions of men who find themselves embarrassed, and more than any other consideration induces them to continue trade under the most inauspicious circumstances long after they would have made a surrender of their property if there were laws to shelter the honest and unfortunate debtor, and if the circumstance of a failure was not attended with all its present disgrace, as unavailing as it is distressing.

These great obstacles to an early surrender operate directly to the prejudice of the creditor's interest, and these obstacles your petitioners believe can only be effectually removed by the interposition of the National Legislature.

Your petitioners, therefore, earnestly solicit your honorable body to enact such a law as in your wisdom may seem best calculated to promote an early surrender and fair distribution of the property of embarrassed men, and subject their transactions to the investigation of tribunals competent to punish the fraudulent and to shelter the upright debtor.

ROBERT WALN, *President.*

JOHN VAUGHAN, *Secretary.*

14th CONGRESS.] No. 423. [2d SESSION.

ADMISSION OF MISSISSIPPI INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 17TH JANUARY, 1817.

Mr. PICKENS made the following report:

The committee to whom was referred the memorial of a convention of delegates from fifteen counties of the Mississippi Territory, praying that the said Territory may be admitted as a State entire and undivided, respectfully beg leave to report:

That they have considered the subject with all that attention which the means in their power have enabled them. The question most immediately involved in the reference was, whether the Mississippi Territory ought to form one entire State, or be divided into two—a question much more important both to the people of the Territory and to the nation than whether its admission should be *immediate*. The considerations deemed of most weight in determining this question are, 1st. As regards the general interest of the Union; 2d. The wishes of the people of the Territory; and, 3d. The convenience and policy of the particular government of the Territory.

1st. The principal point affecting the national interest will consist in the great relative *strength* of such an extensive member of the confederacy, if admitted entire. The great extent of its limits, and the space it occupies on the map of the United States, naturally excite inquiry as to the capacity of its soil and other qualities to afford at any period a dense population; and the inquiry should be directed to a remote period, when the Indian titles shall have become extinct and the country matured by improvement. Although your committee deem it impracticable to obtain any thing like an accurate estimate of the proportions of land fit and unfit for cultivation in that remote territory, so great a portion of which is yet a wilderness, yet, from the general information collected from those who have explored its different parts, and from the progress of settlement and sale of public lands within the tract of country to which the Indian title has been long extinguished, your committee cannot apprehend that the whole Territory is capable of such a strong population as ever to render it a formidable State compared with the largest sized of the northern, middle, and western States.

By a statement from the General Land Office, accompanying this report, it appears that the amount of sales of public land in the Mississippi Territory, from the first opening of a land office therein (in 1807) till the 30th September last, exclusive of Madison county, was 833,534.49 acres. The land districts in which these sales were effected extend from the Mississippi river, eastward, more than 220 miles, to the dividing ridge between the Alabama and Tombigbee rivers, and a little over 60 miles from the thirty-first degree of latitude northward, and contain more than eight millions of acres. It appears, from the concurrent testimony of persons acquainted with the Territory in question, that an uncommon proportion of its land is unfit for cultivation; much thereof consisting of poor pine barrens; while, on the other hand, it is certain that there is much fertile soil on the margin of the rivers, and interspersed over different parts, capable to sustain a sufficient population for a respectable State. Its political strength will also be held in check by the great proportion of slaves it is destined to contain. This circumstance, added to the climate and soil, will render its numbers (entitled to political calculation) relatively small compared with its extent.

2d. As to the wishes of the people themselves, various representations have been made showing a difference of sentiment to exist among them in regard to a division. It is, however, worthy of notice that for several successive years the Legislature of the Territory have petitioned Congress for admission as a State; in none of which have they intimated a wish to be divided.

3d. As to the policy and convenience of the particular Government. The form of the Territory is nearly square, and its average length and width nearly equal. By any line of division, the distant extremes will be but little more convenient to a point at the centre of either division than to the centre of the whole Territory. As to the different parts having different avenues to market—the western by the navigation of the Mississippi river and the waters of Lake Pontchartrain, the eastern by the waters of Mobile and Chatahoochee—it is not seen that this will create any material diversity of interest, or interfere with the internal policy and harmony of the State, all parts of which will be agricultural, and capable of similar products. Nor is it known that local animosities are more peculiar to large than to small States. These are not unusual even in the bounds of a county. It is, indeed, more probable that a large State would incline to cherish its institutions by a liberal policy.

The geographical position of this Territory may render it necessary that its military defences should be more combined than would at all times be practicable in two distinct sovereignties.

It may be proper to take notice of the situation of each division in case the parts are separated by a line such as has been in contemplation, and as proposed by a bill now before this House; although your committee presume, if any division is to be made, the line proposed may be as judicious as any other. The western division will contain 25,037 free white inhabitants and 22,834 slaves, by the census taken lately. By the census taken in 1810, there were west of the line of division 16,602 white inhabitants and 14,523 slaves, including in the last census the county of Jackson, formerly a part of Florida, making an increase of 8,435 white and 8,311 slave inhabitants in the last period of six years, including a new county from Florida. In the whole western division there is no

land to which the Indian title is extinguished but what has been some time in market, and most of it embracing the oldest settlements in the Territory. What prospect may exist of extending the scope for settlement by purchases from the Indians is not known to your committee; until which time the increase of population in that quarter must be *gradual.*

While your committee believe it expedient to admit the whole Territory to the rights of State government, and that immediately, they consider it just to the population which will in a few years occupy the extensive space on the east side of the Tombigbee, which has lately been acquired from the several Indian tribes, to afford the citizens of the State now to be formed a fair opportunity of revising their constitution after a reasonable time, and recommend a provision for that purpose.

Your committee ask leave to report a bill for admitting the Mississippi Territory into the Union as a State.

SIR: GENERAL LAND OFFICE, *January* 13, 1817.

In conformity with your request in your letter of the 11th instant, I transmit, annexed hereto, a statement of the lands sold in the Mississippi Territory. The surveyors' returns do not describe the lands as first, second, and third quality, but merely give the timber and the nature of the soil where their lines are run.

I have the honor to be, most respectfully, sir, your obedient servant,

JOSIAH MEIGS.

Hon. ISRAEL PICKENS, *House of Representatives.*

GENERAL LAND OFFICE, *January* 13, 1817.

14th CONGRESS.] No. 424. [2d SESSION.

ACCOUNTABILITY OF DISBURSING OFFICERS—RANK AND DUTIES OF THE ATTORNEY GENERAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1817.

SIR: DEPARTMENT OF STATE, *December* 31, 1816.

We have the honor to acknowledge the receipt of your letter of the 22d instant, requesting information on the following subjects, viz:

1. Is it intended to apply the power of imprisonment and sale of property, proposed in a late report to the Senate from the Secretaries of the Departments, [see No. 411, p. 396,] to cases of property as well as money which may be withheld from the Government by its officers?

2. Is it proposed to allow any judicial examination into the claim of the United States, either when an officer who has received money from the Government claims credits not admitted in his accounts, or where a citizen is charged by a Department as a depositary of public money which he denies having received?

3. Would the accountability of public officers be sufficiently secured if the different proposals contained in the report above referred to were all to be adopted, with the exception of that for the establishment of a new Department?

In answer to the first inquiry, it is proper to observe that the reasons for resorting to the arrest and imprisonment of the defaulting officer where property is embezzled or withheld are equally strong as in the case of money. It is presumed that imprisonment would be resorted to only where there is a deficiency of property to satisfy the demand, or in the case of a refusal to settle accounts when adjustments of the accounts of others are dependant upon such settlement. In both these cases, but particularly in the latter, the most rigid exercise of the powers vested in the Government would be indispensable.

A judicial examination, where the officer should allege that injustice had been done in the settlement of his accounts, would perpetuate the delays in the settlement of the public accounts which have produced the derangement in the accounting offices that are intended to be remedied by the summary procedure recommended by the report. It is highly improbable that injustice will be practised by the auditing officers; but if it should happen in any case, the appeal should be to Congress, who will always grant relief.

It is not intended to apply the summary procedure proposed in the report to the Senate to any other persons than officers of the Government. If the Government confide the public property to other persons than officers, their rights as individuals ought not to be affected. It is not proposed to extend the principle beyond the necessity which has produced its application to a certain description of officers. Justice and consistency require that it should apply to the disbursing as well as to the collecting officers of the Government.

In answering the third inquiry, serious difficulties present themselves. The Indian Department stands in front. It is possible that, by a more specific regulation in that branch of the public service than has heretofore been attempted, its accounts might be reduced to some general principles which would admit of their settlement by an Auditor without the sanction of the head of the Department. Measures have been taken during the present year with a view to such a regulation. Should this be effected, the most serious obstacle to the settlement of those accounts would be removed.

In recommending the establishment of another independent Department, the Secretaries were influenced in some degree by the consideration that the public interest required that the Executive Department should be simple and uniform in its organization. The various branches of executive authority are now under the direction of the Secretaries of the Departments, except the General Post Office and the Mint. They form exceptions to the general principle upon which the Executive Department has been organized. The best examination which the Secretaries have been able to give the subject has led to the belief that the anomalous organization of these Departments has not been productive of any beneficial consequences. The General Post Office, independent of the anomaly just stated, presents another of a more singular character. The revenue accruing from the postage of letters is disbursed directly by the General Post Office. No part of it comes into the public treasury except that portion of it which exceeds the expenses of the Department. The immense sums which are paid to contractors for the transportation of the mail, and to all the postmasters throughout the nation, are disbursed directly by the Postmaster General. The accounts of the Department are revised by the accounting officers of the Treasury, but they are now about six years in arrear.

It is not contended that the establishment of a new Department is indispensably necessary to change the organization of the General Post Office, so as to subject the payment of money in that Department to the checks to which all other payments of public money are subjected. The sums arising from postage of letters might be paid directly into the Treasury, and all sums due to contractors might be paid by warrants at the Treasury, as well without the establishment of a new Department as with it. If it were deemed necessary, all postmasters whose emoluments exceeded a given sum might be paid in the same manner; or the postmasters of all distributing offices might be placed upon that footing. This discrimination might lead to the suggestion that it would be proper to subject that class of officers to the ordeal of passing through the Senate. This suggestion, however, is foreign to the subject of your inquiry. The changes suggested in the modes of conducting the fiscal concerns of the General Post Office were necessarily involved in the proposition to make a new Department, to which it should be subordinate.

We think proper to add that, although provision may be made for the settlement of all the public accounts without the institution of a new Department, we have no doubt that the just principles of accountability would be better preserved, and economy promoted, by the adoption of that measure. Equally satisfied are we that other essential advantages would result from it. As, however, your inquiry does not extend to this object, we think it improper to enter further into the subject.

We have the honor to be, very respectfully, sir, your most obedient servants,

JAS. MONROE,
WM. H. CRAWFORD,
GEO. GRAHAM,
Acting Secretary of War.
B. W. CROWNINSHIELD.

Hon. Mr. LOWNDES, *Chairman of the Committee of Ways and Means.*

From Mr. Monroe to Mr. Lowndes.

1. The Attorney General has been always, since the adoption of our Government, a member of the executive council, or cabinet. For that reason, as well as for the better discharge of his other official duties, it is proper that he should reside at the seat of Government. It was made the duty of the present officer, at the time of his appointment, to do so; which he has accordingly done. His duties in attending the cabinet deliberations are equal to those of any other member.

2. Being at the seat of Government throughout the year, his labors are increased by giving opinions to the different Departments and public offices. The proportion of increase could be in part ascertained by an examination of the files of all of them, and comparing the opinions given now with heretofore, when the office was at a distance. But this is not all. Being on the spot, it may be supposed that he will often be resorted to verbally in the progress of current business. Such is the fact. The removal of the office has more than doubled its entire business under this head.

3. The Supreme Court. At the last term of the Supreme Court there were forty-nine causes of the United States upon the docket. Of this number, twenty-three were ultimately disposed of by argument or otherwise. Four others were argued without being decided. Under such circumstances, the Attorney General cannot well engage in the causes of private clients in this court consistently with a diligent execution of the public business.

The present Attorney General has not embarked in the practice of the local courts of the city of Washington. The practice is, in itself, of little moment; and to engage in it upon a scale to make it in any degree worth his attention would be incompatible with the calls to which he is liable from the Executive, and the investigations due to other official engagements.

4. The office has no apartment for business, nor clerks, nor a messenger, nor stationary, nor fuel allowed. These have been supplied by the officer himself, at his own expense.

14th CONGRESS.] No. 425. [2d SESSION.

RELEASE OF AN INSOLVENT DEBTOR TO THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 1, 1817.

Mr. MIDDLETON, from the select committee to whom was referred the petition of William Smith, sen., reported:

That, by the statement of the petitioner, with accompanying certificates, it appears that the firm of Wm. Smith & Co., composed of the said petitioner and William Calhoun, deceased, were navy agents of the United States for Charleston; that, at the time of the death of Wm. Calhoun, one of the said partners, the balance stated to be due by the firm, in the first transcript sent on by the Treasury Department, was $11,826; that the said Calhoun having died insolvent, the petitioner immediately confessed judgment for the amount stated to be due, with interest and costs; that he, the said petitioner, afterwards acted as navy agent in his individual capacity, and has fully settled all his accounts with the Treasury. He afterwards forwarded to the Treasury the accounts of the firm for a settlement, when the balance due was found to be only $863 56; on the 31st January, 1812, he paid, on account of this debt, $600, which reduced it to a balance of $263 56, exclusive of interest and costs; that the said petitioner now finds himself incapacitated, by bodily infirmity as well as pecuniary embarrassment, from making any further payment, and for this small amount he is now confined in the prison at Charleston; that he is ready to make an assignment to the United States of all the estate of which he may be possessed, but that, in fact, he has no estate whatever, which he is ready to verify and prove in any manner which may be prescribed. The petitioner prays Congress to grant him such relief as is usually allowed to unfortunate debtors of the United States.

Upon a mature consideration of this case, and having had reference to evidence adduced that the petitioner has ever borne the character of an honest man, and that his conduct in relation to his estate has been perfectly fair, the committee report that it is expedient to grant the prayer of the petition, and ask leave to bring in a bill accordingly.

14th CONGRESS.] No. 426. [2d SESSION.

REPORTS OF THE DECISIONS OF THE SUPREME COURT.

COMMUNICATED TO THE SENATE, FEBRUARY 7, 1817.

SIR: WASHINGTON, *February* 7, 1817.

Your letter, enclosing a copy of the bill "to provide for reports of the decisions of the Supreme Court," in which you do me the honor to request, for the committee, "my views relative to the object and utility of the proposed act," was yesterday received, and communicated to the judges.

We all concur in the opinion that the object of the bill is in a high degree desirable.

That the cases determined in the Supreme Court should be reported with accuracy and promptness, is essential to correctness and uniformity of decision in all the courts of the United States. It is also to be recollected that from the same tribunal the public receive that exposition of the constitution, laws, and treaties of the United States as applicable to the cases of individuals which must ultimately prevail. It is obviously important that a knowledge of this exposition should be attainable by all.

It is a minor consideration, but not perhaps to be entirely overlooked, that, even in cases where the decisions of the Supreme Court are not to be considered as authority except in the courts of the United States, some advantage may be derived from their being known. It is certainly to be wished that independent tribunals having concurrent jurisdiction over the same subject should concur in the principles on which they determine the causes coming before them. This concurrence can be obtained only by communicating to each the judgments of the other, and by that mutual respect which will probably be inspired by a knowledge of the grounds on which their judgments respectively stand. On great commercial questions, especially, it is desirable that the judicial opinions of all parts of the Union should be the same.

From experience, the judges think there is much reason to apprehend that the publication of the decisions of the Supreme Court will remain on a very precarious footing if the reporter is to depend solely on the sales of his work for a reimbursement of the expenses which must be incurred in preparing it, and for his own compensation. The patronage of the Government is believed to be necessary to the secure and certain attainment of the object.

Law reports can have but a limited circulation. They rarely gain admission into the libraries of other than professional gentlemen. The circulation of the decisions of the Supreme Court will probably be still more limited than those of the courts of the States, because they are useful to a smaller number of the profession. Only a few of those who practise in the courts of the United States, or in great commercial cities, will often require them. There is, therefore, much reason to believe that no reporter will continue to employ his time and talents in preparing those decisions for the press after he shall be assured that the Government will not countenance his undertaking.

With very great respect, I am, sir, your obedient servant,

J. MARSHALL.

The Hon. DUDLEY CHASE.

14th CONGRESS.] No. 427. [2d SESSION.

ROADS AND CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 8, 1817.

Mr. THOMAS WILSON, from the committee to whom was referred, on the 4th of December last, so much of the message of the President of the United States as relates to roads and canals, reported, in part:

That, upon mature deliberation, the facility of commercial and personal intercourse throughout the whole extent of the United States and its Territories is viewed by the committee, as it appears to have been viewed by former committees of both branches of the National Legislature, and by every Executive of the Government since its formation, as an essential ingredient in the general economy of the nation, as well in relation to the pursuits of peace as to those of war, and also to the perpetuation and integrity of the Republican Union.

That the interior waters of the United States, co-extensive with its territory, furnish the ample and the only effectual means of such facility. Without inland navigation, an interior commerce, in a large portion of the most necessary articles, would be not merely inconvenient, but wholly impracticable, between sections remote from each other. Those which were destitute must remain so; and where there was abundance, it would be of little value. In such a state, of all the rich bounties of nature distributed over our expanded country, ever varying in their nature and uses with our varied soils, climates, and pursuits, a scanty portion only could be appropriated to the subsistence and comfort of civilized man. Invaluable, then, are those interior waters which, even in their natural state, afford a facility of transportation of the necessaries of life which no other known means could effect. But, although these waters are thus essentially requisite and extensively useful in their original state, their usefulness would be indefinitely increased by improving and uniting their channels.

The great topographical features of our country are its great extent of territory, and variety of soil, climate, and production, which demonstrate the necessity on the one hand, and the number, positions, and magnitude of its bays, lakes, and rivers, which happily, on the other hand, demonstrate the practicability of an internal navigation throughout all its parts.

So magnificent and admirably arranged are these waters, that two great channels are nearly completed by nature the whole way between the extremes of the Union—the one, passing through its centre, three thousand miles; the other, on its margin, two thousand miles. Large and numerous rivers, communicating with each other from a common intermediate source, form natural canals from the one to the other, interrupted only by the main ridge of mountains, from which they descend in opposite directions, and over which artificial roads of the best construction are known to be practicable, so as to unite with the opposite navigations within distances varying from fifty to one hundred miles. Thus, the great chain called the Appalachian mountains, which once was considered as an impassable barrier and partition between the eastern and western interests, may in effect be removed; or, rather, it may be made effectually to assist that intercourse which it has seemed permanently to interrupt. The large and numerous rivers and lakes communicating with the great central channel on the north and west, together with those already noticed, which cut opposite sides of the mountains, traverse the whole continent, conducting all its waters, as they seem destined in future to convey its innumerable productions into two great channels which unite with the navigable waters of the Atlantic ocean at their two extremes, and one of them at numerous intermediate points, forming in the whole more than ten thousand miles of inland navigation, the free use of which requires only the purchase at a moderate price in labor.

The importance of this object to the United States as a community is so evident, that to ascertain its practicability would seem sufficiently to recommend it to the attention of the National Government. The best evidence of its practicability is that already adduced—the positions and magnitude of the interior waters. These are circumstances of notorious importance, the evidence of which cannot be questioned; but it may be proper, in corroboration, also to notice that resulting from an official document of high authority.

It will be recollected that in April, 1808, an elaborate report, prepared in obedience to a resolution of the Senate of the preceding year, was made by the then Secretary of the Treasury, in which were embraced all the outlines, together with much detail, of a general system of national improvement. The sum of $20,000,000 was deemed sufficient to effect the works necessary to confer on the people of every section of the United States all the advantages of good roads and canals of which the country is susceptible The annual application of $2,000,000 would effect this great object in ten years, and which (it was added) could be conveniently supplied from the existing revenues of the United States, leaving a sufficient surplus, in addition to the sum required for the permanent peace establishment and national debt, in the same period of ten years, to arm every man in the United States, to erect as many fortifications and batteries as could be manned, and, if thought eligible, to build a navy. The subject was treated in that report as one of primary national importance, conducive to the general welfare, in enhancing the value of lands, promoting useful commerce, binding the Union together by a community of interests, and constituting an important branch of the public defence. This official report of 1808 attracted much attention, and the subject-matter of it has appeared to receive the decided approbation of the citizens of the United States ever since. The execution of this plan would probably have been commenced long before this time had not extraordinary

difficulties in our foreign relations, and consequent war with Great Britain, intervened. Since the termination of the war, the necessary attention of the Government to other objects sufficiently accounts for the continued suspension of the plan of improvement recommended at that time. But these causes of suspension having now ceased, it may reasonably be expected again to attract a due share of the public attention.

A state of tranquillity has been happily restored under circumstances favoring its continuance for many years. The pursuits of peace in the United States have been resumed with renovated vigor. Great political changes in Europe have affected, and may continue materially to affect, our foreign commerce. The experience of the late war has served to develop the importance of internal transportation; and the resources of the United States are undoubtedly more ample than they were in 1808. At that time the average annual revenue was about $14,000,000. At this time, from various causes, it is increased to an average of $25,000,000. These circumstances seem peculiarly to recommend at this time such a system of general improvement as would accelerate the advancement and secure permanently the internal commerce of the United States. Two important considerations particularly recommend the subject of internal navigation to the early attention of Government—the rivalship of a foreign state in the trade and commerce of our interior possessions, and the lively interest evidenced in various parts of the United States in the improvement of our facilities of intercourse.

That portion of our territory bordering upon Lake Champlain, the St. Lawrence, and great lakes, and to which these waters are the natural outlets, is moderately estimated at sixty millions of acres. Much of this is already populous, and the remainder is becoming so with surprising rapidity. Until other routes shall be greatly improved, all the productions of this extensive district must be drawn to the British ports of Lower Canada, from whence, also, the merchandise, the arms, and the influence of Great Britain are conveyed with unrivalled celerity to the recesses of all the northwestern Indian tribes within our limits. Such an intercourse can scarcely fail to engender in those numerous hordes unfriendly dispositions towards the citizens and Government of the United States in time of peace, and, in war, to array them against us in a force formidable in a degree beyond that of their specific number and strength. The whole commerce of that extensive region, as well of the present and future white population as the trade of the Indian tribes, can be advantageously turned to the posts and possessions of the United States only by an improved inland navigation.

The solicitude on the subject of internal improvements generally, which is felt in various parts of the United States at this time, is indicated in a manner not to be mistaken, and promises an effective co-operation with the National Government in any measure which it may approve and adopt for promoting them.

The perseverance of the citizens and State of New York in their efforts to ascertain the most eligible route and means for opening a navigable canal from the tide water in the North or Hudson river to Lake Erie is a pledge that their wealth and enterprise would contribute largely towards that great object. The local enterprise which has long since organized itself in companies, under State authorites, formed their plans, and progressed considerably in the execution of canals through the necks of land, respectively, which alone obstruct the inland navigation from Boston to St. Mary's, is again directed to these objects. In addition to these several works, there is wanting only a short canal from Lake Erie to some of the navigable waters which empty into the Ohio, some inconsiderable improvements in the bed of such waters, and a lockage or other improvement at the falls of Louisville, to complete the two great channels already mentioned. In all these works, although the nation has a paramount interest in their completion, there are good reasons to believe that individual or local enterprise would contribute a full half or more of the expense.

There are equal or still stronger reasons to believe that individual and local enterprise would, with alacrity, share equally at least with the United States in improving the navigation of such correspondent Atlantic and western rivers as are best adapted for a connexion by portage roads across the mountains, in the construction of such roads, and of such other great leading road or roads as shall be established or approved by the National Government. The great progress already made without the aid of this Government in the construction and extension of permanent roads, as well in Virginia and Maryland as in Pennsylvania, New Jersey, New York, and all the more eastern States, is conclusive evidence of a disposition in most or all of the States to promote these objects. In the State of New York, a great turnpike road has been for some time completed almost to Lake Erie, and, in Pennsylvania, the Herculean task of extending a turnpike road of the best construction the whole way from Philadelphia to Pittsburg has been boldly undertaken, and is in a rapid progress of execution. In both these States a great variety of other turnpikes have been long in great perfection, and new ones are annually added. The latter State has, moreover, a great number of bridges, probably among the largest in the world, and founded in solid masonry; and it has also made provision by law for the liberal encouragement of a great work in its neighboring States of Maryland and Delaware.

The foregoing indications, as well as many other considerations, seem fully to authorize the confident reliance upon individual exertion for a full half or more of the resources requisite for the completion of every improvement of national importance in the United States which its Government shall take measures suitably to encourage. The whole expense, by the official report of 1808, already noticed, of a general system of roads and inland navigation, has been, it appears, carefully estimated at $20,000,000. On the assumption that one-half would be contributed by individual and local exertion, $10,000,000 in addition, applied on the part of the United States, would be a sum fully sufficient. These views present another consideration of great weight, that is, the magnitude of the object compared with the expense required to effect it. The object proposed is the facility of intercourse by means of more than ten thousand miles of internal navigation, and more than two thousand miles of permanent roads, besides those already completed in the several States, and such temporary roads through the more unimproved Territories as might serve for travelling and for transporting the mails.

The expense to the United States, taken at $10,000,000, supposing $7,000,000 applied to the canals and $3,000,000 to the roads, if an actual expenditure, would be only $700 per mile for the canals, and $1,500 per mile for the two thousand miles of permanent roads; but when it is considered that these sums may not be, strictly speaking, expended, but merely invested by subscription in canal and road stocks, which would ultimately rise to par value, the contrast between the magnitude of the object and that of the capital employed becomes still more strikingly obvious. Nor will these views of the subject appear exaggerated, if we recur to the extent of the navigation proposed to be opened, and consider that most of it would be well adapted for steam vessels; and that the recent origin, the present state, and probable improvement of these cannot, if successful, fail to give to all large rivers, bays, and lakes in the United States, in an improved state, all the advantages of navigable canals of the best artificial construction. In Great Britain more than $100,000,000 has been laid out in constructing about one thousand miles of canal navigation, (that of rivers being little used,) and it is considered of great national advantage. How much stronger are the inducements in the United States to employ a tenth part of that sum in effecting an object of ten times the magnitude?

The committee might enumerate various other considerations in detail, but it is not deemed necessary to do so, since they will be comprised in the general importance of inland navigation and intercourse in the United States,

which will now be briefly considered. Internal intercourse is dependant upon internal navigation in a greater or less degree, according to the extent of territory. In the United States, therefore, it must, as has been assumed, depend essentially upon this mean; consequently, the subject must, in the United States, possess a degree of importance unknown in other countries in a political point of view, and must be considered with reference to this principle in connexion with every other advantage to be derived from it.

The general importance of internal navigation is so universally admitted, that any attempt further to illustrate it would seem superfluous, were it not for the fact that it is an object heretofore neglected by the Government of the United States—a circumstance that can hardly be accounted for on any other rational principle than that its intrinsic importance has been somehow overlooked, or hidden in the mass of other concerns, or its advantages been viewed at too remote a distance to induce present activity. From these considerations a few observations are submitted, in which the chief difficulty is, that the case seems too clear to admit of additional proof short of actual consummation. Some will always be found who will call every thing theory which is not actually accomplished in practice and in their own possession. Some twenty years ago there was not a turnpike road in the United States. The one between Philadelphia and Lancaster was then called a theory: there are now in the United States some thousand miles of such road; they have become familiar, and we experience little surprise that individuals, in a single State, undertake fearlessly to extend them over the greatest mountains on the continent. The building of a ship and navigating the ocean has become familiar in the same manner; it is no longer a subject of wonder. But the time probably has been when the simplest raft was the only navigating vehicle; with this man was content until necessity discovered, and experience improved, the use of instruments. Is it not remarkable that, in our present advanced state of civilization and science, man is still little inclined to profit by his reason and intelligence, but disposed always to await the mandate of necessity? Why should an improved inland navigation be any more a theory than a turnpike road, or the building of a house? Merely because we are more familiar with the latter than with the former. But in Europe a canal navigation is as familiarly known to experience as a ship, a house, or a turnpike; and we have the means of profiting by all the experience of Europe, with the materials and inducements which no country of Europe possesses. They will soon become familiar to us, as turnpike roads have become, if we can only be prevailed upon to attempt them in earnest.

If sea vessels entering the harbors of Boston and New York, respectively, could continue their voyages inland, without interruption, from the former to St. Mary's, in Georgia, from the latter to Lake Erie, and thence to New Orleans, would there remain a doubt of the advantages of such an inland navigation? Would there be found in the United States a single voice to oppose the purchase, if they were to be obtained for 10, or even $20,000,000? Yet such and greater advantages are clearly within our reach for $10,000,000, if that sum can be so applied as to insure the completion of the system of improvement by roads and canals to which the natural advantages of this country invite our attention. A steam navigation would be rendered practicable, not only between the distant points just mentioned, but in all our bays, lakes, and largest rivers—a navigation decidedly superior to that of sea vessels in all narrow channels, as may be inferred, not only from the nature of things, but from the important fact that, while yet in its infancy, it has in a great measure supplanted the long-established use of sea vessels in most of the bays and large rivers of the United States. A detail of the advantages of such a navigation to the United States as a community will not be attempted, because an enumeration and estimate of them is impracticable. A few of the most immediate and prominent effects of a well-digested system of improvement, calculated to insure them to our country, will be merely noticed, leaving every mind to imagine (for imagination can hardly exaggerate) their multiplicity and importance.

1st. No sooner will the National Government have fairly commenced the system, than a general confidence in its completion will be inspired. Its benefits will be felt, in anticipation, in the value of lands, in an increased activity, in the general prosperity, and, consequently, in the revenues of the United States. These, in an average of ten years, will have been increased beyond what they would have otherwise produced by an amount greater than that of the whole sum which will have been expended or employed in the requisite works.

2d. Its operation will tend to perpetuate the republic and the Union by an indissoluble community of interests, habits, and attachments; to give celerity of movement, and consequent efficiency, to the military force, as well as an easy exchange and distribution of the necessaries of life, whenever the country may be again visited by the calamities of war.

3d. In times of peace or war, it will give a due value to every production of land and labor, whether of agriculture, minerals, forests, fisheries, or mechanic arts; promote, by the certainty of reward, every well-directed branch of domestic industry, the diffusion of science and of morals, the happiness and comfort of the whole community, by the facility of personal and social as well as commercial intercourse.

4th. It cannot fail to add a new and magnified importance to our foreign as well as our domestic commerce, in making it acceptable to all the productions of the most interior parts of this great continent, which productions will continually increase with the population and progress of improvement.

5th, and finally. It would give a new and more elevated character to the nation, to the republic, in all its domestic concerns, in all its foreign relations, in the comfort, happiness, and prosperity of its citizens, in the permanence of its free institutions, and in the incalculable amount of its public resources.

The same principles and considerations which serve to direct the attention of the committee, in relation to internal navigation, to such routes as are of peculiar national importance, will also point out those roads which seem to require most immediately the attention of the Federal Government, exclusive of portage roads already noticed.

The routes which seem exclusively to claim public and general attention are—

1st. From Maine to Louisiana, in the general direction of the seacoast and main post road, and passing through all the principal seaports. The expense of a good road upon this route may vary according to the construction adopted.

2d. Another object, next, if not equal in importance, would be the improvement, on a less expensive scale, of certain portions of roads leading to the principal naval and military depots and posts, and other important points, in the interior and upon the extremes of the Union. The points contemplated are Sackett's Harbor, Erie, in Pennsylvania, Detroit, in the Michigan Territory, St. Louis, in the Missouri Territory, and New Orleans, in Louisiana.

It remains for the committee to recapitulate the objects of national importance comprised in this report, and to suggest such measures as the general object requires, in their opinion, on the part of the National Government.

The principal improvements requisite to afford the advantages of internal navigation and intercourse throughout the United States and its Territories, are—

1st. Canals through four necks of land from Boston harbor to St. Mary's river, making, altogether, ninety-eight miles, besides a short cut or improvement across Cape Fear, and, as a more distant object, a canal communication, if practicable, from the Altamaha and its waters to Mobile, and from thence to the Mississippi.

2d. A canal from the Hudson or North river to Lake Erie; another from that lake to a navigable branch of the Ohio; some improvement in the bed of said branch, and probably in that of parts of the Ohio river; and a lockage or other improvement at the falls of Louisville.

3d. Improvements, by lockage or otherwise, as the case may require, in each of the principal Atlantic and southern rivers, and in their respectively correspondent northern and western waters.

4th. Turnpike or other permanent roads: 1. Across the mountains or intervening lands, where canals are found impracticable, or not advantageous, between the principal Atlantic and southern rivers, and one or more of their respective branches, at the highest navigable points, and the nearest navigable points on the correspondent northern and western waters; 2. A great turnpike or permanent road from north to south, in the general direction of the seacoast and main post route; and, 3. Improvements, on a less expensive scale, from some convenient point on the main road in York State to the principal military and naval posts and stations on the northern frontier of that State; from some convenient point or points on the Ohio to the principal military and naval stations and posts upon the northern frontiers of Pennsylvania, Ohio, and Michigan Territory; from Detroit to St. Louis, and from thence to New Orleans.

The measures which appear indispensably requisite, in the first instance, are: 1st. A permanent provision for ascertaining with accuracy the particular route, points, and situations for the best location of the proposed improvements, by procuring draughts or plats, with explicit written descriptions and explanations, from actual surveys and levels, to be taken under the authority of the United States, or otherwise; 2d. To provide the necessary funds for an annual expenditure or application to such improvements, to such amount as may be found advantageous.

With respect to the particular mode in which a portion of the national resources might be most advantageously applied to such objects, that must necessarily vary according to the object and existing circumstances at the time of expenditure, and may be provided for by law from time to time. When any object is purely national, and an expenditure upon it required by the public interest, this would constitute a fit subject for the direct and exclusive application of moneys from the national funds. Such objects, however, are believed to be very rare; so interwoven are the common with the local interests, that the former can hardly be consulted anywhere in relation to internal intercourse without affecting the latter in degrees varying according to circumstances. The necessary existence of this principle seems naturally to recommend the combination of those interests in the same object, under such guards and limitations as may effectually secure the public. The most eligible means to produce this effect are believed to be the establishment of a suitable fund to be invested for accumulation until actually required for its object; and the subscription on account of the United States for portions of the stock of companies incorporated, or which may be incorporated, under State authorities, for constructing such roads and canals, or for effecting such improvements in navigable waters, as shall, upon inspection under the authority of the United States, be approved by the Congress, to be paid out of such fund.

This plan is believed preferable to any other which has occurred to the committee in the essential points of efficiency and economy; to be less liable to any constitutional doubts, objections, or practical difficulties, and at the same time retaining in the National Government a sufficient controlling influence in the selection of the objects of improvement, and over the direction, plan, and construction of the improvement proposed, and in fixing the rates of tolls and charges.

1st. It would be efficient in exciting, encouraging, and calling into activity individual and local enterprise.

2d. It would insure economy, by securing the vigilant guaranty of the same individual and local interest.

3d. Less liable to constitutional doubts, objections, or practical difficulties, because it would narrow the whole constitutional question to the single one on which no doubts are known to exist, simply whether the National Government may invest the public money in permanent stocks; and it removes all intricacy and difficulty on the subject of repairs, toll-gates, the collection of tolls, and punishing depredations on the works.

4th. A sufficient controlling influence will be retained in the condition proposed to be prescribed to the subscription, that the proposed undertaking shall first be approved by the Congress.

It may be further remarked, in favor of this mode, that it excludes every idea of erecting in the General Government any improper influence of patronage, which some might apprehend, from the direct application of a large sum of money.

The only desirable object which the mode proposed (of subscription for stock) does not seem to embrace in the fullest extent, is, that of an equalization of the advantages resulting from the application of the national resources to the proposed objects among the several States; but even this desirable object it would approximate more nearly than would a direct application by the National Government.

But if it be deemed necessary and practicable more perfectly to secure this object, a distinct and separate fund should be provided for the purpose, to be distributed among the States as justice may dictate, or according to representation, leaving the former to be employed in the mode proposed. For if the mode of distribution should be exclusively, or even chiefly, adopted, (and the money given over to the exclusive control and direction of State authorities,) it is evident that the national interests cannot be exclusively, or even chiefly, consulted; they would be abandoned so far as the subject of internal facilities of intercourse extends to the State Governments—a course which, if the objects in question be of national importance, and which it is believed few or none can doubt, would not be justified by the constitution of the United States.

With the foregoing remarks, and reserving for an additional report such further details as the materials which the committee possess and may be enabled to collect during the remainder of the session, the following resolution is submitted:

Resolved, That the President of the United States be requested to take measures for ascertaining as far as practicable, and report to this House at the next and every subsequent session of Congress, such roads, canals, and improvements in watercourses as are required in a general system of inland navigation and intercourse throughout the extent of the United States and the Territories thereof, best adapted to facilitate the intercourse necessary for personal, commercial, and military purposes.

14th Congress.] No. 428. [2d Session.

JUDGE OF THE SIXTH CIRCUIT PAID FOR EXTRA SERVICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 13, 1817.

Mr. Wilde, from the Committee on the Judiciary, who have been instructed to inquire into the expediency of allowing the judge of the sixth circuit court of the United States a sum equal to the salary of the judge of the district court of South Carolina for the term of one year, during which time the said circuit judge was compelled, by law, to perform the duties of the judge of said district court, reported:

That it is expedient to allow the judge of the sixth circuit court of the United States a sum equal to the salary of the judge of the district court of South Carolina for the term of one year, during which time the said circuit judge was compelled, by law, to perform the duties of the judge of said district court, and therefore submit the following resolution:

Resolved, That the sum of $1,800 be allowed to the judge of the sixth circuit court of the United States for extra services performed under the act passed 2d March, 1809, entitled "An act further to amend the judicial system of the United States," and that a clause appropriating that amount be inserted in the bill making appropriations for the present year.

Sir: Washington, *February* 12, 1817.

I do not know that ever I should have brought forward my claim against the United States had not a precedent been set at the last session, by which I consider the Government as having already acknowledged a compensation to be due to me. In such a state of things, it would be affectation not to come forward to receive it. I never had a doubt that I was justly entitled to compensation, but I was unwilling to press it (trifling as it was) during the times of financial embarrassment and war, and I confess I was in hopes that I should have been spared the necessity of bringing it forward in any shape myself.

The facts in my case are these: On the 4th July, 1808, Judge Bee was attacked with a disease which rendered him unable, from debility both of mind and body, to discharge the duties of his office. From that time to the March following the business accumulated in the district court, and, as you may well suppose, during the time of the restrictive system, it increased to a most inconvenient bulk, and subjected the Government in that quarter to great inconveniences. The subject was laid before the Executive, and brought before Congress, and I was honored with a consultation on the means to remedy the evil. I saw none but what resulted from vesting the circuit court and judge with the powers and jurisdiction of the district judge, and I pledged myself to acquiesce. I think I had reason to expect that, in the act passed on the occasion, compensation should be provided, or at least that it should have been suggested at some subsequent period. If my delicacy prevented me from pressing it at that time, I respectfully conceive that it ought not to prejudice me now.

In March, 1809, I returned from Washington, and immediately entered upon the business of the district, and from that time until I again left Charleston to attend the Supreme Court, I was constantly employed in discharging the duties of the district judge, except when absent on my own circuit, and I will undertake to say that there never was a year in which the duties were more arduous or important.

It will be perceived that there is a proviso in the act purporting that "the circuit judge shall not be obliged to hold special admiralty courts;" but, notwithstanding this exemption, I determined that giving a judicial power carries with it an obligation to exercise that power, and suffered no business of the district of any description to lie unattended to.

I have never petitioned for or solicited remuneration, as well for the reasons above stated, as from an unwillingness to pass through the ordeal of a public discussion of a right on which a doubt could be entertained. I now consider the question of right as settled in the case of Judge Van Ness, and the quantum only as open to discussion. On that point I have nothing to say. Congress will do that which comports with its own dignity and its opinion of my deserts, or what is due to the relation in which I stand to other public functionaries. I am particularly desirous that the question be disposed of at the present session, as I have set a precedent, upon which the discharge of a similar duty may at some time or other be pressed upon my associates. I am, therefore, bound to ascertain in their behalf whether in such case they are to be considered as entitling themselves to a remuneration from Congress, or must have duties without limitation heaped upon them without compensation.

With the greatest respect, sir, your very humble servant,

WILLIAM JOHNSON, Jun.

14th Congress.] No. 429. [2d Session.

ROADS AND CANALS.

COMMUNICATED TO THE SENATE, FEBRUARY 14, 1817.

Mr. Lacock, from the committee appointed on so much of the President's message as relates to roads and canals, reported, in part:

That, on the general utility and national importance of roads and canals, little remains to be added to the stock of information now in possession of the Senate, and to be found in the several reports made on that subject. The committee, however, would observe, in addition, that the present period appears to them peculiarly propitious and

strongly invites to the commencement and prosecution of such a system of public improvement. To the pleasing prospect of peace abroad, we enjoy mutual confidence and tranquillity at home; our resources are abundant; our public revenues ample; our citizens at all times evincing a willingness to make every sacrifice for the public good, and on whom perfect reliance may be placed, more especially when the contributions required must, when obtained and judiciously applied, promote their own interest, and add, in an eminent degree, to the wealth, comfort, and safety of the nation; and it appears to your committee that the experience dearly purchased in the late war should not be regarded with indifference. Much of the money expended in the necessary defence of the seaboard, as well as the lives of many valuable citizens, would have been saved to the nation had a good inland water communication been made on our Atlantic frontier. The transportation of our armies, with all the munitions of war, to the most vulnerable points, would have been facilitated, and the advantages of the enemy, arising from the celerity of his movements by water, greatly diminished. Moreover, the products of the west and south, consumed in the east and north, could have been transported secure from the common hazards of a sea voyage, and in defiance of blockading squadrons; and thus the inhabitants of the United States, dispersed over a vast territory, embracing various climates, suited to the production of all the necessaries and many of the luxuries of life, might, even in a state of war, rely with comfort and security on their own internal resources.

To these advantages, that refer themselves more especially to a state of war, must be added those, if possible, of a more imperative character, that will at all times arise to the nation from an improved state of her roads and inland navigation.

The people of these United States are spread over an extensive territory, and that dispersion of inhabitants is keeping full pace with the increase of population; and by a people thus dispersed, of different habits and pursuits, and in many instances with discordant views, is the national sovereignty exercised, and its fundamental powers directed; for, politically speaking, there is in the United States but one order or grade known—*that of the people;* and hence arises the imperious necessity in a Government thus constituted of tying together the whole community by the strongest ligatures. This your committee believe can be best effected by the construction of roads and canals: by these means commercial and social intercourse will be made easy; industry in all its branches encouraged, by the increased rewards bestowed on every exertion; the love of country will be awakened, and a laudable spirit of national pride substituted in place of sectional jealousies; a community of interest and feeling will produce mutual confidence and affection: thus, being one people, the nation can have but one object in view—the continuance and preservation of a Government founded in equity and justice, administered for the advantage of all, and calculated in the calm of peace to call forth talents and industry for the acquisition of property, and in war the surest guaranty for its security and protection.

With these general observations on the national importance of internal improvements, your committee will endeavor to lay before the Senate a general outline of such public works, embracing the United States generally, and consulting as far as practicable the interest of each section of the Union, and which they conceive, in a further improved state of our national industry, may be completed without embarrassment to the operations of the Treasury, or imposing additional burdens on the people.

On the subject of national roads. The first that presents itself, and of primary importance, is a turnpike from Maine to Louisiana, passing through the seat of the National Government and the principal cities and towns on this route; secondly, roads to connect the highest navigable points on the Atlantic rivers with such points on the corresponding streams that fall into the northern and western lakes, and the Mississippi river and its branches; and, lastly, such military or other roads as may serve to connect the scattered settlements in our States or Territories with the more compact population of the interior, and thereby secure the frontier settlements, in a great measure, from hostile annoyance, and enhance the value of the public lands by inducing a more dense population.

The other branch of this system of public improvements, and equal if not superior in importance, is the construction of canals and the improvement of the navigation of our rivers.

1. An inland or shore navigation from the harbor of Boston to the river St. Mary's, in Georgia. To connect these points, it is ascertained that not more than one hundred miles will need the aid of canals, and, from an estimate made by Mr. Gallatin, when Secretary of the Treasury, will incur an expense little exceeding $3,000,000—less, it is believed, than $200 per mile, taking the whole distance of this water communication.

2. A canal from the Hudson or North river to Lake Erie, and from that lake to some of the many navigable waters of the Ohio river which approach within a few miles of its margin, or intermix with its navigable waters.

3. The improvement of the navigation of the Ohio river, more particularly the falls at Louisville.

4. The improvement of the several Atlantic rivers, and the corresponding streams that empty into the Mississippi and Ohio rivers.

14th Congress.] No. 430. [2d Session.

NOTIFICATION OF THE PERSONS ELECTED TO THE OFFICES OF PRESIDENT AND VICE PRESIDENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1817.

Mr. Jackson, from the committee of the House of Representatives appointed, in pursuance of the joint resolution of the two Houses, "to ascertain and *report* a mode of *examining* the votes for President and Vice President of the United States, and of *notifying* the persons elected of their election," reported:

That, after the votes had been counted and the result declared, they sought an interview with the committee of the Senate, for the purpose of agreeing to some mode of "notifying the persons elected of their election," and were informed by them that the Senate had entered into a resolution upon the subject. To the remark of your committee, that, in their opinion, this course was irregular, the committee of the Senate answered that it was settled by precedent, and that, if the House of Representatives at any time had a claim to participate in this act, they

had surrendered it; they added, it was a source of regret to them that any misunderstanding should result from their proceeding, and they would recommend to the Senate a reconsideration of their vote, and communicate the result to your committee. Their chairman afterwards informed your committee that he had made such a motion, and that the Senate had refused to adopt it.

Your committee found, on investigation, and so informed the committee of the Senate, that, with a single exception in all cases where the President elect was not the President of the Senate at the time of his election, the House of Representatives had resolved either to send a committee to wait on the President and give him the notice, or that the notice should be given in such manner as the Senate should prescribe; that, in one case, where the election devolved on the House of Representatives, and the President of the Senate was chosen, they had appointed a committee to inform him of his election; and that, in the excepted case, it seemed to be the result of inattention to the duty prescribed by the joint resolution, and passed *sub silentio*.

It is not the purpose of your committee to censure as wanting in courtesy to the House of Representatives the proceedings of the Senate, which, regardless of the joint resolution originating with that body, has assumed the exclusive right of doing an act which they thereby admit should result from the concurrent order of the two Houses, and which is not by the constitution or laws expressly prescribed as the exclusive duty of either. They are actuated by other considerations, more important, founded in a reverence for principles which should never be violated. They are of opinion that, in regard to the momentous subject of the election of President and Vice President, forms should be respected, for substance is intimately connected with forms in all matters of legislation, on all subjects connected with the acts of Congress, and counting the votes for President and Vice President is by the constitution required to be an act of Congress, as the votes are to be opened "in the presence of the Senate and House of Representatives," and shall then be counted. This may at first seem to be a mere formality; but if it were so, why not let the Senate alone count these votes? why not permit the President of the Senate to open and count them in his chamber? The answer is, that the framers and ratifiers of the constitution have thought it wise to guard against any improper practices, by prescribing a more solemn mode—a mode which demands that the two Houses shall be assembled at the time and place of opening and counting the votes. They have also manifested a peculiar confidence in the House of Representatives, who alone are authorized to elect a President in all cases (and they may often occur) where no person has a majority of the whole number of votes given by the electors. As, however, the constitution and the laws are silent in regard to the legality of the electoral votes, neither House can properly claim the exclusive right of deciding who has a majority of them—in other words, what votes shall be counted. Nevertheless, the recent investigation of the votes shows the possibility—even the probability—of a contest upon this point, as it has been claimed by some to belong to the Senate to decide exclusively upon the admissibility of the votes, in consequence of the duty imposed upon the President of the Senate, by the constitution, of performing the manual labor of opening the certificates. If the Senate should at any time hereafter assert this claim, and decide contrary to the judgment of the House of Representatives, it will follow that the exclusive right, assumed by their resolution, of notifying the persons elected of their appointment, becomes a most important one.

In this Government (perhaps in all others) precedents to a certain degree settle principles; and your committee have seen that a single act, in violation of the authority from which it sprung, has been resorted to as a precedent for fixing this question. If the Senate had resolved that they would proceed to open and count the electoral votes on the day fixed by law, and that their President should notify the result to the persons elected, and had ordered that the House of Representatives should be informed of their resolution, and be required to attend them, the act would have been resisted by the House as a usurpation; and your committee cannot distinguish between such a proceeding and the exercise of all or any essential branch of these powers, after adopting a resolve by which the House of Representatives are to participate with them in their exercise. It is, therefore, to resist the authority of a single innovation resulting from accidental inattention, to re-establish the early and repeated precedents upon this subject, and to assert the just rights of the House of Representatives, that your committee have considered it to be their duty to submit their report, so that the House may take such order thereon as they shall think proper.

14th Congress.] No. 431. [2d Session.

CITY OF WASHINGTON: PROGRESS MADE IN REBUILDING THE PUBLIC EDIFICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 18, 1817.

Mr. Condict made the following report:

The Committee on the Public Buildings have been unable to obtain, until the 13th instant, an estimate of the expenses to be incurred in re-erecting the public edifices, which has necessarily delayed to so late a period of the session the report which they now present to the House.

Early in the session the committee addressed a letter to Colonel Lane, the commissioner, desiring him to furnish a statement of the progress made in repairing the buildings, the amount of moneys disbursed, with such other information on the subject as he might think important.

On the 3d January the committee addressed a second letter to the commissioner, requesting a statement exhibiting the number of laborers employed during the season, and the compensation given them; the names and number of persons employed either as clerks, superintendents, master workmen, or overseers, not actually employed at hand labor, with the wages allowed them; and, also, whether any difference is made in the price of a day's labor in different seasons.

On the 29th of January the committee requested to be furnished with a detailed estimate of the probable expenses to be incurred in completing the buildings, and what particular causes had retarded the progress of the south wing of the Capitol, and when it might probably be ready for the accommodation of Congress. This correspondence, including the answers of Colonel Lane, the commissioner, with the accounts of his disbursements, the reports made to him by the architects of the Capitol and President's house, their respective estimates, &c., are all included herein,

and submitted as a part of this report. Besides the *detailed* account of disbursements made to individuals for the various items of expenditure, there is submitted herewith a summary showing the amount expended for *materials*, for *labor*, and *incidental* expenses, each item separately, for the Capitol and for the President's house.

Another view of the expenditures is submitted, showing the amount disbursed by the three commissioners under the act of 1815, on each of the public buildings, viz: the Capitol, President's house, and the offices, as well as the sum expended by the present commissioner on each one of the same objects.

The committee have every reason to believe that the commissioner, Colonel Lane, has faithfully devoted his time and services to the discharge of his duties, and that the public moneys intrusted to his care have been applied as economically as circumstances would permit. In some instances a high price has been paid for materials, owing to the scanty supplies furnished by the markets of this place, and where the immediate want of the article did not allow time to seek it elsewhere.

The committee deem it their duty also to state that a considerable sum has been expended, and much time lost, in pulling down and rebuilding a part of the work done in 1815, from a change of the plan of the Senate chamber and the adjacent apartments. For particulars, they refer to the commissioner's letter of 15th February, 1815.

The estimate furnished by Mr. Hoban, architect of the President's house, is as much in detail as could be expected; but the one furnished by Mr. Latrobe is deficient in point of detail, and by no means satisfactory to the committee. They were informed, however, by the commissioner, that it was the only one he could obtain of that gentleman.

To enable the commissioner to proceed with the greatest despatch in completing the public buildings, the committee have thought it advisable that an additional appropriation be made for the service of the coming year, and therefore submit the following resolution for the consideration of the House:

Resolved, That it is expedient to appropriate the further sum of ——— dollars towards the completion of the public buildings.

SIR: CAPITOL, *November* 28, 1816.

Agreeably to your desire, I submit the following report upon the present state of the Capitol, and upon the progress which has been made in repairing and completing the building during the late season.

1. *The south wing of the Capitol.*

The south wing of the Capitol remains *internally* in the state in which it was left at the close of the year 1815, excepting in as far as the *suggestions of the committee of the House of Representatives to the person appointed to superintend the repairs of the Capitol* have been so far executed as to prepare the south windows of their hall for an access to a platform along the south front. *Externally*, all the injury which was done to the windows and doors by the fire has been repaired.

To account for the apparently neglected state of this part of the Capitol, it is necessary to enter into a detail of the circumstances which occasioned it. When Congress resolved to repair and rebuild the public buildings, the District was divested of all building materials. The hall of Representatives was so ruined that, although the columns and the vault they supported still stood, it was inevitably necessary to take them down, so as to clear the whole area of the principal story of the former work. On this occasion a plan was submitted to and approved by the President, by which the inconveniences experienced in the former House were endeavored to be obviated, and the areas both of the House and gallery considerably enlarged. To execute this plan, and to repair the public buildings generally, large supplies of freestone were necessary. The quarries, which are situated forty miles below the city on the Potomac, had been neglected for some years, and time and much labor were required to open them. Contracts were made by the proper officers for the freestone with several persons, proprietors of the old quarries, and new quarries were opened and engaged in the supply. But as yet no stone equal in quality, and as fit for the most important parts of the work as that formerly produced, has been found in any old or new quarry; and, as far as the work has proceeded, stone of coarser texture has unavoidably been employed, strength and durability being the only qualities which could be attended to.

For the columns, and for various other parts of the House of Representatives, no freestone that could be at all admitted has been discovered. Other resources were therefore sought after. A stone hitherto considered only as an incumbrance to agriculture, which exists in inexhaustible quantity at the foot of the most southeasterly range of our Atlantic mountains, (probably along the greatest part of their extent, but certainly from the Roanoke to the Schuylkill,) and which the present surveyor of the Capitol, and probably others, had many years ago discovered to be a very hard but beautiful marble—this was examined, and, after much labor and perseverance, has been proved to answer every expectation that was formed, not only of its beauty, but of its capacity to furnish columns of any length, and to be applicable to any purpose to which colored marble can be applied. The present commissioner of the public buildings has, therefore, entered into a contract for all the columns, and progress has been made in quarrying them. They may be procured each in a single block, should the transportation be found convenient. A block of one of the pilasters lies ready to be brought down to Washington, and will probably arrive in a few days. The quarries are situated in Loudoun county, Virginia, and Montgomery county, Maryland.

But not only for the columns, but for the entablature also, many very important blocks are still deficient, which must necessarily be of freestone. Those which have been procured have been wrought as fast as they arrived, or are now in hand. The whole number of blocks required is 296; on the spot and wrought, 106; on the spot, unwrought, 15; deficient, November 28, 1816, 175. Of the plain work in freestone, forming the front of the gallery and the south side of the hall, the whole is here wrought, and ready to be set.

It is evident, therefore, that it would have been imprudent and useless to take down the temporary roof which protects the committee rooms in the lower story. No time would have been gained, and a very considerable expense would have been incurred in replacing it at the close of the season.

2. *North wing of the Capitol.*

The north wing of the Capitol was left after the fire in a much more ruinous state than the south wing. The whole of the interior of the west side having been constructed of timber, and the old shingle roof still remaining over the greatest part of the wing, an intensity of heat was produced which burnt the walls most exposed to it, and, being driven by the wind into the Senate chamber, burnt the marble columns to lime, cracked every thing which was of freestone, and, finding vent through the windows and up the private stairs, damaged the exterior of the wing very materially. Great efforts were made to destroy the court room, which was built with uncommon solidity, by collecting into it, and setting fire to, the furniture of the adjacent rooms. By this means the columns

were cracked exceedingly; but it still stood, and the vault was uninjured. It was, however, very slenderly supported, and its condition dangerous. Of the Senate chamber no parts were injured but such as were of marble or freestone. The vault was entire, and required no repair whatever. The great staircase was much defaced, but might have been reinstated without being taken down.

In this state the north wing was found when the work on the Capitol was commenced in 1815. The plan of that wing was determined in 1807, and laid before Congress. The original document having escaped destruction, the work was begun in conformity thereto, and some progress made in the construction of the offices of the judiciary and of the library, when a very important and extensive improvement of the apartments of the Senate was suggested by that honorable body, and ordered by the President to be carried into execution.

In pursuance of this order, it was necessary to take down the vaults which had been constructed on the west side of the house, and to raise them to the level of the principal floor. This alteration was the only one which affected the work carried up in the year 1815. It was effected in the months of May and June. The ruinous state of the building further required that the dome of the centre vestibule, the colonnade, and all the vaulting of the court room, and the dome of the great stairs, with all the walls as far as they were injured, should be taken down. The enlargement of the Senate chamber required that the great dome of that apartment and its semicircular wall be entirely removed, and that the arches and walls of the two committee rooms, and the lobby adjoining the chamber, should also be demolished. All this was promptly accomplished, and the new apartments carried up with all the speed which was consistent with solidity; so that all the committee rooms on the floor of the Senate are completely constructed and vaulted, and the wall of the Senate chamber itself has advanced to the height of ten feet from the floor.

The new vault of the court room, much more extensive than the former, is also completed. All the new work is so constructed as in no part whatever to bear on the old walls, but to serve as a support to them; and the whole is so bound and connected together as to render the building much more strong and durable that it was before the conflagration.

Having now complied with your request to "report to you on the present state of the Capitol," I will further remark, that in the newly discovered marble of the Potomac there is an inexhaustible resource of the most beautiful building material, in a situation easily accessible by water, from whence it may be transported to the very foot of Capitol hill; and that for our future operations the extended work on the freestone quarries will not probably fail to afford the supplies which have hitherto been wanting.

In complying with your request *to report on the work done during the present year, including the pulling down as well as building up*, I have confined myself to the transactions of the season; but I will add, that there is still to be made a very considerable change in the south part of the north wing, in order to complete the design suggested by the Senate. For these alterations a considerable quantity of materials is provided, and other preparations made.

I am, very respectfully,

B. HENRY LATROBE,
Surveyor of the Capitol of the United States.

The COMMISSIONER *of Public Buildings, United States.*

SIR: CAPITOL, *December* 3, 1816.

I now beg leave to comply with that part of your letter of the 25th of November which requires *an estimate of the principal materials required to complete the repairs of the Capitol, and a notice of the materials on hand.*

FREESTONE.

	Tons.
1. For the hall of Representatives we shall require 175 blocks of the first quality of stone, making	205
2. For the vestibules and interior of the north wing, for which I have been able to make designs in minute detail, so as to determine accurately the dimensions of each stone,	225
3. For the exterior of both wings, minutely drawn and determined,	270
4. For those parts of both wings for which the drawings in detail are not made out, but which are generally fixed, (estimated)	300
	1,000

		Tons.
Of freestone, we have received since the commencement of the work,		1,052
Of which quantity there are set in the building,	462	
Wrought, and ready to be set,	410	
Unwrought, or in hand,	180	
		1,052

MARBLE.

	Tons.
A contract for all the marble columns and pilasters of the House of Representatives being in a course of execution, this item may be considered as provided for. It consists of 22 columns, of 11 tons each,	242
Four pilasters, of 6 tons each,	24
	266

For the Senate chamber and vestibule are required 12 columns and 18 pilasters, for which arrangements are in progress.

For the entablatures of the colonnade of the Senate chamber no present provision is made, but it is ascertained that no difficulty will occur in procuring them. They will require, as nearly as can be estimated from the general drawings, 750 cubic feet of marble.

The freestone used hitherto for the staircase of the Capitol being found by experience to be too soft to be sufficiently durable, the new staircase of the Senate will require 240 cubic feet of marble steps and platforms. The marble paving of the public vestibules of both wings amounts to 4,200 feet. Experience has proved that bricks

being unequally hard, in a short time give a bad pavement; and it is believed that marble pavement of Italian or even American marble can be procured and laid at as small expense as a pavement of freestone. A considerable quantity of common Italian paving tile of marble is on hand, say 1,000 superficial feet.

The marble capitals of the columns of both wings are, it is believed, finished, and will arrive in the first public vessel from the Mediterranean. The marble blocks for the sculptors from Italy have been ordered six months ago.

QUARRY STONE.

The detailed drawings not being complete, an exact account of the quantity required cannot be given, but it will not exceed 500 perches.

BRICKS.

The quantity contracted for during the past season not being delivered, there is a deficiency of - - - - - -	200,000
To complete the brick work of both wings, there will be required another supply of -	800,000
	1,000,000

I will remark that I have estimated both the bricks and the quarry stone largely, on account of the uncertainty of the extent of some of those parts of the work which require to be executed in these materials.

Bricks moulded in a particular form for arches, &c. - - -	50,000
Lime, - - - - - - -	250 barrels.

LUMBER.

The supply of lumber on hand, and still due on contracts, is so large that no further supply appears to be required.

Of the materials received and on hand, other than freestone, the following is a correct account:

	On hand May 1, 1816.	Received since May 1, 1816.	Expended since May 1, 1816.	On hand Dec. 1, 1816.	Denominations.
1 inch white pine panel plank, -	25,000	78,036	20,000	83,000	Feet.
1½ inch white pine panel plank, -	-	15,123	-	15,123	Do.
2 inch pine panel plank, red, -	-	68,424	500	67,924	Do.
1 inch common panel plank, -	-	6,660	4,000	2,660	Do.
2 inch common panel plank, -	-	2,760	760	2,000	Do.
1 inch common yellow pine, -	-	216,580	62,000	154,580	Do.
2 inch common yellow pine, -	400	20,000	10,400	10,000	Do.
Scantling, - - -	-	7,654	7,054	600	Do.
Yellow pine timber, - -	-	1,200	300	900	Cubic feet.
Mahogany, - - -	8,000	-	500	7,500	Do.
Scaffold poles, - - -	-	200	200	-	No.
Bricks, - - - -	30,000	536,332	520,082	46,250	Do.
Bricks taken down and cleaned, -	-	350,000	300,000	50,000	Do.
Quarry stone, - - -	340	48	18	370	Perches.
Lime, - - - -	700	1,475	1,500	675	Barrels.
Sand, - - - -	-	2,363	2,363	-	Do.
Plaster of Paris, - - -	-	12½	2	10½	Tons.
Bar iron, - - -	-	42c. 1qr. 37lbs.	17c. 2qr. 15lbs.	24c. 3qr. 22lbs.	
Cordage, - - -	-	2,752	2,500	252	Pounds.

B. HENRY LATROBE, *Surveyor of the U. S. Capitol.*

To the COMMISSIONER *of Public Buildings.*

Report of James Hoban, superintendent of the President's house, of the state of that building, and of its progress during the current year.

OF THE CARPENTER'S DEPARTMENT.

The roof has been framed and raised on the building, and the gutter carriages all around the building have been laid. The internal gutters are nearly completed. The body range of the roof has been covered with shingles until the balustrade is finished and the chimneys are carried up, after which it will be covered with copper.

The trussed partitions and the trussed girders, with the binding joists throughout the building, are all framed and raised, and all the thorough joists of the building are in place, and the ceiling joists are put up in part.

The trimmings of all the doorways of the house, as jambs and soffets, are all framed and panelled, and the doors of the principal story are framed; the ornamental parts of the panels are in progression—all mahogany.

The framing of the doors of the chamber story and panelling are in a state of forwardness, and will progress through the winter; they are all of mahogany. The trimmings of all the windows of the house are framed and panelled, as linings, shutters, backs, elbows, and soffets. All the window frames of the house are finished and primed, and all the sashes of the principal and chamber stories are of mahogany, finished and ready for glazing. The sashes of the basement story are also finished and ready for glazing. The ornamental decorations of the doors and windows of the interior of the building are in a state of progression.

OF THE CUT STONE AND BRICK-WORK.

All that part of the stone and brick-work of the north front of the President's house, to the west of the centre of the building, has been taken down to the level of the floor of the principal story; and all that part of the north front, to the east of the centre of the building, has been taken down to the level of the floor of the chamber story; the whole of the walls have been rebuilt, and the entablature of that front has been finished.

At the west end of the building, the centre part has been taken down from the circular window in the chamber story, to the floor of the basement story, the whole of which has been rebuilt, including the Venetian doorway and the Venetian window, with one Ionic capital for the angle pilaster cut and set, as also the entablature of the north-west angle of the building.

All that part of the east end of the building south of the centre has been taken down to the level of the floor of the principal story; the centre part, including the Venetian doorway, Venetian window, and circular window, has been taken down to the level of the basement floor, the whole of which has been rebuilt, including seven Ionic pilaster capitals, which have been cut and set, as are also the architrave and frieze, and the dentil bed of the cornice.

All the parts of the windows of the basement story that were found to be any way defective in point of durability have been cut out, the whole of which have been rebuilt, and are now finished.

The brick arching of the kitchen and cellar, which had progressed, but had been suspended until the building was covered in, will be carried on as the season may permit. The interior walls have been repaired as far as the scaffolding extended. The injury they received did not materially affect the stability of the building.

Of the materials on hand.

24,000 feet 5-4 yellow pine plank.
10,000 feet 4-4 yellow pine plank.
10,000 feet 4-4 Susquehannah clear pine plank.
2,000 feet mahogany.
20,000 feet yellow heart pine, in stocks.
10,000 feet 5-4 flooring plank.
85 kegs of white lead, 25 lbs. each.
250 barrels of lime.
50 barrels of sand.
327 tons of freestone.
10 tons of plaster of Paris.

Copper for gutters and inclined planes; all the nails, brads, and sprigs; Boston glass for glazing the sashes. All the ironmongery is ordered, and copper for the body of the roof.

All which is respectfully submitted by, sir, your obedient servant,

DECEMBER 3, 1816. JAMES HOBAN.

SAMUEL LANE, Esq.,
Commissioner of Public Buildings, Washington City.

SIR: WASHINGTON, *December* 12, 1816.

Should it be directed to proceed with the work of the President's house with a view to the accommodation of the President of the United States in that building by October next, I would suggest that the following portion of it, comprising the centre and west end, should be carried on, and which part I think might, with considerable exertion, be got ready, viz:

All the basement story.

Of the principal story—

	Feet.
The elliptic saloon,	30 by 40
The hall or vestibule,	45 by 48
Two rooms,	22 by 28
Two rooms, dining and drawing,	28 by 38
One room,	14 by 18

Exclusive of staircase, passage, &c., which will be ready.

Of the chamber story—

The elliptic drawing room,	30 by 40
Two chambers,	22 by 28
Two chambers,	25 by 28
Two chambers,	18 by 28
Two dressing rooms,	13 by 28

Exclusive of the passages and staircases.

All which is respectfully submitted by, sir, your obedient servant,

JAMES HOBAN.

N. B. The principal staircase was put up after Mr. Jefferson came to the President's house, and much of the carpenter's work and painting were to be done to the hall and rooms.

SAMUEL LANE, Esq.,
Commissioner of Public Buildings, Washington City.

Abstract of disbursements made by Samuel Lane, Commissioner of Public Buildings, between the 30th of April and 1st of October, 1816, on account of the Capitol of the United States.

WASHINGTON, *December* 12, 1816.

SAMUEL LANE, *Commissioner of Public Buildings.*

NOTES.—Of the above disbursements, the sum of forty thousand five hundred and sixty-six dollars fifty cents was paid for materials delivered under contracts made with the former commissioners, fixing the quantity and price beyond my control; and, in general, the salaries of architects, superintendents, &c., were determined prior to my entering upon the duties of commissioner.

The vouchers numbered as above have been deposited by me in the office of the Auditor of the Treasury.

S. LANE.

SIR: WASHINGTON, *January* 4, 1817.

I have had the honor of receiving your letter of the 3d instant, requiring a statement exhibiting the following particulars, viz:

"1. The number of hands employed during the past season, &c., and the compensation given them."

I beg leave to refer to the papers marked A and B, as containing the information here required; they being reports (one from each building) such as I have caused to be made every other day through the season. The number of hands, however, varies almost daily. Perhaps the reports here referred to may exhibit about the average number. [The statements A and B are not to be found.]

"2. The names and number of persons employed, either as clerks, superintendents, master workmen, or overseers, not actually engaged at hard labor, and the compensation allowed them."

To provide checks against abuses in the disbursement of public money, either on account of labor or materials furnished, and to insure the faithful execution of every branch of the work, as well as to embrace the professional skill and talents requisite for conducting a great national work, it was an arrangement made at the commencement of the public buildings here, and experience has fully established its utility, to appoint subordinate agents in each department, who, though not required to perform manual labor, have more important and more arduous duties to discharge. The following list comprises the persons of this description, viz:

AT THE CAPITOL.

	Compensation.
B. Henry Latrobe, architect,	$2,500 00 per annum.
Shadrach Davis, clerk of the works,	4 00 per day.
Henry Hillman, foreman of the stone-cutters,	3 75 do.
*John Queen, foreman of the bricklayers,	3 00 do.
Leonard Harbaugh, foreman of the carpenters,	2 50 do.
Thomas Howard, overseer,	2 12½ do.

AT THE PRESIDENT'S HOUSE.

James Hoban, architect,	1,600 00 per annum.
Peter Lenox, clerk of the works,	4 00 per day.
Robert Brown, foreman of the stone-cutters,	3 75 do.
Nicholas Callan, overseer,	2 00 do.
George Blagden, inspector of stone and superintendent of the stone-cutters and setters at both buildings,	1,500 00 per annum.

"3. Whether any, and what, difference is made between a day's labor in the summer and winter seasons; or whether the hands are paid in proportion to the quantum of labor performed."

* When the bricklayers are discharged, the compensation of their foreman stops, of course.

It is attempted to apportion the compensation, as far as is practicable, to the services rendered. Thus, among workmen of the same class, different rates of pay are established, according to their different degrees of merit. Thus, too, the wages of the same person vary with the seasons of the year. During the winter months the bricklayers, and about three-fourths of the laborers, are discharged. The stone-cutters and carpenters working in shops, with the laborers requisite to attend them, are retained. In graduating the wages of these to the different lengths of the day, it is found necessary to pay some attention to the custom and usages at other buildings. Thus, while from the stone-cutters during the winter season fifty cents per day, or one-fifth of their pay, is deducted, from the carpenters the proportion is only about one-thirteenth, or thirteen cents per day. Of the latter none are now retained but of the best kind, selected after a long trial of their merit; and to drive away these by a greater reduction of wages would be a serious injury to the public works, and one not easily repaired. Besides, it is a fact that those persons (as well as most of the others employed on the public buildings) have been retained through the summer at lower wages than were generally given for the same services by individuals, and that the carpenters were induced to stay only by an expectation of permanent employment through the winter. The wages of the laborers on the winter establishment are reduced from one dollar to eighty-seven and a half cents per day.

With great respect, I have the honor to be, sir, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. LEWIS CONDICT, *Chairman of the Committee on Public Buildings.*

Disbursements made between the 30th of April, 1816, and 1st of January, 1817, on account of the Capitol.

1st. For materials as follows, viz:			
955 tons 7 feet 10 inches of freestone,	$9,648 14		
634,608 hard bricks,	5,397 08		
437,028 feet of plank and scantling	17,335 88		
1,427 barrels of Thomaston lime,	5,084 02		
2,752 pounds of cordage,	476 00		
12,092 feet of scaffold poles,	604 60		
1,777 barrels of sand,	444 25		
332 bushels of plaster of Paris,	262 00		
111 cwt. 2 qrs. 25 lbs. iron,	808 16		
2 kegs of white lead,	12 00		
		40,072	13
2d. For labor as follows, viz:			
Stone-cutters and setters,	11,894 90½		
Carpenters, bricklayers, and laborers,	19,193 46		
		31,088	36½
3d. Incidental, that is,			
Freight, drayage, cartage, wharfage, tools, &c. &c.		3,963	91
Sundries, not chargeable under the above heads,		987	76½
		$76,112	17

On account of the President's house:			
544 barrels of Thomaston lime,	1,915 00		
216,934 feet of plank and scantling,	6,343 83		
836 tons 7 feet 9 inches freestone,	8,206 30½		
2,387¾ pounds cordage,	498 07		
134,475 bricks, hard burnt,	1,160 82		
5,174 cubic feet heart of pine,	2,069 60		
7,766 feet 11 inches mahogany,	2,065 52½		
100 kegs white lead,	450 00		
1,483 lights, large Boston window glass,	2,791 60		
60,000 shingles, 2 feet long, first quality,	780 00		
9,623 pounds copper, sheet,	3,767 60		
		30,048	35
Stone-cutters and setters,	9,358 90¼		
Carpenters and sawyers,	8,429 11½		
Bricklayers and laborers,	11,117 38½		
		28,905	40¼
Incidental,		3,965	25¼
Sundries, not chargeable under the above heads,		3,840	88½
		$66,759	89

Errors excepted.

WASHINGTON, *January* 22, 1817.

S. LANE, *Commissioner of Public Buildings.*

SIR: WASHINGTON, *January* 31, 1817.

In answer to that part of your letter of the 29th instant which requires information as to the probable time when the Capitol may be ready for the accommodation of Congress, I have the honor of stating that, if every practicable exertion be made, the Representatives chamber may admit of their reception in the autumn of 1818. That the Senate chamber may be completed by that time admits of no doubt.

Upon the other subjects embraced by your letter I shall report as soon as the inquiries which they demand will permit.

Very respectfully, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. LEWIS CONDICT,
Chairman of the Committee on Public Buildings.

SIR: WASHINGTON, *February* 1, 1817.

In reply to that part of your letter of the 29th ultimo requiring information as to the causes which have retarded the progress of the south wing of the Capitol, I beg leave to report, that, when I first entered the office of Commissioner of Public Buildings, I found that my predecessors, actuated by a laudable desire of renovating the Capitol of the United States in the most complete manner, and "believing that the sculptured ornaments could be procured on cheaper terms in Italy, made out of the best statuary marble, than in this country, made of the freestone heretofore used," had despatched in August, 1815, an artist to Italy, with instructions to procure the twenty-four Corinthian capitals for the Representatives chamber, and had for that purpose deposited funds to a considerable amount in Europe. These capitals were expected and directed to have been shipped at Leghorn previous to the 1st of April last; but, owing to causes not yet explained, no intelligence is received, though daily expected, of their arrival in this country. It was further stated by the architect that no freestone of the quality heretofore used, or that ought to be used, for the columns of the Representatives chamber, was now to be procured at any of the quarries from which we drew our supplies of that article, and that therefore it was necessary to resort to some other material. Quarries of native marble of a beautiful texture, and in a situation on the Potomac offering facilities of water carriage to the foot of the Capitol hill, having been partially explored, I was induced to enter into a contract for the delivery of the columns from these quarries; and, although some progress has been made in execution of this contract, yet the difficulties which have interposed on account of the novelty of the undertaking, and other circumstances, have considerably diminished the confidence at one time entertained of complete success. Until the columns and their capitals were procured and in place, nothing materially advancing the completion of the south wing could be done more than we have been doing. Under these circumstances, it was thought most advisable to direct our efforts for the present principally towards the repair of the north wing and the President's house, which afforded ample room for the employment of our hands, and where our progress, I flatter myself, has been such as to satisfy those best acquainted with the obstacles which have been encountered.

I have the honor to be, with great respect, sir, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. LEWIS CONDICT.

SIR: WASHINGTON, *February* 12, 1817.

I now transmit the estimates, required by your letter of the 29th ultimo, of the sum necessary to complete the repairs of the public buildings, amounting to $386,661 30. Of the $500,000 appropriated by the act of the 13th of February, 1815, there remains unexpended the sum of $114,602 55, which, deducted from the estimate above mentioned, leaves the sum of $272,058 75 unprovided for.

As it is extremely desirable to proceed in the repairs of those buildings with all the despatch which the nature of the undertaking will admit, and as, with this view, the disbursements of the current year probably ought to exceed the sum now applicable to this purpose, I would respectfully suggest the expediency of Congress making an additional appropriation during the present session.

I have the honor to be, with great respect, sir, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Honorable LEWIS CONDICT,
Chairman of the Committee on Public Buildings, &c. &c.

WASHINGTON, *February* 8, 1817.

The following is an estimate of the sum which will be required to complete the President's house and offices, and to erect the porticos to the north and south fronts, viz:

26,000 feet of flooring, in the first and second stories,	at $0 08	$2,080 00	
26,600 feet of flooring, in the garret and basement story,	04	1,064 00	
2,200 feet of joisting, in hall and passage,	06	132 00	
11,000 feet of bridging joist, in first and second stories,	02	220 00	
5,162 feet of surbase and grounds, in first and second stories,	36	1,850 32	
1,888 feet of moulded skirting, in basement and garret,	08	151 04	
24 doorways in basement story, finishing,	31 08	745 92	
34 windows in basement story, finishing,	15 00	510 00	
32 doorways in principal story, finishing,	48 00	1,552 00	
34 windows in principal story, finishing,	80 40	2,733 60	
24 doorways in second story, finishing,	44 40	1,065 60	
34 windows in second story, finishing,	20 20	684 00	
4 archways with frontispiece, fan sash, &c.	180 00	720 00	
2 Delta windows, with trimmings complete,	140 00	280 00	
1 principal staircase,	-	1,000 00	
1 staircase, 38 steps,	10 00	380 00	
1 staircase from basement story to garret,	-	240 00	
23,540 feet of counter flooring,	03	706 20	
			$16,114 68
24,000 feet of best flooring plank,	08	1,920 00	
2,250 cubic feet of pine timber,	40	900 00	
14,512½ feet of copper for roof, and laying do.	60	8,707 50	
200 pounds of block tin,	40	80 00	
75,000 bricks for arches and jambs, and laying ditto,	12 00	900 00	
1,444 yards of brick paving, in basement story,	75	1,083 00	
3,000 lbs. of lead for sash weights, and for casting do.	09	270 00	
17 bell-pulls, wire, bells, and fixing do.	-	85 00	
909 lights, glazing, 18 inches by 27,	25	227 25	
390 lights, glazing, 13 inches by 21,	15	58 50	
217 feet of glass and glazing, 13 by 21, fan sash,	-	217 00	
Locks, hinges, pulleys, screws, sash-line,	-	1,209 60	
8 double closets in basement story,	-	534 96	
800 barrels of sand, for brick work,	25	200 00	
27 window jambs to rebuild,	14 00	378 00	
10 door jambs to rebuild,	5 00	50 00	
9,000 feet pine timber, sawing,	1 50	135 00	
3 water closets' apparatus, and fixing ditto,	-	450 00	

ESTIMATE—Continued.

2 kitchen grates, 2 smoke jacks,		$150 00	
Cartage and moving materials,		812 00	
Iron for cramps and straps,		110 00	
			$18,477 81
12,022 yards of plastering, part stucco finish,	at $0 50	6,011 00	
2,569 feet ornamental cornice, in principal story,	1 00	2,569 00	
252 feet plain cornice, in principal story,	33⅓	84 00	
180 feet ornamental cornice, in second story,	1 00	180 00	
2,206 feet plain cornice, in second story,	33⅓	735 33⅓	
			9,579 33⅓
6,634 yards of painting inside of the building,	40	2,653 60	
4,000 yards of painting on stone, outside walls,	33⅓	1,333 33⅓	
1,700 yards of painting, on the roof,	25	425 00	
			4,411 93⅓
10 marble chimney-pieces, principal story,	300 00	3,000 00	
1 marble chimney-piece in elliptic room,	-	400 00	
8 marble chimney-pieces on second story,	200 00	1,600 00	
5 Aquia stone chimney-pieces,	50 00	250 00	
2 chimney-pieces of marble,	150 00	300 00	
			5,550 00
Composition and ornaments for frontispieces, &c. &c.		–	1,500 00
4 rooms papering and paper,		–	800 00
Marble columns for the hall, caps and bases,		–	1,100 00
Stone and workmanship for balustrade, &c.		–	21,839 97
Cut stone and brick walls of offices,		6,409 68	
Copper covering, paving, carpenter's work for offices,		10,858 74	
			17,268 42
South portico—Columns, stone and brick work,		24,737 44	
Copper covering,		954 00	
Timber and carpenter's work,		470 00	
Iron railing,		1,140 00	
			27,301 44
North portico—Columns, stone and brick work,		24,196 72	
Copper covering pediment, &c.		1,470 00	
Timber and carpenter's work,		470 00	
Iron railing,		150 00	
			26,286 72
Add for contingencies for all the foregoing,		–	2,000 00
Whole amount,		–	152,230 30

All which is respectfully submitted by, sir, your obedient servant,

JAMES HOBAN.

SAMUEL LANE, Esq., *Commissioner of Public Buildings.*

Estimate of the probable expense of finishing the north and south wings of the Capitol of the United States.

NORTH WING.			
Work in freestone and marble,		$46,944 00	
Brick work,		28,790 00	
Carpenter's work,		16,521 00	
Roof, glass, iron, ironmongery, copper, &c.		10,471 00	
Plastering,		16,000 00	
Painting,		2,500 00	
		121,226 00	
Deduct for materials, wrought and unwrought, on hand,		13,285 00	
			$107,941 00
SOUTH WING.			
Work in freestone and marble,		75,900 00	
Brick work,		21,128 00	
Carpenter's work,		16,500 00	
Roof, copper, iron, ironmongery, glass, &c.		10,472 00	
Plastering,		16,000 00	
Painting,		2,500 00	
		142,500 00	
Deduct for materials, wrought and unwrought, on hand,		16,010 00	
			126,490 00
Sum total,		–	$234,431 00

FEBRUARY 12, 1817.

B. H. LATROBE, *S. C. U. S.*

RECAPITULATION.

Capitol,	$234,431 00
President's house,	152,230 30
	$386,661 30

SIR: WASHINGTON, *February* 15, 1817.

The following circumstances have contributed materially towards increasing the expenditures in repairing the public buildings:

1st. In the spring of last year a very extensive improvement of the apartments of the Senate was suggested by that honorable body, and ordered by the President of the United States to be carried into execution. In pursuance of this order, it became necessary to take down, not only the work which had been constructed the preceding season, but the enlargement of the Senate chamber required that the great dome of that apartment, and its semicircular wall, should be entirely removed, and that the arches and walls of the committee rooms, and the lobby adjoining the chamber, should be demolished, and that much additional strength and solidity should be given to the whole structure. Thus did this new arrangement not only produce the loss of one season's labor and expenditures on the north wing of the Capitol, but consumed a considerable part of another season in undoing what had already been done.

2d. The injury of the exterior walls of the President's house was found to reach much deeper than had been apprehended. It was not until some time last summer that we desisted from taking down those walls, and not until a considerable part of them had been levelled to their foundation.

If to these causes be added the unexampled rise in the price of labor and materials, it ought not, perhaps, to be a matter of surprise that the original estimates should be found deficient.

With great respect, I am, sir, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. LEWIS CONDICT, &c.

Expenditures on public buildings by the three Commissioners of 1815, *and by Commissioner Lane to January*, 1817, *showing the sums expended on each of the public buildings, viz: Capitol, President's house, and offices, &c.*

Appropriation by the act of February, 1815,	–	–	$500,000 00
Drawn from the treasury by late commissioners,	–	$225,000 00	
Drawn to 1st of February, 1817, by present commissioner,	–	160,397 45	
			385,397 45
Balance remaining in the treasury February 1, 1817,	–	–	$114,602 55
Expenditures by the former commissioners, for which vouchers have been received and allowed at the Treasury:			
On account of the Capitol,	$79,211 64		
On account of the President's house,	32,030 05		
On account of the Treasury office,	31,882 04½		
On account of the War office,	31,541 86		
On account of the fireproof office,	4,328 16		
On account of the contingent expenses,	9,002 91		
Sundry advances made upon contracts and deposites,	37,003 33½		
		225,000 00	
Expenditures by the present commissioner, for which vouchers have been received up to the 1st of January, 1817, as follows:			
On account of the Capitol,	76,112 17		
On account of the President's house,	66,759 89		
On account of the Treasury office,	1,051 94		
On account of the contingent expenses,	2,269 88½		
Add for sundry advances and for disbursements during the month of January last this sum,	14,203 56½		
		160,397 45	
			385,397 45
Balance in the treasury,	–	–	114,602 55
			$500,000 00

Errors excepted.

WASHINGTON, *February* 15, 1817.

SAMUEL LANE, *Commissioner of Public Buildings.*

14th CONGRESS.] No. 432. [2d SESSION.

SUBSCRIPTION TO THE CHESAPEAKE AND DELAWARE AND DISMAL SWAMP CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 20, 1817.

Mr. THOMAS WILSON made the following report:

The committee to whom was referred, on the 4th of December last, so much of the message of the President of the United States as relates to roads and canals, having heretofore made report, in part, and having had the subject under further consideration, ask leave to report a bill authorizing the Secretary of the Treasury to subscribe for shares in the capital stock of certain canal companies therein mentioned, to wit: the Chesapeake and Delaware Canal Company, and the company incorporated by the States of Virginia and North Carolina for opening a canal through the Dismal Swamp, from Deep creek, a branch of Elizabeth river, which runs into the Chesapeake bay, in Virginia, and Joyce's creek, a branch of Pasquotank river, which runs into Albemarle sound, in North Carolina.

The facts and reasoning which have governed the committee with respect to the first-mentioned canal are set forth in the memorial and petition of the president, directors, and company, referred to your committee on the 10th day of January last; and the facts and reasoning which have governed the committee with respect to the last-mentioned canal are set forth in the survey and written description reported by Major Kearney, topographical engineer, and communicated by the Acting Secretary of War to your committee, in answer to an inquiry made on behalf of the committee of that Department; which written description, together with the petition aforesaid, the committee submit as a part of this report.

To the honorable the Senate and House of Representatives of the United States in Congress assembled: The memorial of the subscribers, directors of the Chesapeake and Delaware Canal Company, on behalf of that company, respectfully showeth:

That the president and directors of the Chesapeake and Delaware Canal Company have, at several times heretofore, presented memorials to Congress praying for its aid.

In these memorials the most ample information was given of the importance of the canal, its practicability, and the measures taken to carry it into effect. Referring to them, your memorialists feel it unnecessary to swell this application with a repetition of facts often set forth, and universally acknowledged; they confine themselves, therefore, at present, to lay before Congress such prominent features in their case as the occasion demands.

It is well known that after the importance of opening the communication between the Chesapeake and Delaware had excited the attention of the most intelligent men of the country for more than half a century, it was begun with enthusiasm, and successfully prosecuted for more than two years; during which all the preliminary operations were completed, and considerable progress made in cutting the canal itself; but at the expiration of this time it became absolutely necessary to suspend it, from no other cause than the failure of funds, arising from the neglect of the stockholders to pay up their subscriptions.

The causes of this neglect were fully explained to Congress; they were, in fact, no other than that in a country where moneyed capital was in great request for a thousand uses, which yielded an immediate and ample return, the patience of the public was not adequate to support an undertaking where reimbursement could not be expected for some years, though certain in the end; and your memorialists expressed their conviction, founded on experience, that neither this nor any similar work would succeed in the United States, unless the Government could patronize and assist the efforts of individuals until at least one work was carried into successful operation.

It will be seen that all reasonable means were used to compel the payment of the subscription; but legal remedies would not produce funds with the celerity necessary to pay workmen and continue their operations; the directors had no alternative, therefore, but to suspend them, or to involve numerous individuals in distress. Some debts were unavoidably left unpaid, but they are of no important amount. The most economical disposal was made of the tools and perishable property of the company, and the works left in such a state that they may be repaired at little expense when the operations are resumed.

Your memorialists, having frequently represented these circumstances, and received no public aid, have been compelled to wait until some happier auspices might enable them to revive a work promising the utmost public advantage; and these they now hope to experience from the present disposition of the National Legislature. After the termination of war, the glory of the arts naturally excites the enterprise of a free people, and your memorialists think they perceive in the acts of the late session of Congress a spirit to foster them; they feel, therefore, emboldened to press their interests upon its attention, and that it would be a dereliction of their duty to omit it.

Your memorialists perceive the general measures adopted by Congress in favor of roads and canals; upon which subject they cannot but feel a hope that, after the subject has been recommended by the Executive Department, and its importance acknowledged in every session for many years, some magnanimous instance will be adopted actually to bestow its benefits upon the country, especially as there is no way in which the money of the public can be expended more essentially to its advantage—a fact which is proved by the example of all nations with whom we are acquainted, who, in this respect, have engaged in a rivalship with each other, to which the United States alone cannot fail to be a party.

While the utility of all undertakings of the kind in question must be universally admitted, the specific adoption of some precise objects seems essential to render their advantages effectual. Amid the numerous improvements which the vast area of our country presents to view, it is obvious that all cannot be undertaken at once; many are not matured; some are in districts which do not possess a population to support them; and others can as yet obtain no individual aid to that which the Government may give them, so that some precedence must be admitted for the benefit of all, since one brief and useful work, carried into complete and successful operation, will surely lead on the rest, while numerous undertakings, pressed on together, will only render each other abortive.

In this situation, your memorialists solicit the particular attention of Congress to the following brief state of the features and merit of the work they represent, which they conceive has an important claim on the patronage of the public:

1st. The utility of opening the communication between the Chesapeake and Delaware has been admitted by all intelligent men, ever since the settlement of the country; and if ever this utility wanted confirmation, it received it during the late war, when, by its means, a most important line of communication and defence might have been formed and maintained.

2d. The more extensive inland navigation from New England to Georgia has been often contemplated, and it is obvious that, if executed, (as no doubt it may be,) it must be done in the outset by opening the two great links between the Chesapeake, Delaware, and Raritan.

3d. The present canal forms the first of these links, and it is already begun. The preliminary operations to organize a company to make the necessary surveys, and to commence a work of this kind, are always attended with difficulty, delay, and expense; these have all been accomplished in the present work, as none ever received a more rigid investigation by the ablest engineers in the United States.

4th. There never was, perhaps, a canal in which the two great requisites for its perfection were so well united as in the present one, viz: a most abundant supply of water and the easiest soil for execution, as, in the whole area of its route, it presents scarcely a single rock or stone or other natural obstacle; in fact, from the shortness of the distance and the ease of its execution, it would almost immediately present to us that object which is so desirable, of an actual successful experiment.

5th. From the immense coasting trade of the Chesapeake and Delaware, the revenue upon it would be so immediate and important as in the highest degree to confirm the confidence of the country in such undertakings.

6th. A part of it is already well executed, and that part is at once the most difficult in the whole route, and the most essential in the prosecution of the rest. If briefly revived, what has been done will be restored at little expense; but it is obvious, if long neglected, must be altogether lost.

7th. Very considerable funds are already in such a state as to depend on the measures of Congress to bring them into full operation. If, by patronage, confidence in the prosecution of the work is revived, the subscriptions already existing, to the amount of $400,000, will be obtained, as shares in which partial payments have been made will become valuable pledges for sums due; besides which, the State of Maryland has passed a conditional law to subscribe two hundred and fifty shares, ($50,000;) the State of Pennsylvania to subscribe three hundred and seventy-five shares, ($75,000,) upon the condition that the United States shall subscribe seven hundred and fifty shares, ($150,000,) and the State of Delaware one hundred shares, ($20,000.) This subscription of Congress, therefore, will organize the rest, and bring into effect funds amply sufficient for executing the whole work.

Under these circumstances, your memorialists cannot but hope for the aid of the National Legislature. If this canal had never been begun, it would now challenge attention among the first national objects of the kind; but, commenced as it has been, and provided with the means of procedure, depending upon one contingency alone, it challenges attention by every consideration which can arise from the propriety of restoring confidence, animating the fortitude of individuals, and giving the lead and direction to those public works which, in all ages and countries, do the utmost honor to the Government, because they are of the greatest advantage to the people.

KENSEY JOHNS,
President of the Delaware and Chesapeake Canal Company.
JOS. GILPIN.
JAMES C. FISHER.

SIR: CITY OF WASHINGTON, *November* 5, 1816.

In obedience to so much of the order of the honorable the Secretary of War, dated May 31, 1816, as relates to the connexion of the navigation of Elizabeth river, in Virginia, with that of the waters of North Carolina, I have the honor to submit the following report:

The routes ordered to be examined are those two, for the opening of which charters have been granted by the Legislatures of Virginia and North Carolina; one, beginning at or near Whitehouse's landing, on the eastern branch of Elizabeth river, is proposed to be cut by the way of Kempsville, forming at that place an angle, and running thence nearly on a right line to the upper landing on North river, and will occupy a distance of between eight and nine miles.

North river cannot correctly be called a stream; it is rather a creek or arm of Currituck sound, whose small ramifications are found in a low swampy country, which adds to them scarcely any further supply than is derived from the downfall water. A slight swell of the ground separates North river from the small branches of Northwest river, and the southern branch of Elizabeth river. The lowest ground between North landing and the eastern branch of Elizabeth river is along the Beachen swamp, and the branch of North river which interlocks with it: this route, to some persons, has appeared to be the most eligible for the "coastwise canal;" but the projector has, for many cogent reasons, rejected it, and proposes to run the canal along higher ground to the eastward of it. It is not, therefore, to be supposed that a supply of water can be had for a canal so situated from the west; nor is the country to the east of the proposed route much better calculated to afford a supply, the Pungo branch of North river being the nearest body of water to it, (except mere catch-water drains,) and that flows over a tract of land parallel with, but lower than it.

This part of the route was examined in company with gentlemen who had an interest in it, and who acknowledged the impracticability of procuring a stream sufficient for the required purpose—an opinion the result not only of personal examination, but of the clear and unanimous testimony of every resident whom I consulted.

It being impracticable to procure a stream, or even downfall water, sufficient to feed the canal, it then becomes necessary to incur the difficulties, risk, and expense of making a cut eight or nine miles on one level, at least two or three feet below the level of the neap tides, in a swampy country; or, to avoid the swamps, recourse must be had to the high ground, and the expense increased beyond any calculations that have yet been exhibited in relation to the project; and, in doing so, the first difficulties of the work only are avoided, and there yet remains the difficulty of cutting below the level of the tides in a country which the great waters approach on all sides. But it is proposed to supply the canal by means of steam machinery, and this is the only feasible mode that has been suggested; the objection offered to it is, that it would be a constant source of expense, increasing with the decrease of timber.

From North landing the river is navigable for craft of any burden, except at one shoal, on which there is nearly five feet water at high tide. Abreast of White's house, on Church's island, in Currituck sound, and six miles southeast of the court-house, there is another shoal of black soft mud, with fine sand mixed; it has four and a half feet of water over it at high tide. Near Salier's, about nine miles south-southeast of the last-mentioned shoal, the channel becomes very narrow and crooked; immediately below Salier's, and about ten miles from White's channel, a sand-bar occurs, with less than four and a half feet over it at high tide. Having passed the sand-bar, the channel deepens as it enters the narrows, which wind in every possible direction through salt marshes for about one thousand six hundred yards to the mud flat, which must be crossed, running due south; it has four feet water on it at high tide. South by east of the mud flat is the Trout hole, a narrow channel running due west about four hundred and fifty yards; it is off the south end of Rattlesnake island. Thence the channel continues south by east one mile and a half to Jew's quarter, one hundred yards below which are the cross rocks, an oyster bank, making across nearly the whole width of the sound; the channel here has five feet water in it at high tide. Thence the channel runs south to Powell's Point, round which it winds in a course nearly west-southwest, and then makes eastwardly to Albemarle sound. It may be proper here to state that, in speaking (in the phraseology of the country) of the tides in Currituck, and the other sounds and inland waters with which it is connected, a regular periodical ebb and flow of the waters is not to be understood, but that change which is produced by the action of a strong and constant wind in driving the water from one sound into another; for the inlets are so small, compared with the extent and surface of the sounds and creeks, that the causes which produce tides in the ocean and open bays cannot sensibly affect them during the short period of their operation. In Currituck sound the highest tides prevail, usually, in May; sometimes during the month of March; ordinary tides during summer, unless it be very dry, or the wind prevail from the north or west; the lowest tides are in cold weather, and always when the wind is from the north.

To render the sound and river navigable at high tide for vessels of five feet draught, it becomes necessary to clear out at least one thousand three hundred yards of the channel at several places, and through shoals of various composition; and the distance to be cleared will be greatly increased if it be thought advisable to make the navigation tolerably direct. But to procure a channel for vessels of six feet draught, the distance to be cleared may be very safely stated at twenty miles, or more.

It has, I believe, been suggested that a canal from Currituck court-house, or its vicinity, to Indiantown, on Indian or North river, a branch of Albemarle sound, would avoid the shoals, and obviate all objections that can be

made to this part of the route. The distance on a right line from the court-house to Indiantown may be estimated at seven miles, and would make the whole distance to be cut, between Norfolk and Albemarle sound, about sixteen miles. But admitting that six feet water may be had at all seasons between the court-house and North river, (which, in truth, is very problematical,) it will be necessary to cut below the level of the surface of the water of the sound, to the depth of at least six feet, or, as in the case of the Kempsville canal, supply water by means of steam machines. The ground between the court-house and Indiantown is higher than the ground between Kempsville and North landing; and to open the canal to six feet below the surface of the sound would require, I presume, a section of nearly thirty feet perpendicular, in some places; and the distance from Kempsville to Albemarle sound would be also considerably increased, for Indian river is very crooked.

The other route ordered to be examined is occupied by the canal which extends from Deep creek, in Virginia, to Joyce's creek, in North Carolina: it is twenty-two miles and two hundred yards long, and is cut on two right lines, which, at two miles within the Virginia line, make with each other an angle of about one hundred and forty-seven degrees. This canal passes through the Great Dismal Swamp, three miles and a quarter to the eastward of Lake Drummond, or, as it is called in that section of the country, "Drummond's pond." This canal is supplied in dry seasons by a drain from the lake, and in very wet seasons by the flow of the waters of the swamp. It is, at the feeder, sixteen feet six inches above the ordinary level of the water in Joyce's creek, and in dry seasons at least six feet below the level of the lake. Other measurements have made the height of the surface of the lake, above high water mark, in Nansemond river, twenty-four feet.

The tract of country occupied by the swamp lies, to the southward, along the head branches of Perquimans river, Little river, Pasquotank river, and North or Indian river, which flows into Albemarle sound; to the eastward, along the branches of Northwest river, which flows into Currituck sound; to the northeast and north, along the heads of the southern and western branches of Elizabeth river; and to the northwest, along the eastern and southern creeks of Nansemond river. The ridge of land which separates the swamp from the head waters of Summerton and Bennet's creeks lies west of it. From the lake to the high ground west of it the distance is about three miles.

That the swamp is caused by the overflowing of Drummond lake and of the small streams to the westward of it, and not by its own springs, is an opinion generally entertained by the most intelligent and best informed persons in the neighborhood, and in support of which very cogent reasons are offered. The ridge of land which separates the heads of Bennet's and Summerton creeks from the swamp is about ten feet higher than the lake; from this ridge many small streams run to the eastward, until meeting with a sudden declivity, from whence also issue innumerable springs of water, they spread over the surface of the land, and fall chiefly into Lake Drummond, between Orapeake and Jericho; they cannot, however, be supposed to be equal to the supply of a body of water which is stated to be nearly seven miles long by five miles wide, having nine feet depth of water within thirty yards of its shores, twelve feet at three hundred yards, and fourteen feet in the centre, and which never shrinks more than eighteen or twenty inches in the very driest seasons, but continues to overflow at all times a tract of country so extensive as that which is covered by the Dismal Swamp.

When the canal was projected, twenty-five years ago, it was believed that the country through which it was to be cut was a perfect level, without an inclination of surface sufficient even to enable the waters of the lake to flow off through the canal when it should be opened. It was even feared, it would seem, that, should more water than was requisite to fill the canal be permitted to escape from the lake, the dry and cultivated lands in its vicinity might be injured; and such continued to be the opinion entertained, until, a ditch being cut and locks constructed, it was found, when in the dry seasons the water ceased to flow but through the feeder of the lake, that at the head of a lock the water was deep and smooth, while at some distance from it, and towards the feeder, there was a constant but shallow current.

This circumstance for the first time induced an opinion that the country between the tide waters and the lake was not perfectly level: there were then constructed intermediate locks, yet at the foot of each there has never been more than eighteen or twenty inches depth of water. In this situation the canal (if it may be so denominated) remained, until the late war and other circumstances combined to force into view the absolute necessity of a more liberal and enlarged intercommunication between Elizabeth or Nansemond river and the waters of North Carolina.

During the summer of the present year the managers have engaged in the work of deepening and widening the canal with a correct and enterprising liberality, which is, however, unfortunately limited by the difficulty of obtaining the requisite funds. They propose that, for the present, it shall have an average surface width of twenty-eight feet, with a talus just sufficient to preserve the banks, and that it shall be capable of floating vessels drawing at least four feet water. To accomplish this purpose, it is calculated that they must expend nearly $80,000. Heretofore the general surface width has not exceeded eighteen feet; in some places it is more, in some less. An additional cut in depth is making from the foot of each lock towards the head of the one next below it, so that the bottom shall in no place be less than six feet from the level of the country, or eight feet from the top of the bank.

The only doubts that occur as to the practicability of rendering this canal navigable for vessels of six feet draught arise from the nature of the soil through which it passes, and the depth of water at its outlets. When the first cut was made, the water oozed through the sides and bottom of the canal, carrying with it a quantity of sand, which in some places choked the passage, by forming shoals, which threatened to reappear as often as they were removed. They were supposed to be the most serious obstacle to the deepening of the canal. During the last summer, one of these places has been deepened two feet below the old bottom without any difficulty, and presents a fine dry surface of sand mixed with some blue clay; and it is believed that it might be further deepened without striking a vein of water. The sides of the canal have become compact and firm by the settling of the soil, as is the case with all the cleared land in the swamp since the water has been drained by the canal, and the numerous small *cuts* made for bringing shingles and staves out of the woods. Generally, the soil has sunk twelve inches; the doubts which arose from this source have, therefore, in a great measure ceased.

The Pasquotank is a deep and crooked river, into which Joyce's creek empties; the only obstruction in it is a narrow sand-bar about a mile and a half from the outlet of the canal, over which there is usually four feet water.

Deep creek, which empties into the southern branch of Elizabeth river, and into which the canal disembogues, has been filled up by the sand from the canal the distance of a mile nearly, and is incapable of floating vessels of any burden at low tide; at high tide, however, vessels drawing three and a half to four feet can navigate it. It is proposed either to remove the sand, or, which would be the most effectual and perhaps the cheapest method, to make a new cut of four or five hundred yards to another branch of the creek, which affords a sufficient depth of water for the required draught.

In considering the relative advantages of these routes for military and naval purposes, on the assumption that they may be of equal depth, (a proposition already considered in this report,) it is necessary to view them during a war with some maritime Power, in which rapidity of movement and complete security should, as much as possible, be combined in the transportation of supplies, materials, and troops.

Currituck court-house, near which the lower canal route must pass, is but ten miles distance from the inlet; and the sound, which is not more than four miles average width, is separated from the ocean by a sand beach so low as to expose to the view of ships cruising along the coast every thing that passes down it. It cannot be considered safe during war, unless an armed force be constantly stationed at the inlet. It is so near the Chesapeake as to be considered within the cruising ground of vessels blockading that bay, and was visited during the late war by the enemy, who burnt or carried off the few craft they found in it.

On the contrary, the upper route is perfectly safe, being separated from the ocean and bay by a very difficult country, and the land around Lake Drummond affords positions capable of being maintained by a small force against great numbers. The security of this route continues until it coincides with the other near Roanoke island, when it in some measure becomes exposed, yet not so much as the lower route is in passing down Currituck sound.

As it regards distance, the Currituck route has greatly the advantage, being about fifteen miles shorter than the swamp route, calculating from Norfolk to Roanoke island, near the entrance of Albemarle sound. But for the transportation of supplies from the country bordering on the Roanoke, Chowan, and Perquimans rivers, and the other branches of Albemarle sound, the upper route is the best, not only as it regards safety, but in distance also; and its connexion with the canal proposed to be cut from the falls of the Roanoke adds much to its importance. Whether this canal be cut round the south side of the falls, leaving the produce of the country connected with the Dan, Staunton, and Roanoke rivers, to pass off by the natural channel of the river; whether it be cut from the north side of the river to Murfreesborough on the Meherrin only; or, finally, whether it be continued up Bennet's creek to the White Oak Spring marsh, or to Suffolk on the Nansemond river, its connexion with the Great Dismal Swamp canal is intimate and important.

The country with which either of the canals would immediately connect Elizabeth river is capable of furnishing many materials and supplies for the army and navy; and there may now be had from it red and white oak of a large growth, red cedar, cypress, juniper, holly, beach, poplar, black and sweet gum, white, yellow, and pitch pine, and maple. Much flax is raised, and Indian corn, wheat, tobacco, cotton, and hemp may be had from it. Considerable numbers of horned cattle, sheep, and swine are raised in the low country for market; and the waters of North Carolina furnish great quantities of shad and herring. Iron ore is found in the mountains, where there are some foundries, and small quantities of lead have been procured; it is probable that sufficient for the purposes of Government might be had, if a communication were opened with the country containing those minerals. An assertion has been hazarded, which, though loose, deserves investigation—that sulphur and saltpetre may be procured from the mountains. Tar and turpentine form some of the principal articles for exportation, and are to be had from the country round Edenton, as well as from other places. It may be satisfactory to exhibit the following list of some of the most bulky articles passed through the Dismal Swamp canal in the year 1815, during the few weeks it was open for navigation; they are exclusive of articles paying toll by valuation, and of the large amount of coasting tonnage which passes to sea through Currituck and Ocracoke inlets, and down Core sound: 6,519,419 shingles, 1,160,591 staves, from the south and east sides of Lake Drummond, and exclusive of those sent by the way of Norfolk; 16,703 bushels of Indian corn; 2,313 bushels of rice; 2,138 hogsheads of tobacco; 2,762 barrels of fish; 3,575 barrels of tar; 329 casks of turpentine spirits; 2,475 bales of cotton; 119 barrels of black lead; 327 tons of iron; 181 tons of lead, and powder and shot.

Ship timber and the bulky materials for house building are immediately shipped for their place of ultimate destination; the canal, in its present state, being considered incapable of admitting them to pass through it. It is to be considered, also, that, on account of the difficulty presented by the falls of the Roanoke, the produce of the country bordering on that river, and on its branches, the Dan and Staunton rivers, generally finds its way over land to Petersburg. The country south of the Roanoke and of Albemarle sound is nearly equally accessible by both routes.

It may be well, also, before concluding this report, (already, perhaps, drawn to too great a length,) to observe, that if the navigation of Currituck sound be supposed to possess any peculiar advantages, except in point of distance, or if the value of the productions of the country bordering on it, or immediately connected with it, should justify the expense of a direct water communication with Elizabeth river, such communication can be obtained by connecting the head of Northwest river with the Dismal Swamp canal. This river has its source in the morass eastward of Lake Drummond, and serves as one of the drains of that body of water; it crosses the canal north of the feeder, and enters Currituck sound south, and within about a mile of the mouth of North river. By clearing out the bed of this stream for the distance of about four miles, or by making a lateral canal of much less than that distance, the desired communication would be established at a trifling expense compared with the cost of a practicable canal by the way of Whitehouse's landing and North river, and would possess nearly all its advantages, aided by its lateral cut, if we except that of the rapid movement of gunboats between Lynnhaven bay and Currituck sound.

I have the honor to be, very respectfully, sir, your obedient servant,

JAMES KEARNEY,
Major Topographical Engineers.

P. S. My report on so much of the order of May 31, 1816, as relates to the defence of the Chesapeake bay, &c. is in the hands of Lieutenant Colonel George Bomford, of the ordnance corps; other materials collected during the last summer remain to be reported as occasion shall require.

Respectfully, J. KEARNEY.

GEORGE GRAHAM, Esq., *Acting Secretary of War.*

14th CONGRESS.] No. 433. [2d SESSION.

AGRICULTURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 21, 1817.

Mr. HULBERT, from the select committee to whom was referred the petition of the Berkshire Association for the promotion of Agriculture and Manufactures, praying for the establishment of a national board of agriculture, made the following report:

The great extent of the territory, and the richness, and consequent productiveness, of the soil of our country, can never fail to invite and employ in the cultivation of the earth far the greater portion of American industry. The

interests of agriculture must, therefore, be primarily important to the people of the United States, and must at all times deserve the warm support and liberal patronage of Government.

The committee observe with pleasure that President Washington, in his speech to Congress of the 7th of December, 1796, recommended to that body the interests of agriculture, and the establishment of a national board to promote the same.

In different parts of Europe, as well as in several States of this Union, such boards have been instituted under the auspices of Government, and have diffused much useful information, and contributed largely, as the committee believe, to the public welfare.

After due consideration of the subject, the committee are of opinion that it is advisable to establish at the seat of Government a national board of agriculture; and report a bill for that purpose.

14th Congress.] No. 434. [2d Session.

INQUIRY INTO THE OFFICIAL CONDUCT OF JUDGE TOULMIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 27, 1817.

Mr. Hugh Nelson made the following report:

The Committee on the Judiciary, to whom were referred sundry documents furnished by Edwin Lewis to this House, containing charges against Judge Toulmin, which the said Lewis averred that he could maintain and prove, have had them under consideration, and report:

That there is no evidence whatever contained in these documents which could warrant any proceedings against Judge Toulmin; that the committee, although the charges were none of them proved, yet conceived themselves bound to give notice, as far as was practicable, to the citizen from whom the charges came that they are prepared to receive testimony to enable them to form a correct judgment upon the case, addressed a letter to Edwin Lewis, stating that this case was referred by the House of Representatives to their consideration, and gave him notice that he should forthwith adduce such testimony as he had pledged himself to produce in verification of his charges. The committee have been furnished with no other testimony. From the remoteness of the residence of Lewis, time sufficient may not have elapsed for the testimony, if any could be produced, to reach this place. The committee consider it improper that this case should be longer continued, upon the slender ground on which it now appears to be founded, to the annoyance of the judge; that Lewis will not be precluded from again submitting this subject to Congress, should he be able to support, by proper testimony, his allegations; that Lewis, being a lawyer, must have known that he ought to have exhibited testimony in support of his charges at the time of producing them, if such testimony has existence; and, particularly as he alleges that some of them could be proved by the records of courts of justice, he might easily have supplied abstracts from those records. The committee are of opinion that no further proceedings ought to be had in this case; and therefore ask to be discharged from further considering this subject.

15th Congress.] No. 435. [1st Session.

ROADS AND CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 15, 1817.

Mr. Tucker, of Virginia, from the committee to whom was referred so much of the President's message as relates to roads, canals, and seminaries of learning, reported, in part:

That they have taken into consideration the subject referred to them, and bestowed on it that attention to which, by its importance, it is so eminently entitled. Involving, as it is supposed, a great constitutional question on the one hand, and intimately connected on the other with the improvement, the prosperity, the union, and the happiness of the United States, it presents the fairest claims to candid and diligent investigation. Nor is it without additional interest from the division of opinion to which it has heretofore given rise between the executive and legislative branches of the Government—a difference which, in the indulgence of the rights of free opinion, will be still found to exist between the sentiments promulgated in the message of the President, and those which will be advanced by your committee in this report. Nor do they conceive that the expression in the message of the President of an opinion unfavorable to the constitutional powers of the General Government should be permitted to have any influence on the disposition of Congress to legislate on this interesting subject; for if the constitutional majority of the two Houses should differ with the Executive Department, the opinion of the latter, however respectable, must yield to such an expression of *their* will. On the other hand, if, from deference to an opinion promulgated in an executive communication, Congress should refrain from entering upon the consideration of a question involving constitutional doctrine, it might happen that the opinion of the President would prevent the enacting of a law, even though there should be the constitutional majority of two-thirds of both Houses in its favor. Thus, by the introduction of such a practice, the presidential *veto* would acquire a force unknown to the constitution, and the

legislative body would be shorn of its powers from a want of confidence in its strength, or from indisposition to exert it. Whilst your committee are perfectly aware that nothing like this is contemplated by the executive branch of the Government, they presume the House of Representatives will scrupulously avoid a course which may be construed into a dereliction of their privileges. They deem it, therefore, not improper to offer some considerations upon the question of the constitutional powers of the General Government to pass laws for the improvement and construction of roads and canals with the consent of the States.

As it is obvious, however, that these several subjects of legislation do not rest upon the same foundations, and that one of these may be within the sphere of the constitutional powers of Congress whilst the others may belong exclusively to the States, it is proposed to treat them separately; and the subject of the improvement and construction of public roads, which appears to your committee most clearly to be reducible to the powers vested in the General Government, will be first taken into consideration.

An accurate attention to the real points of difference on this subject will greatly contribute to free the controversy from unimportant and irrelevant considerations. To attain this, we have only to compare what is manifestly admitted on the one hand with what is claimed and contended for on the other.

The laws of antecedent Congresses, approved by successive Executive Magistrates, and the acts of the Executive Magistrates themselves, will be resorted to as affording evidence of what may be regarded as conceded to be within the powers of the General Government. The commendable jealousy which they have manifested of all encroachments on State power, and their scrupulous adherence to the most rigid principles of construction in the interpretation of the constitution, afford a sure guaranty that more has not been admitted than may fairly be assumed to be within the provisions of that instrument. Taking, then, the acts both of the legislative and executive branches of the Government for our guide, we shall find it clearly admitted that there are *some cases, at least*, in which the General Government possesses the constitutional privilege of constructing and improving roads through the several States.

Thus, by the act of the 29th of March, 1806, confirmed, amended, and enlarged by subsequent acts, a road was directed to be laid out and constructed from Cumberland, in the State of Maryland, to the State of Ohio, upon obtaining the consent of the States through which it should pass. The fund provided for this noble undertaking was to consist of the proceeds of the sales of certain lands, the property of the United States, in the State of Ohio; so that this act furnishes the double admission that "roads may be laid out by Congress through the several States with their consent," and that "the expenses of constructing such roads may constitutionally be defrayed out of the funds of the United States." The act was approved by the President in office in 1806; and other acts, confirming, amending, and enlarging it, were passed by subsequent Legislatures in the years 1810, 1811, and 1815, and approved by the President in office at those periods. Nay, more: the last three acts contained appropriations to the amount of $210,000, payable out of any moneys in the treasury, but reimbursable out of the Ohio fund—a fund which might or might not prove adequate, and which, in point of fact, is believed hitherto to have been insufficient.

Similar to this act in some of its provisions, and analogous in principle, are the acts of 21st April, 1806, and of the 3d of March, 1817, "authorizing roads to be opened from Nashville and Reynoldsburg, in the State of Tennessee, to different points in the Mississippi Territory." But these acts go still further than the former in *omitting to require the previous consent of the State of Tennessee*, through whose territories a part of the roads was to pass, and in directing the expenses of making them to be defrayed out of the public treasury of the United States, without providing for its reimbursement in any manner whatsoever.

But lest the influence to be derived from these admissions should be deemed to be weakened by the consideration that the collision of opinion on the constitutional question has arisen since the passage of those laws, your committee will beg leave to refer to the date of the last act above mentioned, and to certain transactions of a date subsequent to the important and well-remembered difference of opinion between the Executive and Legislature at the last session of Congress. Since that period they have satisfactory information that a road has been directed by the Executive of the United States to be improved at the expense of the General Government, and doubtless for military purposes. This road is laid out from Plattsburg or its vicinity, in the State of New York, to Sackett's Harbor, in the same State. It is presumed that it is to be constructed at the expense of the General Government, and it is understood that the previous assent of the State has not been procured.

From this act, therefore, of the executive branch of the Government, emanating from that source at a late date, it would seem fair to infer that the constitution is admitted to have conferred upon the General Government a power *in some cases* to make roads, and to defray the expense of their construction out of the funds of the United States. And as the power is not denied *in all cases*, your committee will attempt to show that Congress has the power—

1st. To lay out, construct, and improve post roads through the several States, with the assent of the respective States.

2d. To open, construct, and improve military roads through the several States, with the assent of the respective States; and,

3d. To cut canals through the several States, with their assent, for promoting and giving security to internal commerce, and for the more safe and economical transportation of military stores, &c. in time of war; leaving in all these cases the jurisdictional right over the soil in the respective States.

1st. In examining the soundness of these positions, your committee will not find it necessary to resort to what is called a liberal construction of the constitution. They might, indeed, contend that, as the powers here attributed to the United States are not in derogation of State rights, (since they can only be exercised by their assent,) there is less reason for adhering to extreme rigor of construction. Where the authority claimed by the General Government is oppressive in its character, or dangerous in its tendencies; where it is asserted without deference to State assent, and in derogation of State power; where it is calculated to aggrandize the Union and to depress its members, there may be some reason for holding the representatives of the nation to the "letter of their authority." But where the power sought to be exercised is beneficent in its effects, and only felt in the blessing it confers; where it is not proposed to act except with the assent of the party which is to be affected; where the measure is more calculated to increase the opulence and the power of the State than to aggrandize the Union at its expense, it might fairly be contended that a less rigorous construction of the constitution would be justifiable. It is neither unprecedented nor improper to construe the same instrument liberally where the interests of the contracting parties will be thereby promoted, and to adhere to a greater strictness where injury may arise to either by an interpretation too latitudinous. That the powers in question are neither dangerous in their tendencies nor calculated to prove injurious to the States, would seem fairly inferrible from the recommendation to amend the constitution, and from the importance so justly attached to these objects on all hands.

But your committee, nevertheless, do not conceive it necessary to call to their aid the liberal principles of construction which the occasion might justify. They disavow any use of the general phrase in the constitution "to provide for the common defence and general welfare" as applicable to the enumeration of powers, or as extending

the power of Congress beyond the specified powers; and they admit that, to support their position, it must appear that the powers contended for are expressly granted, or that they are both "necessary and proper" for carrying into execution some other express power.

That Congress, with the assent of the States, respectively, may construct and improve their post roads under the power "to establish post offices and post roads," seems to be manifest, both from the nature of things and from analogous constructions of the constitution. It has been contended, indeed, that the word "*establish*," in this clause of the instrument, comprehends nothing more than a mere designation of post roads. But if this be true, the important powers conferred on the General Government in relation to the Post Office might be rendered in a great measure inefficient and impracticable. In some States a power is vested in the inferior tribunals or county courts to discontinue roads at their discretion: a post road designated by Congress might thus be discontinued, to the great embarrassment of the post office establishment. If the power to *establish* confers only the authority to designate, Congress can have no right either to keep a ferry over a deep and rapid river for the transportation of the mails, or to compel the owners of a ferry to perform that service; and yet our laws contain an act, acquiesced in for more than twenty years, imposing penalties on ferrymen for detaining the mail, and on other persons for retarding or obstructing its passage. It would be difficult to discover how this power of imposing penalties can be supported, either as an original or accessory power, except upon principles of more liberal construction than those now advanced. There are, therefore, not a few who believe that, under the authority to "*establish*" post roads, Congress have express power to lay out, construct, and improve roads for the transportation of the mails.

But, however this may be, the authority which is conferred by the constitution to make all laws which shall be "necessary and proper" for carrying into execution the enumerated powers is believed to vest in the General Government all the means which are essential to the complete enjoyment of the privilege of "establishing post offices and post roads." Even without this clause of the constitution the same principle would have applied to its construction, since, according to common understanding, the grant of a power implies a grant of whatever is necessary to its enjoyment.

Taking these principles for our guide, it may be asked if, under the narrow rules of construction contended for, the right of transporting the mails would not be held entirely at the will of the States, respectively? On the other hand, if the United States have the privilege of establishing post roads, and are under the corresponding obligation of transporting the mails, is it not essential to the performance of this duty, and to the enjoyment of this power, that they should have the right (with the assent of the respective States) to throw bridges over deep and rapid streams, to remove embarrassing and dangerous obstructions in the roads which they have the privilege of using, to level mountains which impede the velocity of transportation, and to render passable the morasses which intersect the roads through various parts of the Union? Can it be supposed that the convention, in conferring the power and imposing the duty of transporting the mails, (in its nature a matter of national concern,) intended to vest in Congress the mere authority to designate the roads over which it should be carried? Can it be denied that the right to render a road passable is "necessary" to the enjoyment of the privilege of transporting the mails? Or can it be denied that such improvement, with the assent of the States, is proper? And if "necessary and proper," is it not justified as an incidental power?

It is, indeed, from the operation of these words "necessary and proper," in the clause of the constitution which grants accessory powers, that the "*assent of the respective States*" is conceived to be a prerequisite to the improvement even of post roads; for, however "necessary" such improvement might be, it might be questioned how far an interference with the State jurisdiction over its soil, against its will, might be "proper." Nor is this instance of an imperfect right in the General Government without an analogy in the constitution: the power of exercising jurisdiction over forts, magazines, arsenals, and dockyards, depending upon a previous purchase by the United States, *with the consent of the State.*

Admitting, then, that the constitution confers only a *right of way*, and that the rights of soil and jurisdiction remain exclusively with the States, respectively, yet there seems no sound objection to the improvement of roads *with their assent;* for if, by the tenth amendment, this right is reserved to the States, it is within the power of the State to grant it, unless the United States are incapable of receiving such a privilege. But by various acts of the Government, whose validity has never been questioned, it appears to possess not merely the power of receiving so unimportant a privilege as this, but of acquiring territory *ad libitum.* The acquisition of Louisiana, one of the happiest events of our political history, evinces the power of this Government to acquire territory by treaty from foreign nations. The cession of the Northwest Territory by Virginia shows that, under the strict principles of the old confederation, which had so few features of nationality, the United States were deemed to have the power of acquiring lands even from the States of the confederacy. The Georgia cession, completed about the year 1802, is finally decisive of the practical and undisputed exercise of a power in the General Government to receive a cession of territory from any member of the confederacy under the present constitution. But if the General Government has the power to aggrandize itself by the acquisition of territories, can the inferior privilege be denied it of receiving from a State the right of making or repairing the roads over which it is compelled to transport the mails through the Union?

Moreover, it seems to be admitted that the United States have, since the Georgia cession, a constitutional right to make and repair roads in the ceded territory. If, then, by the transfer of the territory, Georgia could give, and the United States receive, the right to make roads within it, it is difficult to imagine a substantial objection to the validity of a grant to make a road without a transfer of the territory.

2dly. Your committee conceive that the General Government has the power of making and opening *military roads, with the assent of the respective States*, with a view to the common defence of the nation.

The power of opening a road during actual hostilities, for the purpose of transporting military stores and marching troops to points that are menaced, has never yet been called in question. In truth, without such a power the United States must fall a prey to foreign enemies; so that it seems fair to assume that, whenever a military road becomes necessary for the national safety, it is in the power of the General Government to construct it. Of this necessity that Government can be the only judge; and if the power of *judging* of this necessity be in them, the constitutional power to *act* must, of course, be conceded. In the exercise of this discretion, a very general sentiment at present prevails in favor of preparations during peace for a state of war; and if the power of judging *when* it is necessary be admitted, the constitutional right to do it at any time must be allowed.

It is not proposed to enter upon the delicate inquiry whether this right can be exercised by the General Government *without* the assent of the respective States through whose territories a road is constructed, in time of peace, with a view to military operations in any future wars. Leaving this question for discussion whenever the occasion may call it forth, your committee are content in this report to assert the right to exercise this "necessary" power, *with the assent of the States.*

Having taken this cursory view of the principles of the constitution in relation to the construction of roads by the United States, it may not be unimportant to examine what has been the practice under its provisions. The

laws of the Union and the acts of the executive branch of the Government, though they cannot be relied on to support acknowledged error, may safely be referred to in aid of our inquiries as to the proper construction of the constitution.

Among the most conspicuous of the analogies afforded by the acts of Congress is the establishment of the Cumberland road, already mentioned. This road has been constructed under the authority of the United States, with their funds, and through several of the States, with their assent. It has received the sanction of several distinct representative bodies, and of two Presidents of the United States. In short, if precedent alone were wanting, this act would furnish it.

Passing over the road from Nashville to Natchez, and the road from Reynoldsburg to a part of the late Territory of Mississippi, directed by an act of the last session of Congress, both of which afford precedents no less strong, we come to the military road lately directed by the executive authority to be constructed from Plattsburg, or its vicinity, to Sackett's Harbor. This road is not to be constructed with any express assent of the State through which it passes, nor by the authority of Congress; but the President has deemed it necessary as a military road, and has ordered it to be made accordingly—a measure the advantages of which are understood to be so palpable as to have given great satisfaction in the country where the road is made. Hence, however, the question results—whether the exercise of this power by the President is not an express admission of the right of the General Government to open military roads even in time of profound peace, when they are believed to be necessary; and if the power of judging of this necessity is possessed by the Executive, it cannot, it is presumed, be denied to the yet more important organ of the nation's will—the Legislature of the Union.

3dly. As to canals. It will not be necessary to recapitulate the arguments already used on the subject of roads, some of which will be found strongly applicable to canals. It may suffice to add, that the power to make canals and roads for the promotion and safety of internal commerce between the several States may justly be considered as not less incidental to the regulation of internal commerce than many of the powers exercised under the authority to regulate foreign commerce are accessory to that power. The embarrassments of the nation during war, from the want of good roads and canals, both in relation to trade and the transportation of cannon and military stores, have been too recently and sensibly felt to be forgotten. Vested with the power of making war, the constitution could never have intended the General Government should make it under such disadvantages. If there be any part of that instrument which demands a liberal construction, it is that which confers on the Federal Government the power of making war, and the duty of protecting the Union from foreign hostility. With a navy yet insufficient to insure the safe conveyance, coastwise, of troops, of implements of war, and military stores, and destined to contend with an enemy whose command of the sea enables them to assail, in rapid succession, the most distant positions, we have been compelled, from the want of an internal water communication, to encounter the most wasteful extravagance in the transportation of the means of defence. From the same cause, the internal trade between the States has been during war trammelled and embarrassed, and even cut off, and the productions of one portion of the community have rotted on their hands, whilst distant parts of the United States were suffering for the want of them.

It is true that the wants of the Union cannot confer power under the constitution, but they may justly be touched upon as affording aid in its construction. They must have been clearly foreseen, and must have been supposed to be provided for. If the power to carry on war implies "the necessary and proper" means of conducting it to a safe and prosperous issue, and if, without the use of these means, the burdens, and the privations, and the miseries of war are to be indefinitely increased, and its issue (always doubtful) rendered yet more precarious and unprosperous, are we not justified in presuming these means to have been contemplated as being vested in the General Government? Are we not justified in asserting this "necessary" power—the power of constructing roads and canals, at least *with the assent of the States.*

If your committee have not erred in attributing to Congress a constitutional power to make roads and canals, either as an original or accessory power, it would seem that no doubt could remain of the right of applying our revenues to those purposes. If, indeed, the power was denied to the General Government of constructing roads and canals themselves, a question might still arise whether it had not power to appropriate part of the revenue "to aid in the construction of roads and canals by the States?"

There is, perhaps, no part of the constitution more unlimited than that which relates to the application of the revenues which are to be raised under its authority. The power is given "to lay and collect taxes, &c.; to pay the debts, and provide for the common defence and general welfare of the United States;" and though it be readily admitted that, as this clause is only intended to designate the objects for which revenue is to be raised, it cannot be construed to extend the specified powers of Congress, yet it would be difficult to reconcile either the generality of the expression, or the course of administration under it, with the idea that Congress has not a discretionary power over its expenditures, limited only by their application "to the common defence and general welfare."

A few of the very great variety of instances in which the revenues of the United States have been applied to objects not falling within the specified powers of Congress, or those which may be regarded as incidental to them, will best illustrate this remark.

Thus, it can scarcely be conceived that, if construed with rigor, the constitution has conferred the power to purchase a library, either specifically or as a "necessary" incident to legislation; still less, perhaps, can the pious services of a chaplain, or the purchase of expensive paintings for ornamenting the hall of session, or various other expenditures of a similar character, be considered as "necessary" incidents to the power of making laws. Yet to these and to similar objects have the funds of the United States been freely applied at every successive session of Congress, without a question as to the constitutionality of the application.

It would be yet more difficult to reduce, under the specific or accessory powers of Congress, the liberal donation to the wretched sufferers in Venezuela, or the employment of our revenues in the useful and interesting enterprise to the Pacific.

The bounties allowed for the encouragement of the fisheries form another expenditure that does not fall under any of the powers granted by the constitution, nor could it fairly be considered as inferrible from the powers granted upon the strict principles sometimes contended for. The same objections would apply to actual bounties paid to manufacturers for their encouragement, and to the indirect encouragement given to them, and which operates as a bounty to one class of the community, and as a *tax* upon the rest. These, and a variety of other appropriations, can only be justified upon the principle that the general clause in question has vested in Congress a discretionary power to use for the "general welfare" the funds which they are authorized to raise.

Nor is there any danger that such a power will be abused while the vigor of representative responsibility remains unimpaired. It is on this principle that the framers of the constitution mainly relied for the protection of the public purse. It was a safe reliance. It was manifest that there was no other subject on which representative responsibility would be so great. On the other hand, while this principle was calculated to prevent abuses in the appropriations of public money, it was equally necessary to give an extensive discretion to the legislative body in the disposition of the revenues; since no human foresight could discern, nor human industry enumerate, the infinite

variety of purposes to which the public money might advantageously and legitimately be applied. The attempt would have been to *legislate*, not to frame a constitution; to foresee and provide specifically for the wants of future generations, not to frame a rule of conduct for the legislative body. Hence proceeds the use of this general phrase in relation to the purposes to which the revenues may be applied, whilst the framers of the instrument, in the clause which concludes the *enumeration of powers*, scrupulously avoid the use of so comprehensive an expression, and confine themselves to the grant of such incidental power as might be both "necessary and proper" to the exercise of the specified powers.

Nor is it conceived that this construction of the constitution is calculated to give that unlimited extent to the powers of the Federal Government which by some seems to have been apprehended. There is a distinction between the power to appropriate money for a purpose, and the power to do the act for which it is appropriated; and, if so, the authority to appropriate money "for the general welfare" does not, by fair construction, extend the specified or incidental powers of Government. Thus, in the case under consideration, if the power to make a road or dig a canal is not given, the power of appropriating money cannot confer it, however generally it may be expressed. If there were no other limitation, the rights of the respective States over their soil and territory would operate as a restriction.

Whilst this appears to be a safe as well as fair construction of the constitution, it is also that which has been practically given to it since the origin of the Government. Of this, the instances already mentioned furnish some evidence; and it is apprehended that, upon the rigid principles of construction asserted both in regard to the enumeration of powers and the appropriation of revenue, the acts of the Federal Government, including all its branches, will exhibit a continued series of violations of the constitution from the first session after its adoption to the present day.

It would behoove us to turn over the statute book, and deliberately examine how, upon these principles, the laws giving bounties to fishermen, encouraging manufactures, establishing trading-houses with the Indians, erecting and constructing beacons, piers, and light-houses, purchasing libraries, adorning with paintings the chambers of Congress, giving charity to suffering foreigners, constructing roads through the different States, and establishing banks, can be reconciled to the provisions of the constitution. If, as has been remarked by high authority, the constitutional question can be "precluded by repeated recognitions, under varied circumstances, of the validity 'of the exercise of a power by Congress' in acts of the legislative, executive, and judicial branches of the Government, accompanied by indications, in different modes, of a concurrence of the general will of the nation," the advocates for those powers in the General Government can find little difficulty in supporting the pretension.

From all these considerations, your committee submit it as their opinion that Congress has the constitutional power to construct roads and canals through the several States, *with the assent of the States*, on such terms as may be agreed on, leaving the *jurisdictional rights* in the States, respectively. To these and other national improvements which may be found to be within the constitutional powers of the Government, they think it advisable that the interest of the Government in the Bank of the United States should be appropriated. They forbear to give greater length to this report by enlarging on the important advantages to be derived from these national improvements; they also forbear, at this time, to offer the details of any plan upon the subject, presuming it most proper to obtain the sense of the House of Representatives, in the first instance, on the general proposition. For this purpose, they respectfully submit the following resolution:

Resolved, That, in order to promote and give security to the internal commerce among the several States; to facilitate the safe and expeditious transportation of the mails by the improvement of post roads, with the assent of the respective States; to render more easy and less expensive the means and provisions necessary for the common defence by the construction of military roads, with the like assent of the respective States; and for such other internal improvements as may be within the constitutional powers of the General Government, it is expedient that the sum to be paid to the United States, by the twentieth section of the act to incorporate the subscribers to the Bank of the United States, and the dividends which shall arise from their shares in its capital stock, be constituted as a fund for internal improvement.

15th Congress.] No. 436. [1st Session.

EFFECT OF THE JUDICIAL PROCEEDINGS OF ONE STATE IN THE COURTS OF THE OTHER STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 23, 1817.

Mr. Hugh Nelson made the following report:

The Committee on the Judiciary, who were instructed, by a resolution of the House of Representatives, to inquire "whether any, and, if any, what legal provisions are necessary to prescribe the effect which the public acts, records, and judicial proceedings of each State shall have in the courts of every other State," beg leave to report:

That, upon inquiry, it is ascertained that various and contradictory decisions have been made upon the construction of the act of Congress entitled "An act to prescribe the mode in which the public acts, records, and judicial proceedings shall be authenticated so as to take effect in every other State," which was passed the 26th May, 1790. In some of the courts it has been decided that the records of judgments coming from other States, authenticated in the manner prescribed in the act, are upon the same footing as foreign judgments; that they are merely *prima facie* evidence of the debt or demand, which evidence may be inquired into and rebutted by extraneous proof; and, finally, that the original cause of action may be again investigated. In other courts, it has been decided that such records are conclusive evidence of the debt, and cannot be impeached but upon some ground or fact occurring after the rendition of the judgment.

Your committee are of opinion that Congress has not yet executed the power given by the constitution of prescribing the effect which such records shall have. At all events, so much doubt rests upon the question, that, in the opinion of your committee, it is highly expedient that Congress should interpose by a law which will produce uniformity in the decisions throughout the Union, and which, by the establishment of a fixed and certain rule, will give confidence and security to commercial men in every part of the United States. They have therefore prepared a bill, which is herewith presented.

15th Congress.] No. 437. [1st Session.

LIST OF PERSONS HOLDING OFFICE AFTER THEIR ELECTION TO CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1817.

To the House of Representatives of the United States: DECEMBER 29, 1817.

In compliance with a resolution of the House of Representatives of the 12th of this month, requesting to be informed whether any, and which, of the Representatives in a list thereto annexed have held offices since the 4th of March last, designating the offices, the times of appointment and acceptance, and whether they were at that time so held, or when they had been resigned, I now transmit a report from the Secretary of State, which contains the information desired.

JAMES MONROE.

DEPARTMENT OF STATE, *December* 24, 1817.

The resolution of the House of Representatives of the 12th of this month, requesting the President to communicate to that House whether any, and which of the Representatives named in the list thereto annexed have held offices since the 4th of March last, designating the offices, the times of appointment and acceptance, and whether they were at that time so held, or when they had been resigned, having been referred to this Department, the Secretary has the honor respectfully to report to the President as follows:

Persons named in the list from the House of Representatives.	States.	Office held since 3d March, 1817.	Time of appointment.	Time of resignation.
John Holmes,	Massachusetts,	Commissioner under the 4th article of treaty of Ghent,	Feb. 16, 1816,	Nov. 24, 1817.
Samuel Herrick,*	Ohio,	Attorney of the U. States,	Dec. 19, 1810,	Nov. 29, 1817.
Daniel Cruger,†	New York,	Postmaster at Bath,	June 29, 1815,	December 1, 1817.
Elias Earle,	South Carolina,	Postmaster at Centreville,	April —, 1815,	June 12, 1817.
Thomas H. Hubbard,	New York,	Postmaster at Hamilton,	March 11, 1813,	October 23, 1817.
Samuel C. Crafts,	Vermont,	Principal assessor for the sixth collection district,	Dec. 22, 1813,	December 1, 1817.
George Robertson,	Kentucky,	Principal assessor for the seventh collection district,	Jan. 4, 1815,	June 5, 1817.
George Mumford,‡	North Carolina,	Principal assessor for the tenth collection district,	- - -	No resignation has been rec'd from Mr. Mumford.
Levi Barber,	Ohio,	Receiver of public moneys at Marietta,	March 3, 1807,	December 1, 1817.
John F. Parrott,	New Hampshire,	Naval officer for the district of Portsmouth,	April 23, 1816,	Nov. 15, 1817.

JOHN QUINCY ADAMS.

15th Congress.] No. 438. [1st Session.

CONTESTED ELECTION OF SAMUEL HERRICK, A REPRESENTATIVE FROM OHIO.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 5, 1818.

Mr. TAYLOR, of New York, from the Committee of Elections, to whom was referred a memorial of C. Hammond, contesting the right of Samuel Herrick to a seat in this House, reported:

That, on the 19th December, 1810, Mr. Herrick was appointed attorney of the United States for the district of Ohio, which office he accepted, and held until his resignation thereof, on the 29th November, 1817. In October, 1816, he was elected one of the Representatives of the State of Ohio for the fifteenth Congress. The result of the election was publicly announced on the 7th January, 1817, in the presence of the Senate of that State. On the 15th September, 1817, the Governor executed a certificate of Mr. Herrick's election, according to the law of Ohio, which was received by him on or about the 30th day of the same month. Mr. Herrick, therefore, continued in office almost nine months after the 4th of March last, and two months after receiving the certificate of his election. It does not appear, on the part of the memorialist, and it is denied on the part of Mr. Herrick, that he performed any act as attorney of the United States after the said 30th September. He, however, continued in office, was liable to perform its duties, and was entitled to its salary until his resignation. Congress met December 1, 1817, and Mr. Herrick took his seat on that day in the House of Representatives.

The sixth section of the first article of the constitution provides that "no person holding any office under the United States shall be a member of either House during his continuance in office." The incompatibility is not

* See report of Committee of Elections, No. 438.
† See report of Committee of Elections, No. 439.
‡ See report of Committee of Elections, No. 445.

limited to *exercising* an office, and, at the same time, being a member of either House of Congress, but it is equally extended to the case of *holding;* that is, having, keeping, possessing, or retaining an office under such circumstances. If the membership of Mr. Herrick commenced either on the 4th of March or the 30th of September, 1817, he has vacated that membership by holding an office incompatible therewith.

We do not find that the question of incompatibility has been agitated in the House of Representatives on more than two occasions. The first case was that of John P. Van Ness, which occurred during the second session of the seventh Congress. The Committee of Elections were then instructed to inquire whether Mr. Van Ness, one of the Representatives from the State of New York, had not, after his election, *and after he had occupied a seat as a member*, accepted and exercised the office of a major of militia, under the authority of the United States, within the territory of Columbia. Mr. Van Ness freely admitted the fact as alleged, and thereupon the House unanimously resolved that he had thereby forfeited his right to a seat as a member of the House.

The other case was that of Philip Barton Key, decided at the first session of the tenth Congress. Mr. Key's seat was impeached, among other grounds, upon this: that, at the time of his election, and until a few days either before or after he took his seat, he held from the British Government, in his own right and name, the half-pay pension of a captain of infantry. The facts were briefly these: Mr. Key served as an officer in the British army, without the limits of the United States, from 1778 until 1783, when the corps to which he belonged was disbanded, and the officers placed on half-pay. The pension was paid, either for the benefit of himself or his assignee, until the month of December, 1805, when he received six months' half-pay. In January, 1806, he wrote to his agent in London, directing him to resign his claim to half-pay, and also to rank, if any could be supposed to exist; but it did not appear that any thing had been done in pursuance of that letter, nor, indeed, that it had ever been received by his agent.

On the 6th of October, 1806, Mr. Key was elected a Representative of the State of Maryland for two years, commencing on the 4th of March, 1807. On the 24th of October following he addressed a letter to Mr. Erskine, then His Britannic Majesty's ambassador at Washington, referring to the letter written to his agent, and repeating his resignation in a formal manner. This letter was not delivered to Mr. Erskine until the 28th or 29th of October, which was two or three days after the meeting of Congress, and after Mr. Key had taken his seat in the House of Representatives. Upon these facts the House decided that Mr. Key was entitled to his seat.

In regard to the several cases of Messrs. Turner, Dawson, and others, mentioned in the answer marked C, filed by Mr. Holmes, on the part of Mr. Herrick, we think a single remark sufficient. It does not appear that the House of Representatives was made acquainted with the existence of these cases; it cannot, therefore, be considered to have acquiesced in that of which it was ignorant.

The decisions of the House of Commons under the statutes of 5 William and Mary, chap. 7; 11 William III. chap. 2; and 12 and 13 William III. chap. 10, may serve to shed some light upon the subject under consideration. The first of these statutes enacts that no member of the House of Commons shall at any time be concerned, directly or indirectly, or any other in trust for him, in the farming, collecting, or managing any of the duties granted by that or any future act of Parliament, except the commissioners of the treasury, and the officers and commissioners for managing the customs and excise. The second act extends the disqualification to officers of the excise, declaring them incapable of sitting, voting, or acting as members; and the last-mentioned act applies the same provisions to all officers of the customs.

Many members of the House of Commons were, at different times, expelled for violations of these statutes; but the facts are reported in terms so general that it is impossible in most cases to determine whether the offence was committed before or after the member took his seat in the House. We find, however, two cases where the particulars are stated. The first was decided on the 13th of February, 1698, under the act above mentioned of 5 William and Mary. It is the case of Mr. Montagu, and is stated as follows by Hatsell in his precedents of proceedings in the House of Commons: The new Parliament was made returnable on the 24th of August, 1698, and was directed to sit for the despatch of business on the 29th of November. Mr. Montagu had been a commissioner of stamp duties, but in the commission which passed in September, 1698, he was left out; it appeared that he had acted under the former commission till the 4th of October, 1698; but, having informed the House that he did not qualify himself as a member till the 29th of November, and so conceived himself not to be within the law, he is, upon the question, called in to take his place, and a committee is appointed to draw up and state the matter of fact. It does not appear that the committee ever made report.

The other case is reported as follows: On the 5th of February, 1708, Sir Richard Allen was, on the hearing of his petition, declared to be duly elected for Dunwich. On the 7th of February he surrenders an office in the customs for life, to which he had been appointed in May, 1678. On the 8th of February this surrender is enrolled, and on the 9th of February he desires the sense of the House before he takes his seat on the clause of 12 and 13 of William III., chap. 10., which relates to the officers of the customs; and upon reading the letters patent and surrender, he is permitted to take his seat.

Persons elected to the House of Commons become at one time members for certain purposes, and at another time for other purposes. Thus, immediately upon executing the indenture of return by the sheriff or other returning officer, the person elected becomes entitled to the privilege of franking, although the day at which the Parliament is made returnable may not have arrived. Yet he is not a member; for he may thereafter be a candidate for election in another district, at any time before the Parliament is made returnable, and the return actually filed in the Crown Office. From the time last mentioned he becomes a member so far that he cannot be a candidate for another district, but yet he may thereafter hold an office incompatible with membership, and, upon resigning his office, he may immediately qualify and take his seat in the House. It has often been decided by their committee of elections that a person holding an office incompatible with membership is, nevertheless, capable of prosecuting his claim to a seat. After examination of all the parliamentary registers, histories, and journals within our reach, we have found no case where a person elected to the House of Commons was brought in on a call of the House before he had voluntarily appeared, qualified, and taken his seat; nor do we find any instance of a person having been expelled until after such time.

A very particular case occurred on the 10th of February, 1620. Sir John Leech, having been duly elected a member of the House of Commons, and appearing to take the oaths of allegiance and supremacy, was asked whether he had not already sat in the House that Parliament, in violation of the statute. He confessed that on the Wednesday morning previous he did sit in the House a quarter of an hour, being unsworn. For this offence Sir John was not expelled, but it was resolved that he was disabled to serve in the House, and a new writ of election was issued to supply the vacancy, in the same manner as if no election and return had taken place. The same course of proceeding has been pursued when a person duly elected and returned comes into the House and refuses to be sworn. Such was the case of Mr. Archdale, in the year 1698, who, being elected and returned, came into the House of Commons, and said he was ready to serve if his affirmation of allegiance could be accepted instead of his oath. The House resolved that it could not. Mr. Archdale, still declining to take the oath, was refused admittance to a

seat, and a new writ was issued to supply his place. This case is more peculiar, because a person elected to the House of Commons cannot relinquish his right to a seat, either before or after qualification, otherwise than by accepting an incompatible office; but, by refusing to be sworn, he may do that indirectly which he is not permitted to do directly. We have seen several similar cases which occurred in the Colonial Assembly of New York, but, not now having access to the journals, we are unable to report the particulars.

Persons elected and returned to the House of Commons may be chosen members of committees before they appear and qualify. But it is allowed for a reason similar to that which, in courts of law, permits a declaration to be filed *de bene esse* before the defendant appears in court. In both cases the act is conditional; and it is ineffectual unless the condition of appearance be performed.

The practice of this House, which does not allow the appointment of persons to be members of committees until they shall have been sworn and shall have taken their seats, is obviously more reasonable and convenient than the other. It was decided as early as the first session of the second Congress, in the case of John F. Mercer, who was chosen to supply a vacancy in the representation of the State of Maryland occasioned by the resignation of William Pinkney, that a Representative elect might decline his election before taking a seat, and before the first session of the Congress to which he was elected. We do not find that the question has since been agitated, although similar cases have often occurred. Our rule in this particular is different from that of the House of Commons; it is also better, for it makes our theory conform to what is fact in both countries, that the act of becoming in reality *a member of the House* depends wholly upon the will of the person elected and returned. *Election* does not of itself constitute membership, although the period may have arrived at which the congressional term commences. This is evident from the consideration that all the votes given at an election may not be received by the returning officer in season to be counted, whereby a person not elected may be returned and take the seat of one who was duly elected. Neither does a *return* necessarily confer membership; for if he in whose favor it be made should be prevented taking a seat at the organization of a House of Representatives, he might find, upon presenting himself to qualify, that his return had been superseded by the admission of another person into the seat for which he was returned.

At an election held in the State of Georgia, in October, 1804, Thomas Spalding was duly chosen a Representative to the ninth Congress; but, because the votes of three counties were not returned to the Governor within twenty days after the election, Cowles Mead received a certificate, and took his seat. Mr. Spalding afterwards presented his petition. The House vacated Mr. Mead's seat, and admitted Mr. Spalding.

In April, 1814, Doctor Willoughby was elected a Representative of the State of New York to the fourteenth Congress; but, by reason of a clerical error of certain inspectors in returning certificates of votes to the office of the county clerk, General Smith was declared duly elected, and a certificate of election was accordingly delivered to him; but he, having omitted to take a seat at the commencement of the session, was, on the ninth day thereafter, declared not entitled, and thereupon Doctor Willoughby was admitted in his stead.

Several other cases might be cited where persons were returned who never in fact became members, and where others became members who were not returned. Neither do *election and return* create membership. These acts are nothing more than the designation of the individual who, when called upon in the manner prescribed by law, shall be authorized to claim title to a seat. This designation, however, does not confer a perfect right; for a person may be selected by the *people* destitute of certain qualifications, without which he cannot be admitted to a seat. He is, nevertheless, so far the representative of those who elect him, that no vacancy can exist until his disqualification be adjudged by the House; yet it would be easy to state cases where he would not be permitted for a moment to occupy a seat, notwithstanding the regularity of his election and return. To no practical purpose could he ever have been a member. So, also, if a person duly qualified be elected and returned, and die before the organization of a House of Representatives, we do not think he can be said to have been a member of that body, which had no existence until after his death. We say which had no existence, for we consider that concert altogether fanciful which represents one Congress succeeding to another as members of the same corporation. It has no foundation either in fact or in the theory of our Government. Each House of Representatives is a distinct legislative body, having no connexion with any preceding one. It commences its existence unrestrained by any rules or regulations for the conducting of business which were established by former Houses, and which were binding upon them. It prescribes its own course of proceeding, elects its officers, and designates their duties. Even joint rules for the government of both Houses of Congress are not binding upon a new House of Representatives, unless expressly established by it. Although the fourteenth Congress had never assembled, the fifteenth would have met, under the constitution, clothed with every legislative power, as amply as it was enjoyed by the thirteenth. The constitution does not define the time for which Representatives shall be chosen; it is satisfied provided the choice take place at any time in every second year. The rest is left to the discretion of each State. Accordingly, in some States Representatives are usually chosen for one year and seven months, and in other States for a longer time.

The privilege of exemption from arrest, granted by the constitution to Representatives before a meeting of the House, and after its adjournment, furnishes no argument in favor of their membership at such times. Exemption from arrest is a privilege as old as the Parliament of England. There it is extended, not only to members, but to their servants, horses, and carriages. Our constitution adopts the very words of the common law, but restricts the privilege to members. In both countries the object is the same—not the benefit of the member, but of the public service. It is an essential incident to the right of being represented, and a consequence of that right. But that membership is not co-extensive with the enjoyment of that privilege is manifest, from the consideration that such a construction might make the members of one Congress continue in office, not only after the Congress had expired, but also after the next Congress was actually in session. This construction, therefore, is not only absurd, but it serves to illustrate the fallacy of that suggestion which fancies the Representatives of one Congress succeeding to the seats of their predecessors as members of the same corporate body.

The privileges of franking letters and of exemption from militia duty are not granted by the constitution; they are established by law, and liable to be changed at the will of the Government. They have been extended, and may be restricted, as public convenience shall require. Previous to the last Congress, the privilege of franking was not enjoyed until after the commencement of each session. But as that does not prove negatively that persons elected to the House of Representatives were not members before that time, so the existing law does not prove affirmatively that they are. It is true that the words "members of the House of Representatives" are used as descriptive of the persons to whom the privilege is granted, but it certainly was used without intending thereby to express an opinion, much less to decide, when membership commences, and probably without in anywise adverting to that inquiry. The late war had created claims in every part of the country which it was found convenient to send by mail to those who were elected to Congress in the several districts previous to their leaving home. The law was passed with a view to the convenience of these public claimants, as well as to that of the Representatives elected. We have seen that in England this privilege is enjoyed before the commencement of membership, and probably for a reason similar to that above mentioned.

It is not now necessary to inquire what construction ought to be given to the act which exempts "members of both Houses of Congress" from the performance of militia duty. We do not know that it has ever received a judicial exposition, and we presume that the practice under it by the officers of the militia furnishes no very high authority on the constitutional question before us.

In regard to the danger apprehended from executive influence in the concerns of legislation, we might rest satisfied with the remark that the business of *forming* a constitution is not confided to us. Ours is a more humble duty; it is to expound the text by a fair interpretation. We can neither add nor diminish; the object of our inquiry is, not what ought to be, but what is.

Whoever looks into the constitution will find provisions to guard the entrance of the legislative hall against those whose personal and immediate interest would be advanced by perpetuating offices and increasing salaries, but he will find more for the purpose of excluding the influence of executive patronage. The framers of the constitution either did not apprehend danger from that source, or they thought it impracticable to prevent it without hazarding still greater mischief. The great offices of the Union are objects of high and honorable ambition; they are left as open to the members of this House as to others, and they can only be obtained through executive favor. Nay, laws may be passed on the last day of a Congress creating offices and fixing their salaries, and on the next day the members by whose votes they were created may be appointed to fill them. The only antidote provided against an abuse of this pervading influence is the elective franchise. No dependant on the Executive can take a seat in this House. If any member become such, his seat is vacated; his power returns to the people. By a faithful and intelligent exercise of it, they may correct errors and punish delinquency. This is the regenerating principle of the constitution. If this remedy fail, it will be vain to look for another. The constitution was provided for a brave, wise, and virtuous people. If the citizens of the United States ever cease to deserve this character, our present political institutions will be found unsuited to their condition. This is the only constitutional answer we can give to the suggestion of possible danger from executive influence.

In fine, we have examined the memorial of Mr. Hammond with deliberate attention, and are of opinion that Mr. Herrick has not rendered himself incapable of being a member of this House by reason of having held the office of attorney of the United States after the 4th of March, and until the 29th of November last. We subjoin hereto the said memorial, marked A; Mr. Herrick's answer, marked B; and also an answer filed by Mr. Holmes, on the part of Mr. Herrick, marked C; and respectfully submit the following resolution:

Resolved, That Samuel Herrick is entitled to a seat in this House.

A.

To the honorable the House of Representatives of the United States in Congress assembled: The memorial of the undersigned, a citizen of the United States, and a resident and elector in the fourth congressional district of the State of Ohio, respectfully represents:

That, at the general election held in the State of Ohio, in the month of October, in the year 1816, Samuel Herrick, Esq. was duly elected to represent the fourth congressional district of the State of Ohio in the fifteenth Congress of the United States; that, on the 7th day of January, 1817, agreeably to the laws of said State, he was declared duly elected by the Governor and Secretary of State, in the presence of the Senate of said State; that he has obtained a certificate of his election, has appeared and taken the oaths required by law, and now holds and occupies a seat in your honorable body as one of the Representatives of the State of Ohio.

Your memorialist further showeth that, at the time Mr. Herrick was elected a member of the House of Representatives, he held the office of United States district attorney for the Ohio district, which office Mr. Herrick continued to hold, and continued to perform the duties thereof, and to receive the compensation attached thereto, until the month of September, in the year 1817; nor is it known to your memorialist that Mr. Herrick has yet resigned the said office.

Your memorialist further showeth that the office of United States district attorney is an office created by a law of the United States, and the persons appointed to discharge the duties of said office are nominated and appointed by the President, by and with the advice and consent of the Senate of the United States, and hold their offices during the pleasure of the President, and, besides perquisites of office, receive an annual compensation from the treasury of the United States.

Your memorialist further showeth that, by the sixth section of the first article of the constitution of the United States, it is, among other things, provided and declared that "*no person holding any office under the United States* shall be a member of either House [of Congress] during his continuance in office."

It is conceived that the Congress of the United States is a political institution of continual duration. Composed of the President, the Senate, and the House of Representatives, it must always be in existence while the Government exists. The members of all its component parts, though appointed for different, are still appointed for determinate periods. The moment the term of the predecessor expires, that of the successor commences, unless, from some cause, such successor has not been selected in the manner pointed out in the constitution. The commencement of every term is upon the 4th of March, that of the President every fourth, that of the Senate every sixth, and that of the House of Representatives every second year; and although it may possibly happen that the seat of a single member, or the representation of one or more States, may be vacant, yet this fact cannot possibly affect the continual existence of the institution itself; for, if the Congress once ceases to exist, the Government must from that instant be terminated.

As the members of the House of Representatives are appointed for but two years, and the other branches are appointed for a longer period, the election of a new House of Representatives is considered as constituting a new Congress. The present Congress is denominated the fifteenth Congress of the United States; but this description must be referred to the members who compose the Congress, and not to the institution itself. Though, at the end of the biennial term of the Representatives, that branch of the Congress becomes necessarily disorganized, still the Congress exists. The other branches are in complete organization, and the members of the representative branch are legally in existence, ready to be organized, should occasion require it.

All the rights and all the privileges of their station attach to the members elect the moment their term commences. There can be no space of time between the termination of one Congress and the commencement of another. The fifteenth Congress existed on the 4th March, 1817, as certainly as it now exists. The members of the Senate and of the House then elected, but who had not qualified themselves to act by taking the necessary oaths, were, notwithstanding this fact, members of Congress. The terms of Mr. Otis, in the Senate, and of Mr. Herrick, in the House, commenced at the same instant of time. Both were members. The President's proclamation convening the Senate called Mr. Otis to the immediate performance of his duties, but it could not constitute him a member of Congress. A proclamation convening the House of Representatives would have operated in the

same manner upon Mr. Herrick; and certainly, notwithstanding that the States of Virginia and North Carolina had omitted to appoint their representation, the President could have called the fifteenth Congress to meet upon the 4th day of March, 1817.

An opinion seems to have prevailed that a person elected a member of Congress is not, in fact, a member until he shall have declared his acceptance of the appointment by taking the oaths necessary to qualify him to discharge his duties on the floor. This opinion assumes that, although the appointment is complete, and the term commenced, still the seat remains vacant until the person appointed shall signify his pleasure upon the subject. This position is regarded as wholly untenable.

Either Mr. Herrick was a member of Congress on the 4th of March, 1817, or he was not a member. If he was a member, there could be no vacancy; if he was not a member, by what authority does he now occupy his seat?

The constitution of the United States provides that "the times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof;" and it also provides that "when vacancies happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies." On the 14th of February, 1812, the Legislature of Ohio prescribed that, on the second Tuesday of October, 1812, the electors in that State should elect suitable persons to represent that State in Congress for a term of two years, to commence on the 4th day of March, 1813; and they further prescribed "that, at every period of two years from the said second Tuesday of October, the electors of each congressional district in that State shall, in like manner, vote for a suitable person to represent that State in the Congress of the United States for the term of two years, to commence on the 4th day of March next thereafter."

Under these provisions of constitutional and statute law, on the second Tuesday of October, 1816, Mr. Herrick was elected to represent the State of Ohio in Congress for the term of two years, to commence on the 4th day of March, 1817. By this election, the constitution of the United States and the law of Ohio were completely executed. Their office was performed, and no election could be held, except to fill a vacancy, until the recurring term of two years. If, after this, Mr. Herrick should die before the meeting of Congress, the Executive must issue his writ to supply the vacancy; and it seems difficult to comprehend how, if Mr. Herrick never was a member of Congress, his death could leave a vacancy to be filled by special election.

That persons elected members of Congress are legally members before they qualify by taking the oaths is evident, from the practice under the constitution in various particulars. It is provided by the sixth section of the constitution that the members of Congress shall be privileged from arrest in certain cases during their attendance at the session, and in going to and returning from the same. This privilege attaches to the members before they take the oaths when going to attend the first session after their election. If they were not members until the oaths were taken, this could not be the case.

The militia law of the United States exempts "the members of both Houses of Congress" from the performance of militia duty. This exemption has always been considered as attaching to the members from the commencement of their term. And, in like manner, the privilege of franking is claimed and exercised by the members elect before they take their seats. In the cases here enumerated, the practice is undoubtedly predicated upon the hypothesis that the persons elected to Congress are members from the commencement of their term.

If, then, according to the constitution, the person elected a member of Congress becomes a member upon the day at which his term commences, your memorialist conceives that upon that day he must be capable, under the constitution, of occupying his seat in the proper House. A person holding upon that day an office under the United States is not thus capable. On the 4th of March, 1817, Mr. Herrick held the office and received the emoluments of United States district attorney for the Ohio district. This is an office under the United States, and the constitution expressly declares that "no person holding any office under the United States shall be a member of either House of Congress during his continuance in office." *He shall not be a member.* If Mr. Herrick was not a member while he held his office, he cannot now be a member. If he was a member, and at the same time held an office under the United States, it would seem that the constitution is inoperative in his particular case.

The language of the constitution is clear and explicit. It did not mean to prohibit a person from performing the duties of a Senator or Representative, and the duties of any other office at the same time. Its object was to render the holding of an office under the United States and the appointment of a member of Congress utterly incompatible. The interpretation by which Mr. Herrick can hold his seat permits him to be a member of Congress, to enjoy the privileges and exemptions of a member of Congress, and to continue for nine months afterwards, and longer if he pleases, to hold and receive the emoluments of an office under the United States. Your memorialist most respectfully begs leave to insist that this interpretation never was contemplated by the framers of that instrument. Its purpose cannot be mistaken. It intended, by shutting out from both Houses the dependants and the creatures of the Treasury, to close the doors of the Legislature against undue executive influence. And this was done to preserve the American Congress from the baneful consequences of that indirect and invisible system of bribery which corrupted and disgraced the British Parliament.

The provision of the constitution occasions an absolute incapacity. A person elected to Congress, who, after the commencement of his term, continues to hold or accepts an office under the United States, is incapable of membership in the one case, and in the other vacates his own seat. Adopt a different construction, and Congress may soon be filled with men who receive executive appointments after their election, and resign them only long enough to serve executive purposes in the Legislature. Surely it cannot be necessary to an upright, intelligent, and enlightened legislation that Congress should strain for an interpretation of the constitution by which they may retain among them as members men so fond of distinction or so greedy of gain as to place themselves upon a level with the menial instruments of the most corrupt Government upon earth; for here your memorialist must beg leave to suggest that it can seldom happen that a high-minded and honorable man would wish to retain an employment under those whom, in discharging a trust of great confidence, he may soon be compelled to oppose or control.

The view which your memorialist has taken of this subject carries conviction to his mind that Mr. Herrick, by retaining his office, has rendered himself incapable of a seat in Congress; that, consequently, he has, by his own act, vacated his appointment, and has no right to a seat in your House. Your memorialist, therefore, prays that your honorable body will examine into the matters herein alleged, and that you will vacate the seat now occupied by Samuel Herrick, Esq. as a Representative in the fifteenth Congress from the fourth congressional district in Ohio.

And your memorialist will pray, &c.

C. HAMMOND.

B.

SIR: WASHINGTON, *December* 29, 1817.

The question submitted for the consideration and report of the committee is, whether a person elected a Representative to Congress on the second Tuesday of October, 1816, received the certificate of his election about

the 1st day of October, 1817, and who has held the office of attorney of the United States before and after the 4th of March, and down to the 29th of November, 1817, and no longer, is entitled to his seat as a member of Congress, in the House of Representatives, on the first Monday of December following, under the constitution of the United States, or not. This is the question, and these are the facts which make the case for the report of the committee. I am thus particular in stating the facts which make the case, in order that it may be decided upon its own peculiar merits, unconnected with the facts and circumstances which may relate to the case of any other gentleman (if any such there be) whose situation may be similar in some, though not in all respects, to mine. Not because I know, or even suspect, that the facts connected with this case are more favorable to my holding my seat than the facts relating to the case of any other gentleman may be favorable to him; but because I think it just that this, like every other case of individual right, before this, as before every other tribunal, should stand upon its own base, and be decided according to the facts and circumstances of each particular case. The constitution, by which the several departments of the Government have been created, is the only authority essentially connected with, or that has any bearing on, the question. As well may we call to our aid the by-laws of the corporation of the city of Washington or of Alexandria in giving a construction to that instrument, as the laws of the State of Ohio, or of any other State in the Union. I mean no disrespect to the laws of any State. They are all wise and proper, I presume, within their respective spheres, but they have no bearing on the question. Taking the constitution for our only text and guide, does it prohibit a person thus situated from becoming a member of Congress? I think not. He is not precluded, either by the words or the spirit of the constitution. That part of the constitution, and the only part that is regarded as prohibitory, in the sixth section of the first article, reads as follows: "And no person holding any office under the United States shall be a *member* of either House during his continuance in office." What, sir, is necessary to constitute a person a member of Congress within this provision of the constitution? Does the mere act of the people, by electing him their Representative, either in fact or in law, make him a member of Congress? I think not, sir; for, if so, the mere nomination of the President, or the mere nomination of the President with the approbation of the Senate, may constitute a judge, in law or in fact, of one of your courts, an ambassador, a consul, or any other officer, which the President and Senate have the power, under the constitution, of appointing; and that, too, with or without the consent of the person thus nominated, without any evidence of his acceptance, and without his taking the oath of office as prescribed and required by law—a doctrine which, I presume, would not be contended for even by the memorialist himself. And yet this position, as preposterous as it manifestly is, is nevertheless correct, if the election of a Representative by the people, without any act on his part evidencing his consent or proving his acceptance, will constitute him a member of Congress. So far from this being the law, as it regards this case, I believe in every instance, as well under the Government of the United States as under the several State Governments, there are always one or more acts to be performed, both by the candidate or contemplated officer, and by the Government or people, as the case may be, all of which must be performed before any person can be constituted an officer, either in law or in fact; and such is peculiarly the case as it respects a member of Congress. First, the people must elect him; secondly, the votes must be canvassed; thirdly, his election must be duly proclaimed; and, fourthly, the evidence of his election and certificate of the fact must be made out and furnished him by the Executive of the State. All these acts are required to be performed by the people and the Government, and that, too, before the person elected is bound even to *know* that he is elected; and even then it would be unreasonable to say that the person elected should not have some little time to reflect on the subject, and to make up his mind whether he would resign one office to accept of another. But the performance of all the acts above mentioned do not constitute him a member of Congress. He is merely a representative elect—an inchoate or inceptive member.

There are yet two other acts to be performed, one by the Government, another by the inchoate member or the Representative elect, before his right to his seat is consummated, and before he is, agreeably to the language and spirit of the constitution, a member of Congress. He must appear in this place, and consent to take the oath as prescribed to support the constitution, and the Speaker must administer that oath to him. This act of his, in *consenting* to take the oath, is the only legal evidence known to your constitution or laws of his having *accepted* the office; and his having *taken the oath* is the only legal evidence that he is, in law and in fact, a member of Congress, the other acts enumerated having also been performed. This case may be assimilated to that of any other contract made, where the people or the Government form one party, and an individual the other party; or to that of a contract made by two individuals—the assent of both to the contract must be proved, or it is no contract. If all the acts which I have enumerated are not necessary to be performed to constitute a member of Congress, how many are necessary? Where is the dividing line drawn? and by what is it drawn? The constitution has drawn no line between the performance of the whole or a part of those acts. And upon the same principle that the performance of any one of those essential acts and conditions to constitute a member may be dispensed with, the whole may be dispensed with, and a person is equally a member of Congress with or without the consent of the people, or of his own consent. It is contended that a Representative elect, in the State of Ohio, and before he takes the oath required by the constitution, was, on the 4th of March last, a member of Congress, or he was not a member; if a member, he could not hold the office of attorney; and if not a member, there was a vacancy, and the Executive should or might have issued a writ, ordering a new election to fill the vacancy. To support this position, a statute of Ohio is cited, and which, it is said, provides for the election of a Representative on the second Tuesday of October, for the term of two years, to commence on the 4th day of March thereafter. That there is such a statute is not denied. I have, however, before entered my protest against the propriety of dragging in the statute of any State to control or vary the correct meaning and construction of the constitution of the United States. From whence, sir, did the Legislature of Ohio derive their authority to pass a statute determining when the office of a member of Congress shall begin, or when it shall end, or how long it shall continue? Surely not from this constitution. The only power given by the constitution to the State Legislatures on this subject is that of prescribing the times, places, and manner of holding elections, (section 4th, 1st article.) The second section of the first article of the constitution provides for the election of the Representatives every second year by the people of the several States, without fixing any *time* when the office shall commence. As, then, neither the constitution, nor any law made by the authority of that instrument, fixes the time when the office of a member of Congress begins, it is but fair to conclude that it was the intention of the convention that the office should commence at the time the oath was administered to the Representative by the Speaker, and not before; or, otherwise, that convention of statesmen, good and wise as they were, would expressly have fixed on some other and earlier period, and not have left the question open for construction.

I accord with the position assumed, that a Representative elect, on the 4th of March, and before he takes the necessary oath, was a member of Congress, or he was not a member, within the sixth section of the first article of the constitution. I maintain the negative of this position. If a Representative elect was, on the 4th of March, and before he took the oath, a member, then not only all the rights and privileges of a member instantly attached to him, but also all the rights and privileges of the people on their Representative as instantly attached to them. I presume

it will not be said that the rights of the Representative elect on the people attach to him before the rights of the people on him attach to them. No, sir; those respective rights have a simultaneous beginning. And suppose the President had thought proper, on the 4th of March, or soon thereafter, to have called an extra session of Congress, (as he had a right to do,) and the Representative elect, before he had taken the oath, had been summoned to attend at this place, and refused obedience to the summons, could his obedience have been forced? No, sir. And suppose, on the 1st of December, the constitutional period for the meeting of Congress, the House had met; and there not being a quorum to do business, suppose a member elect, but who had not been sworn into office, was walking the streets of this city, attending to his ordinary private concerns, with the certificate of his election in his pocket, as made out by the Executive of the State—could the House compel the attendance of such Representative elect? Or suppose the sergeant-at-arms should seize the Representative elect, and drag him before the House *vi et armis*, and Mr. Speaker should rise with his Bible in his hand, and order him to be sworn, and to repeat the form of the oath after him, and the Representative should refuse, by saying he would not repeat the oath, he would not be sworn, and that he would not perform the duties of a member—I ask, would not Mr. Speaker, and would not the House, to use a homely phrase, be at the end of their tether? And why? Because a Representative elect cannot perform any duty enjoined upon him by law before he has taken the oath of office, and he cannot take the oath before Congress convenes, and which is the only legal, unequivocal, and certain evidence that he has accepted the office and has become a member. Nor do the rights and privileges of a *member* of Congress instantly attach to a Representative elect on the 4th of March, and before he takes the oath of office. If he *indeed* takes the oath on the 4th of March, I agree that his rights and privileges attach to him, in the manner as prescribed by the constitution, as soon as he takes the oath, and *not before*.

It will be perceived, sir, that there is an evident distinction running throughout the constitution between the meaning of the word "Representative" and the word "member." The word "*Representative*," as used in the constitution, signifies a person who has been elected, but not *qualified to act;* to him the rights and privileges of a member do not attach. The word "*member*" signifies a person who has not only been elected, but has taken the oath of office; it means a member *de jure* and *de facto;* to him the rights and privileges do attach. Thus, for example, in the fourth section of the first article: "The times, places, and manner of holding elections for Senators and *Representatives* shall be prescribed in each State by the Legislature thereof;" not for Senators and *members*. And again, by the fifth section of the first article: "Each House shall be the judge of the elections, returns, and qualifications of its own *members;*" not *of its own Representatives;* "and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent *members;*" not *the attendance of absent Representatives*. "Each House may determine the rules of its proceedings, punish its *members*," *not its Representatives*, "for disorderly behavior, and, with the concurrence of two-thirds, *expel a member;*" not *expel a Representative*. And the sixth section of the first article, called the *prohibitory* section, does not say that a person holding any office under the United States shall not be a *Representative* during his continuance in office; it says, no person holding, &c. shall be a *member* of either House during his continuance in office. And, however it may have been the fact in some instances that Representatives elect, before they were qualified and took their seats in the House, may have claimed exemptions from the performance of military duties, (as is alleged by the memorialist,) and the benefit of the privilege of franking letters, &c., (though I do not know that it is a fact that any gentleman has done it, I can answer for one that I have not done it,) yet I very much doubt whether the practice is warranted by the true construction and spirit of the constitution. Again, sir, if the convention who framed the constitution intended that no person holding any office under the United States should be a Representative elect during his continuance in such office, they would have employed the necessary and appropriate language for the expression of that intention, as they certainly were capable of doing, and not employed the language here used.

If such had been their intention, the convention would have employed the same language which they have used in the second section of the first article, where they have clearly expressed such intention when they say "no person shall be a *Representative* who shall not have attained to the age of twenty-five years, been seven years a citizen of the United States, and an inhabitant of that State in which he shall be elected." So, in the first section of the second article, "no Senator or Representative, or person holding any office of trust or profit under the United States, shall be appointed an elector." Here the convention has not only said that a person holding an office under the United States shall not act as an *elector*, but that he shall not be a candidate—*he shall not be appointed an elector.*

I have only to add, sir, that, if a contrary doctrine prevail, it will have the effect, in many instances, of defeating the views and thwarting the wishes of the people; it will have the effect, in some instances, of limiting the number of persons out of whom the people will be permitted to select their candidate for a member of Congress. I can assure you, sir, that I should not have permitted my name to be used as a candidate, if I had not most conscientiously believed that I had the right, lawfully and equitably, to hold the office of attorney (as inconsiderable as the emoluments of that office are) until I *took the oath* as a member of this House; for, by taking a seat in this House, I have not only resigned the office of attorney of the United States on the 29th November, (which I did cheerfully at the time,) but shall also suffer a considerable loss by neglecting the practice of my profession as a lawyer, which has heretofore been profitable. The latter loss I believed would be as great as my pecuniary circumstances could comfortably sustain for the honor of holding a seat in this House, *without* resigning the office of attorney *long before* I became *in fact a member of Congress.*

I have the honor to be, &c.

SAMUEL HERRICK.

To the Hon. Mr. TAYLOR, *Chairman of the Committee of Elections.*

C.

Answer of Mr. Holmes, filed in behalf of Mr. Herrick.

Mr. Herrick is duly elected a Representative in the Congress of the United States from the State of Ohio. At the time of his election, and until after the 4th of March last, he held the office of attorney of the United States for the district of Ohio, which office he resigned before the commencement of this session of Congress.

Upon these facts his right to a seat is contested. In the sixth section of the first article of the constitution of the United States, it is provided that "no Senator or Representative shall, during the term for which he was elected, be appointed to any *civil* office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased, during such time; and no person holding *any* office under the United States shall be a member of either House during his continuance in office." The first clause affects the *office*, the

last the *membership*. The first prohibits the Executive from taking away a Representative from the people, and very properly extends it to the whole period "for which he is elected;" and it guards against the temptation to create offices for our own emolument.

Had the prohibition in the other clause relating to *membership* been intended to extend to the same period of time, it would have been so expressed. The sentence would have then stood: And no person holding any office under the United States during the time for which he was elected shall be a member of either House. The changing the phraseology in the same paragraph would not have been without design. The prohibition does not extend to the time for which he is elected, nor even in which he is a member, but is expressly limited *to his continuance in office*.

When the constitution disqualifies a person from serving the people as their Representative, the reason of the disqualification is apparent. By the second paragraph of the second section of the same article, no person shall be a Representative who shall not, *when elected*, be an inhabitant of the *State*. The *inhabiting* is required *at the time of his election*, that the people may know his ability and his principles, and he may understand their interests and inclinations.

The first and principal inquiry, then, is, was Mr. Herrick, in the sense intended in this clause of the constitution, *a member* of this House during his continuance in office?

It would be difficult to perceive how a person can be a member of *either House* until he has met with the others, taken the oath, and submitted to the usual organization. Before this, he has no powers as a *member*. He can do no *act* in that capacity. He is, to be sure, a Representative or member *elect;* but he is not a member of the *House* until that House shall have judged of his "election, return, and qualification."

A person cannot be a member until he accepts the appointment. This is not done until he appears and expresses his willingness to act, or, *at least*, claims some privilege of his election. Many members do not receive their *credentials* until they arrive at the seat of Government. A notice that they are chosen does not make them *members*, nor is it evidence of their acceptance. When they *elect to act*, they signify their acceptance; when they are *qualified*, they become *members*.

The word "*member*" is used throughout the constitution to signify a constituent branch of an *organized House*. Thus, the *House of Representatives* is to be composed of *members*, &c. The Senate may convict, on impeachment, with the concurrence of two-thirds of the *members* present. Each House shall be the judge of the election, &c. of its own *members*, may punish its *members* for disorderly behavior, and, with the concurrence of two-thirds, expel a *member*. At the desire of one-fifth, the yeas and nays of the *members* are to be entered on the journals; and there is no instance in which they are spoken of as *members* except as constituting a *House*, unless the power to compel the attendance of *absent members* is an exception. If this power extends to compelling the attendance of those who have *never taken their seats*, it would seem that, in *one* instance, the constitution describes persons as members before they are qualified. But it is at least doubtful whether a *minority* of the House can exercise forcible means to bring in a man who has never taken the oath or submitted to the rules. It is not readily perceived what officer could be employed to execute a *capias* upon a member elect in a remote part of the country, who had never submitted to the authority of the House, or signified his acceptance of his place.

If the expression is intended to extend to those only who absent themselves *after* they are qualified, it is not an exception. But, *at most*, it is not an exception. It speaks of the *House* compelling the attendance of *absent* members, or *members elect*. The word *absent* qualifies the meaning. Besides, it only proves that the Representatives are called members *after* the commencement of the session, which might be safely admitted.

When they are spoken of in the constitution in relation to other times than while in session, they are invariably called *Senators and Representatives, and not members*. Thus, no person shall be a *Representative* who shall not have attained to the age of twenty-five years, and, *when elected*, be an inhabitant of the State. So of a Senator. The times, &c. of holding the elections of *Senators and Representatives* shall be prescribed by the Legislatures of the States. Senators and Representatives shall receive a compensation, and be privileged from arrest. These privileges embrace the time in which they are members, and *more*—including their *going and returning*. No Senator or Representative shall, *during the time for which he is elected*, be appointed to any civil office, &c.; and then comes the clause under consideration, that no person holding an office *shall be a member*.

This being the solitary instance among so many in which the word is extended beyond the session, there should be some good reason for this difference of its meaning. Now, what *is* the reason? Does the office influence the election? The objection comes too late. It seems to be agreed that a person may hold his office at least to the time of his election.

Does it influence the conduct of the member? The office ceases before he begins to act. There are very good reasons why a person shall not be a *member* during his continuance in office. His duties as a Representative are not to be interrupted by the duties of his *office*, nor his motives perverted by *executive influence*. If, before he is called to act as a Representative, he is disencumbered of the office, the former reason ceases; and why does not the latter? Can it be pretended that, because he *has had* an office, the influence continues after the office ceases? Is a Representative *purified* if he resigns an office on the 3d, and polluted if he holds it to the 4th of March? A doctrine like this leads to the most palpable absurdities. The election in New York is twenty months before the usual session in which the Representatives are to serve; that in Tennessee about four months. Suppose a gentleman in each State to be appointed to an office of the *same kind* on the *same day*. They both hold their offices *up to* the day in which the election takes place in Tennessee, resign on the same day, are chosen to Congress, and take their seats. Yet, because the gentleman from New York held his office after the 4th of March, and *after his election*, and the gentleman from Tennessee held his to the same time and *up to* his election, the latter is qualified, and the former disqualified. Here are two gentlemen who hold their offices and take their seats contemporaneously, and one is admitted, and the other rejected, and the reason is, that the one would be under executive influence, and the other would not. It is a poor compliment, indeed, to those venerable sages who framed the constitution, to suppose them capable of such palpable absurdities.

At the time the federal constitution was framed, an opinion had long prevailed that executive and judicial officers ought not to partake in legislation. It was deemed expedient that the three departments of the Government should be kept distinct, lest members of a Legislature, holding offices under the Executive, might be too much inclined to yield to his will, and extend his power. But it would have betrayed unreasonable jealousy to apprehend that gratitude for *past* or hopes of *future* favors would lure a member from his duty. Had the framers of the constitution apprehended any danger from this source, they would have defined and *equalized* the time that an office must be executed before the incumbent could act as a legislator; and they would have especially extended their prohibition to a period *after* the legislator's power had expired. Men are less inclined to be influenced by gratitude for *past* than hopes for *future* benefits. Selfishness induces the belief that when the office is executed the account is balanced; but the hopes of *future smiles* afford a much stronger inducement to a member to forget his constituents and cling to the Executive.

But it is insisted that Congress is a *perpetual body*, and as soon as one House expires another springs into existence. Visionary as is this theory, it becomes us to notice it. The constitution has provided that the House shall be composed of members chosen every second year, but has not defined at what time their period shall commence. It is the *law* that has established the 4th of March as the commencement of the two years *within which* a Congress shall meet and act. The time of election, however, is still left with the *States*. In Virginia, North Carolina, and Tennessee, the Representatives are chosen *after* the 4th of March. If membership commences at this time, the Representatives of those States must be excepted, or be members before they are chosen. And should the other States postpone their elections until after the 4th of March, which they have a right to do, this doctrine of a perpetual Congress would be subverted, and still the constitution and the liberties of the people would be safe.

But it is said that because, by the constitution and laws, Representatives are entitled to privileges before and after their sessions, this implies that they must be members while these privileges exist. This argument proves too much. Congress might be summoned to meet on the 4th of March; they must set out for the seat of Government, and would be exempt from arrest, before the former Congress expires. But they cannot be *members* while another Congress exists. They may, and generally do, hold their last session *until* the 4th of March, when their term expires. They are, however, exempt from arrests during their *return*, but they are not members during that time. The truth is, that while going to *become* members, and returning after they have *ceased* to be members, they are entitled to this privilege. The same reason will apply when speaking of their right of franking letters, or any privileges granted by law.

But it is apprehended that a Representative would resign his office and take his seat upon a *bargain* with the Executive that he should be reappointed. If this objection deserves a serious answer, it may be observed that this clause in the constitution, in its utmost extent, is no cure for the evil. *Before* the election, or *after* and *before the 4th of March*, the resignation would always be made under a promise of reappointment. Were we disposed to indulge in suspicion, we should have much more reason to fear a contract for a *new* appointment than a reappointment. But the constitution has provided against *neither*. To suppose it *possible*, would be a slander upon any Executive, and betray a jealousy totally unworthy a free and enlightened people.

The State constitutions afford a very good commentary upon the clause under consideration. The incompatibility is generally confined to the power of *acting*. In few instances it extends to *eligibility*, but in *none* to the precise time for which the person is elected.

By the constitution of Massachusetts, formed in 1780, executive and legislative powers cannot be *exercised* by the same *person*.

By that of Virginia, formed in 1776, the *exercise* of the powers of the different departments of the Government at the same time is prohibited.

By that of Delaware, of the same year, certain officers are made *ineligible* to either House, and members accepting of offices *vacate their seats*.

By that of New Jersey, of the same year, no person holding an office of profit, &c. shall be entitled to a seat in the General Assembly, but, on his being elected and *taking his seat*, his *office* shall be vacated. There are instances which happened during the Revolution, at a time when the corruptions of Parliament were deprecated and magnified.

Several of the State constitutions, adopted since that of the United States, have copied the words of that instrument in this particular.

By that of *Georgia*, however, the person holding an office shall not be allowed to *take his seat*.

By that of *Tennessee*, no persons of the above description *shall have a seat*.

By that of *Mississippi*, laid on the table during this session, the prohibition commences with the *first session* after the election. With such expressions of the opinions and inclinations of the people before them, the framers of this constitution made the provision in question; and it seems impossible to doubt their intention to prohibit merely the exercise of the powers of the different departments of the Government by the *same person* at the *same time*.

Were this construction a novel one, and resisted by the uniform practice of this House, the propriety of urging this doctrine might be reasonably doubted. Had the indulgence of the practice proved dangerous to the independence of the House, or the liberties of the people, it would be our duty to correct it. But ever since the first organization of the Government, repeated instances of the kind have occurred, and those even stronger than that of the member objected to.

Mr. Tracy, of Connecticut, while a Senator of Congress, was appointed by the President to the performance of some office relating to the Indians, the duties of which encroached upon the session of Congress, but he finished the duties, took, and retained his seat.

Mr. Dawson, a member from Virginia, between the first and second sessions of the Congress for which he was elected, was appointed a messenger to France. He performed the duties of his appointment, returned, and resumed and retained his seat.

Mr. Turner, of Massachusetts, claimed the seat occupied by Mr. Baylies. The House decided in his favor. He resigned the office of postmaster, and immediately took his seat.

Mr. Worthington and Mr. Morrow, Senators in Congress from Ohio, were, in 1812, appointed by the President to make a treaty with certain Indians in that State; they attended to the duties assigned, *after the 4th of March*, and returned, took, and retained their seats.

In nearly every Congress since the commencement of the Government postmasters have been returned as members, and such members have almost uniformly held their offices after the 4th of March succeeding their election. Since the year 1800 are, among others, the following cases: Benjamin Tallmadge, Erastus Root, Matthew Lyon, Thomas Gholson, Samuel McKee, S. Dana, E. Wickes, and U. Tracy. When a Representative is fairly elected by the people, every doubt should weigh in his favor. Unless the construction of the constitution is *plainly* against him, he should retain his seat. But when the letter and the spirit of the constitution, and its rational and practical construction, are favorable, there seems no plausible reason why a member should be disturbed.

J. HOLMES.

15th Congress.] No. 439. [1st Session.

CONTESTED ELECTION OF ELIAS EARLE, A REPRESENTATIVE FROM SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 5, 1818.

Mr. Taylor, of New York, from the Committee of Elections, to whom was referred a resolution of the House of Representatives of the 10th of December, 1817, and a message of the President of the United States of the 29th of the same month, reported, in part:

That, in the month of April, 1815, Elias Earle was appointed postmaster at Centreville, in the State of South Carolina. That, at the last congressional election in that State, he was elected one of its Representatives to this House. On the 10th of February, 1817, the Governor executed a certificate of his election, which Mr. Earle states to have been received by him in April or May thereafter. On the 10th of September, 1816, he addressed to the Postmaster General, and sent by mail, a letter requesting it to be accepted "as my [his] resignation as postmaster," and recommending the appointment of a Mr. Tillinghast, who was accordingly appointed, but, having omitted to execute the bond required by law, he was never commissioned. The office continued to be executed in the name of Mr. Earle, and he superintended the same, until the 12th of June, 1817, when his connexion with it ceased, as appears by the message above mentioned. We subjoin hereto a letter from the Postmaster General, (marked A,) and copies of two letters of Mr. Earle, (marked B and C,) which we desire may be considered as part of this report; and respectfully submit the following resolution:

Resolved, That Elias Earle is entitled to a seat in this House.

A.

General Post Office, *December* 30, 1817.

Elias Earle, esquire, being postmaster at Centreville, South Carolina, September 10, 1816, sent a resignation, and recommended Daniel H. Tillinghast to be his successor. An appointment was sent to Mr. Tillinghast, who never executed the bond. On the 12th of June, 1817, by letter, Mr. Earle recommended John Morris, jun. to be appointed postmaster. The appointment was sent to Mr. Morris, who also declined. During the above periods Mr. Earle superintended the direction of the office, though he considers his resignation to relate back to 1816.

R. J. MEIGS, Jun.

B.

Sir: Centreville, *September* 10, 1816.

You will be so good as to receive and accept of this as my resignation as postmaster at this place; and I also take the liberty of recommending Daniel H. Tillinghast as postmaster in my place. In answer to your inquiries, to know where I was born, I can only say in Virginia. Your obedient servant,

ELIAS EARLE.

C.

Sir: Centreville, *June* 12, 1817.

Enclosed is a receipt paid Alexander Waddle for the amount of forty dollars, returned by your order, which amounts to upwards of twenty more than is due you by the returns forwarded to you last mail from this office, which I paid at your request, and which can be settled for hereafter. This office is for several months without a postmaster, although I wrote on to you last September, and lately again. I hope you will name Mr. John Morris, jun., as it is impossible I can keep any charge of it, as I am almost constantly from home; it has hitherto been tolerably well attended to.

Your obedient servant,

ELIAS EARLE.

15th Congress.] No. 440. [1st Session.

ALTERATION OF THE FLAG OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 6, 1818.

Mr. Wendover, from the select committee appointed to inquire into the expediency of altering the flag of the United States, reported:

That they have maturely considered the subject referred to them, and have adopted, substantially, the report of the committee to whom was referred the same subject at the last session of Congress, as forming a part of this report, [see No. 418, page 412.] The committee are fully persuaded that the form selected for the American flag was truly emblematical of our origin and existence as an independent nation, and that, as such, it having met the approbation and received the support of the citizens of the Union, it ought to undergo no change that would decrease its conspicuity, or tend to deprive it of its representative character. The committee, however, believe that an increase in the number of States in the Union since the flag was altered by law sufficiently indicates the propriety of such a change in the arrangement of the flag as shall best accord with the reasons that led to its original adoption, and sufficiently point to important periods of our national history.

The original flag of the United States was composed of thirteen stripes and thirteen stars, and was adopted by a resolution of the Continental Congress on the 14th of June, 1777. On the 13th of January, 1794, after two new States had been admitted into the Union, the National Legislature passed an act that the stripes and stars should, on a day fixed, be increased to fifteen each, to comport with the then number of independent States. The accession of new States since that alteration, and the certain prospect that at no distant period the number of States will be considerably multiplied, render it, in the opinion of the committee, highly inexpedient to increase the number of stripes, as every flag must, in some measure, be limited in its size, from the circumstance of convenience to the place on which it is to be displayed; while an increase would necessarily decrease their magnitude, and render them proportionably less distinct to distant observation; this consideration has induced many to retain only the general form of the flag, while there actually exists a great want of uniformity in its adjustment, particularly when used on small private vessels.

The national flag being in general use by vessels of almost every description, it appears to the committee of considerable importance to adopt some arrangement calculated to prevent in future great or expensive alterations. Under these impressions, they are led to believe no alteration could be made more emblematical of our origin and present existence, as composed of a number of independent and united States, than to reduce the stripes in the flag to the original number of thirteen, to represent the number of States then contending for and happily achieving their independence, and to increase the stars to correspond with the number of States now in the Union, and hereafter to add one star to the flag whenever a new State shall be fully admitted.

These slight alterations will, in the opinion of the committee, meet the general approbation, as well of those who may have regretted a former departure from the original flag, as of such as are solicitous to see in it a representation of every State in the Union.

The committee cannot believe that in retaining only thirteen stripes it necessarily follows they should be distinctly considered in reference to certain individual States, inasmuch as nearly all the new States were a component part of, and represented in, the original States; and inasmuch, also, as the flag is intended to signify numbers, and not local and particular sections of the Union; nor can the committee view the proposed inconsiderable addition to be made on the admission of a new State in the light of a departure from that permanency of form which ought to characterize the flag of the nation.

The committee respectfully report a bill.

15th Congress.] No. 441. [1st Session.

SLAVES BROUGHT INTO THE UNITED STATES FROM AMELIA ISLAND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 10, 1818.

Mr. Middleton made the following report:

The committee to whom was referred so much of the President's message as relates to the illicit introduction of slaves from Amelia island, having carefully taken the matter committed to them into consideration, respectfully report:

That, having applied to the Department of State for information respecting the illicit introduction of slaves into the United States, they were referred by the Secretary of State to the documents transmitted to this House by the President's message of the 15th of December last, consisting of various extracts of papers on the files of the Departments of State, of the Treasury, and of the Navy, relative to the proceedings of certain persons who took possession of Amelia island in the summer of the past year, and also relative to a similar establishment previously made at Galvezton, near the mouth of the river Trinity.

Upon a full investigation of these papers, with a view to the subject committed to them, your committee are of opinion that it is but too notorious that numerous infractions of the law prohibiting the importation of slaves into the United States have been perpetrated with impunity upon our southern frontier; and they are further of opinion that similar infractions would have been repeated with increasing activity without the timely interposition of the naval force under the direction of the Executive of our Government.

In the course of their investigation, your committee have found it difficult to keep separate the special matter given into their charge from topics of a more general nature, which are necessarily interwoven therewith; they therefore crave the indulgence of the House while they present some general views connected with the subject, which have developed themselves in the prosecution of their inquiry.

It would appear, from what can be collected from these papers, that numerous violations of our laws have been latterly committed by a combination of freebooters and smugglers of various nations, who located themselves in the first instance upon an uninhabited spot near the mouth of the river Trinity, within the jurisdictional limits of the United States, as claimed in virtue of the treaty of cession of Louisiana by France. This association of persons organized a system of plunder upon the high seas, directed chiefly against Spanish property, which consisted frequently of slaves from the coast of Africa; but their conduct appears not always to have been regulated by a strict regard to the national character of the vessels falling into their hands when specie or other very valuable articles formed part of the cargo. Their vessels generally sailed under a pretended Mexican flag, although it does not appear that the establishment at Galvezton was sanctioned by or connected with any Government. The presumption, too, of any authority ever having been given for such an establishment is strongly repelled, as well by its piratical character, as its itinerant nature; for the first position at Galvezton was abandoned, on or about the 5th of April last, for one near Matagorda, upon the Spanish territory; and, at a later period, this last was abandoned, and a transfer made to Amelia island, in East Florida—a post which had been previously seized by persons who appear to have been equally unauthorized, and who were, at the time of the said transfer, upon the point, it is believed, of abandoning their enterprise from the failure of resources which they expected to have drawn from within our limits, in defiance of our laws. There exists, on the part of these sea rovers, an organized system of daring enterprise, supported by force of arms; and it is only by a correspondent system of coercion that they can be met, and constrained to respect

the rights of property and the laws of nations. It is deeply to be regretted that practices of such a character, within our immediate neighborhood, and even within our judisdictional limits, should have prevailed unchecked for so long a time, the more especially as one of their immediate consequences was (to give occasion to the illicit introduction of slaves from the coast of Africa into these United States, and thus to revive a traffic repugnant to humanity and to all sound principles of policy, as well as severely punishable by the laws of the land.

By the seventh section of the act prohibiting the importation of slaves, passed in 1807, the President is fully authorized to employ the naval force to cruise on any part of the coast of the United States, or territories thereof, where he may judge attempts will be made to violate the provisions of that act, in order to seize and bring in for condemnation all vessels contravening its provisions, to be proceeded against according to law.

By the joint resolution of the Senate and House of Representatives of the 15th January, 1811, and the act of the same date, the President is fully empowered to occupy any part or the whole of the territory lying east of the river Perdido, and south of the State of Georgia, in the event of an attempt to occupy the said territory, or any part thereof, by any foreign Government or Power; and, by the same resolution and act, he may employ any part of the army and navy of the United States which he may deem necessary for the purpose of taking possession and occupying the territory aforesaid, and in order to maintain therein the authority of the United States.

Among the avowed projects of the persons who have occupied Amelia island was that of making the conquest of East and West Florida, professedly for the purpose of establishing there an independent Government; and the vacant lands in those provinces have been, from the origin of this undertaking down to the latest period, held out as lures to the cupidity of adventurers, and as resources for defraying the expenses of the expedition. The greater part of West Florida being in the actual possession of the United States, this project involved in it designs of direct hostility against them; and as the express object of the resolution and act of 15th January, 1811, was to authorize the President to prevent the province of East Florida from passing into the hands of any foreign Power, it became the obvious duty of the President to exercise the authority vested in him by that law. It does not appear that among these itinerant establishers of republics and distributors of Florida lands there is a single individual inhabitant of the country where the republic was to be constituted, and whose lands were to be thus bestowed. The project was, therefore, an attempt to occupy that territory by a foreign Power. Where the profession is in such direct opposition to the fact; where the venerable forms by which a free people constitute a frame of government for themselves are prostituted by a horde of foreign freebooters for purposes of plunder; if, under color of authority from any of the provinces contending for their independence, the Floridas, or either of them, had been permitted to pass into the hands of such a Power, the committee are persuaded it is quite unnecessary to point out to the discernment of the House the pernicious influence which such a destiny of the territories in question must have had upon the security, tranquillity, and commerce of this Union.

It is a matter of public notoriety that two of the persons who have successively held the command of Amelia island, whether authorized themselves by any Government or not, have issued commissions for privateers, as in the name of the Venezuelan and Mexican Governments, to vessels fitted out in the ports of the United States, and chiefly manned and officered by our own countrymen, for the purpose of capturing the property of nations with which the United States are at peace. One of the objects of the occupation of Amelia island, it appears, was to possess a convenient resort for privateers of this description, equally reprobated by the laws of nations, which recognise them only under the denomination of pirates, and by several of the treaties of the United States with different European Powers, which expressly denominate them as such.* It was against the subjects of Spain, one of the Powers with which the United States have entered into stipulations prohibiting their citizens from taking any commission from any Power with which she may be at war, for arming any ships to act as privateers, that these vessels have been commissioned to cruise; though, as the committee have observed, no flag, not even that of our own country, has proved a protection from them. The immediate tendency of suffering such armaments, in defiance of our laws, would have been to embroil the United States with all the nations whose commerce with our country was suffering under these depredations, and, if not checked by all the means in the power of the Government, would have authorized claims from the subjects of foreign Governments for indemnities, at the expense of this nation, for captures by our people, in vessels fitted out in our ports, and, as could not fail of being alleged, countenanced by the very neglect of the necessary means for suppressing them.

The possession of Amelia island as a post of refuge for such privateers, and of illicit traffic in the United States of their prizes, which were frequently, as before stated, slave ships from Africa, was a powerful encouragement and temptation to multiply these violations of our laws, and made it the duty of the Government to use all the means in its power to restore the security of our own commerce and of that of friendly nations upon our coasts, which could in no other way more effectually be done than by taking from this piratical and smuggling combination their place of refuge.

In order, therefore, to give full effect to the intentions of the Legislature, and in pursuance of the provisions of the above-recited resolution and acts, it became necessary, as it appears to the committee, to suppress all establishments of the hostile nature of those above described made in our vicinity, the object of which appears to have been the occupation of the Floridas, the spoliation of peaceful commerce upon and near our coast by piratical privateers, the clandestine importation of goods, and the illicit introduction of slaves within our limits. Such establishments, if suffered to subsist and strengthen, would probably have rendered nugatory all provisions made by law for the exclusion of prohibited persons. The course pursued on this occasion will strongly mark the feelings and intentions of our Government upon the great question of the slave trade, which is so justly considered by most civilized nations as repugnant to justice and humanity, and which, in our particular case, is not less so to all the dictates of a sound policy.

Your committee anticipate beneficial results from the adoption of these measures by the Executive, in the promotion of the security of our southern frontier and its neighboring seas, and in the diminution of the evasions (latterly so frequent) of our revenue and prohibitory laws. The experience of ten years has, however, evinced the necessity of some new regulations being adopted in order effectually to put a stop to the further introduction of slaves into the United States. In the act of Congress prohibiting this importation, the policy of giving the whole forfeiture of vessel and goods to the United States, and no part thereof to the informer, may justly be doubted. This is an oversight which should be remedied. The act does indeed give a part of the *personal* penalties to the informer, but these penalties are generally only *nominal*, as the persons engaged in such traffic are usually poor. The omission of the States to pass acts to meet the act of Congress, and to establish regulations in aid of the same, can only be remedied by Congress legislating directly upon the subject themselves, as it is clearly within the scope of their constitutional power to do. For these purposes, your committee beg leave respectfully herewith to report a bill.

* See the treaty of peace with France, 1778, art. 21, United States laws, vol. 1. p. 88; with the Netherlands, 1782, art. 19, vol. 1, p. 162; with Sweden, 1783, art. 23, vol. 1, p. 190; with Great Britain, 1794, art. 21, vol. 1, p. 218; with Prussia, 1785, art. 20, vol. 1, p. 238; and 1797, art. 20, p. 256; with Spain, 1795, art. 14, vol. 1, p. 270.

15th Congress.] No. 442. [1st Session.

PROGRESS MADE UNDER THE ACT "TO PROVIDE FOR THE PROMPT SETTLEMENT OF PUBLIC ACCOUNTS."

COMMUNICATED TO THE SENATE, JANUARY 22, 1818.

In obedience to a resolution of the Senate of the 11th of December, 1817, requiring the Secretary of the Treasury "to lay before the Senate information of the progress which has been made in the settlement of public accounts, under the act 'to provide for the prompt settlement of public accounts;' and that he also state what further legal provisions may be necessary, in his opinion, to insure the speedy settlement of public accounts," I have the honor to submit the enclosed reports of the First and Second Comptrollers and the five Auditors of the Treasury.

From them it appears that that portion of the public accounts which are subjected to the examination of the Second and Fourth Auditors have been adjusted, and that the books of those officers have been brought up to the 1st day of the last month.

In the office of the First Auditor much remains to be done before the accounts subjected to the examination of that officer can be adjusted.

The imposition of the internal and direct taxes in the year 1813, and in the subsequent years, together with the embarrassment produced by the issue of treasury notes bearing interest, (each of which, in its final redemption or payment into the treasury, not only presented a complicated account involving generally several calculations of interest, but rendered the account of every officer through whose hands it passed extremely complex,) greatly increased the duties of this officer and of the First Comptroller of the Treasury. This increase in the duties of those officers was not attended by a correspondent increase of the force placed at their disposition for the performance of the services required of them.

The great number of banks which became the depositories of the public money after the dissolution of the late Bank of the United States, and particularly after the derangement of the currency in the year 1814, together with the complexity introduced in the accounts of the Secretary of the Treasury, and of the Treasurer of the United States, by the subdivision of the public revenue into cash, special deposite, small treasury notes, and treasury notes bearing interest, had, during the years 1815 and 1816, produced some irregularity in the accounts of these two officers, which it has required much labor and assiduity to correct.

This circumstance, and the other causes which have been stated, have necessarily produced in the office of the First Auditor of the Treasury a considerable arrearage in the settlement of the accounts confided to him. So far as the accounts of the Secretary of the Treasury are connected with this arrearage, the cause of delay has been removed. The abolition of the internal duties will considerably diminish the labors of the First Auditor, and will enable him to settle with promptitude the accounts which are examinable in his office.

The accounts assigned to the Fifth Auditor of the Treasury were greatly in arrear. That officer, however, believes that, with the number of clerks subject to his direction, he will be able to examine and report upon them without unnecessary delay.

In the office of the Third Auditor of the Treasury, where all the old accounts of the War Department are to be examined, a great mass of accounts remain unsettled. It is in that office where the greatest difficulties are to be surmounted, where remedies of the most energetic character are required. By referring to the report of that officer, it will be found that the most serious obstacle to the prompt settlement of the public accounts is the want of power to compel delinquent officers to render their accounts and vouchers. In the Pay Department it is extremely unsafe to settle the accounts of any paymaster until the accounts and vouchers of every paymaster employed in the same part of the country are rendered.

The same observation applies with nearly the same force to the Quartermaster's Department. The great mass of officers employed in both of these departments during the late war, and whose accounts are still unsettled, are now out of office. Should a small number of these officers obstinately withhold their accounts and vouchers, the settlement of the accounts of the others, as well as their own, will be indefinitely protracted, unless the power of coercing settlements shall be greatly extended. At present, the means of compelling delinquent officers to render their accounts and vouchers for settlement consist, 1st. In ordering an action to be brought against the delinquent, upon the trial of which no voucher is admissible which has not previously been presented to the accounting officers of the Treasury; 2d. The forfeiture of commissions, and the payment of interest at the rate of 6 per cent. from the time the money was received until it is repaid into the treasury, if the final judgment should be in favor of the United States; and, 3d. The payment of costs, whether the judgment is for or against the defendant.

The first is found in practice to be wholly inefficient, as the party never fails, under the third and fourth sections of the act which contains these provisions, to have his retained vouchers presented to the Treasury after the commencement of the action, so as to remove that objection to their legal admissibility. The payment of interest from the time the money was received until it is repaid into the treasury is nothing more than what is required by the ordinary demands of justice, and can hardly be considered as a penalty. The forfeiture of the commissions to which the party would have been entitled had he acted correctly is generally more than balanced by the benefit derived from the possession of the public money for the length of time which generally elapses before the sum embezzled can by legal process be wrested from the delinquent. A reference to the acts of the 3d of March, 1795, and of the 3d of March, 1797, which contain the principal provisions for the recovery of debts due the United States, will furnish some idea of the delays to which the settlement of the public accounts must necessarily be subjected where the accounts of the delinquents are not connected with those of other officers; but where they are connected with the accounts of a great number of other officers, the delays which must necessarily result on account of the refusal or neglect of a small number of them to render their accounts and vouchers may be considered, with respect to any practical result, as interminable.

It is therefore respectfully suggested that further provision be made for compelling the officers of the Government to whom the disbursement of the public money is confided to render their accounts and vouchers at stated periods. As long as the officer remains in office, the power of removal vested in the Executive Department may be considered sufficient for this purpose; but when that power has been exercised, or when the office has in any other way become vacant, the means of coercing a settlement are extremely defective. For a definition of the power which ought to be vested in the officer charged with the collection of debts due to the United States, as well as for the general reasoning on this subject, the Senate is respectfully referred to the report of the Secretaries of the different Departments, made upon this subject to that honorable body on the 6th of December, 1816, and to a

letter from the same officers to the chairman of the committee to whom that part of the President's message relating to changes in the organization of the Departments was referred in the House of Representatives, bearing date the 31st day of December of the same year.

The opinions and views presented in those papers not only remain unchanged, but have acquired additional force from the experience of the past year. The money remaining in the hands of the officers employed during the late war, whose accounts remain unsettled, must be very considerable. In several cases where they have rendered their accounts, and admit considerable balances to be in their hands, they have refused to pay over the balance until their accounts are finally settled; which, from the explanations already given, may be protracted to a period so remote as to subject the Government to the eventual loss of the whole, from the death, insolvency, or emigration of the principal and sureties.

If the power recommended by the reports referred to should not be vested in the Government, some provision for promptly enforcing the payment of sums admitted to be in the hands of officers no longer employed is certainly necessary. The propriety of absolutely rejecting, on the trial of any action brought against a delinquent officer, every voucher which had not been presented to the accounting officers of the Treasury before the commencement of the action, is respectfully suggested.

Independent of the changes proposed in the existing provisions upon this subject, the appointment of an officer who shall be exclusively charged with the power of instituting and superintending all actions brought by the United States for the recovery of money is again respectfully submitted to the consideration of the Senate. This recommendation is founded upon the fullest conviction that the duties now required of the First Comptroller of the Treasury cannot be correctly performed by any officer whatever. The revision of accounts reported to that officer by the First and Fifth Auditors of the Treasury, and by the Commissioner of the General Land Office, if revision is intended to be any substantial check upon the acts of those officers, must, by every person who will take the trouble to examine into the subject, be considered sufficient to command the whole of his time and attention.

It is not expected that the principal officer in the primary or secondary departments of the Government will be able minutely to examine every case upon which they decide; but unless it is understood that a certain portion of the cases will be so examined, a degree of negligence and laxity on the part of the subordinate officers in those departments, whether principal or secondary, may reasonably be expected. The gradation from unintentional error to wilful negligence, and from the latter to the practice of deception, is gentle and almost imperceptible. The principal officer of each office is responsible to the nation for the correct discharge of the duties required of him, and legal checks have been devised to correct and detect the errors which may be committed in the execution of their public functions. The clerks or subordinate officers are responsible to the chief of the office for the correct discharge of their duties; the only check, however, which he possesses is the examination which he is able to make of their official acts before they receive his official signature. If, then, the duties required of any officer are so great and multifarious as to prevent his giving to the acts of his subordinate officers such an examination as will render the detection of any errors which may be committed by them probable, there is imposed upon him the highest responsibility, without the adequate means of acting up to that responsibility. Such is believed to be the situation of the First Comptroller of the Treasury.

The correspondence which he is compelled to carry on with the collectors of the customs, the district attorneys, and the marshals, will afford ample employment to an active and intelligent officer, aided by a recording clerk. Should it, however, be deemed advisable to continue with the Comptroller the duty of corresponding with the collectors of the customs, and deciding upon legal questions arising under the revenue laws, the officer proposed to be appointed might find ample employment by being charged with the light-house establishment, which is now under the superintendence of the Commissioner of the Revenue. He might also be directed to perform any other duty which the President of the United States might think proper to require of him.

From the best view of the subject which I have been able to take, the appointment of a Solicitor of the Treasury appears to me to be indispensable, without any reference to the decision of Congress upon the changes which have been proposed to the laws relating to the collection of debts.

If such an office is not created by law, it must exist in fact, as the Comptroller of the Treasury must of necessity delegate to one of his clerks the power of corresponding with the district attorneys and marshals, and hold him responsible for the due execution of that duty, without being able to examine his acts in a manner necessary to the exercise of a salutary check upon them.

The opinion expressed by the Second Auditor of the Treasury, relative to the distribution of the accounts of the War Department between the Second and Third Auditors, is entitled to consideration; but there is some reason to believe that the inconvenience of which he complains is rather the result of ignorance or negligence in the officers who make returns, than of any defect in the distribution made between those officers. The evil will necessarily diminish by time and experience. The irregularity in the returns of the quartermasters, military storekeepers, and commissaries, will be corrected by instructing them how to make their returns. It is not believed that the public service requires any essential change to be made in the distribution of duty between the accounting officers of the Treasury as now established by law. A more simple distribution between the two Comptrollers might confine the duty of the First to the settlement of all accounts arising from the collection of the revenue, and payment of it into the treasury; whilst the Second should take charge exclusively of all accounts resulting from its disbursement from the treasury. Some difficulty, however, would arise in carrying this principle into effect, especially in distributing the duty between the Auditors.

It may, however, be proper to observe that the report of the heads of Departments, before referred to, recommended a transfer of the Indian Department from the War to the Home Department. As that part of the system was not adopted, the Secretary of War is not relieved from examining and sanctioning all the contingent allowances made to the agents, interpreters, &c. employed in our intercourse with the Indian tribes. The transfer of the Indian accounts to the Fifth Auditor of the Treasury is not attended with any good effect. It introduces an anomaly into the Departments, by making the Treasury disburse the Indian appropriations under the direction of the Secretary of the War Department. As relief to the Secretary of War, and not to the Second and Third Auditors, was the object of that recommendation, the assignment of those accounts to one of the Auditors last mentioned is respectfully recommended.

It may be proper to state that this suggestion does not embrace the accounts of the Superintendent of Indian Trade, which were previously settled in the Treasury Department.

All which is respectfully submitted.

WM. H. CRAWFORD.

TREASURY DEPARTMENT, *January* 21, 1818.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 5, 1818.

In compliance with your request to be furnished, so far as the accounts under my direction were involved, with the information required by the resolution of the honorable the Senate of the United States of the 11th ultimo, relative to the progress which has been made in the settlement of public accounts, under the act to provide for the prompt settlement of public accounts, and as to what further legal provisions may be necessary to insure the speedy settlement of those accounts, I have the honor to state that a communication on the subject was addressed by me to the First and Fifth Auditors of the Treasury, copies of whose answers are transmitted herewith.

It will be seen, from the representation of the First Auditor of the Treasury, that all the accounts of the customs for the year 1816 have been reported upon by him, which, with a few exceptions, have been revised and finally passed upon by me; that he is progressing with, but has not yet reported on, the accounts relative to the internal revenue for the same year, a small proportion of the accounts under which head for the year 1815, recently reported on by him, remain to be revised and passed by this office; and that the accounts of every other description are examined by him as presented, and adjusted with all the despatch which their bulk and nature admit of. These accounts may be comprised under the following heads, viz:

1st. Accounts of marshals.

2d. Accounts of the Bank of the United States, its branches, and of such State banks as have been designated by that institution, under the act of 3d March last, to perform the duties of the late commissioners of loans relative to the public debt and to the payment of pensions of invalids.

3d. Accounts of the officers under the civil list.

4th. Accounts relative to the marine hospital establishment.

5th. Accounts relative to the light-house establishment.

6th. The accounts of the Treasurer of the United States for receipts and expenditures of the United States.

7th. His accounts as agent for the War and Navy Departments.

8th. Accounts of the mint.

9th. Accounts of the Superintendent of the city of Washington, and Commissioner for Public Buildings.

10th. Accounts on the awards by the commissioner for liquidating claims for property lost.

11th. And a variety of miscellaneous accounts.

The accounts of the War Department, comprehended under the head of "Old books," to the 30th June, 1814, and those under the head of "New books," to the 31st December, 1814, and the accounts of the Navy Department to the 31st December, 1813, have been finally acted upon by me.

The First Auditor of the Treasury has reported on the accounts of the War Department for the first and second quarters of 1815, and of the Navy Department for the first, second, third, and fourth quarters of 1814, which are now in my office to be passed upon. He has remaining in his office the accounts of the War Department for the third quarter of 1815, and of the Navy Department for the fourth quarter of 1814, and for the first, second, third, and fourth quarters of 1815.

It results that all the accounts settled by the late Accountant of the War Department, from the 1st October, 1815, to the 3d March, 1817; by the late additional Accountant, between the 29th April, 1816, (the date of the act establishing the office,) and the 3d March, 1817; and by the late Accountant of the Navy Department, from the 1st January, 1816, to the 3d March, 1817, remain to be reported upon by these officers, respectively, and to be transmitted to the First Auditor of the Treasury, after whose revision of them they are to be finally acted upon at my office.

In relation to the representation made by the Fifth Auditor of the Treasury, I have to observe that all the accounts which have been reported upon by him have been revised and passed upon by this office, with the exception of the accounts of the General Post Office. These I have not been able to take up, as I had previously received four quarterly accounts of that Department reported upon by the First Auditor of the Treasury under the former organization of the Departments. Three of these quarterly accounts have been examined and passed upon by me since the 3d March last, as well as three quarterly accounts of the late Accountant of the War, and three of the late Accountant of the Navy Department, which had also been reported upon by the last-mentioned Auditor.

The following is a concise view of the accounts to be reported upon by the Fifth Auditor of the Treasury, and of course to be revised and passed upon at my office, viz:

1. Accounts of ministers, consuls, and foreign agents of every description.

2. Accounts under the Indian Department in all its ramifications.

3. Accounts of all the postmasters and mail carriers in the United States, rendered quarterly by the Postmaster General.

4. And a variety of miscellaneous accounts.

Beside the accounts already enumerated, the accounts of the land officers, or receivers of public moneys, which are in the first instance examined in the office of the Commissioner of the General Land Office, and reported upon by him directly to me, form a component (and not a small) part of the public accounts coming under my cognizance for revision. These accounts are increasing by the increase of the number of land offices.

In relation to the progress made in their settlement since the 3d March last, the following view of them is communicated, viz:

The accounts of James Findlay, from the 1st January, 1809, to 31st December, 1815, have been finally passed upon.

The accounts of Park Walton, from 1st July, 1810, to 31st December, 1813, have been finally passed upon.

The accounts of John Brahan, from 8th August, 1809, to 31st December, 1813, have been finally passed upon.

The accounts of Samuel Smith, from 1st July, 1815, to 25th May, 1817, have been finally passed upon.

The accounts of Peter Wilson, from 3d November, 1808, to 30th June, 1816, have been finally passed upon.

The accounts of Samuel Findley, from 1st April, 1806, to 30th June, 1815, have been finally passed upon.

The accounts of Edmund H. Taylor, from 1st January, 1812, to 31st December, 1813, have been finally passed upon.

The accounts of Benjamin Stephenson, from 28th October, 1816, to 31st December, 1816, have been finally passed upon.

With reference to that part of the resolution of the Senate which requires information as to what further legal provisions may be necessary to insure the speedy settlement of public accounts, I take leave to observe that, out of the number of clerks appropriated for my office, I have not been able, from the various duties incident to it, to assign more than seven of them for the examination and revision of *all* the *accounts* enumerated as coming under my superintendence.

From the nature and extent of the accounts committed to the charge of these clerks, it is impracticable for them to enter into a minute and correct investigation of principles and details, and at the same time progress so fast in the settlements with that accuracy and despatch which the public interest requires as to bring up the accounts of the office now in arrear.

When the accounts of the internal revenue shall have been finally settled, and the accounts of the late Accountants of the War and Navy Departments, to the 3d March 1817, shall have been brought up, the number of clerks now employed in my office being put on other accounts appertaining to it, will, I trust, insure a careful, efficacious, and prompt examination of them after that time. But I must take leave to observe that it will be morally impracticable, without more clerks, to keep pace with the current accounts, *and bring up the arrears of business in the office* which existed for many years anterior to my accession to it, (and I speak confidently,) for want of the requisite number of clerks.

Whilst on this subject, I cannot forbear to mention that even after the War and Navy accounts shall have been completely settled up, under the former organization of the Departments, the accounts to be passed upon by me will not have been much diminished, as the accounts to be reported upon by the Fifth Auditor of the Treasury, agreeably to the act for the prompt settlement of public accounts, for expenditures under the head of Indian Department, annuities to Indians, trading-houses with Indians, &c., and the great increase in the Post Office and Land Office accounts, will, in a great measure, counterbalance them.

It may be remarked, too, that since the peace the revenue business appertaining to my office has been increased to a great extent. This, among other causes, may be ascribed to the change in the system produced by the adoption of a new tariff of duties, the convention with Great Britain, and by recent acts of Congress relative to tonnage duties, &c.

These changes have produced a multiplicity of applications to this Department for decisions on questions arising under the new tariff, the convention, and these acts of Congress.

The correspondence on this branch of business has consequently been swelled beyond all former precedents; another cause for which is to be looked for in the unexampled embarrassments experienced by the mercantile class of the community for some years past. I am fully satisfied, from experience, that the other public avocations of my office will not allow me to devote as great a portion of time to the means necessary to a prompt and rigorous collection of the many old balances due to the Government, and to prevent their accumulation, as the importance of this business requires; for it has been found, by experience, that an extensive and *persevering* correspondence with the attorneys, marshals, and other officers, and in many instances with the debtors themselves, is indispensably requisite; and this correspondence has hitherto been done almost exclusively by myself. I therefore consider it a duty which I owe to the Government as well as to myself respectfully to state that the interest of the public would be materially promoted if Congress would either authorize the appointment of a Solicitor for the Department, (whose duty it should be to attend specially to this business,) or to grant me such an appropriation as will enable me to employ a clerk of the requisite qualifications to attend to it under my superintendence.

I have the honor to be, with great respect, your most obedient servant,

JOS. ANDERSON.

The Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

SIR: TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, *December* 23, 1817.

In compliance with the resolution of the honorable the Senate of the United States of the 11th instant, I have now the honor to state the progress that has been made in the settlement of public accounts in the War and Navy Departments, under the act "to provide for the prompt settlement of public accounts," to wit:

The accounts relating to the different branches of expenditure in the War Department, including arrearages, which have been adjusted and settled from the 4th March last to the 22d instant, inclusive, amount to - - - - - -	$2,390
The accounts relating to the Navy Department for the same period, which have been settled, amount to - - - - - - -	397
Aggregate of accounts settled, - - -	$2,787

The number of warrants drawn on account of the War Department for the above-mentioned period, including advances to contractors, &c., is 1,966, amounting to $6,555,688 97.

The number of warrants drawn on account of the Navy Department for the same period, including advances, &c., is 635, amounting to $2,679,733 95.

Respecting the progress made and making in the settlement of the several species of accounts, I beg leave to refer you to the reports of the Second, Third, and Fourth Auditors, herewith enclosed.

With great respect, I have the honor to be, sir, your obedient servant,

RICHARD CUTTS,
Second Comptroller of the Treasury.

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

SIR: TREASURY DEPARTMENT, FIRST AUDITOR'S OFFICE, *December* 15, 1817.

In reply to your letter of the 13th instant, I have the honor to state that the settlement of the revenue accounts in this office has been much retarded by the want of warrants to cover payments by the collectors into the treasury. Those of the customs, however, are now completed to the 31st December, 1816; and those relating to the internal duties and taxes for the same year are fast progressing. The accounts of every other description are examined as presented, and are adjusted with all the despatch which their bulk and nature admit of.

I am, very respectfully, sir, your obedient servant,

R. HARRISON.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

TREASURY DEPARTMENT, *December* 19, 1817.

The Second Auditor, to whom has been communicated the resolution of the Senate of the 11th instant, requesting the Secretary of the Treasury to lay before them information of the progress which has been made in the settlement of public accounts under the act "to provide for the prompt settlement of public accounts," and that he also state what further provision may be, in his opinion, necessary to insure the speedy settlement of public accounts, has the honor to report to the Second Comptroller:

That there are, of the current business of his office, but few unsettled accounts, and they are under examination; and that the books of his office have been brought up to the 1st of the present month. That, since the

undersigned came into office, numerous accounts to a very considerable amount, in discharge of claims originating in the current business of the office, between 1st July, 1815, and his appointment, have been presented and settled; many others have yet to come in, and he presumes, in the coming year, he will be able to close them all, should they be presented.

It is proper for him to state that, by the division of the office of the Accountant of the War Department, which took place in May, 1816, the additional Accountant then appointed became charged with the arrearages up to the 30th June, 1815. As that arrangement threw considerable business into the office of the additional Accountant, it was thought reasonable that the Accountant should prepare for the Treasury all the quarterly statements which were by law required to be submitted to the accounting officers of that Department for revision, up to May, 1816. In consequence of this arrangement, one of the bookkeepers attached to this office has been exclusively occupied in balancing the books of the Accountant of the War Department and in preparing the quarterly statements. They have been completed to the end of the third quarter of the year 1815, and the statements have been sent to the Treasury.

The undersigned does not think that the balancing of the old books and arrearages in these quarterly accounts properly belongs to this office; but, in order to assist all in his power in the prompt settlement of public accounts, he has thought it his duty to continue the preparation and adjustment of them, though the work militates greatly against the current business of the office, which, to be kept up, ought not to be shackled with any old arrearages.

Under the act of the 3d of March, for the prompt settlement of public accounts, there have been assigned to this office, under the head of military and hospital stores, all accounts relating to the Ordnance Department, including arsenals, armories, materials for mounting cannon, &c.; while to the Third Auditor the accounts of the Quartermaster's Department have been assigned.

This distribution does not tend to the prompt settlement of public accounts; on the contrary, it retards it. When the quartermasters' accounts arrive at the Third Auditor's office, he dissects them, and sends to this office such parts as relate to the discharge of all claims originating between 1st July, 1815, and 31st December, 1816, together with all the vouchers appertaining to the Medical and Hospital Department, Ordnance Department, and contingencies; from which vouchers new abstracts are to be made out in this office.

The making out of these abstracts and dissecting these accounts causes confusion, and creates as much labor as would the whole of the quartermasters' accounts, were they to be adjusted in this office. The same confusion takes place in many of what are called store accounts. It has been thought expedient, under the act of 3d March, 1817, to charge the Second Auditor with the settlement of the principal part of the accounts of the late office of Superintendent General of Military Supplies, as coming also under the head of military and hospital stores. By this distribution, he is to adjust the accounts relating to ordnance, military stores and equipments, clothing, medical and hospital stores, also quartermasters' stores in the hands of military storekeepers and assistant commissaries. He is to hold officers accountable to the United States for the public property in their possession, to see that all issues are made conformably to law, and upon proper vouchers, and to be able at any time to give a full and explicit statement of the quantity of public property in the possession of officers and at the various depots. Here a like inconvenience occurs as relates to the quartermasters' stores, for the division of these accounts with the Third Auditor is attended with as much trouble as the entire examination and settlement of the whole would occasion: for, owing to the returning officers having for so long a time been accustomed to blend quartermasters' stores with other property either received or issued, they are frequently embraced in the same invoice or voucher.

These remarks are made to show the necessity of transferring the whole of the quartermasters' accounts from the Third to the Second Auditor. It is proper here to observe that the affairs of this office suffer considerably for want of room for the clerks. The undersigned has five persons in the room with him; the remainder are distributed about the house at a considerable distance from him, and out of the reach of that close inspection which is necessary in the discharge of all public business, and particularly that of the settlement of accounts. Five rooms for the clerks, and a fireproof one for the accounts, are necessary for the proper distribution of the business of the office, and the speedy settlement of public accounts.

Respectfully submitted.

WM. LEE, *Second Auditor.*

To Richard Cutts, *Second Comptroller.*

Sir: Treasury Department, Third Auditor's Office, *December* 22, 1817.

I have received your letter of the 13th instant, enclosing the copy of a resolution of the Senate of the United States requiring information of the progress which has been made in the settlement of public accounts under the act "to provide for the prompt settlement of public accounts," and requesting me to furnish a statement of the progress made in the settlement of the public accounts in this office. I have accordingly to state that, so far as it regards the accounts of the current service, confided by the aforesaid act to the Third Auditor, it may be stated that they have been generally rendered and settled for the third quarter of the present year; in some cases, accounts have not been rendered as late, and in others, where they have been rendered, some explanations and additional vouchers are necessary to a settlement, but they are comparatively small.

Of the other description of accounts confided to the Third Auditor under the act of the 3d of March, consisting of all the accounts of the War Department which remained unsettled at the conclusion of the late war, a great variety, and to a very large extent, remain to be settled. These may be arranged under the following heads:

1st. Accounts of the several States for disbursements made on account of the services of their militia whilst in the service of the United States.

2d. Paymasters and their assistants, and others employed in paying regular troops, militia, and volunteers.

3d. Officers' recruiting and contingent accounts.

4th. Quartermasters' accounts.

5th. Contractors' accounts.

6th. Outstanding claims for supplies during the war, and for arrearages due soldiers discharged, and officers and soldiers deceased, of the regular army, militia, and volunteers.

1. Of State accounts.

There has not been much progress made in the examination of this description of accounts. Those of the State of Virginia, having been first rendered, were taken up for examination, and, from the great extent of disbursements and vouchers, have necessarily consumed a great length of time in their examination. The accounts are nearly completed. The other accounts remain unexamined.

2. Of paymasters' accounts, and those of their assistants and others employed in paying troops.

There have been but an inconsiderable number of the accounts of this description settled, owing to the preparatory measures necessary. There were turned over to this office for settlement, on the 27th June, 1816, one hundred and ninety-eight unsettled accounts of persons who had received public money on account of the pay department. It was found necessary, before any of those accounts could be correctly settled, to ascertain, from the investigation of all the payments, the names of the persons who had received public money, that it might be known whether all the accounts had been rendered: this was a business of great labor, and was only completed during the last summer. It resulted that, in addition to the accounts rendered, a large number of persons had received public money who had not rendered any accounts, and others who had only rendered them in part. It therefore became necessary to call upon all such persons, and some of both descriptions have been received, but a number yet remain to be rendered, constituting, in the aggregate, more than three hundred accounts in this Department which remained to be settled on the 3d of March last: of those in the office, fifteen paymasters' accounts have since been settled, and a number have been examined, and only await explanations and some additional vouchers to complete their settlement.

3. Of officers' recruiting and contingent accounts.

There were also turned over for settlement to this office a large number of this description of accounts, and others have been called for and received; a considerable number yet remain to be rendered. Of those in the office, there have been settled, since the 3d of March last, three hundred and seventy-one accounts, but a large number remain unsettled.

4. Of quartermasters' accounts.

There have been settled, since the 3d of March last, eighteen accounts of this description, and a number yet remain to be settled, and others to be rendered.

5. Of contractors' accounts.

There have been settled, since the 3d of March last, seven accounts of this description, and some yet remain to be settled.

6. Of outstanding claims and balances due officers and soldiers, &c.

Of this description of accounts there have been eleven hundred and seventy settled since the 3d of March last; those relating to soldiers' arrearages forming the principal part; and, from the daily applications and the large number remaining in the office, this branch of business may be stated to be yet in a very unsettled state, and will require much time and labor to complete.

Thus the number of settlements made of the accounts of the late war have, in the aggregate, amounted to upwards of seventeen hundred since the 3d of March last.

It may be proper further to add that the books of the office were greatly in arrears on the 3d of March last, and have required the attention of all the force applicable to that object to bring them up to that date: they are not yet completed. This may be accounted for from the circumstance of there being upwards of five thousand accounts open on the books.

From the foregoing view of the business of this office, it will appear manifestly necessary that additional means be afforded to make an impression on the unsettled accounts within any reasonable period; these consist, in the opinion of the Auditor, of an increased number of clerks, and additional room for their accommodation.

The pressing business of the office has prevented an early reply to your letter.

Very respectfully, I am, sir, your obedient servant,

PETER HAGNER, *Auditor.*

RICHARD CUTTS, Esq. *Second Comptroller of the Treasury.*

SIR: TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, *December* 16, 1817.

I have received your letter of the 13th instant, in which was enclosed a resolution of the Senate, requiring the Secretary of the Treasury to lay before them information of the progress which has been made in the settlement of public accounts under the act "to provide for the prompt settlement of public accounts;" and also what further legal provision may be, in his opinion, necessary to insure the speedy settlement of public accounts.

To answer these inquiries, as far as relates to the business of this office, I have to observe that it was necessary that all the accounts in the office of the Accountant of the Navy should be closed, and the balances carried forward to the books of this office. This required considerable labor and many separate statements.

In the principal seaports there are navy agents. Applications have been daily made from every section of the Union for balances due to officers or seamen; therefore, whenever these balances have not exceeded one hundred dollars, orders have been given for the amount upon the nearest navy agents to the residence of the applicant. This mode has greatly facilitated business, as these orders will be passed to the credit of the agents upon the settlement of their accounts.

The examination of pursers' accounts is very laborious, and occupies more or less time, according to the length of the cruise of the vessel to which they are attached. Monthly returns of accounts and vouchers have hitherto been required, and will be continued to the end of the present year, from the several navy agents: these have been examined, and settlements made thereof as rapidly as has been consistent with correctness. After the 1st of next January these returns will be made quarterly.

In order that there should not be any unnecessary delay in the settlement of small accounts by claimants residing near to the seat of Government, one of the clerks performs in this office the duties of a navy agent.

Besides the aforegoing, there is a deal of current business which it would be difficult to define. What, however, has been noticed, gives full employment. The books of this office are brought up to the 1st day of the present month; and, in future, they will always be in this state of forwardness.

As the new system has been in operation but nine months, it might be presumptuous to pronounce it the best which could be devised; but, so far as it has gone into effect, it has admirably answered all the good expected from it in this office. I should not, therefore, propose any alteration for the present.

I am, with great respect, sir, your obedient servant,

CONST. FREEMAN, *Auditor.*

RICHARD CUTTS, Esq., *Second Comptroller of the Treasury.*

SIR: TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, *December* 22, 1817.

I have had the honor to receive your letter of the 13th instant, enclosing a resolution of the Senate requiring information as to "the progress which has been made in the settlement of public accounts under the act 'to

provide for the prompt settlement of public accounts,' and as to what further legal provisions may be necessary to insure the speedy settlement of public accounts."

The law above alluded to assigned to this office the settlement of all accounts appertaining to the Department of State, to Indian Affairs, and to the General Post Office; in addition to which, the unsettled accounts of the late office of Commissary General of Prisoners were attached to it by the Executive. It will be proper to notice them under distinct and appropriate heads.

OF THE DEPARTMENT OF STATE.

It has been, and still is, the practice of the ministers and consuls of the United States, and of all their other agents abroad, to receive their salaries and other authorized allowances of the bankers of the United States, either at London or Amsterdam, and, on the receipt of the bankers' accounts at the Treasury, to charge the respective persons with the sums they may have received. In some cases no accounts have been rendered by the agents to balance these charges; and, in others, where accounts have been received, they were so imperfect as not to admit of settlement. Thus, individuals have been reported to Congress as public debtors, and the Treasury books been swelled with balances, where nothing was really due. Most of the accounts have been of long standing, and some of them of more than twenty years.

In entering upon the duty assigned me under the law for the prompt settlement of public accounts, my attention was forcibly drawn to accounts of this nature, and every exertion has been made to effect a due and speedy settlement of them. Many of the persons interested, and who are yet living, were in different parts of Europe, or in remote places in the United States, from whom the necessary vouchers and explanations could not immediately be procured. As much progress, however, has been made in the settlement as these circumstances, the current business of the office, and the short period which has elapsed since its organization would admit of, as will be seen by a comparison of the balance list of the present with that laid before Congress the last session.

OF INDIAN AFFAIRS.

These accounts are of two classes: 1st. Those relating to trading-houses; 2d. Those of annuities to Indians, expenses of agents, commissioners treating with Indians, implements of husbandry, &c.

Upon these accounts, and those of the Department of State, four persons have been employed, and many of the accounts of the second class, involving considerable expenditures, have been adjusted. In those of the trading-houses the same progress has not been made; but I feel confident that, with the application of the same force the ensuing year, the old accounts, both of the Department of State and of Indian Affairs, as well as the current business in those branches, will be duly disposed of.

OF THE GENERAL POST OFFICE.

None of these accounts were settled subsequently to the year 1810. They are rendered quarterly by the General Post Office, and comprise the accounts of about two thousand five hundred post offices, and increase in number as they advance in point of time. Although five persons have been employed on them, yet, so extensive and laborious are the examinations and calculations they require, that those gentlemen have been unable to advance with the settlement to a later period than the last quarter of 1812. I do not, however, consider any additional aid in this branch of the accounts necessary.

OF THE LATE OFFICE OF COMMISSARY GENERAL OF PRISONERS.

Many accounts were received from this office on its termination in March last, some wholly unsettled, and others partially so. Two persons of that office who accompanied the accounts, on their transfer, have been employed in the adjustment of them, under the superintendence of the Fifth Auditor, and it is expected they will be able finally to close them in the first half of the ensuing year.

I have the honor to be, with great respect, sir, your most obedient servant,

STEPHEN PLEASONTON.

The Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

15th CONGRESS.] No. 443. [1st SESSION.

PROGRESS MADE IN MAKING ROADS BY AUTHORITY OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 23, 1818.

To the House of Representatives of the United States: WASHINGTON, *January* 23, 1818.

In compliance with a resolution of the House of Representatives of the 9th of December last, requesting information as to what roads have been made or are in progress under the authority of the Executive of the United States; the States and Territories through which they pass, or are intended to pass; the periods when they were ordered to be made, and how far they have been executed, I now communicate a report from the Secretary of the Treasury, and likewise a report from the Secretary of War, containing the information which is desired.

JAMES MONROE.

TREASURY DEPARTMENT, *December* 29, 1817.

The Secretary of the Treasury, to whom was referred the resolution of the House of Representatives, requesting the President of the United States to cause to be laid before that House information of what roads have been made or are in progress under the executive authority of the United States; the States and Territories through

which they pass, or are intended to pass; the periods when they were ordered to be made; and how far they have been executed, has the honor to submit statements No. 1 and No. 2 from the office of the Register of the Treasury, which show the number of roads embraced by the resolution, the sums which have been expended upon them, the periods when the money was paid at the Treasury, and the persons to whom the money was paid.

Statement No. 3 shows the amount of the two per cent. fund arising from the sale of the public lands in the State of Ohio, under the act of Congress for admitting the Northwest Territory into the Union as an independent State; and statement No. 4 shows the amount of the same fund in the State of Indiana which is understood to be applicable to the construction of the Cumberland turnpike road, commencing at Cumberland, in the State of Maryland, passing through a part of the States of Maryland, Pennsylvania, and Virginia, and intersecting the river Ohio at the town of Wheeling.

This road is completed from Cumberland forty-five miles west of that place. Contracts have been executed early in the present year for the construction of that part of the road lying west of the forty-fifth mile from Cumberland to Uniontown, a distance of nearly fifteen miles; and, from the activity with which the work is carried on by the contractors, there is just ground to believe that it will be completed thus far early in the ensuing year.

Contracts have also been made for completing upwards of thirty miles of the road west of the Monongahela, including a section on the eastern margin of that river.

These contracts embrace such parts of the roads between the Monongahela and the Ohio as presented the most serious difficulties to travelling and the transportation of heavy articles between those rivers.

Statement No. 5 presents an estimate of the appropriations which will be necessary to enable the Treasury Department to discharge the demands which have accrued, and which will be demandable by the contractors pending and at the completion of those sections of the road which they have severally engaged to construct.

Statement No. 6 shows the estimated amount of the expense of completing the whole road from Cumberland to Wheeling, which is not yet undertaken, including bridges over the Youghiogeny and Monongahela rivers.

It may be proper to observe that the demands which have already accrued beyond the appropriation for that object, and which now remain unpaid, exceed $38,000.

The vigor with which the present contractors have prosecuted their labors furnishes the most satisfactory evidence of their capacity and determination to perform their engagements within the time stipulated. There is also just reason to believe that the whole of the distance yet to be undertaken, both on the eastern and on the western side of the Monongahela, may be advantageously let in the course of the ensuing year; and that the road from Cumberland to the Ohio may be completed in the best manner in two years from the present time, if appropriations equal to the object shall be made during the present session of Congress.

By statement No. 2 it appears that the appropriations for opening a road from the frontiers of Georgia to New Orleans, and for opening another from Nashville to Natchez, were paid to and disbursed by the Postmaster General; those roads being intended principally for the transportation of the mail through the wilderness, separating the different points from whence they commenced and terminated. Those roads were completed as far as the object for which they were intended required, and are understood to be at this time in a state to be useful to that object.

The appropriations for opening roads from the Mississippi to the Ohio, and to the former Indian boundary line established by the treaty of Greenville; from the foot of the rapids of the Miami of Lake Erie to the western line of the Connecticut Reserve; and from Shawneetown to Kaskaskia, in the Illinois Territory, have been expended, as far as they have been carried into effect, by the Treasury Department.

The route of the last-mentioned road has been explored, and the commissioners employed in the execution of that service have transmitted a map thereof for the sanction of the President; but nothing more has yet been done. From the extent of the other roads which have been opened under the direction of the Treasury Department, compared with the sums appropriated and expended, the state of them may be readily conceived, but no particular information of their present state exists in this Department. The appropriations were made for opening them, and, when that was accomplished, no further agency was required from the Department.

The last two appropriations exhibited in No. 2 were placed at the disposition of the War Department. The money has been paid from the treasury upon the requisition of the Secretary of the War Department, but no information has been received at this Department of the application of the money to that object, nor of the state in which those roads are at this time.

All which is respectfully submitted by

WM. H. CRAWFORD.

The PRESIDENT OF THE UNITED STATES.

No. 1.

Schedule of the several appropriations made by law in relation to the opening and making roads, exhibiting the amount expended thereon, so much thereof as was unapplied and carried to the surplus fund, and so much thereof as remains to be applied.

Date of acts.	Designation of the roads.	Amount appropriated.	Amount applied.	Amount not applied, carried to the surplus fund.	Balance remaining to be applied.	Remarks.
1806. April 21 1809. Feb. 17 June 28	Opening a road from the frontier of Georgia to New Orleans, - -	13,800 00	5,500 00	8,300 00	-	Under the direction of the President of the United States.
June 28	Opening roads through the territory lately ceded by the Indians to the United States, from the Mississippi to the Ohio, and to the former Indian boundary line, which was established by the treaty of Greenville,	7,800 48	5,539 35	2,261 13	-	Ditto.
June 28	Opening a road from Nashville, in the State of Tennessee, to Natchez, in the Mississippi Territory, - -	9,000 00	3,000 00	6,000 00	-	Ditto.
1811. Dec. 12	Surveying and making roads within the State of Ohio, as contemplated by the treaty of Brownstown, - -	6,000 00	5,945 50	54 50	-	Ditto.
1812. Jan. 8	Roads from the line established by the treaty of Greenville to the North Bend, in the State of Ohio, -	800 00	-	800 00	-	Ditto.
1816. April 27	Roads in the Illinois Territory, -	8,000 00	1,208 51	-	6,791 49	Ditto.
April 27	Roads between Columbia, Tennessee, and Madisonville, Louisiana, & Fort Hawkins, Georgia, & Fort Stoddert,	10,000 00	10,000 00	-	-	Under the direction of the Secretary of War.
1817. March 3	Opening a road from Reynoldsburg, on Tennessee river, in the State of Tennessee, through the Chickasaw nation, to intersect the Natchez road near the south end of the Chickasaw Oldtown, - - - - -	4,000 00	4,000 00	-	-	Ditto.
			$35,193 36			

Extract from the records.

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, REGISTER'S OFFICE, *December* 17, 1817.

No. 2.

PARTICULARS OF THE SUMS STATED IN THE WITHIN TO HAVE BEEN APPLIED.

Opening a road from the frontier of Georgia to New Orleans.

To Gideon Granger, Postmaster General, on account of said road:

Warrant No. 8658, dated March 11, 1807, - - - -	$4,000 00	
1505, dated July 28, 1809, - - - -	1,500 00	
		A $5,500 00

Opening roads through the territory lately ceded by the Indians to the United States, from the Mississippi to the Ohio, and to the former Indian boundary line which was established by the treaty of Greenville.

To John Badollet, agent for opening said road,	warrant No. 9009, dated June 30, 1807,	$315 00	
	9645, dated Dec. 31, 1807,	338 77	
	9920, dated March 31, 1808,	450 75	
	539, dated Sept. 30, 1808,	950 00	
	540, dated Sept. 30, 1808,	145 00	
	541, dated Sept. 30, 1808,	400 00	
	542, dated Sept. 30, 1808,	100 00	
	543, dated Sept. 30, 1808,	1,500 00	
To Nathaniel Ewing, agent for do. do.	warrant No. 1403, dated June 30, 1809,	1,000 00	
	2117, dated March 31, 1810,	130 58	
To Benjamin Chambers, agent for do. do.	warrant No. 3711, dated August 1, 1811,	209 25	
			B 5,539 35

Opening a road from Nashville to Natchez.

To G. Granger, Postmaster General, on account of said road, warrant No. 8659, dated March 11, 1807, C 3,000 00

Roads under the treaty of Brownstown.

To Resin Beall, one of the commissioners,	warrant No. 5010, dated Aug. 26, 1812,	$190 50	
To Benjamin Van Cleve, do.	warrant No. 5011, dated Aug. 26, 1812,	255 00	
To Return J. Meigs, Governor of the State of Ohio, on account of the said roads,	warrant No. 5382, dated Dec. 17, 1812,	5,500 00	
			A 5,945 50

Roads in the Illinois Territory.

To Jonathan Taylor, Joseph M. Street, and Thomas Sloo, commissioners:

Warrant No. 1982, dated Dec. 18, 1816,	$600 00	
216, dated April 28, 1817,	524 51	
557, dated June 10, 1817,	84 00	
		A 1,208 51

Roads between Columbia, Tennessee, and Madisonville, Louisiana, and Fort Hawkins, Georgia, and Fort Stoddert.

To Thomas T. Tucker, agent for the War Department, warrant No. 171, dated Oct. 30, 1817, A $10,000 00

Opening a road from Reynoldsburg, on Tennessee river, through the Chickasaw nation, &c.

To Thomas T. Tucker, agent for the War Department, warrant No. 135, dated July 31, 1817, - A 4,000 00

$35,193 36

Those accounts marked A remain unsettled.
That marked B is settled.
That marked C is settled, and a balance due Mr. Granger of $2,946 65 on that account.

No. 3.

Estimate of moneys received for lands in the State of Ohio, upon which two per cent. is appropriated for roads leading to that State.

From 1st July 1802, to 30th September, 1817, - - - -	$7,816,012 15
Two per cent. on that amount is, - - - - -	156,320 00

No. 4.

Estimate of moneys received for lands in the State of Indiana, sold from the 30th November, 1816, to the 30th September, 1817, upon which amount two per cent. is appropriated for roads leading to that State.

Received at Vincennes.		Received at Jeffersonville.		Received at Cincinnati for lands in Indiana.

JOSIAH MEIGS.

No. 5.

Estimate of the amount necessary to be appropriated to enable the Treasury Department to discharge the demands which have accrued, and which will be demandable by the contractors, pending and at the completion of those sections of the Cumberland road which they have engaged to construct.

Amount of claims presented at the Treasury remaining unpaid, - -	$52,984 60
Amount of demands which will be made under the existing contracts, - -	260,000 00
	$312,984 60

No. 6.

Estimate of the amount necessary for the completion of the whole of the road from Cumberland to Wheeling, which is not yet undertaken.

Thirty-five miles, including the cost of the construction of the bridge over the Monongahela, $400,000 00

DEPARTMENT OF WAR, *January* 20, 1818.

The Secretary of War, to whom was referred the resolution of the House of Representatives requesting the President of the United States "to cause to be laid before that House information of what roads have been made, or are in progress, under the executive authority of the United States; the States or Territories through which they pass, or are intended to pass; the periods when they were ordered to be made; and how far they have been executed," has the honor to state that, in March, 1816, the general commanding the southern division was ordered to employ the troops in cutting a military road from the most convenient point upon the Tennessee river to New Orleans. This road has been surveyed, and a considerable part of it has been completed.

Orders were given in May, 1816, to the commandant of the fifth military department to employ the troops under his command in the construction of a military road from Detroit to Fort Meigs, at the foot of the rapids of the Miami of the Lakes. This road, it is believed, is nearly completed.

In May, 1816, a survey was ordered, extending this road from Fort Meigs to the Connecticut Reserve, in the State of Ohio; and another was intended to be opened at the same time from the reservation at the rapids, on the Sandusky, to the settled parts of the Ohio south of that point.

During the last autumn the troops at Plattsburg were ordered to repair and complete the military road between that station and the station at Sackett's Harbor, on the St. Lawrence, through Chautauque county, State of New York, in which some progress is made.

A part of the appropriation for the repair of the road between Fort Hawkins and Fort Stoddert, and of that between Columbia and Madisonville, has been applied, and it is believed the repairs in the latter have been considerable.

In October last orders were given to open the road from Reynoldsburg, on Tennessee river, to Natchez. It is believed the work is in considerable forwardness.

J. C. CALHOUN.

The PRESIDENT OF THE UNITED STATES.

15th CONGRESS.] No. 444. [1st SESSION.

CITY OF WASHINGTON: ADDITIONAL EXECUTIVE OFFICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 26, 1818.

Mr. PARRIS, from the committee to whom was referred so much of the President's message as relates to the "public buildings, and to the erection of new edifices for the accommodation of the heads of Departments and the Attorney General," reported:

That, among the most important objects to which their attention was called by that part of the President's message specially committed to their consideration, was the insufficiency of the public buildings for the accommodation of the several Executive Departments. For the purpose of ascertaining their present situation, and also what further provision might be necessary for their better accommodation, the committee, on the 10th of December, addressed a note to the head of each of the Executive Departments, requesting such information, and also requesting to be informed what number of rooms were then occupied by each Department in the public buildings appropriated for that purpose, and also what number, if any, in buildings which had been rented of individuals. In compliance with this request, the committee have been furnished with statements from each Department giving the information desired, which statements are herewith submitted as a part of this report.

From the information thus derived, the committee became satisfied that the public buildings at present occupied as public offices are altogether insufficient for the transaction of the business connected therewith; that placing different branches of the Departments at a distance from the head, as must be the case while the public buildings are so crowded as to render it necessary to resort to private buildings, and as is now the fact in the Treasury, War, and Navy Departments, is both inconvenient and expensive, and, therefore, that the erection of new buildings, sufficient to afford ample accommodation for all the branches of the several Departments, and in a situation convenient for each, is necessary.

Believing it to be expedient to place the buildings about to be erected near those now occupied as public offices, the Commissioner of the Public Buildings was, on the 31st of December, directed to examine and report whether the northwest and northeast corners of what is called the President's square would afford convenient sites for such edifices, to be placed on a line parallel with the other offices. The report of Colonel Lane, made in compliance with this request, is herewith communicated. The next object of the committee was to ascertain the probable expense of erecting and completing such buildings as, in their opinion, the public interest required. For this purpose they directed Colonel Lane, the Commissioner of the Public Buildings, to furnish an estimate, detailing as particularly as possible the expense of erecting and finishing fit for occupation two buildings, similar in structure to those at present occupied by the Treasury and War Departments.

The answer of the commissioner, accompanied with drawings and a detailed report made to him by James Hoban, an architect in the employment of the Government, is also herewith communicated. The reports and estimates which have heretofore been received from this architect, particularly of the President's house, have been so correct as to justify the expectation that the actual expenditure in completing the buildings contemplated to be erected will not exceed the estimates. The committee have, therefore, reported a bill to provide for erecting additional buildings for the accommodation of the several Executive Departments.

SIR: DEPARTMENT OF STATE, WASHINGTON, *December* 27, 1817.

In answer to your letter of the 10th instant, I have the honor to inform you that there are occupied by this Department five rooms on the second floor of the south and east end of the public building west of the President's house; four rooms in the garret of the same building; two rooms occupied for the Patent Office in the building where the General and City Post Office is kept.

The only house rented by the Department is that in which the messenger resides. These rooms are not sufficient for the transaction of the daily and ordinary business of the Department. Independent of which, a room is wanted for the convenient arrangement of the books and papers belonging to the office of the Secretary of the Congress under the confederation; for the constantly accumulating archives and records of the Department; for the library belonging to it; and for the safe keeping of the models in the Patent Office. These necessities, already pressing, must necessarily become more urgent from year to year, in proportion as the increasing population of the country multiplies its relations of intercourse both at home and with foreign nations. The whole building in which the office of the Department is kept would even now, after providing for the convenience of the public service, leave little, if any, room unoccupied.

I am, with great respect, sir, your very obedient servant,

JOHN QUINCY ADAMS.

ALBION K. PARRIS, Esq.,
Chairman of a Committee of the House of Representatives.

SIR: TREASURY DEPARTMENT, *December* 17, 1817.

In reply to your letter of the 10th instant, inquiring what further accommodations are necessary for the different branches of the Treasury Department, and also what number of rooms is at this time occupied by that Department in the public buildings appropriated for that purpose, and what number, if any, in buildings which have been rented of individuals, I have the honor to state that, at present, in what is generally called the Treasury Office, thirty rooms (exclusive of two fireproof rooms for the preservation of the records, and the rooms in the garret) are occupied by the Secretary of the Treasury, the Comptroller, the First and Fifth Auditors, the Register of the Treasury, the Treasurer of the United States, and the Commissioner of the Revenue; that, in the building generally called the War Office, the Second Comptroller, and the Second, Third, and Fourth Auditors of the Treasury, occupy fourteen rooms; that the General Land Office occupies eight rooms rented of an individual.

At present, two rooms in the Treasury building are occupied by the office of discount and deposite. This accommodation was afforded the bank under an expectation that measures would be promptly taken to procure or erect a building suitable for the purpose; and the board of directors, who have as yet taken no steps for the accomplishment of that object, will be informed that their occupancy of the rooms in question must shortly terminate. These rooms, with those now occupied by the Commissioner of the Revenue, when his duties shall be terminated, will render the situation of the offices now kept in the Treasury building convenient and proper for the despatch of public business.

The Second Comptroller, and the Second, Third, and Fourth Auditors, are more inconveniently crowded in the rooms which they occupy, than the offices which are kept in the Treasury building.

Instead of the fourteen rooms now occupied by them in the War Office, they require twenty-nine rooms; and if the additional number of clerks necessary to bring up, in a reasonable time, the arrearage in the office of the Third Auditor, should be provided for by law, two additional rooms would be required, making, in the whole, thirty-one. The Commissioner of the General Land Office now occupies eight rooms, and believes that twelve will be necessary. As the business of that office must necessarily be greatly increased, in consequence of the continual increase of the number of land offices, there can be no doubt but that in a very few years that number of rooms would not be more than the public service would require.

If it is intended that all the offices comprising the Treasury Department should be accommodated in one range of buildings, it will be necessary to enlarge the Treasury building so as to furnish forty-three additional rooms.

Such an arrangement would leave unoccupied in the War Office a sufficient number of rooms to accommodate, in a suitable manner, the Attorney General, the Commissioners of the Navy Board, and the Ordnance Department. That building would then be occupied by the State Department, the War Department, including the offices of adjutant and inspector general, of the paymaster general, and of the Ordnance Department; the Navy Department, including the office of Commissioners of the Navy Board; and the office of the Attorney General. If, however, it should be considered necessary that the offices of the Second Comptroller, and of the Second, Third, and Fourth Auditors, should be kept in the buildings occupied by the Secretaries of the War and Navy Departments, then an addition of twelve rooms in the Treasury building for the accommodation of the General Land Office will be all that will be required, unless it should be deemed expedient to furnish the Attorney General with an office in that building. The greatest addition to the public offices would then be made in the War Office, where seventeen additional rooms will be required for the accounting officers before enumerated, exclusive of the accommodation necessary for the Navy Board and Ordnance Department.

I have the honor to be, very respectfully, sir, your most obedient servant,

WM. H. CRAWFORD.

Hon. ALBION K. PARRIS, *Chairman of the Committee on Public Buildings.*

SIR: DEPARTMENT OF WAR, *December* 15, 1817.

In answer to your letter of the 10th instant, requesting me to inform the committee of the House of Representatives to whom was referred "so much of the President's message as relates to the public buildings what further accommodations are necessary for the different branches of the Department of War," I have the honor to state that ten rooms, in addition to those now occupied by the War Department in the public buildings, will be required for its accommodation. The Department of War occupies at this time five rooms in the public buildings, including two assigned to the paymaster general, and rents eight rooms of individuals, for which a high price is paid.

I have the honor to be your most obedient servant,

J. C. CALHOUN.

Hon. ALBION K. PARRIS, *Chairman of the Committee on Public Buildings, &c.*

SIR: NAVY DEPARTMENT, *December* 18, 1817.

In compliance with your request in behalf of the committee of the House of Representatives relative to the public buildings, I have the honor to state that the business of the Navy Department, and of the Commissioners of the Navy immediately connected with it, has long suffered great inconvenience from the crowded state of the rooms which are occupied in the *public buildings;* and the Navy Commissioners have been badly accommodated in different private houses remote from the Navy Office.

I therefore improve the occasion offered by your communication to suggest that two additional rooms are necessary for the Navy Department, in order to a prompt execution of the important duties at certain periods, free *from interruption.*

The Commissioners of the Navy Board suggest for their accommodation five rooms of ordinary size, and one large room for models, maps, and other valuable articles, which are now in a very crowded place, and difficult of access and examination in the usual course of business.

The Navy Department now occupies three rooms in the public buildings, and one small garret room for the deposite of extra books and papers, without a fireplace.

The commissioners rent a small house at three hundred dollars per annum, consisting of five rooms, without affording one for models, maps, &c.

All which is respectfully submitted.

B. W. CROWNINSHIELD.

Hon. ALBION K. PARRIS, *Chairman of the Committee on Public Buildings.*

SIR: WASHINGTON, *January* 7, 1818.

Upon examination, I am of opinion that the proper site for the erection of two buildings similar to the Treasury and War Offices would be directly north of those offices, leaving a sufficient court between.

Very respectfully, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. ALBION K. PARRIS, *Chairman, &c.*

SIR: WASHINGTON, *January* 21, 1818.

I now forward plans and estimates of two buildings similar to those at present occupied by the Treasury and War Departments, as required by your letter of 31st ultimo. These have been delayed in consequence of the architect having to attend court as a witness.

I have the honor to be your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. ALBION K. PARRIS.

SIR: JANUARY 21, 1818.

The following is an estimate of a building to contain forty rooms on two floors, exclusive of the garret and basement stories, to be built in a substantial manner of brick and stone, with a portico of six columns of the Ionic order, with a pediment and flight of steps, with a cornice round the building, all of cut stone, and the basement story to be arched, every room and passage with brick, and to be covered with slate, thereby rendering the building as secure from fire as the nature of such a building will admit.

It may be proper to remark that the coal and wood for the use of the offices are deposited in the basement story.

To 2,751	yards cube, digging foundation, basement story, at 25 cents per yard, -	$687 75	
881	perches stone in foundation, basement walls, at $4 50 per perch, -	3,964 50	
1,192	thousand bricks, and laying, at $15 per thousand, - -	17,880 00	
210	thousand bricks, arching basement story, at $25 per thousand, -	5,250 00	
10,500	yards of plastering, three coats, at 40 cents per yard, - -	4,200 00	
3,300	yards plastering counter-ceiling, at 10 cents per yard, - -	330 00	
180	squares roofing, boarding, and slating, at $30 per square, - -	5,400 00	
297	squares of floors and joists, at $20 per square, - - -	5,940 00	
297	squares of counter-flooring, at $6 per square, - - -	1,782 00	
1,260	feet run of copper gutter and water pipe, at 75 cents per foot, -	945 00	
12	cistern heads, of copper, at $12 each, - - -	144 00	
7,386	feet beaded skirting to rooms and passages, at 12½ cents per foot, -	923 25	
1,484	feet angle beads to quoins, at 8 cents per foot, - - -	118 72	
840	feet border to hearths, at 10 cents per foot, - - -	84 00	
			$47,649 22
1,220	yards painting skirting and window heads and sills, at 33⅓ cents per yard, -	406 66	
48	windows, trimming, principal story, frames, shutters, sashes, &c., at $53 92 each, - - - - - -	2,588 16	
48	windows, painting, principal story, hinges, pulleys, weights, &c., at $39 90 each, - - - - - -	1,915 20	
50	windows in second story, frames, sashes, jambs, arch, &c., at $37 80 each, -	1,890 00	
50	windows second story, painting, glazing, pulleys, weights, &c., at $32 20 each, - - - - - -	1,610 00	
5	semicircular windows in centre of recess, at $34 18 each, - -	170 90	
3	Venetian entrances, first story, doors, sashes, &c., at $102 50 each, -	307 50	
3	Venetian entrances, glazing, painting, iron saddle, &c., at $54 30 each, -	162 90	
2	Venetian windows, second story, frames, sashes, &c., at $96 56 each, -	193 12	
2	Venetian windows, second story, glazing, painting, &c., at $71 each, -	142 00	
40	doorways, trimming, first story and second, hinges, locks, &c., at $63 68 each,	2,547 20	
18	doorways in garret, doors, jambs, locks, hinges, &c., at $32 98 each, -	593 64	
18	dormers to roof, frames, sashes, glass and painting, &c., at $68 each, -	1,224 00	
2	stories of stairs, three flights to each story, at $500 each, - -	1,000 00	
44	cast iron gratings to basement semi-windows, at $7 each, - -	308 00	
34	feet run of iron railing to portico, at $6 per foot, - -	224 00	
2	windows in pediments, frames, sashes, glazing, &c., - -	146 00	
60	centres to trimmer arches, at $1 25 each, - - -	75 00	
516	feet run of fillet gutter to roof, at 30 cents per foot, - -	154 80	
1,007	yards painting on stone, &c., at 33⅓ cents per yard, - -	335 66	
			15,994 74
			$63,643 96

Cut stone work.

223½	tons of freestone in plinth and base, at $12 50 per ton, - -	2,793 75	
3,228½	feet work in plain face, at 40 cents per foot, - - -	1,291 40	
550	feet sunk moulded base, bed, and door sills, at $1 20 per foot, -	660 00	
96	window sills, at $5 each, - - - -	480 00	
4	Venetian window sills with brakes, at $10 50 each, - -	42 00	
8	pilasters, back part moulded, at $30 each, - - -	240 00	
4	heads, part circular, at $15 each, - - -	60 00	
1	window sill in pediment, at $10 50 per window sill, - -	10 50	
1,282	feet steps and platforms in three flights, at $1 10 per foot, - -	1,410 20	
561	feet run of façade course, at 95 cents per foot, - - -	532 95	

96	window heads, at $6 each,	$576 00		
70	feet door sills, best hard stone, at $1 20 per foot,	84 00		
		8,180 20		
	Add for setting 10 per cent.,	818 02		
				$8,998 22
507	feet of stone cornice, moulded, at $8 per foot,			4,056 00
	Portico, with six columns, entablature, &c.			
318½	tons of freestone, at $13 50 per ton,	4,299 75		
4,154	feet plain face work, at 40 cents per foot,	1,661 60		
1,133	feet circular plain face work, at 70 cents per foot,	793 10		
1,229	feet sunk moulded work, at $1 per foot,	1,229 00		
165	feet circular sunk moulded work, at $1 50 per foot,	147 50		
644	feet stone, and work in steps, at $1 10 per foot,	708 40		
2	pilaster capitals, at $90 each,	180 00		
6	column capitals, 2 feet 9 inches diameter, at $200 each,	1,200 00		
		10,219 35		
	Add for setting 10 per cent.,	1,021 93		
				11,241 28
131	perches of foundation stone to steps and platforms, at $4 per perch,			524 00
				24,819 50

	Brought over,			63,643 96
	Amount of estimate,			$90,380 50

Respectfully submitted by, sir, your obedient servant,

JAMES HOBAN.

SAMUEL LANE, Esq., *Commissioner of Public Buildings.*

15th CONGRESS.] No. 445. [1st SESSION.

CONTESTED ELECTION OF GEORGE MUMFORD, A REPRESENTATIVE FROM NORTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 6, 1818.

Mr. TAYLOR, of New York, from the Committee of Elections, to whom was referred a resolution of the House of Representatives of the 10th of December, 1817, and a message of the President of the United States of the 29th of the same month, further reported, in part:

That, in the year 1813, subsequent to the passage of the act for the assessment and collection of direct taxes and internal duties, George Mumford was appointed principal assessor of the tenth collection district of the State of North Carolina; that he accepted the said office, and executed the duties appertaining thereto, under the several acts afterwards passed laying direct taxes upon the United States; and that he has not resigned the said office.

In the month of August, 1817, he was elected a Representative of the said State, and on the first day of the present session he was qualified, and took his seat in this House.

The act of July 22, 1813, under which Mr. Mumford held his appointment, was prospective and without limitation. No law then existed laying a direct tax; but, as Congress intended resorting to that system of revenue, it was enacted "that, for the purpose of assessing and collecting direct taxes," the United States should be divided into collection districts, and a principal assessor appointed for each district. If this act has neither expired nor been repealed, Mr. Mumford is still in office, and cannot rightfully be a member of this House. But, by the second section of the act to provide additional revenues for defraying the expenses of Government and maintaining the public credit, by laying a direct tax upon the United States, and to provide for assessing and collecting the same, approved January 9, 1815, the said act was repealed, except so far as the same respected collection districts, internal duties, and the appointment and qualification of collectors and assessors; in all which respects it was enacted that the said act should be and continue in force for the purposes of the last-mentioned act. The act of July 22, 1813, so far as the same was not repealed, was thereby limited to the duration of that act, and was continued in force only for its purposes. By that act a direct tax of $6,000,000 was annually laid upon the United States, and apportioned agreeably to the provisions of the constitution. At the first session of the fourteenth Congress that act was modified, by repealing so much thereof as laid an annual tax of $6,000,000, by reducing the same to $3,000,000, and by limiting its continuance to one year; and it was expressly enacted that all the provisions of the act of Jan-

uary 9, 1815, except so far as the same had been varied by subsequent acts, and except the first section thereof, which related to the apportionment of the tax, should be held to apply to the tax of $3,000,000 thereby laid: thus the act of July, 1813, was again limited, and it was continued in force for the purposes of the $3,000,000 tax laid March 5, 1816. Whenever those purposes were fulfilled, that act expired; and, of course, all offices created by it ceased to exist.

By the letter of the Secretary of the Treasury, hereto annexed, enclosing a report of the Commissioner of the Revenue, it appears that the entire tax assessed in the tenth collection district of North Carolina was accounted for previous to the 1st of December, 1817, and that no official duty then remained to be performed by Mr. Mumford, the principal assessor of that district. His said office, therefore, expired previous to his taking a seat in this House. The committee, therefore, respectfully submit the following resolution:

Resolved, That George Mumford is entitled to a seat in this House.

SIR: TREASURY DEPARTMENT, *January* 31, 1818.

In reply to your letter of the 27th instant, requesting to be informed whether on the 1st day of December, 1817, any official act remained to be performed by the principal assessor of the tenth collection district of the State of North Carolina, of which George Mumford was principal assessor; and whether the same has been performed, and, if so, by whom, I have the honor to submit the enclosed report from the office of the Commissioner of the Revenue.

I have the honor to be your most obedient and very humble servant,

WM. H. CRAWFORD.

The Hon. JOHN W. TAYLOR,
Chairman of the Committee of Elections of the House of Representatives.

SIR: TREASURY DEPARTMENT, REVENUE OFFICE, *January* 28, 1818.

I have the honor to state, in respect to the letter from the chairman of the Committee of Elections of the 27th instant, referred to me, that the entire tax assessed in the tenth collection district of North Carolina was accounted for previous to the 1st of December, 1817; that no official duty in the capacity of principal assessor has been since performed by Mr. George Mumford; and that no official duty remained to be fulfilled by him on that day.

I am, very respectfully,

S. H. SMITH, *Commissioner of the Revenue.*

Hon. SECRETARY OF THE TREASURY.

SIR:

Being about to defend myself against what appears to be a charge that implicates my honor and my character, I ask your attention whilst I make such an exposition as shall exonerate me from the imputation of having taken a seat in Congress contrary to the constitution, or contrary to the principles of an honest man and a gentleman.

Before I enter into the argument, I will briefly relate the facts as far as they are recollected. I was appointed principal assessor at the commencement of the system of direct taxation, and continued until its termination, which happened at the last session of Congress; previous to which time I had discharged all the duties assigned me by the law, and had settled all my accounts. I did not write a letter to any person saying that I resigned the office, for it would at that time (whatever it might since) have been extremely ridiculous, as the office had left me. Some time, however, in the spring I received a letter from the Commissioner of the Revenue, written under the authority of the act of the 3d March last, which was calculated to clothe me with new power, so that any of the duties which might not have been finished should be completed. I do not recollect having performed any duty after the receipt of that letter. The election at which I was chosen was held on Thursday, the —— of August. On the Thursday following, the sheriffs of the three counties, viz. Rowan, Randolph, and Chatham, composing the tenth district of North Carolina, met, declared me to be duly elected, and gave me their joint certificate to that effect. Early in October I left home for Portsmouth, New Hampshire, and when on my way, I arrived in the city of Raleigh, and presented that certificate to the Governor, who, on receiving it, gave me a commission as a Representative, bearing date at *that* time. As I passed through this place, I intended to have remained here a few days, and meant to have called on the Commissioner of the Revenue for the purpose of giving him all the information I could relative to the probable business that might arise in the course of the completion of the collection by the collector. This visit was due from respect to an officer under whose direction I had served, and which, though not official, would have been proper, and which should have been paid had it been in my power. Having remained at Portsmouth, out of my assessment district, during the intervening period, I returned to this place on the last day of November, and on Monday, the 1st of December, I appeared in the Representatives hall, was qualified by taking the oath to support the constitution, and took my seat; when, as soon as the resolution inquiring what members held offices was adopted, I made a written communication of my circumstances to the chairman of the Committee of Elections.

This, sir, is the history; you will now please to indulge me while I make some remarks, and, in attending to them, you will be good enough to bear in mind that the inquiry is, *whether I am a member of Congress or not—whether I am in the House or not?*—a question so plain that it was not without some difficulty that I brought my mind into a train of reasoning to prove it. Indeed, if I had not so much at stake, and if it were not that the question, plain as it appears to me, seems to be doubted by those, or some of those, whose opinions I am bound to respect, and whose votes may be injurious to my rights, I should hardly trouble you to discuss the question. It is more than doubted, for it appears to be taken for granted that, if a person holds an office up to the time of his qualification as a member, it would affect his seat; and it further appears to be taken for granted that, if a person has held an office at any time since the 4th of March, or subsequent to his election as a Representative, it ought to affect his seat; and that a person who has held an office must write a letter to some one saying that he resigns it, otherwise the omission would be considered a proof that he continued to hold the office, notwithstanding his qualification and taking his seat. I contend for the contrary of all these propositions, and hope I shall place them in so clear a point of view as to leave no doubt on your mind; and, in doing so, will give you the plain words of the constitution, attaching to them the plainest and most obvious meaning of which they are susceptible. Be so good as to turn to it, and you will find that it is in the second clause of the second section of the first article that the *qualifications* of a Representative are enumerated, viz: " No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when

elected, be an inhabitant of that State in which he shall be chosen." *And these are all that are enumerated as qualifications.* After going through with the House of Representatives, the constitution begins with the Senate, and, in the third clause of the third section of the same article, enumerates the *qualifications* of a Senator in these words, viz: "No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen." And these are all that are enumerated as qualifications of a Senator. After having thus mentioned, in express terms, the qualifications of each; after having said what shall entitle a person to a seat as a Representative, and what as a Senator; after having gone through every thing relative to the person of each, until you get to the last clause of the sixth section, it then provides that "No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased, during such time; and no person *holding* [continuing to hold] any office under the United States shall be a member of either House *during his continuance* in office." What, let me ask, was the object of this clause? What did the people intend to guard against when they spoke these words? Let us inquire; and we cannot do so as effectually in any other way as by seeing what would have been our situation if this clause, or any part of it, had been omitted in the constitution. Suppose, then, that that whole clause had been omitted; what would have been the consequence? Would there have been any thing to prevent the same person from holding United States offices while he was a member, or being a member while he held such offices? You must say not. Then may we not fairly conclude that that clause, *taken altogether*, was intended to prevent the occupancy of both at once? But suppose the latter part only, viz: "No person holding any office under the United States shall be a member of either House *during his continuance* in office;" suppose this had been omitted, what would there have been left that would have prevented a member from being appointed to or from holding any office, except such as happened to have been created, or to have had their emoluments increased, during the time for which he was elected? Surely nothing. Then may we not as fairly conclude that *this part* of the clause was *intended*, not to prevent the *appointment* of a member to an office, nor to prevent his *acceptance* of it; not to prevent the people from *choosing an officer* to be a member, nor to prevent his *acceptance and qualification as such*, but to provide that, although you may be appointed to an *old* office, although you may be elected to serve as a member, you shall not, *during your continuance* in office, be a member; you shall not, *during your continuance* as a member, be an officer. Now, sir, let us suppose that the *first part* of the clause only had been omitted; would there have been any thing to prevent a member from being appointed to a *new office* as well as he can *now* be to an *old one?* As certainly not. This part of the clause was, therefore, intended to provide, not merely that a member should not hold a new office during the time he was a member, but that he should not *hold it at all during the time for which he was elected.* Indeed, sir, if the words that make the latter part of this clause, viz: "And no person *holding* any office under the United States shall be a member of either House *during his continuance* in office," had stood alone; if they had been intended to contain *all the condition* that should have entitled a person to a seat, it would have been a forced construction, and not less forced than unreasonable and unjust, to say that a person who had qualified and taken his seat as a member ought to have it vacated because he *had held* an office, without any proof, or even a suggestion, that he *was then holding it*, and especially after hearing him declare (as I do, and as I did to the committee) that he does not hold or continue to hold any office under the United States, and that he has not discharged any duties of any such office since his election as a Representative. Is it not indecorous, after a man has taken the oath to support the constitution, and thereby qualified himself and taken his seat as a member, to insist that he *does hold an office*, which is as much as to say that he has violated the constitution and his oath, without having *some evidence* that he has discharged, or attempted or wished to discharge, other duties than those of a member? But, sir, these words, viz: "And no person," &c. &c., do not stand alone; they are not a part of a clause merely; they are a part of a sentence; they are included in a period with others, divided only by a semicolon; their very situation and connexion prove that they were not intended to contain the *only condition, or any condition* which should entitle a person to a seat as a member, that having been provided for in the second clause of the second section, as before mentioned. The object of that clause must have been simply to declare that no officer should be a member, and, of course, that no member should be an officer, viz: that no person shall be both at once. This must have been the intent and meaning of that part of the clause, because, if the other meaning had been intended, viz: that no officer should be a member until he had formally resigned, would not the convention, instead of putting them where they are, have added them to the second clause of the second section, thus: "No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen; and no person holding any office under the United States shall be a member of either House *during his continuance* in office?" And even then, sir, it would have been very ambiguous, leaving a doubt whether you must resign, or whether your acceptance of a subsequent appointment did not, in itself, vacate the office. Here it may not be improper to remark that a resignation, viz: a written communication saying that you resign, is a thing that does not appear to have been contemplated as necessary, it not having been either described or prescribed.

From all which, it seems to be clear that no person *holding* an office under the United States can be a member; and it is equally clear that no person, *being a member*, CAN hold an office. This will bring the question to what it ought to be, viz: Whether a member does, by being appointed, and qualifying as an officer, vacate his seat? and whether an officer does, by being elected, returned, and qualified as a member, vacate his office? or, to reduce them to a single proposition, whether an officer or a member must *resign* the commission, office, or appointment which he holds, before he can be constitutionally authorized to discharge the duties of one which is subsequently conferred upon him?

If, sir, you will now suffer yourself to resort to common sense and common usage, (for here the constitution is silent,) I think you will find *that a resignation would, in many cases, be as unnecessary as it would be absurd*, and *that, in all cases where a person goes from one appointment to another, under the same general authority, it is not necessary*, though in many it is useful, and in all it is respectful; leaving it to be necessary only in cases where the person wishes to withdraw from the authority under which he is acting, to place himself under *his own* or *that of another;* and then it is not necessary as a means of releasing himself from the employment, but that he may vacate it quietly, that he may save himself from the sentence of a court. Is it not the universal practice and understanding relative to all offices and appointments, (which are incompatible,) *that the accepting the last*, viz: the being constitutionally and legally initiated into the last, *virtually dissolves or vacates the first?* Is there an exception, from a village council and constable to the Congress and President of the United States? Suppose the United States, or the President and Senate, in her name, and under her authority, were to appoint a member of the House of Representatives to be Secretary of War; could he not accept, qualify, and enter upon the duties of the War Department until he had either said or written to the House, or to the people of his district, or to somebody, that he resigned his seat? He might have been appointed *pro tempore*, before Congress had assembled; could he not act as Secretary until the House met and received his resignation? Suppose the Legislature of North Carolina

should choose a member of the House of Representatives as one of her Senators; would the Senate refuse to receive him as such until he had *proved* that he had said, or sung, or written a resignation of his seat there? Would they have stopped their proceedings, after having suffered him to take his seat, to inquire into such a fact? Does the constitution require it? Does common sense demand it? Suppose the House of Representatives had contended that, as he had not resigned, he was still a member of that body; could a justification have been found in the constitution for an attempt to compel his attendance? Suppose the people should elect a man who was a collector to be a Representative; would he, besides the *qualifications* enumerated in the constitution, be obliged to produce proof that he had resigned his collectorship? To whom must he resign? Do you say to the Secretary of the Treasury? He did not appoint him. Must it be to the President, or the Senate, or to both? May it be sent by the mail? It may miscarry. Who proves that you did not send it? And is the Secretary of the Treasury to send to the House of Representatives, and claim his once subordinate, and take him from the high and important duties assigned him by his constituents, because, forsooth, a letter did not happen to get on safely? And does the House intend to expel a member because it does not appear that he has written a few lines to the Secretary of the Treasury, informing him of what it is his duty to know, and what he cannot help knowing, viz: that the person who *was collector* is *now a member*, and, of course, no longer a collector—the two being incompatible by the constitution which he has sworn to support, and which it is supposed is before him? But suppose the people should choose one who had been a principal assessor, (I say had been,) one who had discharged the duties of his office as long as there were any to perform, one who had continued in that office as long as that office had continued to exist, under the laws prescribing the duties of the assessor; must he still be considered to be an assessor, because a law was passed at a session subsequent to the termination of all his duties authorizing the Secretary of the Treasury to give the assessors new and distinct powers? Must he still be considered an assessor, notwithstanding he has told you, in the oath he has taken qualifying himself as a member, that he holds no office, civil or military, under the United States? Has he not told you so? And does he not now declare to you the same thing in writing? Must he still be considered an assessor, whether he agreed to act under this last direction or not, to the performance of the duties of which there was no compensation allowed? Surely not. Shall I take the liberty to refer you to the act appointing assessors, and the act renewing their authority? On reading them, you will find that all the duties were performed; they were obliged to be performed previous to the commencement of the last session of Congress, if done agreeably to any law *then* existing. You will find, from the tenor of the law of the 3d of March last, that Congress acted under the impression that the power of the assessors and that of the Treasury Department had ceased; else why renew it? And, having renewed it, without affixing any compensation, was I bound to accept it? Did I accept it? I say I did not. I performed no duty under it. And does not the very omission to perform the duties amount to a refusal to accept a new office?

But, sir, a resignation is necessary in some cases, as I have stated. A constable cannot fairly and quietly vacate his office by merely abstaining from the duties of it, or by refusing to act; nor can an assessor, or any other officer. He must give *notice* to the authority that appointed him of his intention, or he will be liable to be sued. But suppose the same court which had appointed him constable should appoint him sheriff; what then? I say he must give notice of his intention to accept; and, after acceptance, and a regular initiation into the last office, the first *is vacant;* for where is the necessity of a resignation, (that is, a notice that he intends to quit his constableship,) *when that information is contained in the notice of acceptance of the sheriffalty?* A judge cannot leave the bench to accept an appointment given him by another authority, without resigning, viz: without giving notice. He must discharge the duties assigned him until he gives notice to the person or persons authorized to fill the vacancy of his intention to withdraw; and he is liable if he does not: for, otherwise, it would be in his power, not only to refuse justice, but to prevent any other person from being appointed to dispense it. But suppose the Legislature of a State were to elect one of its judges to be Governor; where would be the necessity of a resignation of his seat on the bench? If he came forward and became qualified as Governor, all they would or could want to know would be, whether he was Governor; and, that being before their faces, they would, as in duty bound, proceed to fill the vacancy on the bench. Suppose a Legislature were to elect one of the judges to be a Senator in Congress. It would, to be sure, be decorous for him to say *immediately* whether he intended to accept the senatorship or not, that they might proceed, during their session, to fill the vacancy; but it is not an imperative duty. He may go through a summer's circuit, and appear in Congress hall on the first Monday of December afterwards, and take his seat. If he did not resign his seat on the bench (viz: *say that he accepted the senatorship*) to the Assembly, he could do so, at any time, to the Governor. If he did so while they were in session, they would fill the vacancy; if he did so to the Governor, he and his council would fill it *pro tem.* If he did not give this notice, he would be bound to perform the duty until he took his seat as Senator, and would be liable to be impeached if he refused or neglected to do so. Would the Senate, on his arrival, enter into an examination of his conduct? *Would they require any thing except an assurance that he was duly elected Senator, and that he came under the description of the third clause of the third section of the first article of the constitution? They would not;* for some of the States permit their State officers to be members of Congress, and some do not. It is a matter, therefore, that Congress have nothing to do with, and they would not trouble themselves to inquire into it. When a State officer has been elected, and *has taken his seat as a member of Congress*, his State is bound to know it, without notice from him by way of resignation. Yet it often prevents difficulties, and is always respectful, to give notice of your intentions. They cannot help knowing it; for he is, as to the office, held politically dead. Suppose an assessor wishes to retire from his office. He must resign. The Treasury Department must have notice of his intention, in order to provide that the public service shall not be injured; and the assessor would and ought to be liable in damages if he *left* his duty, the same as if he *neglected* it. But when the President and Senate have appointed him to a different and incompatible station, is not his acceptance of that a sufficient notice to the President that he is no longer an assessor? and would he not proceed to recommend another to fill the vacancy? Will any one contend that he would not, or ought not, until the assessor had resigned? Surely not. And is not the case much stronger when it is not merely the President and Senate (who are but servants of the people) that make the appointment, but the people themselves? Must the assessor go, or send, or write to some one of the other servants of the same master, to ask *him* to permit the transaction? Is not the President bound to know and to provide for the vacancy in an office which they have, before his face, made vacant, and made it his duty to fill? Do you suggest that he might not know it? Would not the Commissioner of the Revenue, when he saw the officer with whom he had been in the habit of transacting business sitting as a member of Congress, know it? Would he not know that the office was vacant if he saw the officer lying dead? and would that be plainer than seeing him sitting as a member of Congress? And are they not *equally* incompatible, so long as we have *nature* and the *constitution* for our guide?

Does the President, or the Secretary of State, or of the Treasury, or the Commissioner of the Revenue, recognise me as an assessor? Would they not frown indignantly on the man so lost to every sense of propriety and of virtue as to attempt to continue to hold an office under their absolute control after he had taken the oath to support the constitution, and his seat as a member of Congress? *Would they not be equally guilty to suffer it?* Can they,

now that I have taken my seat as a member of Congress, transact business with me *as an assessor*, without a violation of the oaths that they have taken? Would they not be liable to impeachment for continuing, or attempting to continue, a man in the execution of the duties of an office after that man had become a member of Congress? *Is not that one of the ways in which an undue executive influence could be exercised in this House?*

Besides, sir, in all cases where it is necessary that a resignation should be sent, it is equally necessary that it should be received, and *as important that it should be agreed to*, and all for the reason before given, viz: to enable the officer to retire quietly. But to contend for this proceeding in all cases would put it completely in the power of the heads of Departments, by refusing to accept, or by omitting to acknowledge, the receipt of a resignation, to prevent any one who held an office from taking his seat as a member of Congress. Now, sir, will it be contended that the President, or the Secretary, or the Commissioner (neither of whom pretends to recognise me as an assessor) intended, by saying in their report, "that no resignation had been received from Mr. Mumford," to fix upon him the stigma of having violated the constitution and his oath, and to deprive him of his reputation, and his constituents of the Representative of their choice? Impossible. If I am asked why the resolution required information "whether any offices were at that time [December 12] so held," and why, by the answer given, "that no resignation had been received from Mr. Mumford," it is left to be inferred that he is yet in office, I could answer, that it would not have been proper for the President (or the Secretary of State) to have expressed an opinion as to Mr. Mumford's qualifications as a member. He had simply to state the facts, viz: that Mr. Mumford had been appointed to an office heretofore, and that no resignation had *been received.* He could not with propriety say whether a resignation was or was not necessary; nor *(when the extent of the question is understood)* could it be expected that he would answer as to whether any of the members held offices at that time: no inference ought therefore to be drawn from the report on either of these points. Suppose, sir, that I had held an office after the 4th of March: what then? I was not elected as a Representative until August. But suppose that I had held an office up to the 1st of December: does it follow that I held it up to the 12th, and that *I continue to hold it now?* Does *my having held* prove that *I do hold?* Do you ask when I became a member? When does a man become a witness, or a juror, or a husband? *Can they become so in an instant?* Can you *make* a mathematical point? Is a man married until the last ceremony is performed? Yet has he not privileges as a bridegroom? and have not witnesses and jurors and Representatives privileges also? When does a quill become a pen? Before you have put your knife to it, it is a quill; at the instant that it is nibbed, it is a pen, and not before.

But, after all, it may be asked, what great object of state policy is expected to result from knowing the offices, the term of appointment, of acceptance, and of resignation, by persons *who are now* members of Congress? Some invidious person might suppose that it was intended that the few names on that list should be known and held up to public view as suspected of executive influence. Some spiteful enemy might insist that it was intended that Mr Mumford (who was appointed, accepted, and served to the end, in the unthankful and laborious office of principal assessor, and who, after having so served, had received, in his election to a seat in Congress, the reward due only to the faithful) should be so held up. But inasmuch as there is another way of vacating an office besides dying, resigning, and dismissing, as there is such a thing as political death as to an office without political disgrace, and as the office which he *held* has become *vacant in that way*, it would seem to become the moral duty of those who have cast the odium to wipe it off. It may be said, however, that it was not intended or expected that he would have been touched in this business. Sir, I believe it; I am convinced that he was not thought of when that resolution was introduced and passed; but the ill-natured will not be disposed to view it so favorably, which leaves it to be lamented that a stone should have been thrown in the dark. Only suppose, sir, that, instead of *looking back*, that resolution had *looked forward*, and, instead of asking the President to tell how many of the members he was secretly and unconstitutionally keeping in office, (for this is really the question,) it had been required of him to communicate whether any, and to which of the members of the House of Representatives he had promised an appointment, designating the office, the time promised, whether it was to be accepted, and how far a right to a seat was affected thereby—this stone would not have fallen on my head. Sir, the cautious had better look *forward* for danger than backward. Being convinced that it could not have been intended to charge me with a wrong by a resolution in which I am not named, nor to find me guilty by a report *that does not say that I hold an office*, I shall rest my case here. Indeed, sir, I believe I should have paid a better compliment to your understanding, and to that of the House, if I had rested it in silence; and I should have done so, but that the language of the resolution, affecting to be the language of the House, made it my duty to treat it with more attention. Sir, I became a member of Congress on Monday, the 1st day of December. I have held no office, nor have I discharged the duties of any, since; nor have I held or discharged the duties of any since I became officially informed of my election. And as I possess all the qualifications prescribed by the constitution, I trust that you will so report.

Very respectfully, I am, sir, yours, &c.

GEO. MUMFORD.

To the Hon. Mr. TAYLOR, *Chairman of the Committee of Elections.*

15th CONGRESS.] No. 446. [1st SESSION.

AMENDMENT PROPOSED TO THE CONSTITUTION IN RELATION TO TITLES OF NOBILITY, &c.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 6, 1818.

To the House of Representatives: WASHINGTON, *February* 4, 1818.

Pursuant to a resolution of the House of Representatives of the 31st of December last, requesting information of the number of States which had ratified the thirteenth article of the amendments to the constitution of the United States, I transmit to the House a detailed report from the Secretary of State, which contains all the information that has been received upon that subject.

No time will be lost in communicating to the House the answers of the Governors of the States of South Carolina and Virginia to the inquiries stated by the Secretary of State to have been recently addressed to them, when they are received at that Department.

JAMES MONROE.

DEPARTMENT OF STATE, *February* 3, 1818.

The Secretary of State, to whom was referred a resolution of the House of Representatives of the 31st of December last, requesting information of the number of States which have ratified the thirteenth article of the amendments to the constitution of the United States proposed at the second session of the eleventh Congress, has the honor respectfully to report to the President that it appears, by authentic documents on file in the office of the Department of State, that the said article was ratified—

1. By Maryland, on the 25th of December, 1810.
2. By Kentucky, on the 31st of January, 1811.
3. By Ohio, on the 31st of January, 1811.
4. By Delaware, on the 2d of February, 1811.
5. By Pennsylvania, on the 6th of February, 1811.
6. By New Jersey, on the 13th of February, 1811.
7. By Vermont, on the 24th of October, 1811.
8. By Tennessee, on the 21st of November, 1811.
9. By Georgia, on the 13th of December, 1811.
10. By North Carolina, on the 23d of December, 1811.
11. By Massachusetts, on the 27th of February, 1812.
12. By New Hampshire, on the 10th of December, 1812.

That it further appears by authentic documents, also on file, that the said article was rejected—

13. By New York, on the 12th of March, 1812.
14. By Rhode Island, on the 15th of September, 1814.
15. That it was submitted to the Legislature of the State of Connecticut at May session, 1811; but that as late as the 22d of April, 1813, according to a letter of that date from Governor Smith, no final decision had taken place thereon; that, in pursuance of the resolution of the House of Representatives, in conformity to which this report is made, the Secretary of State addressed a letter to the Governor of Connecticut, and enclosed to him therewith a copy of the proposed amendment to the constitution, requesting information as to any final decision in relation to it; and that the answer to said letter, under date of the 22d ultimo, was accompanied by an authenticated copy of resolutions of the General Assembly of that Commonwealth, declaring that the said amendment was not ratified.
16. That, on the 29th November, 1811, a report was made by a committee of the Senate of South Carolina, recommending the adoption of the amendatory article, which report was agreed to, and ordered to be sent to the House of Representatives, in which House a report was also made on the subject on the 7th of December, 1813, recommending the rejection of the said article, but which report does not appear to have been definitively acted upon by that House; that the Secretary of State addressed to the Governor of South Carolina a letter, with a copy of the amendment, of a like tenor and date to that which he addressed to the Governor of Connecticut, to which he has not hitherto received any answer.
17. And that a similar letter, accompanied also by a copy of the amendment, was written by the Secretary of State to the Governor of Virginia, from whom, up to this period, no answer has been received at the Department of State on the subject.

All which is respectfully submitted.

JOHN QUINCY ADAMS.

SIR: EXECUTIVE OFFICE, CHARLESTON, *February* 14, 1818.

Your communication of the 7th ultimo was received in due time, but, owing to my absence from Columbia, it was out of my power to give you the necessary information required at an earlier date. You will now receive, enclosed, authenticated copies of the proceedings of the Legislature of this State upon the proposed amendment of the constitution of which you enclosed me a copy, by which it will appear that the amendment was not agreed to.

I have the honor to be, with very great respect, your humble servant,

ANDREW PICKENS.

The Hon. JOHN QUINCY ADAMS, *Secretary of State United States.*

Extract from the Journals of the Senate.

NOVEMBER 29, 1811.

The House then took into consideration the following report:

"The committee to whom was referred the resolution of the Congress of the United States, proposing an amendment to the federal constitution, in the words following: '*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, (*two-thirds of both Houses concurring*,) That the following section be submitted to the Legislatures of the several States, which, when ratified by the Legislatures of three-fourths of the States, shall be valid and binding as a part of the constitution of the United States: If any citizen of the United States shall accept, claim, receive, or retain any title of nobility or honor, or shall, without the consent of Congress, accept and retain any present, pension, office, or emolument of any kind whatever, from any Emperor, King, Prince, or foreign Power, such person shall cease to be a citizen of the United States, and shall be incapable of holding any office of profit or trust under them, or either of them,' beg leave to report: That they have duly considered the foregoing resolution, and are of opinion that it ought to become a part of the constitution of the United States. Your committee, therefore, beg leave to recommend to the Senate to concur in the adoption of the said resolution, and, when it may be agreed to and concurred in by three-fourths of the Legislatures of the several States, that it may become a part of the constitution of the United States of America."

The House, having considered the report, agreed thereto.

Ordered, That the same be sent to the House of Representatives for their concurrence. By order of the Senate.

OFFICE OF CLERK OF THE SENATE, *February* 3, 1818.

I do hereby certify that the foregoing is a correct extract from the journals of the Senate.

J. MURPHY, *Clerk of the Senate.*

Extract from the Journals of the House of Representatives of the State of South Carolina.

DECEMBER 21, 1814.

The committee to whom was referred the message of his excellency the Governor, (No. 5,) calling the attention of the House to a resolution of the Senate and House of Representatives of the United States, proposing an amendment to the constitution thereof, passed on the — day of December, 1811, report: That the resolution referred to the committee was submitted to this House as early as the session of 1811, and referred to a select committee, who reported favorably, and recommended the adoption of the said amendment; and their report on the said resolution was several times taken up and considered by this House, and ultimately postponed on the 21st of December, 1811, without coming to any final decision thereon. That the said resolution was again brought to the view of the Legislature of 1813, by a message from his excellency the Governor, reminding them that no decision had yet been made thereon, and enclosing a resolution of the Legislature of New Hampshire, approving and adopting the same. That, at the September session of 1813, a committee was appointed to examine the journals of this House, and to report its proceedings on this resolution; and that the report made by them was ordered to lie on the table, and was not further acted upon during that session. That, at the last session, this resolution was referred to a committee, who reported thereon, and recommended its rejection. It does not appear that this report was ever called up or acted upon, thus still leaving the subject undecided by any expression of the sentiments of this Legislature. Your committee beg leave to report that they have had the aforesaid resolution under consideration, and are of opinion that a respect for the recommendation of the Congress of the United States and for our sister States imperiously requires that this House should, during the present session, finally make known their sentiments upon the proposed amendment. They beg leave to observe that they are not aware that any evil consequences have resulted from the existing provisions of the constitution, while, on the other hand, they cannot but believe that the adoption of such an amendment would operate injuriously on innocent individuals as well as the community at large. Under these views of this important subject, your committee recommend the rejection of the aforesaid resolution, which is in the words following: "*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of both Houses concurring,)* That the following section be submitted to the Legislatures of the several States, which, when ratified by the Legislatures of three-fourths of the States, shall be valid and binding as a part of the constitution of the United States: If any citizen of the United States shall accept, claim, receive, or retain any title of nobility or honor, or shall, without the consent of Congress, accept and retain any present, pension, office, or emolument of any kind whatever, from any Emperor, King, Prince, or foreign Power, such person shall cease to be a citizen of the United States, and shall be incapable of holding any office of profit or trust under them, or either of them." Your committee, therefore, recommend the adoption of the following resolutions, viz:

Resolved by the Senate and House of Representatives of the State of South Carolina, That the foregoing amendment, proposed by Congress to the constitution of the United States, be disagreed to, and the same is hereby rejected on the part of this State.

And be it further resolved, That his excellency the Governor be requested to transmit copies of the foregoing resolution to the President of the Senate and Speaker of the House of Representatives of the United States, and to each of the Governors of the several States.

Ordered, That the same be sent to the Senate for their concurrence.

COLUMBIA, *February* 3, 1818.

I do hereby certify that the foregoing is a correct extract from the journals of the House of Representatives.

J. MURPHY, *Clerk of the Senate.*

15th CONGRESS.] No. 447. [1st SESSION.

CITY OF WASHINGTON: LOCATION OF THE PUBLIC OFFICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 10, 1818.

SIR: OFFICE OF COMMISSIONER OF PUBLIC BUILDINGS, *February* 6, 1818.

In compliance with a resolution of the House of Representatives of the 2d instant, I now enclose a copy of one of the original deeds of conveyance to the trustees of the United States for the ground in the city of Washington, (the deeds from the other proprietors being of the same tenor;) also, copies of all the correspondence which I have been able to find in this office relating to the location of the public offices on the President's square.

I have the honor to be, with great respect, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

This indenture, made this twenty-eighth day of June, in the year of our Lord one thousand seven hundred and ninety-one, between Samuel Davidson, of the State of Maryland, of the one part, and Thomas Beall and John Mackall Gantt, of the State of Maryland, of the other part, witnesseth: That the said Samuel Davidson, for and in consideration of the sum of five shillings to him in hand paid by the said Thomas Beall and John Mackall Gantt before the sealing and delivery of these presents, the receipt whereof he doth hereby acknowledge, and thereof doth acquit the said Thomas Beall and John Mackall Gantt, their executors and administrators, and also in consideration of the uses and trusts hereinafter mentioned to be performed by the said Thomas Beall and John Mackall Gantt, and the survivor of them, and the heirs of such survivor, according to the true intent and meaning thereof, hath granted, bargained, sold, aliened, released, and confirmed, and by these presents doth grant, bargain, sell, alien, release, and confirm, unto the said Thomas Beall and John Mackall Gantt, and the survivor of them, and the

heirs of such survivor, all the lands of him, the said Samuel Davidson, lying and being within the following limits, boundaries, and lines, to wit: beginning on the east side of Rock creek, at a stone standing in the middle of the road leading from Georgetown to Bladensburg; thence along the middle of the said road to a stone standing on the east side of the reedy branch of Goose creek; thence southeasterly, making an angle of sixty-one degrees and twenty minutes with the meridian, to a stone standing on the road leading from Bladensburg to the Eastern Branch ferry; thence south, to a stone eighty poles north of the east and west line already drawn from the mouth of Goose creek to the Eastern branch; thence east, parallel to the said east and west line, to the Eastern branch; then, with the waters of the said Eastern branch, Potomac river, and Rock creek, to the beginning; with their appurtenances, except all and every lot and lots of which the said Samuel Davidson is seised, or to which he is entitled, lying in Carrollsburg or Hamburg; to have and to hold the hereby bargained and sold lands, with their appurtenances, to the said Thomas Beall and John Mackall Gantt, and the survivor of them, and the heirs of such survivor, forever, to and for the special trusts following, and no other, that is to say: that all the said lands hereby bargained and sold, or such part thereof as may be thought necessary or proper to be laid out, together with other lands within the said limits, for a federal city, with such streets, squares, parcels, and lots, as the President of the United States for the time being shall approve: and that the said Thomas Beall and John Mackall Gantt, or the survivor of them, or the heirs of such survivor, shall convey to the commissioners for the time being, appointed by virtue of the act of Congress entitled "An act for establishing the temporary and permanent seat of the Government of the United States," and their successors, for the use of the United States, forever, all the streets, and such of the said squares, parcels, and lots, as the President shall deem proper for the use of the United States; and, as to the residue of the said lots into which the said land hereby bargained and sold shall have been laid off and divided, that a fair and equal division of them shall be made; and if no other mode of division shall be agreed on by consent of the said Samuel Davidson and the commissioners for the time being, then such residue of the said lots shall be divided, every other lot alternate to the said Samuel Davidson; and it shall, in that event, be determined by lot whether the said Samuel Davidson shall begin with the lot of the lowest number laid out on the said land, or the following number; and all the said lots which may in any manner be divided or assigned to the said Samuel Davidson shall thereupon, together with any part of the said bargained and sold land, if any, which shall not have been laid out in the said city, be conveyed to the said Samuel Davidson, his heirs or assigns, by the said Thomas Beall and John Mackall Gantt, or the survivor of them, or the heirs of such survivor; and that the said other lots shall and may be sold at such time or times, in such manner, and on such terms and conditions, as the President of the United States for the time being shall direct. And the said Thomas Beall and John Mackall Gantt, or the survivor of them, or the heirs of such survivor, will, on the order and direction of the President, convey all the lots so sold and ordered to be conveyed to the respective purchasers in fee simple, according to the terms and conditions of such purchases; and the produce of the sales of the said lots, when sold as aforesaid, shall, in the first place, be applied to the payment, in money, to the said Samuel Davidson, his executors, administrators, or assigns, for all the part of the land hereby bargained and sold, which shall have been laid off in lots, squares, or parcels, and appropriated as aforesaid to the use of the United States, at the rate of twenty-five pounds per acre, not accounting the said streets as part thereof; and the said twenty-five pounds per acre being so paid, or in any other manner satisfied, that then the produce of the same sales, or what thereof may remain as aforesaid, in money, or security of any kind, shall be paid, assigned, transferred, and delivered over to the President for the time being, as a grant of money, and to be applied for the purposes, and according to the act of Congress aforesaid. But the said conveyances to the said Samuel Davidson, his heirs or assigns, as well as the conveyances to the purchasers, shall be on and subject to such terms and conditions as shall be thought reasonable by the President for the time being for regulating the materials and manner of the buildings and improvements on the lots generally in the said city, or in particular streets or parts thereof, for common convenience, safety, and order; provided such terms and conditions be declared before the sales of any of the said lots, under the direction of the President. And in trust, further, and on the agreement that he, the said Samuel Davidson, his heirs or assigns, shall and may continue his possession and occupation of the said land hereby bargained and sold, at his or their will and pleasure, until the same shall be occupied under the said appropriations for the use of the United States, as aforesaid, or by purchasers. And when any lots or parcels shall be occupied under purchase or appropriation, then, and not till then, shall the said Samuel Davidson relinquish his occupation thereof. And in trust, also, as to the trees, timber, and wood on the premises, that he, the said Samuel Davidson, his heirs or assigns, may freely cut down, take, and use the same as his or their property, except such of the trees and wood growing as the President or commissioners aforesaid may judge proper, and give notice, shall be left for ornaments; for which the just and reasonable value shall be paid to the said Samuel Davidson, his executors, administrators, or assigns, exclusive of the said twenty-five pounds per acre for the land. And in case the arrangement of the streets, lots, and the like, will conveniently admit of it, he, the said Samuel Davidson, his heirs and assigns, shall, if he so desire it, possess and retain his buildings and grave-yard, if any, on the hereby bargained and sold lands, paying to the President at the rate of twelve pounds ten shillings per acre of the land so retained, because of such buildings and grave-yards to be applied as aforesaid, and the same shall be thereupon conveyed to the said Samuel Davidson, his heirs and assigns, with his lots; and if the arrangements of the streets, lots, and the like, will not conveniently admit of such retention, and it shall become necessary to remove such buildings, then the said Samuel Davidson, his executors, administrators, or assigns shall be paid the reasonable value thereof, in the same manner as the squares or other ground appropriated for the use of the United States are to be paid for. And because it may so happen that, by the deaths or removals of the said Thomas Beall and John Mackall Gantt, and from other causes, difficulties may occur in fully performing the said trusts, by executing all the said conveyances, if no eventual provision is made, it is therefore agreed and covenanted between all the said parties that the said Thomas Beall and John Mackall Gantt, or either of them, or the heirs of either of them, lawfully may, and that they, at any time, at the request of the President of the United States for the time being, will convey all or any of the said lands hereby bargained and sold, which shall not then have been conveyed in execution of the trusts aforesaid, to such person or persons as he shall appoint, in fee simple, subject to the trusts then remaining to be executed, and to the end that the same be perfected. And it is further granted and agreed between all the said parties, and each of the said parties doth for himself and his heirs covenant and grant to and with the others of them, that he and they shall and will, if required by the President of the United States for the time being, join in and execute any further deed or deeds for carrying into effect the trust, purposes, and true intent of this present deed.

In witness whereof, the parties to these presents have hereunto interchangeably set their hands, and affixed their seals, the day and year first above written.

SAMUEL DAVIDSON. [L. S.]

Signed, sealed, and delivered, in the presence of
R. Hooe,
Daniel Jenifer, Jun.

Received on the day and year first above written, of and from the within-named Thomas Beall and John Mackall Gantt, the sum of five shillings, currency, the consideration money within mentioned to be by them paid to me.

SAMUEL DAVIDSON.

R. HOOE.
DANIEL JENIFER, Jun.

On the 28th day of June, 1791, came before me, one of the judges of the general court, the within-named Samuel Davidson, and acknowledged the within and foregoing instrument of writing to be his act and deed.

THOMAS JOHNSON.

Extract of a letter from George Washington, President of the United States, to the Commissioners of the City of Washington, dated

MOUNT VERNON, *October* 21, 1796.

As the business of the executive officers will be chiefly, if not altogether, with the President, sites for their offices ought to be convenient to his residence; but as the identical spots can be better chosen on the ground, with the plan of the city before one, than by the latter alone, I shall postpone this decision until my arrival there.

Extract of a letter from George Washington, President of the United States, to the Commissioners of the City of Washington, dated

GENTLEMEN: PHILADELPHIA, *March* 3, 1797.

Three things relative to the city of Washington call for my decision, and this is the last day I have power to give any.

The first respects the dispute with Mr. Law touching the conveyances of lots. The second, to my approbation of the plans for the executive offices. The third, &c.

The second not only meets my approbation, but is much approved also by the heads of Departments, and may, when the funds and other circumstances will permit, be carried into effect; for which purpose the plans are returned with my approving signature.

Copy of a letter from Alexander White, one of the Commissioners of Washington City, to the Commissioners of Washington City, dated at

GENTLEMEN: PHILADELPHIA, *March* 8, 1798.

I have received your favor of the 27th ult. I am sorry that any difficulty has arisen respecting the roof of the Capitol, which renders a full board necessary to its completion. I am still more concerned to find the prospects here so gloomy. I had not been long in this city when I found opinions circulating, which never came from me, mostly savoring of the clashing interests which have caused so much discord in Washington. Some proposed that there should be a small house erected near the Capitol for the residence of the President, and that the executive offices should be built in the same vicinity; some wish this house to be the permanent, others the temporary residence of the President. Those who wish it permanent talk of making a judiciary of the President's house, and allege that the seat of justice would be as advantageous to the adjacent proprietors as the residence of the President. Others propose making the President's house the residence of Congress; and too many on both sides of this question are of opinion that only one of these houses should for the present be finished, and that any money granted should be appropriated by the act to finishing the one which might be preferred. Another opinion prevailed, that we wanted only $100,000; and the old clamor against the style of the buildings was revived. I endeavored to suppress all these opinions, and to show that although the plans of the buildings may be extensive, yet the mode the late President had pointed out for their completion is the most proper now to be pursued. By an adherence to this line of conduct, I have given offence probably to Mr. Law, certainly to General Forrest, between whom and myself some letters passed, and an explanatory conversation took place. This discussion brought to light several facts of which I had previously no knowledge, and one which had been communicated to me confidentially by a person whom I could not suspect of stating a falsehood, yet attended with some circumstances which rendered it difficult to give credit to it; this was, that the commissioners had authorized or requested General Forrest to give his aid or assistance in promoting the business on which I was sent. It really did appear to me highly improbable that you should have appointed an assistant without giving me notice, that we might have formed some system and co-operation in the measures to be pursued. No such notice was given me, nor did General Forrest ever give the most distant hint of it till the correspondence above mentioned brought it forth. The facts previously unknown to me are, that the President's house had, from the beginning, through the management or influence of some of those interested in the adjacent property, been calculated for the accommodation of Congress, and that General Forrest had lately procured from Mr. Hoban estimates of finishing it, both for the reception of Congress and the residence of the President; that the first (exclusive of slating the roof) might be done for $12,000, and that the latter would cost $54,000. General Forrest said Mr. Hoban at first doubted the propriety of giving these estimates, but at length consented. How easy would it have been to apply to the board had those estimates been intended for purposes which the general thought proper to avow? In this state of things, the committee had several meetings before they could come to any resolution. Yesterday morning a majority agreed to recommend the appropriation of $100,000 only, for which measure Mr. Craik was a strenuous advocate. But part of the majority wished the money to be applied to finishing the north wing of the Capitol, and erecting a temporary house for the President, and executive offices as near to it as may be. An amendment to that effect was offered by Mr. Sprigg; this lay over for consideration till to-day; it was withdrawn, and another amendment offered, confining the appropriation to the Capitol. These amendments brought up Mr. Craik with great warmth against them, on the principle that it was a breach of faith with those who had given up their property in expectation that the building would be completed according to the original plan; and with still more zeal, on the principle that if the original system were broken through, the President's house was the proper place for the reception of Congress. On this point he suggested the propriety of sending a committee to view on the spot the advantages of the rival houses. A member of the committee observed that he supposed, when the committee should report, another committee must be sent to inquire whether they had done their duty. At length this amendment was also withdrawn, the resolution of yesterday reconsidered, and a resolution agreed to recommending the appropriation of $200,000 at three annual instalments, which it is expected will complete the Capitol, the President's house, and the executive offices; the judiciary

not being considered as immediately necessary. This resolution, and a note of mine given in at the desire of the committee, stating the last loan from Maryland, and its operation on our funds, agreeably to our letter to the President on that subject, were reported to the House, and ordered to be printed. Whatever may be the event of this measure, it is my opinion we ought as soon as possible to advertise a sale of Morris and Greenleaf's lots to the amount of the sum due. If I recollect right, we wrote them that this measure could not be postponed longer than till the 1st of March. I conversed to-day with a master builder in this city respecting the wages of mechanics: he says it cannot yet be ascertained, but he expects the wages of stonecutters will be 9*s.*, and of bricklayers 12*s.* 6*d.* per day. There is no mahogany yet arrived.

I am, with great regard and respect, gentlemen, your most obedient servant,

ALEXANDER WHITE.

COMMISSIONERS *of the Federal Buildings, City of Washington.*

Copy of a letter from Alexander White, one of the Commissioners of Washington City, to the Commissioners of Washington City, dated

GENTLEMEN: PHILADELPHIA, *March* 11, 1798.

Since my letter of the 8th instant, I have been a good deal among the members of Congress, and am of opinion that no law will pass granting money for the federal buildings, without appropriating it to the objects which Congress may approve, unless the President's sentiments on the subject are previously known. I was alarmed at the consequence of that opinion, because I knew the investigation necessary to determine the proper objects would lead to a delay, and might probably end in a rejection of our memorial. I therefore waited on the President, to know whether it would be agreeable to him that I should communicate what had passed between him and me on the subject. The President was pleased to say that what he had said to me he had not mentioned to any other person. He repeated the substance of former conversations by observing that, with respect to the President's house, so far as concerns himself, he is perfectly satisfied. He said he could go a mile and a half, whenever his official duty may require it, as long as he shall remain in office, or, if he should find it inconvenient, he could hire a house; that he paid great regard to the opinion of General Washington, but, from the best view he could take of the subject, he was of opinion that the executive offices ought to be as near the Capitol as a convenient place could be found for them, as well for the accommodation of the members of Congress, who have frequent occasion to recur to those offices, as a means of collecting the inhabitants to a point, so as to secure accommodations for the Government when the time comes for its removal; but that he would not reverse the orders of his predecessor without knowing your sentiments. If you concur with him, he will then make his opinion known. It is my earnest wish that the plans of the late President, and his orders for carrying them into effect, in every respect, be fulfilled; but, as I said before, I do not believe a grant of money can be obtained without particularly appropriating it, unless the appropriation is prevented by a previous knowledge of the President's intentions. I find no advocate for the President's house as the residence of Congress except Mr. Craik; and the measures which have been taken to adapt it to that purpose, as stated by General Forrest, are not calculated to gain proselytes; yet it will probably be made a question, much time will be spent, and perhaps the benefits expected from our application to Congress totally frustrated. I sincerely wish that, in a question of this delicacy and importance, there may be unanimity; but if that cannot be obtained, I would suggest the propriety of individual opinion. Should it be determined that the executive offices shall be near the Capitol, I would suggest the propriety of finishing the south wing for their reception rather than erecting other buildings; ~~for sure~~ I am that that superb and elegant building will not be finished during the present age, unless it is appropriated to some useful purpose. The west part of the main body may, in that case, be finished for the House of Representatives. The President has read the draught from which this letter is taken, and says he has no corrections to make.

I am, with sentiments of great regard, gentlemen, your most obedient servant,

ALEX. WHITE.

COMMISSIONERS *of the Federal Buildings, Washington.*

SIR: WASHINGTON, *March* 16, 1798.

We have received your two favors of the 8th and 11th instant, and are desirous of expressing our opinions as soon as possible on this momentous occasion. The President's opinion, derived from your letter, is, that the offices for the several Departments ought to be near the Capitol, and that he is willing to reverse the appropriations of the late President if the board advise the measure. We understand that it is your opinion that the original destination of the President's house ought to be changed, and the south wing of the Capitol finished for the public offices.

When the late President of the United States called together the original proprietors who granted the soil on which the federal city was to be erected, he laid before them a plan, with the present appropriation, for the Capitol and President's house, and the offices for the several Departments contiguous to the latter; and, under the faith of these several appropriations, thus publicly declared, the proprietors agreed to make the several grants, which afterwards took place. These two appropriations, viz: for the Capitol and President's house, the only ones made until the year 1796, were published on the engraved plan promulgated by the President, and were declared to be sanctioned by him at all the public sales of lots which took place at the early period of the city. The commissioners, and all others who have made sales of lots in the city, have made their sales and contracts under a full persuasion that these appropriations were permanent and unalterable.

When the President has, under the deed of trust, once executed his power by establishing a public appropriation, how far he can afterwards change or abolish it, or how far a court of equity will countenance and sustain sales made by the commissioners of lots apparently contiguous to some great national building, which is afterwards abolished, or changed by the President, are questions worthy of consideration, and will no doubt be well weighed before they are acted upon.

It cannot be questioned but that a change in the city, to the extent contemplated by your letter, must shake public confidence to its centre, and create more contentions than can at present be easily foreseen. It was the decided opinion of the late President that real inconveniences would result from the public offices being near the hall of Congress. This opinion, with the reasons for it, were publicly declared to the board, on the ground, when these sites were fixed. The frequent communications between the President and Departments, which must of necessity take place, would render it convenient and proper that they should not be far apart. These observations were made by the President, when occupied on this subject. If the measures recommended by you were well founded

in principle, (which we cannot but deny,) the policy or expediency would still be very questionable. We think that the erecting of the south wing of the Capitol, for the purpose proposed, is not only improper, but impracticable, with all the aid expected from Congress. You know that the foundation walls of that part of the building have been much questioned, and have not yet been well examined. The north wing, now on hand, and not yet carried within eight or ten feet of the intended height, including the balustrade, has cost the sum of $229,223 97, though the two great articles of freestone and timber for that wing (or a great part, at least, of these articles) were laid in when they were a little more than half the present prices. Can we safely calculate that the south wing would, at the present advanced prices of every material and of labor, cost less than the north has done?

With respect to converting the President's house into a judiciary, it may be remarked that it is much too large, and by no means fitted to that object; that fifteen rooms in the Capitol, besides those for Congress, averaging not less than twenty-four feet ten inches by thirty-five feet, and some much larger, will well afford one for a temporary judiciary, and leave a sufficient number for the committees of Congress.

Since writing the above, we have received a letter from two principal original proprietors of the city, a copy of which we enclose to the President, together with a copy of this letter.

We are, sir, &c.

G. SCOTT,
W. THORNTON.

ALEXANDER WHITE, Esq., *Philadelphia.*

GENTLEMEN: GEORGETOWN, *March* 15, 1798.

Mr. Dunlop, who has just returned from Philadelphia, mentions that efforts were making by Mr. ——— and others (not discouraged, as he understood, by Mr. White) to remove the public offices for the great Departments from the President's square to the Capitol.

We hope it will not be forgotten that the late President, at a meeting between himself and the proprietors of the ground in the city, produced the plan of the city which he had determined to adopt, placing the offices for the Treasury and War Departments near the President's house, and that this took place before the deeds were given by the proprietors for the ground; at the same time the President explained his reasons for fixing these buildings convenient to the President's house. More than fifty people attended on this occasion, and witnessed this transaction. Mr. Young, Mr. Carroll, Mr. Burns, and others in the city, must remember the circumstance here mentioned. Nor can you have forgotten, gentlemen, that President Washington fixed on the actual spots for those buildings when on his way to Congress in October, 1796. Feeling ourselves interested that the original design should not, without evident necessity, be departed from, we have taken the freedom to make this communication,

And remain, with high respect, gentlemen, your most obedient servants,

ROBERT PETER,
SAMUEL DAVIDSON.

GUSTAVUS SCOTT and WM. THORNTON, Esqs., *Comm'rs of Washington City.*

SIR: WASHINGTON, *April* 18, 1798.

The commissioners were informed by a letter from Mr. White of the 11th of March last, "that the President was of opinion that the executive offices ought to be erected as near the Capitol as a convenient site could be found for them, as well for the accommodation of the members of the Legislature, who have frequent occasion to recur to those offices, as a means of collecting the inhabitants to a point so as to secure accommodation for the Government when the time comes for their removal." We exceedingly regret this opinion, because the late President always held up the idea that the executive offices ought to be attached to the President's house, for this obvious reason—that the business of heads of Departments was principally with the President; and not only so, but he stated that it was a universal complaint among them that, while the Legislature was in session, they could do little or no business; so much were they interrupted by the individual members, that they were often obliged to go home, and deny themselves, in order to transact the current business of their Departments. He not only gave us his opinion, with his reasons, but on the ground personally pointed out the places on which the executive buildings were to be erected, with orders to erect them there when we should possess the means. We now possess the means, and consider the act of the late President as full authority to proceed in the work. We flatter ourselves the present President will not obstruct this measure, because the erecting those buildings in any other place would indicate an intention to abandon the President's house as the residence of the President, which, we think, cannot be done consistently with the good faith due to those who gave up the property on and near which it stands, and those who have purchased in the vicinity. We are likewise of opinion that a change in the situation of these buildings, instead of tending to secure accommodations for the Government when the time comes for their removal, will have a directly contrary effect, because it will withdraw from those who hold property in that part of the city the strongest inducement to build—that of immediate profit; it will not lessen the buildings near the Capitol, because the utmost exertions of the proprietors in that vicinity will not be sufficient to provide more houses than will be immediately occupied on the removal of the Government. We intend to cease the work on the President's house, as soon as it can be laid by in safety, till the buildings more immediately necessary shall be finished; but we wish not to do an act which, in our opinion, would be injurious, not only to individual rights, but to the general interests of the city.

We are informed that a bill has passed both Houses of Congress authorizing a loan of $100,000 for completing the public buildings in this city; but that it had not, when Mr. White left Philadelphia, been presented to the President for his approbation. That approbation we have no doubt it has received, and, in consequence, have written to the Secretary to forward us the act, with directions as to the forms to be pursued in obtaining the money. We wish the business may be completed as soon as convenient, to prevent the necessity of selling stock at its present low price. Part of the money will be wanted in ten days.

We are, with sentiments, &c.

G. SCOTT,
W. THORNTON,
A. WHITE.

PRESIDENT OF THE UNITED STATES.

SIR: WASHINGTON, *May* 7, 1798.

We took the liberty of addressing you, by letter dated the 18th ultimo, on the subject of the executive offices, expressing our regret that your opinion did not coincide with that of your predecessor, agreeably to whose order

we should long since have commenced the work had we possessed the means, and expressing our hope that, now we do possess the means, you will not obstruct the measure. We stated some of the reasons which the late President was pleased to inform us governed him in respect to the sites of these buildings, and our own reasons for believing a change in this arrangement would be injurious. We flattered ourselves that we should receive an answer to this letter, and were not without hopes of the concurrence of the present President with his predecessor and ourselves on this subject. We are sensible the pressure of more weighty business may have occasioned you to delay an answer, unless, indeed, you meant to give counter-orders, in which case, we presume, you would have communicated them before this time, as the building season is fast advancing. We consider the existing orders as sufficient authority for us to proceed with the building; but to secure the completion of the north wing of the Capitol, and the finishing whatever buildings may be commenced, in due season, we mean at present only to contract for one of the executive buildings, and, as soon as that shall be undertaken, to discontinue the work on the interior of the President's house, leaving the other executive building untouched, and only finishing the stone work, (which is nearly completed,) and slating the roof of the President's house, till the extent and efficacy of our resources are better known. We will receive proposals for undertaking the building now to be erected till the 20th day of June next, of which notice will be given in the newspapers of Philadelphia, Baltimore, and Alexandria.

We are, with sentiments of the highest respect, &c.

G. SCOTT,
W. THORNTON,
A. WHITE.

PRESIDENT OF THE UNITED STATES.

GENTLEMEN: PHILADELPHIA, *May* 10, 1798.

I have this morning received your favor of the 7th instant, and, although I have not found time to answer your former letters, I will give you a short answer to this, that you may meet with no delay or embarrassment in your proceedings. Although I may have been inclined to an opinion that a variation of the measures might have more surely prepared the city for the residence of Government at the time prescribed, I have been far from feeling any determination to give orders contrary to your unanimous judgment. I therefore approve of your proceeding, without loss of time, in the manner you propose in this letter.

I am, gentlemen, with much esteem, your humble servant,

JOHN ADAMS.

COMMISSIONERS *of Washington City.*

15th CONGRESS.] No. 448. [1st SESSION.

CITY OF WASHINGTON: PROGRESS MADE IN REBUILDING THE PUBLIC EDIFICES.

COMMUNICATED TO THE SENATE, FEBRUARY 16, 1818.

To the Senate of the United States: WASHINGTON, *February* 13, 1818.

In compliance with a resolution of the 28th of January last, I now transmit to the Senate a statement of the expenditures upon the public buildings, and an account of their progress, for the year one thousand eight hundred and seventeen.

JAMES MONROE.

SIR: OFFICE OF THE COMMISSIONER OF PUBLIC BUILDINGS, *February* 10, 1818.

In obedience to a resolution of the Senate of the United States passed the 28th ultimo, I enclose a statement of the expenditures upon the public buildings during the year one thousand eight hundred and seventeen, marked A; also a report and estimate for the Capitol, marked B, and of the President's house, marked C.

All which is respectfully submitted.

SAMUEL LANE, *Commissioner of Public Buildings.*

PRESIDENT OF THE UNITED STATES.

A.

Abstract of disbursements made by Samuel Lane, Commissioner of Public Buildings, during the year 1817.

CAPITOL.

1,091 tons 10 feet 2 inches freestone, - - - - -	$11,369 98	
1,179,675 hard bricks, - - - - - -	11,157 64	
317,011 feet of lumber, - - - - - -	6,995 79	
All other materials, - - - - - -	8,752 47	
Labor, including marble quarry, - - - - -	113,748 03	
Incidental, - - - - - - -	7,631 20	
		$159,655 11

PRESIDENT'S HOUSE.

1,015 tons 4 feet freestone,	$10,927 48	
202,149 hard bricks,	2,121 15	
168,340 feet of lumber,	5,881 07	
All other materials,	6,354 68	
Labor,	74,933 26	
Incidental,	8,963 14	
		109,180 78
		$268,835 89

Errors excepted.

WASHINGTON, *February* 10, 1818.

SAMUEL LANE, *Commissioner of Public Buildings.*

B.

SIR: FEBRUARY 5, 1818.

Since the time when I entered upon the duties of surveyor of the Capitol of the United States, I have been occupied in examining into the state of the building, and in viewing the original plans and designs for the work already commenced. Great progress having been made towards rebuilding the north and south wings, it will be necessary to complete them according to the designs already adopted, and on the foundations already made. From a knowledge of the plans, and from the view of the work as far as it has advanced, I have no doubt that the public rooms of Congress will be very splendid, and exhibit favorable specimens of correct taste and of the progress of the arts in our country. I have been engaged in preparing drawings for the centre of the Capitol, and hope soon to be able to present several designs to the President of the United States, from which he may select the one he may most approve for computing the building.

Agreeably to your desire, I have taken measures to obtain as correct an estimate as circumstances will allow of the probable expense of finishing the two wings. Statements have been given me from those at the head of each branch of business, which have enabled me to present the following:

Of the work prepared and materials on hand.

A large quantity of freestone is prepared for finishing the Representatives room, and the marble stairs and back stairs of the north wing are ready to be laid as soon as the season will permit. The dome of the north wing is ready for the copper covering, and the frame of that of the south wing is two-thirds prepared.

All the window frames and sashes are made, and a great part of the doors; a sufficient quantity of copper for the roofs is on hand, and of glass for the windows, and about 100,000 feet of boards and plank, and 30,000 feet of scantling and timber.

It is estimated that about four hundred tons of freestone are wanted for the Representatives room, viz.

	Stones.
For architrave,	6
For frieze,	7
For cornice, first bed,	15
For cornice, upper course,	12
For blocking in the circle,	26
For blocking, straight,	25
For gallery wall,	161
For cupola, north wing,	160
For plinth of balustrade, both wings,	189
For balusters, both wings,	240
For work above balusters,	100
	941

22 stonecutters are employed, who could complete the above stone in 7 months, the expense of which would be		$8,400 00
Laborers' attendance,		1,092 00
Cost of stone, 400 tons, at $13 25 per ton,		5,300 00
Setting the above in place,		3,000 00
Setting what is now prepared,		3,500 00
35 additional steps to back stairs,		500 00
30,000 feet of pavement for floors of both wings, part of marble, part stone,		15,000 00
Setting 22 marble columns and 4 pilasters, with their bases and capitals, at $45 each,	$1,170 00	
2 iron bands for blocking course, 486 feet, 5 lbs. each foot, at 62½ cents per foot,	303 75	
Stairs at each end of gallery, at $200 each,	400 00	
		1,873 75
		$38,665 75

Estimate of carpenters' work on north wing.

18 windows, finished complete, at $80 each,	$1,440 00	
20 windows, finished complete, at 75 each,	1,500 00	
17 windows, finished complete, at 40 10 each,	681 70	
100 doors with jambs, soffits, groundsel, &c. at $32 each,	3,200 00	
4,025 feet of groundsel, base of plinth, at 36 cents per foot,	1,449 00	
2,340 feet of ceiling of Senate chamber, to be panelled, coffers complete, at $1 per foot,	2,340 00	
360 feet of circular sashes and frames, at 75 cents per foot,	270 00	
168 feet of blinds, at 60 cents per foot,	96 00	
Mahogany handrail for stairs,	300 00	
Fixtures, platforms for seats, &c. Senate room,	1,000 00	
Fixtures, platforms for seats, &c. court room,	500 00	
Jobs of carpenter's work to assist stonecutters, masons, &c.	1,000 00	
Nails, sprigs, glue, &c.	1,000 00	
		$14,776 70

Coppering the roof.

17,699 lbs. of copper, to be laid at 17 cents per lb.,	$3,008 88	
400 lbs. of block tin, to be laid at 40 cents per lb.,	160 00	
5,244 yards of coarse linen under the copper, at 15 cents per yard,	786 60	
Laborers, carting, copper, &c.	200 00	
		$4,155 48

Plastering.

3,200 yards of plastering and cornice, at 50 cents per yard,	$16,000 00	
400 casks of lime, at $2 50 per cask,	1,000 00	
50 tons of plaster of Paris, at $16 per ton,	800 00	
1,000 bushels of hair, at 20 cents per bushel,	200 00	
		18,000 00

Brick work.

50,000 bricks, laid in arches, mortar included, at $20 per thousand,		1,000 00

Painting.

6,591 yards of 3 coat painting outside and inside of roof, at 33 cents per yard,	$2,197 00	
661 lights of glass, set in sashes, at 30 cents per light,	198 40	
5,500 lbs. lead for sash weights, at 10 cents per lb.,	550 00	
Iron cramps for stonemasons, and other iron work wanted,	400 00	
		3,345 40
		$41,277 58

Estimate of expense of finishing south wing.—Carpenter's work.

For finishing and putting up the external and internal domes and roofs, ready for copper,	$3,500 00	
3,515 feet of groundsel, base, surbase, and plinths, at 36 cents per foot,	1,264 40	
14 windows, finishing complete, at $30 each,	1,120 00	
12 windows, finishing complete, at $82 each,	984 00	
14 windows, finishing complete, at $45 each,	630 00	
24 door jambs, linings, soffits, &c. at $32 each,	768 00	
Fixtures in Representatives room,	2,000 00	
3,500 feet groined centering, at 12 cents per foot,	420 00	
2 mahogany doors, at $25 each,	50 00	
		$10,736 40

Copper work.

17,699 lbs. copper, to be laid at 17 cents per lb.,	$3,088 88	
400 lbs. block tin, at 40 cents per lb.,	160 00	
5,244 yards coarse linen under copper, at 15 cents per yard,	786 60	
Laborers, carting, copper, &c.	200 00	
		4,235 48

Plastering.

32,000 yards of plastering and cornice, at 50 cents per yard,	$16,000 00	
25 tons plaster of Paris, at $16 per ton,	400 00	
400 casks of lime, at $2 50 per cask,	1,000 00	
1,000 bushels of hair, at 20 cents per bushel,	200 00	
		17,600 00

Brick work.

100,000 bricks laid in ground arches, at $20 per thousand,		2,000 00

Painting.

6,591 yards of 3 coat painting outside and inside of domes, at 33 cents per yard,	$2,197 00	
500 lights of sashes glazed, at 30 cents per light,	1,500 00	
5,500 lbs. lead for sash weights, at 10 cents per lb.,	550 00	
Nails, sprigs, glue, &c.	600 00	
		3,497 00
20 laborers to aid in work on both wings, at $300 each,		6,000 00
3,000 lbs. iron bands for dome, and cramps for stone work, at 17 cents per lb.,		510 00
		$44,578 88

Of marble columns, pilasters, &c.

There are 18 columns and 4 pilasters in hand, of which 3 columns and 2 pilasters are completely finished; two columns in hand polishing, and others in various stages of finishing; the stonecutting work of all is done, except five pieces of columns and one pilaster, now at the quarry; four columns are not yet taken out of the block.

It is estimated that all the columns for the Senate and Representatives rooms may be finished by August next.

Expenses necessary to finish them,	$28,000 00

Marble chimney-pieces.

20 for committee rooms, at $80 each,	$1,600 00	
20 for committee rooms, at $100 each,	2,000 00	
10 for principal rooms, at $200 each,	2,000 00	
2 marble door-cases at entrance of Representatives and Senate rooms,	1,000 00	
16 marble pilasters in upper circular wall of Senate chamber, at $200 each,	3,200 00	
		9,800 00

Carving.

20 cinctures of marble to columns, at $100 each,	$2,000 00	
11 bases to marble columns, at $100 each,	1,100 00	
12 Corinthian capitals, at $200 each,	2,400 00	
12 Ionic capitals, at $166 each,	1,982 00	
		7,482 00
Sculpture of allegorical figures of emblematic bas-relief, &c. It is impossible to estimate the cost of separate figures, but the expense of the artists now employed for one year, exclusive of materials, will be		8,000 00
		$53,282 00

RECAPITULATION.

Estimate of stone work,	$38,665 00
Estimate of work on north wing,	41,277 58
Estimate of work on south wing,	44,578 88
Estimate of marble columns, carving, and sculptured figures,	53,282 00
	$177,803 46

The above estimate is exclusive of the piazza, which I find by the plan is intended to be attached to the north and south ends of the building, and, being wholly of stone, will probably cost $50,000. As these piazzas may be built at any future time, I propose to omit proceeding the ensuing season, but to bestow the labor that they would require on the foundations and walls of the centre.

Respectfully submitted.

CHARLES BULFINCH, *Surveyor Capitol U. S.*

SAMUEL LANE, Esq., *Commissioner of the Public Buildings, U. S.*

C.

Report of James Hoban, architect and superintendent of the President's house, of the works necessary to the completion of that building and the offices thereto attached, comprised under the following heads, viz:

1,161 sheets of copper, grooving and laying on roof of the house, 14 pounds to the sheet, 16,254 pounds, at 20 cents per pound,	$3,250 80
6,000 feet run of strips screwed to roof, at 8 cents per foot,	480 00
24 lights, mahogany sash, for elliptic room, chamber story, at $1 50 each,	36 00
24 lights, glass and glazing, 18 by 28 inches, at $2 50 each,	60 00
21 marble chimney-pieces, fitting and setting, at $20 each,	420 00
8,953 yards painting on wood, inside and outside, at 10 cents per yard,	895 30
2,500 yards bagging to lay under copper, at 10 cents per yard,	250 00
	$5,392 10

The following items were not included in former estimates:

1,272 yards paving round the house, brick on edge, at 75 cents per yard,	$957 00
510 feet run of curb-stone, faced, and laying ditto, at $1 per foot,	510 00
990 yards plain painting on walls and ceiling of hall and elliptic room, at 20 cents per yard,	198 00
270 yards painting walls and circling of elliptic room, in compartments, at $2 per yard,	540 00
720 yards painting walls and circling of hall, in compartments, at $2 per yard,	1,440 00
	$3,645 00

Of the drawing-room, 40 by 80 feet, 20 feet 6 inches elevation between the floor and ceiling, not included in former estimate.

3,200 feet of flooring to drawing-room, at 10 cents per foot,	$320 00
796 feet Venetian blinds, of mahogany, in two heights, at $1 50 per foot,	1,194 00
414 feet filling-shutters and wall-linings, at 70 cents per foot,	289 80
240 feet framed backs and elbows to windows, at 40 cents per foot,	96 00
970 feet groundsel, sunk, grooved, &c., at 12½ cents per foot,	121 25
370 feet architrave, moulded and sunk face, at 30 cents per foot,	111 00
690 feet architrave panelling in compartments and soffits, at 50 cents per foot,	345 00
400 feet base plinth and surbase, at 30 cents per foot,	120 00
810 yards painting on walls, (plain,) at 25 cents per yard,	202 50
810 yards plastering walls and ceiling for painting, at 50 cents per yard,	405 00
614 yards painting on wood work, at 20 cents per yard,	122 80
600 superficial feet of stucco cornice, enriched, at $1 50 per foot,	900 00
810 yards painting walls and ceilings in compartments, at $2 per yard,	1,620 00
2,600 feet clear Susquehannah pine plank, 6-4, at 6 cents per foot,	156 00
2,750 feet clear Susquehannah pine plank, 4-4, at 4 cents per foot,	110 00
9 sets of pivots to hang Venetian blinds, at $4 per set,	36 00
56 feet mahogany border to hearths of fireplaces, at 50 cents per foot,	28 00
	$6,177 35

Of the offices east and west of the President's house.

761 sheets of copper, 14 pounds to the sheet, 10,654 pounds, at 40 cents per pound,		$4,261 60
10,654 pounds, grooving and laying, at 20 cents per pound,		2,130 80
830 feet entablature to colonnades, at 20 cents per foot,		166 00
1,040 feet casing and brackets, at 20 cents per foot,		208 00
6,656 feet top floor and bearers, at 10 cents per foot,		665 60
236 feet circular window frames, at 50 cents per foot,		118 00
97 feet strong gate frames to north gate-ways, at 50 cents per foot,		48 50
200 feet of jambs and soffits to doors, at 40 cents per foot,		80 00
340 feet single architrave, at 12 cents per foot,		40 80
132 feet strong gate, framed and panelled, at 50 cents per foot,		66 00
1,205 yards painting, three coats, on wood, at 33⅓ cents per yard,		401 66
392 feet glazing to circular sashes, at 60 cents per foot,		235 20
153 yards paving colonnade, brick on the flat, at 50 cents per yard,		76 50
392 feet circular sash to window of colonnade, at 75 cents per foot,		294 00
1,803 yards plastering walls and ceilings, at 40 cents per yard,		721 20
5,000 feet of 6-4 flooring plank, for top floors, at 6 cents per foot,		300 00
8 locks, at $1 each, and 7 pairs of hinges, at 50 cents each,	$11 50	
10 locks, at $2 50 each, and 10 pairs of hinges, at 50 cents each,	30 00	
4 pairs of gate hinges, at $3 each,	12 00	
		53 50
		$9,867 30

Of the south portico.

The foundation is laid, and the arcade of the basement is nearly ready to set.

565 tons of freestone for columns, entablature, &c., at $13 50 per ton,		$7,627 50
851 cubic feet of Baltimore, Philadelphia, or New York marble steps, at $2 75 per foot,		2,340 25
662 feet of marble paving, at $1 50 per foot,		993 00
10 tons of freestone for arches, at $13 50 per ton,		135 00
3,498 feet work on circular plain face, at 60 cents per foot,		2,098 80
1,490 feet circular moulded work, at $1 50 per foot,		2,235 00
6 column capitals, Ionic order, at $230 each,		1,380 00
		16,809 55
23 thousand bricks for backing of walls, &c., at $13 50 per thousand,	$310 50	
14 thousand bricks in ground arches, at $20 per thousand,	280 00	
Setting, 15 per cent. on $16,809 55,	2,521 43	
Iron and lead entablature,	200 00	
Digging foundation and masonry,	165 00	
Setting steps, and setting iron railing horizontally,	800 00	
		4,276 93
Amount of stone and brick work,		21,086 48
114 sheets of copper, 14 pounds each, 1,596 pounds, at 40 cents per pound,	638 40	
1,596 pounds, grooving and laying, at 20 cents per pound,	319 20	
1,200 feet strong framing and boarding, at 12 cents per foot,	144 00	
880 feet of circular ceiling, at 12 cents per foot,	105 60	
1,500 feet 5-4 plank flooring under copper, at 6 cents per foot,	90 00	
1,000 feet square scantling, at 6 cents per foot,	60 00	
99 yards plastering, (circular,) at 50 cents per yard,	49 50	
190 feet run of iron railing to steps, platforms, and portico, at $6 per foot,	1,140 00	
		2,546 70
Amount of south portico,		$23,633 18

Of the north portico.

Offices east and west of the President's house,	9,867 30
Wall north of the President's house,	12,000 00
Amount of porticoes,	50,322 53
½ per cent. on amount for contingencies,	4,365 16
Total amount,	$91,769 44

The above estimate is respectfully submitted by, sir,

Your obedient servant,

JAMES HOBAN.

SAMUEL LANE, Esq., *Commissioner of Public Buildings.*

15th CONGRESS.] No. 449. [1st SESSION.

ENCOURAGEMENT TO IRISH EMIGRANTS.

COMMUNICATED TO THE SENATE, FEBRUARY 16, 1818.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled: The memorial of the New York Irish Emigrant Association respectfully showeth:

That your memorialists, while they presume most respectfully to solicit your attention to the helpless and suffering condition of the numerous foreigners who, flying from a complicated mass of want and misery, daily seek an asylum in the bosom of the United States, are emboldened by the recollection that a liberal encouragement to the settlement of meritorious strangers has always characterized the Government and constituted authorities of the Union. The wise and brave fathers and founders of its independence held out to the oppressed and suffering of every nation the consoling assurance that in this country, at least, they should find a refuge and a home. The successors of these illustrious men have continued to redeem, in calmer and happier times, the pledge made to philosophy and benevolence amidst perilous scenes of distress and difficulty. From this humane and beneficent policy America has reaped a rich and happy harvest. She has added to the national resources the moral and physical strength to be derived from so many thousands and tens of thousands, who, actuated by attachment to her free constitution, have adopted the nation where liberty has made, and is making, her most glorious stand, as the country of their choice.

Your memorialists, in addressing your honorable body, need not seek to enforce by argument the generally received maxim of political economy that the wealth and solidity of a nation consist in the number, the social comforts, and the productive industry of its people. In the dense and crowded states, and under the existing Governments of Europe, these sources of wealth and stability are not always found well combined. It frequently does not happen that the social comforts, or even the productive industry, are proportioned to the number of the people. In the extended territory and scattered population of the United States, however, and under their free and blessed institutions, it is an unquestionable and important truth, that every increase of inhabitants, when wisely and judiciously distributed and settled, adds to the social comforts and productive industry of the whole, and that the excess of population, which cannot be considered as giving stability to the various Governments of Europe, if suffered or encouraged to settle here, would incalculably increase our wealth and strength. But that accession is doubly valuable which also brings to the common fund, with a mass of laborious industry, unalterable attachment to the laws and constitution of the country. And, surely, to give a wise direction to that industry, and to secure by well-placed kindness that attachment, are among the noblest exercises of legislative authority.

Your memorialists beg leave respectfully to represent that at no period since the establishment of American independence have the people of Europe, particularly the laboring classes, discovered so great a disposition as at present to emigrate to the United States. But the people of Ireland, from the peculiar pressures under which that country has so long been placed, have flocked hither in the greatest numbers, and perhaps under the most trying and necessitous circumstances. They come, indeed, not to return and carry back the profits of casual speculations, but to dedicate to the land of their hopes their persons, their families, their posterity, their affections, their all.

It is, however, a truth, regretted by those who have the best means of observation, that, for want of guides to their steps, and congenial homes, where all their honest energies might be called at once into activity, and their hardy enterprise turned to their own advantage, as well as to the general good, they remain perplexed, undecided, and dismayed, by the novelty and difficulty of their situations. They have fled from want and oppression—they touch the soil of freedom and abundance; but the manna of the wilderness melts in their sight. Before they can taste the fruits of happy industry, the tempter too often presents to their lips the cup that turns man to brute, and the very energies which would have made the fields to blossom make the cities groan. Individual benevolence cannot reach this evil. Individuals may indeed solicit, but it belongs to the chosen guardians of the public weal to administer the cure. Nor is the misdirection or the destruction of the capabilities and industry of these emigrants to be regretted only on its own account. The story of their blasted hopes and fortunes is transmitted back, and retailed with malicious exaggeration. Others, possessing more abundant means and more prudent habits, who have been accustomed to look with longing eyes to this free country, and contrast its happiness with the present state of Europe, are discouraged and deterred by their sufferings and misfortunes; and thus a large current of active population and wealth, inclined to flow into and enrich the United States, is dammed up at the fountain-head. A serious consideration of these circumstances induces your memorialists to hope, and most earnestly but respectfully to request, on behalf of those whose interests they urge, that a portion of unsold lands may be set apart or granted to trustees, for the purpose of being settled by emigrants from Ireland, on an extended term of credit. The conditions of this grant your memorialists wish to be such as may give to the settlers its entire benefit, and may exclude all private speculation in others. They also beg leave to suggest, after contemplating the various uncultivated tracts which invite the labor of man, that a situation peculiarly adapted for a settlement of that description might be found among the lands lately purchased in the Illinois Territory.

Your memorialists are fully sensible that many of the most persuasive arguments in favor of their application must be addressed, and will not be addressed in vain, to the benevolence and sympathies of the Legislature; but they also confidently appeal to its wisdom and patriotism. The lands to which they have alluded, being frontier and remote, are neither likely to be speedily exposed to sale, to be rendered by cultivation subservient to the general prosperity, nor by settlement conducive to the general strength. The portion which might be granted on extended credit would probably be paid for almost as soon as if it had not been brought into the market before its regular turn. During that time, in which it would otherwise remain unproductive, (and therefore unprofitable,) thousands of families would have acquired opulence, would have benefited the country by its cultivation, by the establishing of schools, the opening of roads, and the other improvements of social and civilized life. They would form a nucleus round which a more abundant population would rapidly accumulate, and all the contiguous lands would be largely increased in value. The small loss which might appear to be sustained by the suspension of interest on the credit (if it should have any existence) will be abundantly compensated by the money and labor that must be almost immediately expended on works of general utility, which the convenience and necessities of the settlers will naturally induce them to accomplish. But who can calculate the physical or moral, or even the pecuniary advantages, in time of war, of having such a strong and embattled frontier?

The Irish emigrant, cherished and protected by the Government of the United States, will find his attachment to their interest increase in proportion to the benefits he has received. He will love with enthusiasm the

country that affords him the means of honorable and successful enterprise, and permits him to enjoy unmolested and undiminished the fruits of his honest industry. Ingratitude is not the vice of Irishmen. Fully appreciating his comparative comforts, and the source from whence they flow, he will himself cherish, and will inculcate on his children, an unalterable devotion to his adopted and their native country. Should hostilities approach her in that quarter, whether in the savage forms of the tomahawk and scalping-knife, or with the deadlier weapons of civilized warfare, the Irish settlers, with their hardy sons, will promptly repel the invasion, drive back the war upon the enemy, and give to our extended frontier security and repose.

Your memorialists therefore humbly pray your honorable body to receive and listen favorably to their application. And, as in duty bound, they will ever pray, &c.

On behalf of the New York Irish Emigrant Association:

THOS. ADDIS EMMET, *President.*
DANIEL McCORMICK, *Vice President.*
JAMES McBRIDE, *2d Vice President.*
ANDREW HERRIS, *Treasurer.*
JOHN W. MULLIGAN, *Secretary.*
WILLIAM SAMPSON, *Secretary.*

NEW YORK, *December*, 1817.

15th CONGRESS.] No. 450. [1st SESSION.

RENEWAL OF A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 25, 1818.

Mr. WHITMAN made the following report:

The committee to whom was referred the petition of Daniel Pettebone, presented in behalf of himself and Ezekiel Chapman and Josiah Nichols, on the 5th instant, having attended to the same, beg leave to report:

That the said Pettebone, Chapman, and Nichols, on the 22d of December, 1802, obtained a patent as original inventors of an improvement in the manner of welding cast steel to iron. This patent having expired, they request that the Secretary of State may be authorized to renew it, including some further improvements, extending the utility of the original invention. For these supposed improvements they have already obtained two patents, viz: one in 1806, and the other in 1813. The patentees allege that they cannot duly enjoy the benefit of these later discoveries without having them incorporated with the original invention.

But your committee are not fully satisfied that the pretended improvements are such as to entitle the patentees to an exclusive use thereof. It would rather seem that they are the necessary results of an application of the supposed original invention to practical purposes, and to be comprehended substantially in the specification accompanying the patent of 1802. It is not every new modification of portions of the machinery in an original invention that can be considered as within the purview of the statute securing to inventors the [exclusive] use of their original inventions. When a new principle is invented, whatever is within the scope of the specification, and essential to carry the principle into effectual operation, must necessarily be considered as an incident to, and a part of it.

The statutes on this subject have been framed upon the presumption that fourteen years of exclusive use of any new invention is a sufficient period to enable the inventor to avail himself of ample remuneration for the exercise of his ingenuity, and the trouble and expense of putting a new invention into operation. There may occur cases in which this length of time would be too short for the purpose, but it does not appear to your committee that the present is one of that description; they therefore recommend the following resolution:

Resolved, That the prayer of the petition of Daniel Pettebone, presented on the 5th instant, in behalf of himself, Ezekiel Chapman, and Josiah Nichols, ought not to be granted.

15th CONGRESS.] No. 451. [1st SESSION.

BOUNDARY BETWEEN KENTUCKY AND TENNESSEE.

COMMUNICATED TO THE SENATE, MARCH 2, 1818.

To the Congress of the United States of America: The memorial of the General Assembly of the Commonwealth of Kentucky respectfully represents:

That, for many years past, an unpleasant controversy has existed between this State and the State of Tennessee, relative to the boundary line between them. Many attempts have been made to settle the difference to the mutual

satisfaction of both States, but hitherto all these attempts have been unavailing; and, judging from the past, there remains very little ground of hope that the dispute will be adjusted by amicable arrangement and mutual concession. As far back as the year 1801, the Legislature of Kentucky passed an act, the object of which was to ascertain and mark the true position of the boundary line between the two States, according to their chartered limits. This act was repealed at the next session of the General Assembly of this Commonwealth. In the year 1812, the subject was again taken up by the Legislature of Kentucky, and an act passed authorizing the appointment of commissioners, to co-operate with commissioners to be appointed on the part of the State of Tennessee, for the purpose of running and marking the boundary line between the two States, according to its true position. This act was predicated on a resolution passed by the General Assembly of the State of Tennessee, the provisions of which were promptly acceded to by this State. It was at this period that the people of Kentucky contemplated a speedy termination of the differences between the two States. Both parties had assented to the same proposition, and public faith seemed to stand pledged to carry into effect the mutual agreement. But this fair prospect was soon darkened by the conduct of the State of Tennessee. The State of Kentucky saw with regret that the State of Tennessee would not abide by the terms which she had at first proposed; she abandoned her own propositions, and, by the departure, defeated the adjustment of the existing difference. The consequence of this conduct on the part of the State of Tennessee was the passage of an act by the General Assembly of Kentucky, in the year 1813, requesting the Governor of this State to communicate to the Executive and Legislature of the State of Tennessee the ultimate determination of our Government on the subject of the boundary between the two States. By this act of 1813 our Executive was requested to solicit from the Government of the State of Tennessee a recognition of the principles contained in the resolutions adopted by the State of Tennessee, in pursuance of which our act of Assembly in 1812 had been passed, and the adoption of the necessary measures for carrying the same into complete operation; and, further, to express to the Government of Tennessee, in case of their final rejection of the overture made by the act of 1813, that the disagreeable necessity of having the contested question of boundary finally settled by a resort to the means pointed out by the constitution of the United States for the decision of such controversies would be imposed upon the Government of Kentucky. The Government of the State of Tennessee gave no official answer to the communications made in pursuance of the act of 1813. Her failure produced a memorial by the Legislature of Kentucky to your body, asking the interference of Congress, as the last resort for settling the controversy, (all other means having apparently failed,) approved by the Executive of this State February 1, 1814. During the session of the General Assembly of this State in the winter of 1815–'16, the State of Tennessee sent a commissioner to our Government authorized to renew the negotiations between the two States on the subject of boundary. He was heard at the bar of the House of Representatives. The result was the passage of a law on our part, approved February 10, 1816, the provisions of which, in the opinion of this Legislature, are liberal, as it relates to the State of Tennessee. The people of this State waited with much anxiety for the meeting of the Legislature of the State of Tennessee after the passage of the act of 1816. It was hoped that the Government of Tennessee would not hesitate to accede to all the propositions contained in our act of 1816; but in this we have been greatly disappointed. It is true that the Legislature of Tennessee took up the subject at their last session, and passed an act concerning it, but its provisions fall very far short of those contained in our act of 1816, and are such as cannot meet with the approbation of this Legislature. This Assembly is constrained to regard the failure on the part of the State of Tennessee to reciprocate the provisions of the act of 1816 as evincing a disposition to delay the settlement of the controversy, unless done upon terms derogatory to the interests and rights of Kentucky; it therefore becomes the imperious duty of this Assembly to appeal to your body as the arbiter, under the authority of the constitution of the United States, to point out the mode by which the contest unhappily existing shall be decided. The laws which the Legislature of Kentucky has passed on the subject, and to which your body is referred for more particular information, will prove that our State has not been wanting in exertions to have the difference amicably adjusted. It is conceded on all sides that the true line should run on a parallel of thirty-six degrees thirty minutes north latitude. The constitutions of the States of North Carolina and Tennessee both recognise that latitude as limiting their northern boundary; and in this they coincide with the charter of King Charles II. It is presumed that no objection can be made to the establishment of the true line, unless it be on account of the effect it will probably have on individual rights to land lying between the said latitude and what is now called Walker's line, to which, at present, both States exercise jurisdiction. To obviate this objection, the Legislature of Kentucky will be governed by the most liberal principles. If the establishment of the true line should operate so as to give more territory to this State, whereby many persons, now citizens of Tennessee, living on lands title to which they have derived by grant from the State of North Carolina or Tennessee, this Legislature doth pledge the faith and character of Kentucky to ratify all such claims wherever they do not interfere with claims founded on the land laws of the State of Virginia, or of this State; and where they do so interfere, the occupant in all cases shall have the benefit of the laws in force in this State for the time being, made for the protection of occupying claimants, the statute of limitations excepted. The unsettled state of the line is calculated to have an effect in the formation of new counties which bind on it. To particularize all the evils to the State, and especially to those individuals who have claims to land founded on the laws of Virginia and this State, lying within our chartered limits, and who are kept from the enjoyment of those rights by the present exercise of jurisdiction over their lands by the State of Tennessee, would be unnecessary. Nothing short of the establishment of the line between this State and the State of Tennessee, according to its true latitude, will now comport with the wishes of this Legislature; and as it is a right appertaining to our State, which can only be enforced by the Supreme Court of the United States, acting under the wise provisions of the constitution of the United States, we ask of your body the passage of a law directing the proceedings in the Supreme Court by which one State, having a subject of difference with another, may have the same legally decided. To effectuate this desirable object, this General Assembly concur in the following resolutions, to wit:

Resolved by the General Assembly of the Commonwealth of Kentucky, That the foregoing memorial to Congress be adopted as the earnest prayer of this Legislature.

Resolved, That the acting Governor of this State be, and he is hereby, requested to transmit a copy of this memorial and resolutions, and copies of all laws passed by the Legislature of Kentucky, and all laws and resolutions passed by the Legislature of Tennessee alluded to in the foregoing memorial, to each of our Senators and Representatives in Congress, to be by them laid before that body.

Resolved, That our Senators in Congress are hereby instructed, and our Representatives requested, to use their exertions to effectuate the object of this memorial.

Resolved, That the acting Governor be, and he is hereby, also requested to transmit copies of this memorial and resolutions, and copies of all laws and resolutions passed by the Legislatures of this State and Tennessee, to each of the Senators and Representatives of the State of Tennessee in the Congress of the United States.

Resolved, That our Senators and Representatives in Congress be, and they are hereby, requested to report to the Governor of this State the steps which they may take to effectuate the object of the foregoing memorial, and the result to be by the Governor laid before the next General Assembly.

AN ACT concerning the boundary line between this State and the State of Tennessee. Approved December 14, 1801.

Whereas doubts have arisen with respect to the position of the boundary line, or some part thereof, between this State and the State of Tennessee: therefore,

Be it enacted by the General Assembly, That the Governor of this State be authorized and requested, as soon as he is informed that commissioners are appointed on the part of the State of Tennessee, to appoint two commissioners to meet such commissioners, and with them to settle and remove all doubts upon the subject aforesaid, by running and marking the said line, or as much thereof as may not extend within the lands reserved by Congress to any Indian tribe, agreeably to the chartered limits of the States of Virginia and North Carolina; and the commissioners so appointed shall have power to employ a surveyor, and as many hands as may be necessary to carry the same into effect, at the joint expense of both States. The commissioners so appointed on behalf of this State shall receive for their services and expenses three dollars per day for every day they may be actually employed in going to, continuing on, and returning from, said line; and shall make report to the Governor of their proceedings as soon as the same is completed; and also certify how many hands were employed, and for what purpose, and what is due to said hands from this State; which report and certificate the Governor shall lay before the next Assembly. And if the proceedings of the said commissioners shall be approved by this State and the State of Tennessee, the line so run and marked shall be the line forever between the said States, unless altered by mutual consent. If any lands claimed under titles derived from the State of Tennessee shall be found, on running the said line as before mentioned, to lie within the limits of this commonwealth, all such claims shall, as soon as a similar and reciprocal law shall be passed by the Legislature of the State of Tennessee, on behalf of persons claiming lands lying in the said State, under titles derived from this State, be as valid as if they were derived from this commonwealth. And the Auditor, on the order of the Governor, shall issue a warrant to the said commissioners for any sum not exceeding one hundred and fifty dollars, to enable them to provide for the execution of the business assigned them by this act, and the Treasurer shall pay the same accordingly, out of any money in the treasury. The Governor of this State shall transmit a copy of this act to the Governor of the State of Tennessee as soon as possible, who is requested to lay the same before the next Legislature which shall be held for said State.

AN ACT to repeal the act entitled "An act concerning the boundary line between this State and the State of Tennessee." Approved December 22, 1802.

Whereas it appears to this present General Assembly that the act passed at the last session entitled "An act concerning the boundary line between this State and the State of Tennessee" is defective, inasmuch as it provides that the boundary line between the said States shall be run agreeably to the chartered limits of the States of Virginia and North Carolina, and it does not appear to us that any charter ever was granted describing the limits of the last mentioned States, respectively: therefore,

Sec. 1. *Be it enacted by the General Assembly*, That the said recited act shall be, and the same is hereby, repealed.

Sec. 2. *And be it further enacted*, That the Executive of this State shall, as soon as possible, send a copy of this act to the Governor of the State of Tennessee.

This act shall be in force from its passage.

AN ACT to provide for the ascertainment of the boundary line between this State and the State of Tennessee. Approved February 4, 1812.

Whereas it is desirable to have the boundary line between this State and the State of Tennessee run and marked according to its true position: and whereas the General Assembly of the State of Tennessee have passed a resolution at their last session authorizing the Executive thereof to appoint two commissioners to cause to be run and marked the boundary line between this State and the State of Tennessee: wherefore,

Sec. 1. *Be it enacted by the General Assembly of the Commonwealth of Kentucky*, That the Governor of this State be, and he is hereby, authorized to appoint two fit persons as commissioners, who shall be, and they are hereby, authorized to meet the commissioners to be appointed on the part of the State of Tennessee under the resolution aforesaid, and then proceed to run and mark said line according to its true position, as it is established by the charter of King Charles II., and recognised by the twenty-fifth section of the declaration of rights in the constitution of the State of North Carolina, and also recognised by the thirty-second section of the declaration of rights in the constitution of Tennessee, beginning on the top of Cumberland mountain, at thirty-six degrees and thirty minutes north latitude, when accurately taken, and from thence to run west a right line in thirty-six degrees and thirty minutes north latitude, so far as not to run into the lands claimed by the Indians.

Sec. 2. *Be it further enacted*, That the said commissioners are empowered to employ a surveyor at three dollars and fifty cents per day, and chain-carriers and markers at one dollar per day each, and cause the said line to be run and marked between this State and the State of Tennessee agreeably to the provisions of this act.

Sec. 3. *Be it further enacted*, That the commissioners so to be appointed on behalf of this State are authorized to confer with the commissioners on behalf of the State of Tennessee as to the most advisable plan for quieting the titles to land which may be claimed by the citizens of either State between the boundary line and the line commonly called "Walker's line."

Sec. 4. *Be it further enacted*, That if the commissioners on the part of the State of Tennessee shall fail or refuse to act and proceed with the commissioners to be appointed on the part of this State, or if the Executive of said State of Tennessee should not appoint such commissioners, nevertheless the commissioners so to be appointed on the part of this State may proceed, (unless forbidden by the Executive of the State of Tennessee,) upon proper observations of the true point and direction of thirty-six degrees and thirty minutes north latitude, to cause the said boundary line to be run and marked so far as not to run into the lands at present claimed by the Indians.

Sec. 5. *And be it further enacted*, That said commissioners shall, for the time they shall be necessarily employed in said service, each receive the sum of five and a half dollars per day; and that, upon the Governor's certificate of their appointments as commissioners, and of their being ready to proceed to the discharge of the duties herein prescribed, they shall be entitled to draw a sum from the treasury of this State, (for which the auditor is hereby required to issue his warrant on the treasurer,) not exceeding six hundred dollars, for the payment in part for a surveyor, chain-carriers, markers, and furnishing the requisite provisions; which latter shall be furnished at the expense of the State.

Sec. 6. *And be it further enacted*, That it shall be the duty of the commissioners to report their proceedings, together with an account of the necessary expenses of said services, to the next session of the Legislature.

AN ACT concerning the boundary line between this State and the State of Tennessee. Approved February 3, 1813.

Whereas it appears, from the communications made by the Governor to this Legislature at the commencement of the present session, that the Legislature of the State of Tennessee, by an act of their last session, have indicated a disposition to depart from the proposition formerly made by their Government to this, of proceeding by the agency of commissioners mutually appointed on the part of each, and acting in concert together, to ascertain, by correct and scientific observation, the true line of separation between the respective States, agreeably to their chartered limits: and whereas it is deemed by this Legislature that the true interest and sound policy of this State, as well as those of Tennessee, require an explicit declaration of the views and ulterior determination of each other on this point, so important to the cultivation of harmony and a proper understanding between the Governments as well as citizens of two contiguous and friendly States: wherefore,

Sec. 1. *Be it enacted by the General Assembly*, That the Governor of this commonwealth be requested to communicate to the Executive and Legislature of the said State the final determination of the Government of this commonwealth in relation to the ascertainment of the said boundary line, to be in conformity with that evinced by the Government of Tennessee in their proposition to ascertain the true boundary line between the said States, agreeably to their chartered limits as first alluded to in the preamble of this act, and to solicit, in the most respectful terms, from the said Government, a recognition of this principle, and a correspondent determination on their part, with the adoption of the necessary measures for carrying the same into complete operation; and further expressing to the said Government, in case of their final rejection of this overture, the disagreeable necessity imposed upon the Government of Kentucky of having the long-contested question finally settled by a resort to the means pointed out by the constitution of the United States for the decision of such controversies.

AN ACT to settle the boundary line between this State and the State of Tennessee. Approved February 10, 1816.

Whereas a dispute exists as to the true position of the boundary line between this State and the State of Tennessee, which has produced many attempts at accommodation hitherto unsuccessful; and the State of Tennessee, by an act of its Legislature, passed on the 17th day of November, in the year 1815, has appointed a commissioner to wait on the constituted authorities of this State, and adopted the principles for adjusting the said boundary line; and although this State cannot meet every proposition contained in the said recited act, and pass one on the part of this State in all respects similar, because, first, the establishment of Walker's line (as it is usually called) would not determine the whole extent of boundary between the two States; and, secondly, because this Legislature is forbidden by our own constitution to form any compact with a sister State, or do any other thing within the purview of legislative authority, which might take from individuals a right of property in lands near the contemplated line, without previously paying the claimants a compensation therefor: yet, the Legislature of this State, being willing to keep open the door of accommodation and adjustment, and feeling desirous that mutual harmony between the two States should not be molested by a territorial controversy, do propose the following terms:

Sec. 1. *Be it enacted by the General Assembly of the Commonwealth of Kentucky*, That the line usually called Walker's line, so far as it was originally run and marked, to wit, from a point near the mouth of Obed's *alias* Aba's river to the Tennessee river, be the true jurisdictional line between this State and the State of Tennessee; and as to the residue of the line between the two States, the following shall be adopted as the true position thereof: At the eastern extremity of Walker's line, near the mouth of Obed's river aforesaid, a line shall be run at right angles, either north or south, as the case may require, till it reaches the true chartered limits of the two States, in the latitude of thirty-six degrees and thirty minutes north; and from that point the line shall be extended to the east, still keeping the same latitude, till it reaches the eastern boundary of this State. And at the west extremity of Walker's line, to wit, at the Tennessee river, a line shall be extended up or down said river, (as the case may require,) till it reaches the true chartered latitude of thirty-six degrees and thirty minutes north; and from that point the line shall be extended due west, still keeping the same latitude, till it reaches the river Mississippi. And the line so pointed out by this act shall be and remain the true jurisdictional line between this State and the State of Tennessee: *Provided*, The following articles, conditions, and stipulations hereby adopted on behalf of this State, are acceded to on the part of the State of Tennessee, to wit:

First. The lines so pointed out shall be marked or re-marked, and well cleared, at the joint expense of each State, by two commissioners, attended with proper surveyors, chainmen, markers, and laborers; and one of said commissioners shall be appointed by each State. And, in running that part of the line called Walker's line, the commissioners shall be governed by the old marks, if they can be found, or the most notorious places of the line as now acknowledged, still making the line as straight as can be practicable if the old line shall be found to be crooked.

Second. The true chartered limits between the two States shall be run on that part now supplied by Walker's line, and marked in numerous places, so that hereafter it may be found with ease and convenience, and may furnish evidence of the situation of claims when they shall be adjusted as hereafter directed.

Third. If the true chartered limits in that part of the line supplied by Walker's line shall turn out to be north of Walker's line, and encroach on what is now under the jurisdiction of Kentucky, and any fair connected titles to land derived under the laws of the State of North Carolina or Tennessee, completed by patent from the proper authority, shall appear between Walker's line and the true chartered line, and shall interfere with any title, or cover any occupant holding title under the laws of this State or the State of Virginia, the claimants, at their option, may relinquish such claim, and be entitled to compensation for the value thereof from the State of Kentucky, ascertained in a manner pointed out by this act; or such claimants may take any remedy to recover the land which may be most proper for their case; and if, on the contrary, the true chartered limits shall be south of Walker's line, and include a portion of the land now under the jurisdiction of the State of Tennessee, and any fair connected titles to land derived under the laws of the State of Virginia or Kentucky, completed by patent from the proper authority, shall appear between Walker's line and the true chartered line, and shall interfere with any title, or cover any occupant holding title under the laws of the State of North Carolina or Tennessee, the claimants, at their option, may relinquish such claim, and be entitled to compensation for the value thereof from the State of Tennessee, ascertained in the manner pointed out by a stipulation between the two States; or such claimants may take any remedy to recover the land which may be most proper for their case.

Fourth. If any claimant holding title under one State shall not elect to take compensation for the land according to the next preceding article, and shall, by any suit in law or equity, recover the land from any occupant holding title under the laws of the other State, he shall be compelled, in a mode pointed out by the laws governing such court where the recovery may be had, to compensate the occupant for his improvements on the land according to their intrinsic value, without any deduction for rents or waste; and for such compensation the occupant shall have a lien on the land so recovered, and shall not be disturbed in the possession thereof till the compensation legally ascertained shall be paid to such occupant.

Fifth. If any claim for land shall fall between Walker's line and the true chartered limits, and shall come under the jurisdiction, by this arrangement, of the State from which such title did not originate, and shall not be patented when [said] line is thus settled, and shall interfere with a title derived from the State to whom the jurisdiction shall be assigned by this compact, no patent shall ever issue therefor; and all patents issued contrary to this article shall be void.

Sixth. If in the territory ceded by this compact there shall exist any claim between Walker's line and the true chartered limits, which claim shall be regularly derived under the laws of either State or the parent States, and shall not interfere with any other claimant, but shall be on land vacant as to other claims, the same shall be, and is hereby, ratified; and if not completed by patent, provision shall be made by the State into whose jurisdiction it may fall to complete the title by the emanation of the grant.

Seventh. And whereas it is believed that many claims granted for actual settlement under the laws adopted by the State of Kentucky since its separation from Virginia were granted contrary to the true intent and meaning of said laws, without any actual *bona fide* settlement, and that some of them are laid south of what is actually Walker's line; and it is also believed that many removed certificates under the laws of the Commonwealth of Kentucky, originally granted for actual settlement, have been removed and located for speculative purposes south of Walker's line; now it is hereby declared that such claims, where they interfere with any claims derived under the laws of North Carolina and Tennessee, south of Walker's line, are not aided by the provisions of this act, and that the owners of such claims shall not be entitled to any compensation under this compact, provided they fall within the ceded territory, nor shall the State of Tennessee be bound to allow patents to emanate for such claims unless they are entered on land entirely vacant.

Eighth. If any claimant between Walker's line and the true chartered limits shall choose to relinquish his claim according to the first article of this compact, he may produce authenticated copies of his title-papers to any court of general jurisdiction of matters of law and equity in the State of Kentucky which may hold its sessions nearest the lands so to be relinquished, and also to some court of the State of Tennessee which may possess general jurisdiction of matters of law and equity, and which may hold its sessions nearest the lands so to be relinquished; and said courts shall each appoint some discreet person to act as commissioner to value said lands so to be relinquished, if the claim shall come within this act; and said two commissioners shall proceed to appoint and associate with them one other commissioner, and the three being duly sworn before some judge or justice of the peace well and truly to value the land so relinquished according to the best of their skill and judgment, without partiality or favor to either party, and without regard to any improvements which may have been made thereon, shall proceed to value said lands, and certify the same under their hands and seals; and, on producing said valuation to the court appointing the commissioner in the State where the land lies, and also producing a certified copy of the relinquishment of said land according to the laws of that State where the land may then be, the court shall order the value thereof, so ascertained by commissioners, to be certified, and the same shall be paid out of the public treasury of that State in which the land may be situated.

Sec. 2. *Be it further enacted*, That if the State of Tennessee shall pass a law at or before the next stated session of their Legislature, similar in all respects to this act, the Governor of this State shall proceed to appoint a fit person as commissioner, to run and ascertain the position of the lines directed to be run by this act, who shall receive for his services five dollars per day during the time he shall be necessarily employed in running the lines aforesaid, and five dollars per day for every twenty-five miles he may necessarily travel in going to and returning from the lines aforesaid. The surveyor or surveyors, if any are employed on the part of this State, shall each receive for his or their services five dollars for each day he or they may be actually employed in running the lines aforesaid. And said commissioner shall take an oath well and truly to execute all the duties assigned him by this act to the best of his skill and judgment, and to render a true account thereof; and his services, certified by the Governor, shall be paid out of the public treasury, by virtue of a warrant from the auditor of public accounts. Each laborer and chain-carrier employed on behalf of this State shall receive as a compensation for his services three dollars per day, to be paid by the commissioner out of any funds which may be placed in his hands by the Governor of this State for that purpose; and the Governor of this State shall have at his disposal, to be drawn from the treasury at his order, two thousand dollars, to be paid in contingent expenses, for the purposes aforesaid. Each chain-carrier shall be sworn by the commissioners, or one of them, well and truly to carry the chain, and render a true account of the distance. But if the State of Tennessee shall refuse to pass an act similar in its provisions, this act shall cease to operate, and have no force and effect; nor shall any fact or concession therein be binding or obligatory upon the State of Kentucky in any future discussion of the said boundary line, whether that discussion be legislative or judicial.

AN ACT for adjusting the boundary line between this State and the State of Kentucky.

Whereas great injury may happen, as well to the citizens of the State of Kentucky as to the citizens of this State, from suffering any part of the boundary line between the two States to remain unascertained and unmarked: therefore,

Sec. 1. *Be it enacted by the General Assembly of the State of Tennessee*, That the line commonly called Walker's line, so far as the same has been run and marked, shall be considered and taken to be the true line between said States.

Sec. 2. *Be it enacted*, That so soon as the State of Kentucky shall pass a law agreeing thereto, a direct line from the eastern extremity of the line called Walker's line as marked at Cumberland river, to Walker's line at a place called Cumberland Gap, shall be taken and considered the true line between the two States.

Sec. 3. *Be it enacted*, That this State will, provided the State of Kentucky agree thereto, apply to the Executive of the United States to appoint a commissioner to ascertain the true point where the boundary line between this State and the State of Kentucky will strike the Tennessee river on the western bank thereof, and that from said point a line shall be run directly west to the west boundary line of the State of Tennessee, which shall be the line between the two States.

Sec. 4. *Be it enacted*, That the Governor of this State shall have full power and authority, whenever he shall receive information that the State of Kentucky has agreed to the appointment of commissioners to run and mark the lines herein described, to appoint commissioners on behalf of this State, to superintend the running and marking the said lines.

Sec. 5. *Be it enacted*, That, when said lines shall have been run and marked, every grant which may have been issued by the State of Kentucky, and which may cover lands lying south of said line, shall be considered as good and valid as if such grants had been issued under the authority of the State of Tennessee: *Provided, always*, That this section shall not have any effect until the State of Kentucky shall have passed a law containing a similar provision with respect to such grants as may have been issued by the State of Tennessee, and may cover lands lying north of the line.

SEC. 6. *Be it enacted*, That this State shall stand pledged to pay one-half of the expense of the commissioner who may be appointed by the Executive of the United States.

THOMAS WILLIAMSON,
Speaker of the House of Representatives.
EDWARD WARD,
Speaker of the Senate.

Passed November 24, 1817.

AN ACT to repeal all laws passed by this State relative to the southern boundary line. Approved January 30, 1818.

SEC. 1. *Be it enacted by the General Assembly of the Commonwealth of Kentucky*, That all laws heretofore passed by the General Assembly of this Commonwealth, relative to the boundary line between this State and the State of Tennessee, shall be, and the same are hereby, repealed.

SEC. 2. *Be it further enacted*, That the southern boundary line of this State shall be and remain on a line running west from the top of Cumberland mountain to the Mississippi river, in thirty-six degrees and thirty minutes north latitude, any thing in any former law passed by this State to the contrary notwithstanding.

STATE OF KENTUCKY, } *sct.*
Secretary's Office, }

FRANKFORT, *February* 13, 1818.

The foregoing memorial and resolutions, and the several laws annexed thereto, are true copies of all the proceedings and laws passed by the Legislature of this State, and of the last law passed by the Legislature of the State of Tennessee, on the subject of the boundary line between those States.

Attest: JOHN POPE, *Secretary.*

15th CONGRESS.] No. 452. [1st SESSION.

MISCONDUCT OF CERTAIN CLERKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 30, 1818.

Mr. HOLMES, of Massachusetts, made the following report:

The select committee of the House of Representatives appointed to "inquire whether any and what clerks or other officers in either of the Departments, or in any office at the seat of Government, have conducted themselves improperly in their official duties," ask leave to report:

That several cases have come to their knowledge, which they have investigated with that attention which the interest of the Government and the reputation of its officers require. The inquiry had excited suspicions, and it became necessary that these suspicions should be removed, or their foundation ascertained. To listen to hearsays or surmises, further than they were the means of furnishing proof, would have been illiberal and unjust. We have, therefore, given to each case to which our attention has been directed a full examination, and it is either dismissed as groundless or here reported.

Our attention has been called to the Post Office Department, and we have been urged to re-examine a report of a committee of a former Congress. This we have declined. Justice to the officers implicated in that inquiry, and respect for the decision of a former committee, were sufficient to prevent us from a further investigation.

It was suggested that there were facts which did not come to the knowledge of that committee; but this suggestion was not found to be true; we could not see the propriety of re-examining a report made by gentlemen of intelligence, experience, and fidelity, and upon a much fuller and more extensive examination than we could possibly afford.

Our inquiry has, however, been called to another subject relating to that Department. It was stated and *proved* that Aaron T. Crane, a clerk in the General Post Office, was very extensively concerned as agent for claimants against the United States, and in purchasing soldiers' lands; that this business occupied a considerable portion of his time; that he attended to it at the offices of the different Departments during office hours; and that it was worth to him about $1,500 per year. The proofs of these facts will be found in the papers marked B, C, D, G, H, M, N.

Mr. Crane was heard before the committee, and his statement accompanies this report. He did not deny any material fact, but stated as a justification that his salary of $1,000 was small; that there was assigned him *a given duty* to be performed in *a given time*, and that what he could gain he considered his own.

But your committee cannot forbear to disapprove and condemn a practice which tends so strongly to infidelity. Mr. Crane's duty was the adjustment of the accounts of the several postmasters of the United States, and which were to be completed in every *six months*. The temptation to indifference or neglect, when *private duties* pressed him, would be too strong to be resisted; and we apprehend that the public have little reason to expect fidelity from an officer whose *unofficial labors* are the principal object of his attention.

Where the blame in this case should attach, is an inquiry more suitable for the House than its committee. It is matter of inference, from the facts reported, whether the fault is in the *chief* or subordinate officer, or in the *law* regulating the Department. From the high character of the officer who controls this Department, we are disposed to hope and believe that no intentional fault is imputable to him. But surely it neither comports with the dignity of the Government, nor the confidence which its officers should inspire, to permit them to engage in speculations which would be scarcely correct in any private citizen.

We have also examined the cases of James L. Edwards and William M. Stuart, clerks in the War Department, in the section of bounty lands, and the evidence is contained in the papers marked A, B, C, D.

These cases are alike, and, by the facts proved and not denied, it appears that they have transacted business as agents for claimants against the United States, principally in obtaining land warrants for the *Canadian volunteers*, for which they have received compensation. There was no proof that either of these gentlemen was much absent, or that their agencies materially interfered with their official duties. But the tendency of the practice renders it

necessary that it should be prevented. The clerks in this office are numerous, and it is necessary to rely much on their correctness and fidelity. Claims passing through *interested hands* would be likely to succeed, without the proper scrutiny. If the public have not already suffered from these agencies, there is certainly danger in indulging, and safety in preventing the practice.

The existing laws do not prohibit the clerks from transacting other than *official* business, with the exception of those in the Treasury Department. The allowances made by Government were deemed sufficient to command their exclusive labors.

If they engaged in employments incompatible with their duties, a corrective was expected in the *chiefs* of the Departments, to whom they were respectively responsible. But as the number of clerks is exceedingly multiplied, and many are removed from the immediate view of their *principals*, it would, perhaps, be safest to compel their exclusive services by laws to be enforced with suitable penalties; in this way only could we depend on their attention and fidelity.

Your committee have examined the case of Benjamin Homans, chief clerk in the Navy Department, and the evidence is contained in the affidavits of William Blagrove and Mr. Homans himself, and their statements marked O, R, T, U, V, W, Y. The evidence against Mr. Homans went to show that he had loaned for his own benefit a part of the *Epervier fund*, being a grant of $12,000 made by Congress to the widows and heirs of those lost in that ship; and also that Mr. Homans had appropriated to his own use a horse and forage belonging to the Navy Department.

Upon hearing the whole case, however, it appears that the fund was paid over for the use of the claimants, by the Secretary of the Navy, to Mr. Homans, who gave bonds for its faithful application, to be accounted for in two years; that Mr. Homans had in one or two instances accommodated a friend with money from this fund; that the two years were not expired, and that no claimant had been denied or delayed; that the story of the horse and forage was at most a trifling affair, and there appeared in it nothing improper on Mr. Homans's part.

We know not whether it has been the practice for those *bound* to apply public moneys to specific purposes to use the money, provided they were always ready to account; but we are strongly inclined to the belief that public money should never be touched by the trustee, but for the purposes of executing the trust. Mr. Homans, however, it is believed, is a faithful officer and a responsible man, and that the money is perfectly safe in his hands.

We have also examined the case of Ezekiel Macdaniel, a clerk in the Navy Department, and the evidence is contained in the papers marked P, L, X.

It appears that George Beale, jun., a purser in the navy, was, by the captors of the Champlain squadron, appointed their prize agent, and that about $290,000 of the money granted them by Congress was put into his hands for their use by the Secretary of the Navy. The Secretary of the Navy took surety of Beale for the faithful application of the money. After this, Beale was ordered to the *Mediterranean*, while a considerable part of this money was in his hands; he substituted Macdaniel to draw on his father of this city, and pay over to the claimants. The prize agent has not yet returned, and the father has neglected to furnish Macdaniel with money, whence several claims have been rejected *for want of funds*. That the conduct of the prize agent has been unfaithful, there can be no doubt. But no suit has been instituted against the sureties of Beale; and it is surely matter of regret that an officer so responsible as a purser in the navy should have contrived to delay and defraud the *honest tar* who has conquered for his country, and be still suffered to remain in employ. Public confidence should be withdrawn from a man who has so grossly abused a private trust, and withheld from our naval heroes the rewards of victory.

Macdaniel is agent of this Mr. Beale *without funds;* objections to agencies in public offices are, consequently, applicable to him. It does not appear that he has squandered any of the money; but it will be perceived that when clerks in the Departments are permitted to connect themselves with men like Beale, the public confidence will be impaired, and suspicions may attach where they ought not.

We, however, learn by the letter of the Secretary of the Navy of 16th February last, that Beale is ordered home to settle his accounts, and are in hopes that this error will be corrected.

But while this affords consolation to the claimants, it proves that Beale's duties as prize agent are incompatible with his office in the navy.

We have examined the case of Daniel Parker, adjutant and inspector general, and the evidence is contained in the paper marked S.

It appears that certain claims for property captured by the enemy were presented to the commissioner for allowance; they purported to be examined and vouched by "Isaac Clark, late col. 26 R. R." The papers were *entire forgeries*. Before their allowance, it was necessary that the genuineness of Clark's signature should be certified by Parker. Parker made the certificates, and but for the vigilance of Peter Hagner, Third Auditor of the Treasury, who discovered the fraud, these claims would have been paid.

General Parker attributes his *inadvertence* to a press of business, which prevented a due examination; but the forgeries being exceedingly apparent, the papers written throughout by the same hand, and Clark's official signature being of the *26th rifle regiment*, when no such regiment existed, the committee perceive in this case a very culpable, if not inexcusable neglect. Happily in these cases the fraud was detected; but we are told that several other forged claims certified as genuine by General Parker have succeeded, and the money has been paid.

By the eighth section of the act of the 2d September, 1789, the first section of the act of 3d March, 1791, and twelfth section of the act of 8th May, 1792, it is, in substance, provided that no clerk in the Treasury Department shall purchase by himself, or another in trust for him, any public lands or other public property, or be concerned in the purchase of any public securities of any State, or of the United States, or take or apply to his own use any emolument or gain for negotiating or transacting any business in the said Department, other than what shall be allowed by law, under a penalty of $500, removal from office, and perpetual disqualification.

Your committee have examined several cases which appeared to have infringed or evaded the provisions of these acts.

The first is the case of Lund Washington, a clerk in the Treasury Department, and the evidence is contained in the papers marked B, C, D, G, H.

It appears that Mr. Washington is an agent for claimants generally; that he receives the claims usually by mail, attends to their passage through the several branches of the Department to which they belong, and takes a commission for doing the business; and that his agency extends to the transfer of *United States stocks.*

The next case is that of Michael Nourse, a clerk in the same Department, and notary public to the branch bank. The evidence is contained in the papers marked B, E, F, G.

It appears that he is an agent for claimants, of whom he takes a reward; that he transacts their business at the proper Departments, and receives and transmits their money.

The next case is that of Edward Fox, another clerk in this Department; the evidence is contained in the papers marked D, E, F.

It appears that he is agent chiefly for claims at the office of Mr. Lee, under the property act, so called. In a case of Colonel Jameson, of the Pennsylvania volunteers, he admits he received a commission of five per cent. In this case an error had escaped, and the sum of $1,100 had been paid Jameson, without deducting $600 previously paid to a captain of the same corps. We did not *find* that any blame could attach to Mr. Fox in *this case;* but when mistakes do happen, and redound to the profit of the clerks who are agents, it may excite reasonable jealousies in the public mind.

It was the design of these acts to guard the Treasury against the cupidity of its officers. The opportunities afforded the subordinate officers of this Department to learn the fluctuations of the public property are strong temptations to speculate, and to attempt to engross every important bargain without danger of competition. But if the law prohibits the clerks from purchasing public property or stock for *themselves*, and permits them to do it as *agents for others*, they would enable their *friends* to realize all the *exclusive benefits* intended to be prevented by these acts. Besides, it would in most cases be difficult to distinguish an agency from a *real interest*, and the clerks in the Treasury would be purchasers for *themselves* in the *names of others*, and without the possibility of detection.

But your committee have no doubt that to transact any business relative to the Department, in that Department, for *pay*, is a direct violation of the provisions of the law. It is the business of this Department to adjust and pay the demands against the United States. The subordinate officers should have no interest in any account or claim which they might be called upon to inspect or examine. An agency *coupled with an interest* operates as a reward paid by the claimant for the adjustment and allowance of his demand. This, then, is not merely "taking and applying to his own use an emolument or gain" for doing his duty; it is more—it is taking that which may encourage him to obtain what is *not* due or *more* than is due, under an expectation of augmenting the reward. Although the correct organization of this Department may, and generally will, prevent the evils of which we speak, yet the reason (and perhaps the expression) of the law applies with equal force to agents as to others.

Your committee are confident that no fault is attributable to the respectable officer who directs this Department: the honor, integrity, and talents of that gentleman are sure pledges that in him the public confidence will not be misplaced. Nor are we sure that the public *have materially* suffered from a practice which we condemn. We lay our animadversions on the *facts proved* before this House, subject to their investigation and correction. We feel the full force of the delicacy and perplexity incident to such an inquiry. While we regret that it has fallen to *our* lot, it will be matter of satisfaction to us that we shall have done our duty; and that among so many public agents so few instances of conduct of dangerous tendency have yet been discovered. The gentlemen whose cases are here reported were notified and heard, and their answers accompany this report. It is but justice to state that their conduct was frank, candid, and honorable, and that they did not appear to be conscious that the acts proved were incompatible with their duty.

We are, however, well satisfied that the practices developed by this inquiry are improper and inadmissible, and that, if a corrective is not to be found in the existing laws, these should be so altered as to effect a prohibition.

We are, nevertheless, aware that, after the most effectual legislative guards, much must depend on a prompt execution of the laws by the principal officers of the Department. They have the appointment of their clerks, and public opinion holds them responsible for the performance of their duties, and that those duties should not be perverted by practices dangerous to the fidelity of the clerks and the interests of the public.

We therefore recommend the following resolutions:

Resolved, That it is expedient to prohibit the clerks in the several Departments from acting as agents for claimants against the United States.

Resolved, That it is expedient to prohibit the officers in the several Departments from engaging in any business of trade.

Resolved, That the several acts relating to the Treasury Department should be amended, and certain penalties should be increased.

Resolved, That a committee be appointed to report a bill or bills to carry into effect the above resolutions.

J. HOLMES, *Chairman.*

A.

Joseph Watson's affidavit.

I, Joseph Watson, of the city of Washington, agent for claimants against the United States, testify and declare that, about January, 1817, Dudley Frink, of Buffalo, in the State of New York, called on me, I having been employed by him as agent to support his claims against the United States. He asked me if, by offering compensation to a Mr. William M. Stuart, a clerk in Mr. Nathaniel Cutting's office, it would not facilitate his business? I told him I thought he would not accept of such an offer. I understood, after this, from Mr. Frink's letter to me, that he had employed Mr. Stuart. After this, Mr. Stuart told me that he was the agent of Frink, and that Frink had advised his friends to send their business to him, which quite encumbered him, and he proposed to me to do the business for him, and let him have a portion of the charges. I stated to him that I would transact the business for my regular charges, and he must make his own arrangement on the subject; he said he would converse with me further on the subject, but he did not. He has frequently stated to me that he has received business as an agent from various quarters, particularly from the south. He never stated what compensation he had for doing this business, but I always understood from him that he received pay for it; nor did I ever know what sum he did receive. Mr. Frink, however, told me that Mr. Stuart's price was five dollars for each Canadian land warrant.

I have taken up a large package in an office, from Dudley Frink, as appeared by the handwriting, addressed to James L. Edwards, clerk in the War Department. I do not know what the package contained, but Stuart told me, when he made the proposition herein alluded to, that the transacting the business would be equally for the benefit of himself and Edwards. I further know that, in Mr. Stuart's absence, packages, addressed by Frink to him, were opened by Edwards, and the business was transacted by him.

I further recollect that Stuart, in the conversation above alluded to, observed that, as Edwards had done business of this nature for him in his absence, he (Edwards) would be equally entitled to the benefit of any business which might be done by me. I further testify that Lewis Edwards, a clerk in the War Department, has transacted agency business in relation to Canadian land claims. I had a number of Canadian claims sent me from Detroit, for a Doctor Crosby. I presented these papers to Lewis Edwards, as his agent. He acknowledged himself as such, and endorsed one of the papers in that capacity.

JOSEPH WATSON.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 4th February, 1818, personally appeared the above-named Joseph Watson, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

B.

Peter G. Washington's affidavit.

I, Peter G. Washington, a clerk in the Treasury Department, testify and say that Aaron T. Crane has frequently presented claims to the Third Auditor's office, in the Treasury Department, in which I am clerk, as an agent for claimants. What compensation he had, or whether any, for doing this business, I do not know. I know an instance in which Mr. Crane, several months ago, presented a claim for the pay of a discharged soldier; there was some defect in the papers, and they were returned to him. They were afterwards sent for, and Mr. Crane made some objections to returning them, stating that if he gave them up he might lose his *compensation* for doing the business; but he did give them up without security for compensation.

I further testify that James L. Edwards presented claims for pay of certain Canadian volunteers at Mr. Hagner's office; he acted as agent, but the claims were not allowed. William M. Stuart presented some of the same description, in the same capacity, and they met with the same fate.

I further testify that William Bayard has presented claims, as an agent, at Mr. Hagner's office, and has frequently received pay for them.

I further testify that Michael Nourse, a clerk in the Treasury Department, has frequently presented claims at Mr. Hagner's office, as an agent for claimants, and received them in that capacity. My father, Lund Washington, a clerk in the Treasury Department, has acted as an agent for claimants; he has collected claims in most of the offices of Government from different parts of the United States, and received compensation for them. His charge is three per cent.

P. GRAYSON WASHINGTON.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 4th February, 1818, personally appeared the above-named P. Grayson Washington, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

C.

John E. Frost's affidavit.

I, John E. Frost, clerk in the War Department, in the section of bounty lands, testify and say that James L. Edwards and William M. Stuart, clerks in said section, have acted as agents in obtaining soldiers' land warrants. I heard them say that they received pay for it; but I do not know what compensation they received.

I have frequently seen Aaron T. Crane in Mr. Cutting's office, in office hours, acting as agent for claimants or *their* agents; he is pretty extensively concerned.

I know that Mr. Lund Washington has frequently transacted agency business at Mr. Cutting's office.

JOHN E. FROST.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 2d February, 1818, personally appeared John E. Frost, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

D.

Richard T. Queen's affidavit.

I, Richard T. Queen, clerk in the paymaster general's office, testify and say that, in the paymaster general's office pay for extra services has been uniformly refused. I know that Aaron T. Crane has acted as agent for claimants, and has been frequently at the office of the paymaster general in that capacity during office hours. He appears to be extensively concerned.

I further testify that Lund Washington, a clerk in the Treasury Department, acts generally as agent for claimants; he is at the paymaster general's office in office hours frequently. I do not know what compensation either of these gentlemen receives.

I further say that I have frequently seen Edward Fox, a clerk in the Secretary of the Treasury's office, at the paymaster general's office, acting as agent relative to the transactions of a court-martial of the Pennsylvania militia. Letters have come to Edward Fox under cover of an address to the paymaster general, and, as I understood, from Pennsylvania, relative to this transaction.

I further testify that I received of a Mr. Tallman, by the hands of a Colonel Watson, $50, but not for any business in the offices, or either of them; this money was due me from a Mr. Carson, and paid me by Tallman.

I further testify that James L. Edwards and William M. Stuart have acted extensively as agents in business relative to the Canadian volunteers; but Mr. Edwards told me he did not receive a cent for doing this business; and I do not know whether Stuart did receive any thing or not.

I further say that Ezekiel Macdaniel, clerk in the Navy Department, acts as agent for George Beale, a purser of the navy. This I understood from him.

RICHARD T. QUEEN.

House of Representatives of the United States, in committee appointed pursuant to a resolution of the 16th of January, 1818: On the 6th day of February, 1818, personally appeared Richard T. Queen, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

William M. Stuart's statement.

SIR: WAR DEPARTMENT, SECTION OF BOUNTY LANDS, *February* 22, 1818.

Agreeably to your request, I have the honor to inform you that I had received, by power of substitution and for agents only, three months' extra pay and land warrants for that class of claimants denominated "Canadian volunteers," and for which I have taken a compensation of not more than one-fourth of what is usually charged by

the regular agents in this place; by which means the claimants have been benefited, as the agents only charge, in addition to their own fees, what they have to pay to their substitutes here; and I am confident that the Government has lost nothing by the transaction.

First. Because I have a regular fixed business in this office, and have frequently been obliged to attend after three o'clock during the recess of Congress, and almost constantly when it is in session, to keep my business up, when I have, more than ten times over, repaid for the few moments that I have spared from my official duties in signing my name for warrants and money; and it is well known that I have never made out such warrants, or passed a single claim.

Secondly. Agents have sent claims to me which may have been just, but I did not think them so, and therefore declined handing them to Mr. Cutting for his inspection; those claims are now in my possession; the discharges on which they were predicated had the word "honorable" erased, but might very easily have been suppressed, and a certificate obtained from the records of the army to show that the claimants were borne on the rolls the length of time required by law; but, in place of acting the *subtle agent*, I retained the documents, because I thought it a duty I owed the War Department, and thereby lost my commission.

Colonel Watson has stated to the committee that I have received claims from the south. I most positively deny the charge, and assert, without fear of contradiction, that I have never transacted any agency business for any other person than Messrs. Frink, Jewett, Hopkins, Strong, and Pettis, of the State of Vermont, except a few patents that I have received for some gentlemen of the first *respectability* from the States of New Hampshire and New York for the soldiers of the late war, and for which I never would accept of more than fifty cents each; and, indeed, I never would have engaged in the business if it had not been represented at this office that Colonel Watson had sent to a correspondent of his in the State of New York the papers of a poor wounded soldier, who made the following charge for the colonel: notification, four dollars; pension certificate, four dollars; and for his services, four dollars more; to which the correspondent added for his own services seven dollars more—amount, nineteen dollars; and I have been credibly informed that he charges for patents four dollars, which are sent to his agents, who, for themselves, charge the same amount, and postage also.

I have the honor to be, sir, very respectfully, your most obedient servant,

WM. M. STUART.

The Hon. JOHN HOLMES, *Chairman of the Committee of Inquiry.*

James L. Edwards's statement.

SIR: WAR DEPARTMENT, *February* 18, 1818.

In conformity with your request, I now do myself the honor of making a statement to you explanatory of the evidence which has been adduced before the committee of investigation, of which you are chairman, relative to certain business which I have transacted as an agent while employed as a clerk in the Department of War.

The testimony alluded to goes to show that I have received compensation as an attorney in procuring land warrants for a certain description of troops called Canadian volunteers. This evidence is strictly true; and had I conceived that there was any impropriety in such an agency, I should have been one of the last to have engaged in it.

The material objections which I understand to exist against the national clerks being employed as agents for individuals who have demands against Government are—

1st. That Government has not sanctioned the employment of agents for such purposes.

2d. That the employment of persons in the public offices as agents would lead to corrupt practices, in authorizing, for example, a clerk to receive a compensation as an attorney in a case where the claim was investigated by him, and where perhaps his judgment might be perverted in consequence of having an interest in the claim.

3d. That the clerks would, in their capacity as agents, consume a part of the time which should be devoted to official duty, and for which the Government pays them.

To the first of these objections I reply that, from the nature of the business in which I have been employed by individuals, an attorney was indispensably necessary if the claimant did not apply in person. A Canadian land warrant is transferable property; and a heavy responsibility is imposed on the person who undertakes to transmit it by mail several hundred miles to the individual to whom the agent is accountable: to be paid, therefore, for such business is, I presume, nothing more than reasonable; it is what no public officer is obliged to do.

To the second, that I have never, in my official capacity, investigated the claims of Canadian volunteers.

To the third, that I have never devoted any time during office hours to the transaction of business as an agent, except a few minutes in signing receipts.

For the evidence to support my assertions, I beg leave to refer you to the accompanying letter of Nathaniel Cutting, Esq., the superintending clerk of the Bounty Land Office.

So far from supposing that the employment of clerks in this office as agents has been detrimental to the public interest, I believe it has been advantageous to the Government, as well as beneficial to the individual who had a just claim. For instance, several claims have been presented by volunteers, who had served upwards of six months, but who did not receive honorable discharges: had these claims fallen into the hands of dishonest men, how easy would it have been for them to have suppressed the discharges, and obtained from the records of the War Department evidence of having belonged to the army for six months, (which is all that the law requires as to service,) and thus have passed the claims. That spurious claims are frequently presented by agents out of the public offices is a well-known fact; and this justifies the belief that, had the business which has been confided to gentlemen in this Department been confided to other hands, the Government would have been more liable to imposition. As to the compensation which I have received, I can only say that it is not more than one-fourth of what other agents have charged for similar services. Here, then, I consider the honest claimant and the Government equally benefited.

In the whole of this business I have done nothing which I conceive incompatible with my principles as a man, or my duty as an officer. A former Secretary of War gave permission to a clerk in his office to transact business similar to that in which I have been engaged. That gentleman is as much distinguished for sound judgment as correct principles. His character and abilities were never questioned. Whatever may be thought of my conduct in this business, I shall always have the consolation of a self-approving conscience.

I have the honor to be, with the most perfect respect, your obedient servant,

JAMES L. EDWARDS.

Hon. JOHN HOLMES, *Chairman of the Committee of Investigation, &c.*

SIR: WAR DEPARTMENT, *February* 7, 1818.

I shall be highly gratified if you will be so obliging as to answer the subjoined queries. You will, no doubt, readily perceive the object I have in view in making this request.

1. Does not every claim for warrants for bounty land granted to "certain Canadian volunteers" pass through your hands for examination?

2. In obtaining warrants of the above description, is not the employment of an agent or attorney necessary if the claimant does not apply in person?

3. During the period of nearly two years that I have been in the War Department, have you ever found me remiss in my duty?

4. Did you ever consider my conduct reprehensible in transacting any extra-official duty?

I am, most respectfully, your obedient servant,

NATHANIEL CUTTING, Esq. JAMES L. EDWARDS.

SIR: WAR DEPARTMENT, SECTION OF BOUNTY LANDS, *February* 7, 1818.

In reply to your queries of this date on the annexed page, I have no hesitation to reply that no warrant has been issued under what is commonly called the "*Canadian volunteer*" act, without my examining the evidence so far as to see that *the local authorities*, as was represented at this office, duly attested the *American citizenship* of the claimant *anterior* to the late war, and *his residence in Canada* at the commencement of it; and, since the *additional* act of March 3, 1817, that he had served six months with some regiment or corps of the United States army, was required to be attested from records in the War Department.

2d. A warrant has never been issued for *military bounty land* under the act above cited without my requiring that some person, *legally authorized*, should sign a *receipt upon the record* before delivery of the warrant. If, then, neither the *claimant* nor his immediate *attorney* appears here for that purpose, *a substitute* of the latter is indispensable.

To the third and fourth questions, I unequivocally reply in the negative.

Amicably, your obedient servant,

M. JAMES L. EDWARDS. NATHANIEL CUTTING.

E.

Joseph Watson's affidavit.

I, Joseph Watson, of the city of Washington, agent for claimants against the United States, testify and say that Edward Fox, clerk in the Treasury Department, transacted agency business, from information, and from seeing him in the office of the Commissioner of Claims inquiring about and attending to claims.

I further testify that Michael Nourse, clerk in the Treasury Department, is notary public and agent for claims. I have seen him in Mr. Hagner's office attending to claims and inquiring about them in office hours, and have seen documents in that office filed with his name as agent. I understand that he is also notary public to the Bank of the United States, and transacts business in that capacity. I have understood that he has done business as agent in transferring stocks of the United States.

I further testify that Lund Washington, a clerk in the office of the Comptroller of the Treasury, has acted as agent for claimants against the United States, particularly for claims under the *property act*. I have seen him in the office of the Commissioner of Claims, frequently transacting business of this description, and I have understood it from his own conversation, and he expressly told me that he charged a commission for transacting this business.

JOSEPH WATSON.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 4th February, 1818, personally appeared Joseph Watson, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

F.

Thomas Dungan's affidavit.

I, Thomas Dungan, clerk in the Treasury Department, testify and say that Edward Fox has, I understand, acted as agent for claimants against the United States under the *property act*, so called. His name appears as such on the books, but I do not know that he has received any pay for it.

I further testify that Michael Nourse very often hands certificates of United States stock to me to be transferred, and appears to have some agency in this business, but I do not know how far he is concerned, and the transacting this business takes but little time. I do not know that he receives any pay for it.

THOMAS DUNGAN.

House of Representatives of the United States, in committee appointed pursuant to a resolution of the 16th January, 1818: On the 7th of February, 1818, personally appeared Thomas Dungan, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

Edward Fox's statement.

SIR: WASHINGTON, *February* 20, 1818.

In compliance with the wish expressed by the honorable committee over which you preside, that I should make a written and concise reply to the depositions of Messrs. Watson, Dungan, and Queen, and that I would also offer such explanations touching the same as they might seem to require, I have the honor to state that those depositions are substantially correct, and that I have, at various times, transacted business at this place, for which I have in most cases made a regular charge, but have never in any instance received a compensation, other than that allowed by law, for performing those services which were required of me in my official capacity.

I presume, sir, I need offer to the committee no other explanation on this subject than simply to state that, as no doubt of its propriety had ever occurred to me, I have not hesitated to attend openly to any business intrusted to my care which did not interfere or was not inconsistent with my official duties.

I have the honor to be, with the highest respect, sir, your most obedient servant,

EDWARD FOX, JUN.

The Hon. JOHN HOLMES, *Chairman of a Committee of Congress.*

G.

Thomas B. Dashiell's affidavit.

I, Thomas B. Dashiell, clerk in the Treasury Department, testify and say that Michael Nourse, a clerk in the office of the *Register*, has frequently received money from the treasury as agent or attorney for claimants. I do not know whether he received any reward for this service. Mr. Nourse is notary public for the Branch Bank of the United States. He sometimes brings the papers to the Treasury himself, and sometimes he sends them.

I further testify that Lund Washington, a clerk in the *Auditor's* office, transacts business as agent for claimants. He has drawn very often from the treasury for claimants for property lost during the war.

I further testify that Aaron T. Crane is pretty extensively concerned as agent for claimants. He told me he had made a great deal of money by it. He has very frequently drawn money from the treasury in that capacity.

THOMAS B. DASHIELL.

House of Representatives of the United States, in committee appointed under a resolution of the 16th January, 1818: On the 5th day of February, 1818, personally appeared Thomas B. Dashiell, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

Michael Nourse's statement.

SIR: WASHINGTON, *February* 17, 1818.

I beg leave to submit the following facts and explanation in relation to the business which has been transacted by me, and which has claimed the attention of your honorable committee:

1st. With respect to the settlement of public accounts.

The documents upon which these have been obtained have all (three or four instances excepted) been sent to me by one gentleman, lately an officer in the army. His letters are opened and read at home, the papers examined, and, after being assorted, are generally sent under cover to the proper officer. When adjusted, I call and receipt for the payments. All letters in relation to claims and remittances are written and copied at home. The commission charged has in no instance exceeded one per cent. The claims received by me during the last year were about fifty.

2d. With respect to the transmission of stock warrants.

The certificates to which these warrants are attached are forwarded by mail directly to my address, either by the proprietor or his agent. When the warrants, which are filled up and attached to the certificates in the office of the Secretary of the Treasury, are completed, they are transmitted agreeably to advice received. Letters of advice receive my attention at home, where my answers are prepared, and a record of each transaction made. This agency has always been considered at the Treasury entirely of a private character, and altogether distinct from any thing like buying and selling of stock, inasmuch as the agent has no more control over the property than if it were a bill of exchange payable to a merchant in Charleston, and deposited in his hands for transmission.

3d. In relation to my duties as notary, I beg leave to refer to Mr. Smith's letter.

The committee will, I trust, excuse me in troubling them with one or two general but short remarks.

After being in the public employment for upwards of twenty years, during which period, with all my economy, I had barely subsisted, I found myself surrounded with a large family; to feed and clothe them, my salary in *this place* was *but* sufficient; to educate them, it would not enable me; to accomplish this most desirable object, other means were necessary; the commission business presented itself as one most likely to be useful, while, at the same time, it would interfere but little with my official duties. In attending to claims on Government, perhaps on each half an hour of public time has been employed; my commission has, however, been moderate, and the charges made only in consideration of my attention at other hours. Permit me, however, to remark that, having been blessed with good health, I have not, to the best of my recollection, been absent from my desk one whole day during the last three years. The commission business, however, did not answer my expectations; I therefore declined further proposals, and applied for the situation I now hold in connexion with the branch bank, which interferes still less with my public duties, and for which I am thankful, not only as it aids me in improving the minds of my children, but as it affords the means of contributing to the support and comfort of others who have peculiar claims on my benevolence.

I am, with the greatest respect, sir, your most obedient servant,

MICHAEL NOURSE.

The Hon. JOHN HOLMES, *Chairman of the Committee, &c.*

DEAR SIR: OFFICE OF DISCOUNT AND DEPOSITE, WASHINGTON, *February* 16, 1818.

In answer to your inquiry, I have to state that the principal part of the notes protested in this office have been put into your hands at or near three o'clock on each day. Some few that we wished to send away by a particular mail have been delivered to you at earlier hours, with a request that they might be proceeded with and returned to us before the closing of the bank.

I am, dear sir, yours, very respectfully,

RD. SMITH, *Cashier.*

MICHAEL NOURSE, Esq.

H.

Edward Stephens's affidavit.

I, Edward Stephens, clerk in the War Department, in the section of bounty lands, testify and say that Aaron T. Crane, a clerk in the General Post Office, has acted as an agent in obtaining the warrants for soldiers of the regular army. I have made out a great many for him. He has been very often there, attending, in office hours, to obtain these warrants, and to transact the business relating to his agency. He is very extensively concerned.

I further testify that warrants, to the best of my recollection, have been made out for Michael Nourse, a clerk in the Treasury Department, as an agent or attorney for the soldiers.

I further testify that Lund Washington, a clerk in the office of the Comptroller of the Treasury, has acted as agent in obtaining several land warrants—perhaps a hundred at various times. I do not know what compensation he received for this, or whether any.

EDWARD STEPHENS.

House of Representatives of the United States, in committee appointed pursuant to a resolution of the 16th January, 1818: On the 2d February, 1818, personally appeared Edward Stephens, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

Lund Washington's letter.

SIR: CITY OF WASHINGTON, *February* 20, 1818.

Conformably to your request, I proceed to state, for the information of Congress, that I have acted as an agent for claims upon Government from the month of October, 1816, to this time.

The claims have been for the pay of soldiers, and pensions of widows, and lost property, say horses, arms, and accoutrements, and for obtaining land warrants and patents upon soldiers' discharges.

The collections have, in the whole, amounted to seventeen thousand dollars, the land warrants to about sixty, and the patents to about thirty. For my services I have charged three per cent. on moneys collected, on land warrants two dollars each, and on patents one dollar each.

The claims have been forwarded to me by Mr. T. G. Bradford and Mr. Washington Perkins, Nashville; Mr. T. F. Bradford, Shelbyville; and Messrs. Jones & Moore, Murfreesborough, all in Tennessee; and by Mr. George Kesling, Lebanon, Ohio, and from no other persons.

The giving receipts, obtaining money from bank, &c., have been necessarily done in hours of office business. Mr. Brent and Mr. Lee, in whose offices nearly all the business has been done, know that this has not taken much time as respects myself; and this may be established by the gentlemen who are my companions in business. I with great confidence assert that, as a clerk in the Treasury Department, I have done a great deal of business, and done it well; and I really believe I have actually performed as much or more labor, in my official capacity, since I have been an agent, than I ever did before.

I did not, nor do I now, entertain any doubt about the correctness of my own conduct in this matter. I have, however, under date of the 22d January, notified the gentlemen named above that I have withdrawn from the business. I have done this, lest the continuance of the agency should be considered among the causes *why* the great body of persons attached to the public offices as clerks do not receive from the Government, for their services, such compensations as will enable them decently to maintain themselves and families.

I am, very respectfully, sir, your most obedient servant,

LUND WASHINGTON.

J. HOLMES, Esq.

I.

James Hewitt's affidavit.

I, James Hewitt, clerk in the General Post Office, testify and say that the final settlement and registering the accounts of the postmasters of the United States is assigned to myself and Aaron T. Crane, and that this service is as much as two persons can well perform in office hours. Mr. Crane has frequently attended to business as an agent, and has, as he states, received pay for it. Mr. Crane is a very expeditious clerk, and does his equal proportion of this duty. I have done considerable of other business in the office; but I do not know that Mr. Crane has done any except that *assigned*. He is frequently absent from the office in office hours.

JAMES HEWITT.

House of Representatives of the United States, in committee appointed pursuant to a resolution of said House, 16th January, 1818: On the 12th of February, 1818, personally appeared James Hewitt, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

K.

Joseph Watson's affidavit.

I, Joseph Watson, of the city of Washington, agent for claimants against the United States, testify and say that Aaron T. Crane and William Bayard, clerks in the General Post Office, have transacted agency business. Crane is a general agent; has so advertised in the papers. I have seen him transact business at the Land Office, and attending during office hours, for the purpose of purchasing lands from the soldiers; and he has told me that he was agent for claims generally. He stated that during the last year he made fifteen hundred dollars in this business. I have also seen him transacting business at other offices, particularly at Mr. Hagner's and Mr. Cutting's offices: this was also in office hours. Mr. Bayard's agency was, I think, confined to transacting business from the State of Ohio. I know that he received pay for this business, for he told me so. I have repeatedly seen him in office hours attending the offices in his capacity as agent, particularly at the paymaster general's office. Mr. Crane had powers of attorney to receive several patents, and a few days after he received them, as I understood, he went to New York to distribute them, and last summer he was absent in Virginia for two or three weeks.

JOSEPH WATSON.

House of Representatives of the United States, in committee appointed under a resolution of the 16th of January, 1818: On the 4th of February, A. D. 1818, personally appeared Joseph Watson, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

L.

Ezekiel Macdaniel's affidavit.

I, Ezekiel Macdaniel, clerk in the Fourth Auditor's office, in the Treasury Department, testify and say that George Beale, jun. was purser in the navy, attached to the squadron on Lake Champlain, and about three hundred

and ten thousand dollars was placed in his hands, as agent for the captors of the British squadron. Mr. Beale is now in Europe. When he went away, about two years ago, he requested me to attend to the business; I consented; and he left about six thousand dollars in my hands to pay to the captors. At this time he directed me to call on his father, George Beale, of this city, for further funds. I have drawn from him about four thousand dollars more. This money has been paid over to the captors, except about twelve or fifteen hundred dollars, which I received about a month ago. I have frequently called for money, but could not obtain it. Mr. George Beale, jun. paid off a considerable part of the prize money himself before he went to Europe.

Question by the chairman. On what terms do you transact this business for George Beale, jun.?

Answer. I do not know what compensation I shall receive.

Question by the chairman. Was there no agreement between you and George Beale, jun. relative to your agency in this business; and, if any, what?

Answer. There was no agreement.

Question. Do you expect to receive any compensation?

Answer. It is a question which I am not prepared to answer.

EZ. MACDANIEL.

House of Representatives of the United States, in committee appointed under a resolution of the 16th of January, 1818: On this 11th of February, A. D. 1818, personally appeared Ezekiel Macdaniel, above named, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

M.

Edward Stephens's affidavit.

I, Edward Stephens, clerk in the War Department, in the section of bounty lands, testify and say that James L. Edwards and William M. Stuart, clerks in the section of bounty lands, acted as agents and attorneys in obtaining the Canadian land warrants; they appear so on the books in the office. I never knew on what terms they did the business; the principal part of the business, I think, was done for Dudley Frink, who lives somewhere to the northward—if I mistake not, in Burlington, Vermont. The papers were examined by these gentlemen principally after office hours; and, after they were so examined, passed through the hands of Mr. Cutting for further examination. I have no knowledge of their being agents for any other claims.

EDW. STEPHENS.

House of Representatives of the United States, in committee appointed under a resolution of the 16th of January, 1818: On the 2d day of February, A. D. 1818, personally appeared the above-named Edward Stephens, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

N.

William Paine's affidavit.

In December, 1816, I presented the claims of John Smith, of the 1st rifle regiment, and James Whitehead, of the 24th infantry, for clothing due to them, with powers of attorney legally executed. Mr. Hagner, the accounting officer, refused to admit the claim, and informed me there was no law existing to authorize the payment.

In March, 1817, I presented the claim of James Hanna, late a soldier, with power of attorney and papers. The claim was rejected under an alleged imperfection in the papers. Mr. Lund Washington, clerk, informed me that he received, (six or eight months subsequently,) on the same papers, the amount due to Hanna.

In May, 1817, I presented the claim of John May, administrator of Richard May, late a soldier, with power of attorney. This claim remained in the office for several months unsettled. P. G. Washington, a clerk in the same office, became authorized; and (as Mr. L. Washington, the father, informed me) the claim was settled and paid.

James Mathews, of the 5th infantry, and I. W. Winklehearke, of the same regiment, left their discharges with the district paymasters, who certified this fact, and (as it is said) forwarded the original discharges, with other vouchers, to the War Department. With a view that the land warrant might issue to the soldiers, I presented the certificates above mentioned to the Third Auditor, in order to obtain the discharges. He observed that his clerks could not be employed in searching for such papers. I then filed them in the office of Mr. Cutting, with an expectation that *he* might obtain the discharges. After six or eight months, I was again written to by the gentleman who sent me the papers; and, finding that nothing had been done, I again applied to the Auditor, who observed that he would not deliver the discharges unless I produced an order from the soldier.

Mr. Stuart, (a clerk in Mr. Cutting's office,) some time last summer, said he had received within a short time (a few days) twenty dollars, as commissions, &c.

Lund Washington has frequently told me that he was engaged as an agent, &c.; that he received commissions for his services; that he had obtained a number of patents, &c. I have myself delivered him a number of papers to establish claims, &c., which he said he was authorized to receive.

I have heard Aaron T. Crane say that he was extensively engaged as agent for claimants. He said his emoluments were considerable, and offered me a partnership in this business.

WM. PAINE.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 5th February, 1818, personally appeared the above-named William Paine, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

O.

William Blagrove's affidavit.

I, William Blagrove, clerk in the Navy Department, testify and say that Benjamin Homans, clerk in the Navy Department, has loaned out of the *Epervier fund* (so called) about ten thousand dollars. This I know by his loaning to me about four hundred dollars; and he stated that he had loaned to a friend from eight to ten thousand dollars, and smaller sums to others.

I know that a horse, purchased for the Department, was kept at Mr. Homans's stable, and not used by the Department for more than a year; the forage was purchased at the public expense, and the horse was used in Mr. Homans's family.

I further testify that Ezekiel Macdaniel, a clerk in the *Fourth Auditor's* office, is agent for George Beale, jun., a purser of the navy, and prize agent for the Champlain squadron. Three hundred and sixty thousand dollars, appropriated by Congress to pay for the captured fleet, was placed in the hands of Beale. He is now absent, in Europe, and his father transacts his business here. Macdaniel transacts the business for prize claimants to obtain their pay out of this fund.

WM. BLAGROVE.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 7th February, 1818, personally appeared William Blagrove, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

William Blagrove's affidavit.

Benjamin Homans, at	$2,000,	-	nett quarter	$500,	$300	additional,	-	$800
John Boyle,	1,200,	-	do.	300,	180	do.	-	480
William Blagrove,	1,300,	-	do.	325,		-	-	325
Noah Fletcher,	1,200,	-	do.	300,		-	-	300
Henry Rich,	800,	-	do.	200,		-	-	200
Thomas Fillebrown, 79 days, at $2,		-		-		-	-	158

Leaving a balance still of $29 in his hands.

The above is the apportionment first made by Mr. Homans of the surplus fund, at the end of the year 1817; afterwards it was modified, in consequence of our resistance.

WM. BLAGROVE.

Sworn to 26th March, 1818.

P.

Joseph Watson's affidavit.

I, Joseph Watson, now residing at the city of Washington, being interrogated and duly sworn, do depose and say that I have understood that the British armed vessels captured on Lake Champlain were appraised agreeably to the act of Congress approved on the 3d April, 1815, at the sum of $310,000, and that $290,000 of that sum was, in the month of June following, placed in the hands of George Beale, jun. as prize agent, with an authority to deduct from his payments three per cent.; of which last sum $40,000 was in District money, and the remainder in treasury notes. That said prize agent, after making payments in Boston, New York, in the city of Washington, and elsewhere, was ordered on board of one of the United States vessels bound to Europe, in his capacity as purser in the navy; since which time, Ezekiel Macdaniel, a clerk in the office of the Fourth Auditor, has disbursed moneys to persons holding prize claims. That, on or about the 13th April, 1817, I received a claim of one Abijah Dudley, for prize money, amounting to $116 40; and on or about the 16th June following, the claim of Robert Hamilton, also for prize money, amounting, as I was informed by Mr. Macdaniel, when presented on the 17th June, to about $640; at which last time, or a few days after, he (Macdaniel) did endorse on the claim "exd. good," and apprized me, as he had before, in reference to Dudley's claim, that payment could not be made for want of funds; for, although he had undertaken to examine the claims and disburse the money, yet the prize agent had deposited the funds in the hands of his father, George Beale, of this city, who expected shortly to receive some bank dividends. In the course of the many conversations which I subsequently had with Mr. Macdaniel, he stated that George Beale, jun. had employed the funds in speculations which had not proved fortunate, and particularized the nature of the speculations; after this I saw Mr. Beale, and having urged him much on the subject, stating to him that Hamilton had been waiting in New York, and would wait there to receive his prize money, he agreed, as I understood him, to raise the money by discounting a note at sixty days, and to pay it the day following. But, on calling at the time appointed, Mr. Macdaniel tendered me a blank note, dated, I think, on the 5th September, which he informed me he had been requested by Mr. Beale to fill out in any name. This note I declined receiving, expressing my surprise at this mode of disbursing moneys, and stating that I was not authorized to make the claim an individual one. I have not yet received payment on the claims above alluded to, and have reason to believe, from letters received, that Hamilton is yet in New York patiently expecting his money. It is my impression that there are many prize claims remaining to be paid by Beale. When treasury notes commanded a high premium abroad, and District money was at a discount, I frequently was compelled to accept the greater portion of the claims intrusted to me in District money. I annex the original of one of the certificates which I, on those occasions, exacted from Mr. Macdaniel. I cannot state what compensation Mr. Macdaniel receives from Mr. Beale for his services, and whether he has any thing to do with the adjustment of the accounts of the prize agent in his capacity as clerk, but do know that the payments he has made to me have been so made during office hours.

JOSEPH WATSON.

House of Representatives of the United States, in committee appointed pursuant to a resolution of the 16th January, 1818: On the 11th February, 1818, personally appeared the above-named Joseph Watson, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

Isaiah Hacket and Perly Foster's claims for prize money have been paid by me to Col. Watson, in District money.

EZEKIEL MACDANIEL.

JANUARY 15, 1817.

A. T. Crane's statement.

DEAR SIR: WASHINGTON CITY, *February* 17, 1818.

Agreeably to the suggestions of the honorable committee, I have made a statement relative to my official duties as a clerk, and also stated the manner in which, and my reasons for, undertaking the agency in which I have been employed.

The friendly manner in which you received and answered my first communication emboldens me to trouble you with a plain statement of my ideas upon the business I have been engaged in for the last two years, and I trust

that the openness with which I treat the subject will be excused, as the only object is to exhibit in as fair a light as possible every thing that has transpired.

That part of the evidence received by the honorable committee tending to show that I was "frequently absent from my office" may be explained by stating that twice or thrice, and sometimes oftener, I have had occasion, in the course of a week, to appear at some of the Departments or offices for the purpose of looking after the business confided to me by individuals. Upon the whole, it might possibly average twice a week the year round, and the time I was absent might be computed at from a half to three-quarters of an hour upon each occasion. This, in the winter season, is generally taken between the hours of 2 and 3 o'clock, just before the hour for closing the office. Well knowing the value of this time, a little extra industry and close application to my books have afforded me the opportunity by the gain I could make in my office business. In the summer season the clerks in the General Post Office attend to business one hour earlier than in most of the other Departments, and for that reason are not rigidly confined to the hour of 3 o'clock P. M.

That the transacting business of individuals with the Government in the capacity of agent is honorable and respectable, I must ever believe, for it has been done from time immemorial, and very few in any capacity who appear here have not more or less to do for their friends and others. That the attending to this business when it can be done without interfering with my office duties is correct, I am fully satisfied; and that the receiving compensation for what I have done, distinct from the office and duties required of me by the United States, is what I owed to myself, and for which I think no blame can be imputed.

It was said in my hearing by an honorable member of the House of Representatives that agencies were in no instance necessary. I do not know that they really are; but I know that the gentleman who made the observation had frequently presented claims to the different offices, and attended to their final settlement; he did not receive a per centage for his services, but *the act* as to necessity of agency I consider as pretty good evidence.

In the course of my hearing on Monday last, one of the honorable committee observed that a statement had been made that I was a long time absent visiting the States of Virginia and New York during the last year. That I have been absent and visited as is stated, I readily admit; and can only defend it by stating that the time thus spent could not be esteemed unreasonable in the course of two years, as it did not exceed *seven weeks*, two-thirds of which was expended in pursuit of health, and the remainder on a visit to my relations and friends. And as for furloughs or leave of absence, I would say that no class of society but the criminal is excluded from a partial share of freedom. I never knew or heard of any in the employ of Government or otherwise but expected an occasional liberty to follow inclination. The officer and the *private soldier* expect and *receive* their *furlough;* and from the *highest* to the least, through all the grades in the Departments and offices, I believe every man calculates upon an occasional recess. In my case, however, I feel a consciousness of meriting no censure for the little share of liberty that was enjoyed by me, as my official duty was exacted of me, and the time I was absent made good by extra labor after my return.

If any thing remains upon which yourself or the honorable committee are not perfectly satisfied, I shall be happy to again appear and make any explanation in my power; and if the certificate herein enclosed is not such as is required, an intimation thereof will be thankfully received and attended to. For the trouble I have imposed and the friendship you have shown, be assured of my grateful remembrance.

Very respectfully, I have the honor to be your obedient servant,

Hon. JOHN HOLMES. AARON T. CRANE.

GENERAL POST OFFICE, *February* 16, 1818.

I, Aaron T. Crane, clerk in the General Post Office, do, upon honor, certify that during the late war I was a captain in the United States army, and consequently became acquainted with many who had accounts with the United States; that after my removal to, and permanent location at, the seat of Government, I frequently received applications from those who had been my companions in arms, requesting my assistance in the settlement of their claims: these requests were at first attended to on the score of friendship, and not unfrequently have my services been repaid, by those for whom I labored gratuitously, by their allowing me to pay the postage on their letters.

The many calls I received for this kind of service, and offers made of remuneration, induced me to make a business of it, which I the more readily undertook as the compensation ($1,000 per annum) which I received from the United States I found was not adequate to my *support* in the *city of Washington*. This agency then became an object to me, and was industriously pursued, but, at the same time, my duties as a clerk were as punctually performed as if no agency had existed.

I would here state that *my official duties* are a *specific task which necessarily must be performed within a given time*. The part assigned to me is considered fully sufficient to occupy the time of an individual during the hours of office; and if I gain upon my duty, it is by extra industry, or the performance of it after and without the established office hours. For the proof that my business is done, and well done, I appeal to the head of the Department, and to the books which it has been my duty to keep.

AARON T. CRANE.

R.

Joseph Mechlin's affidavit.

I, Joseph Mechlin, clerk in the Fourth Auditor's office, in the Treasury Department, testify and say that Benjamin Homans, clerk in the Navy Department, stands charged on the books in the Fourth Auditor's office with about twelve thousand dollars—money appropriated, as I understood, to pay off the widows and orphans of the persons lost in the *Epervier*.

J. MECHLIN.

House of Representatives of the United States, in committee appointed pursuant to a resolution of 16th January, 1818: On the 11th February, 1818, personally appeared the above-named Joseph Mechlin, and made oath to the truth of the above affidavit by him subscribed.

JOHN HOLMES, *Chairman.*

S.

Satterlee Clark's affidavit.

I, Satterlee Clark, testify and say that Isaac Clark, late a colonel in the army of the United States, is my father. Some time in the month of January or February last, certain claims which had been previously presented to the

office of Richard B. Lee, commissioner of claims for property lost by the war, were shown to me by Peter Hagner, Esq., Third Auditor. Those claims purported to have been certified by my father, whose name was upon each, of which, I think, there were about twenty, and Daniel Parker, adjutant and inspector general, had certified that the signatures, purporting to be those of my father, were genuine. Upon examination, I discovered that they were forgeries.

SATTERLEE CLARK.

House of Representatives of the United States, in committee, 25th March, 1818: The above Satterlee Clark made oath to the truth of the above affidavit by him subscribed before me.

JOHN HOLMES, *Chairman.*

T.

Benjamin Homans's affidavit.

I, Benjamin Homans, chief clerk in the Navy Department, testify and say that, in the month of April, 1817, the Secretary of the Navy appointed me prize agent under the act of Congress passed 3d March of same year, to distribute the amount of six months' extra pay to the widows and heirs of the officers, seamen, and others, lost in the United States brig Epervier; and that I received the sum of $12,654, estimated by the pay-roll for that purpose, and for which I gave bond and security in due form; and that I have paid out of the said fund every just claim that has ever been presented at the office, promptly and without delay.

I further testify and say that, at the earnest and repeated solicitations of William Blagrove, a clerk in the said office, I did loan to him, out of my own private funds, about $450, for which I hold his note; but that I have not loaned the public money to any person. I further testify and say that, to avoid the further importunities of the said Blagrove, I may have said to him that I have lent *thousands* to some individuals, or that I had loaned all the money I could spare; and as I hold myself responsible, and ready at any time to settle up the account of my disbursement of the money aforesaid, the *proof* of loaning money is to Mr. Blagrove alone; by continued payments, the sum is now reduced to about one-half, and claims are daily coming in, not *one* of which has ever been refused, when properly authenticated.

I further testify and say that the horse belonging to the Navy Department having been abused and neglected by the messenger, and the hay and provender wasted, I took the horse to my own stable for better keeping; that I have no other horse, and the bills rendered for horse feed are duly examined and passed at the Treasury, and that they are within the strictest limits of economy.

BENJAMIN HOMANS.

WASHINGTON COUNTY, *ss:*

On this 25th day of March, 1818, before me, a justice of the peace for said county, personally appeared Benjamin Homans, Esq., and made oath in due form that the facts stated in the foregoing deposition by him subscribed are true to the best of his knowledge.

DANIEL RAPINE.

U.

W. Blagrove's document.—Extract.

SIR: NAVY DEPARTMENT, *February* 6, 1818.

In reply to your letter of the 28th ultimo, as chairman of a committee appointed by the honorable House of Representatives to inquire what alterations are necessary to be made in the act entitled "An act to regulate and fix the compensation of clerks," &c., I have the honor to communicate, for the information of the committee, that five clerks were constantly employed in this Department during the year 1817, and the amount of compensation paid to them was as follows, viz:

To the chief clerk, - - - - - - - -	$2,204
To the second clerk, - - - - - - - -	1,350
To the third clerk, - - - - - - - -	1,355
To the fourth clerk, - - - - - - - -	1,250
To the fifth clerk, - - - - - - - -	850
To two temporary clerks who were employed in the year 1817, one for 34 days, and the other for 79 days, at $2 per day, - - - - - -	226
	$7,235

Making an aggregate sum of seven thousand two hundred and thirty-five dollars, being the amount appropriated by Congress on the 3d of March, 1817, for compensation to the clerks employed in the office of the Secretary of the Navy.

So far as relates to that part of your letter which has reference to the respective employments of the clerks, I have the honor to state that the *chief clerk* has the arrangement and disposition of all the books, papers, and documents of the Department of which he has the charge and responsibility, and takes care to preserve them in perfect condition and regular order, so that reference may be had to any subject with promptness and perspicuity. He has the exclusive charge of all the furniture and effects, of the seal and keys of the office, to which no person is to have access out of office hours unless himself or such person belonging to the office as he shall permit. He has the general direction and distribution of the duty to be performed by the several clerks, and he apportions such duty according to circumstances and to the vacant time each may have from his special duty. He receives from the Secretary all letters, papers, and documents, with his notes and instructions for the correspondence or orders to be taken thereon, and distributes the same to the clerks according to the duties assigned to them. He attends personally to the general correspondence, and prepares all reports, estimates, and statements, except such as may be particularly assigned to some other clerk, and superintends the execution of the general duties of the Department, and sees that each clerk performs the duty required of him; and all letters, orders, and papers of every description, prepared by any of the clerks, pass through his hands for examination, before being offered to the Secretary for signature; he alone being held responsible for their correctness.

The *second clerk* aids the chief clerk in the general correspondence and in preparing instructions to commanding officers, reports and statements to Congress, chairmen of committees, &c. He has charge of the miscellaneous books, and keeps regular entries of the names, rate, and class; dimensions of hull, masts, and spars, and of the tonnage; actual force in guns, officers, and men; commanders' names, and special employment of all the ships and vessels in the navy, noticing, particularly, all the variations that take place in any of the public vessels. He likewise

keeps a record of all stores belonging to the navy, comprehending ordnance, small arms, ammunition, and implements of war of every description, nitre, sulphur, gunpowder, and naval stores of all kinds, so as to know the particular quantity at each place or station, and the aggregate balance at the end of each month. The second clerk also files the recommendations and applications of candidates for appointment in the navy, and keeps fair registers of the candidates' names, their place of residence, age when mentioned, dates of applications, persons recommending them, and such short but comprehensive notes of particular qualifications or merits and demerits as are represented in the letters addressed to the Department. He also keeps a record of the correspondence with the board of naval commissioners, and assists in such other general duties as his special employment may admit, or the pressure of particular business require.

The *third clerk* is charged with the correspondence between this Department and the officers of the navy, embracing orders, furloughs, &c. He endorses on all letters from officers to the Department the substance thereof, and files them in alphabetical order. He keeps a correct register of all the officers of the navy according to their several stations, and showing their place of residence, the age of midshipmen, number and date of commission or warrant, and the ship or station to which each officer is attached. He also keeps an alphabetical record of all the lieutenants, surgeons, surgeon's mates, pursers, sailingmasters, midshipmen, gunners, boatswains, and carpenters, in which he enters, from time to time, the vessel or station to which they are respectively attached, the nature of the service, notes of their general character and conduct, and of meritorious or reprehensible acts, with a short reference to the circumstance, letter, or document indicating such acts; and the register and the records are at all times in such order that the actual situation, rank, and character of any such officer may in a moment be ascertained. He prepares all the exhibits required by the President and by Congress in respect to officers of the navy, and all nominations to the Senate, the confirmations of which he records in a book appropriated for that purpose. He fills all commissions and warrants for officers, and affixes to the same the seal of the Department after the commissions and warrants have received the signatures of the President of the United States and of the Secretary of the Navy. He also attends to any other duties of the office as circumstances require, and which do not interfere with those specially assigned to him.

[After this are detailed the duties of the fourth and fifth clerks, *and a reference is made to the report recently made by the heads of Departments to Congress on the subject of the salaries of the clerks.*]

Honorable SAMUEL D. INGHAM,
Chairman of a Committee, &c., House of Representatives.

V.

Benjamin Homans's document.

The United States, to Benjamin W. Crowninshield. DR.

1818.

Jan. 1. For his salary as Secretary of the Navy, and the salaries of the clerks and messenger employed in his office, for the quarter ending with the 31st of December, 1817:

Benjamin W. Crowninshield, Secretary of the Navy, salary at $4,500 per annum,	$1,125 00
Benjamin Homans, chief clerk, salary $2,000 per annum, additional $204,	704 00
William Blagrove, clerk, salary $1,300 per annum, additional $55,	380 00
John Boyle, clerk, salary $1,200 per annum, additional $150,	450 00
Noah Fletcher, clerk, salary $1,200 per annum, additional $50,	350 00
Henry Rich, clerk, salary $800 per annum, additional $50,	250 00
Thomas Fillebrown, temporary clerk, from 13th October to 31st December, inclusive, 79 days at $2 per day,	158 00
William Righter, messenger, at $410 per annum,	102 50
	$3,519 50

Pay to Benjamin Homans.

B. W. CROWNINSHIELD.

True copy of the record:

JOHN BOYLE.

I, Benjamin Homans, chief clerk in the Navy Department, do testify and say that there is an annual surplus appropriation for paying extra clerk hire, the balance of which has been divided at the end of the year among the clerks in addition to their salaries, at the discretion of the Secretary of the Navy; and the mode adopted by William Jones, Esq., late Secretary, the first year he came into office, was by *pro rata*, according to the several salaries, and has been practised ever since; that every year there has been more or less extra clerk hire paid, which has varied the proportions; that the highest I ever received as chief clerk was about $204, in two different years, and in one year $178. I further testify and say that the neglect of some of the clerks during the year 1817 induced the Secretary of the Navy to deduct the extra clerk hire paid from their proportions, leaving mine and Mr. John Boyle's the same as the preceding year. As the extra services had been required in consequence of their neglect, it was not considered equitable to charge the same to those who had punctually performed their duty.

BENJAMIN HOMANS.

Sworn and subscribed to before me, this 27th March, 1818, in the city of Washington, District of Columbia.

ROBERT BRENT.

W.

Benjamin Homans's letter.

SIR:

I have the honor to state to the honorable committee of which you are chairman, that, in giving my counter-deposition to that of William Blagrove, I have endeavored to avoid prolixity, and to meet the facts he alludes to with as little digression as possible.

I am not disposed to animadvert upon the malignity which dictated the accusations, or to recriminate any charge but that of *ingratitude*, which appears upon the face of his own statement.

A man in the desperate circumstances of Blagrove may do many unjustifiable acts, and discover a lamentable turpitude of character; but in this case it ought to be remembered that I obtained for him the place he now holds

at $1,300 a year, and that I have been his best and only friend, until his own misconduct exposed him to general reprehension and contempt, and necessarily compelled me to withdraw my confidence from him; that he is under a load of obligations to me, and ought to have been the last man in the world to attempt to injure me.

It will appear obvious that, had I cause of apprehension for any act of my own in dereliction of duty, I should have conciliated every one, with a view to secure their good-will and to skreen myself. I have no hesitation in declaring, what I can prove, that my attention to public business, devotion of my whole time, to the neglect of my private concerns, and my endeavors to make others perform their duties in the Department, have been the causes of my having enemies of this description; and while I have sacrificed my health and domestic comforts to the public good, those who complain of me have never earned the salaries they have received from the Government.

I can appeal to the most respectable testimony, if necessary, to prove my zeal and faithful exertions for the last five years, and that I have a fair claim upon public confidence, and for additional remuneration from the Government.

I tender to you and the committee my perfect respect.

BENJAMIN HOMANS.

Hon. JOHN HOLMES, *Chairman of a Committee of Congress, &c.*

X.

B. W. Crowninshield's letter.

SIR: NAVY DEPARTMENT, *February* 16, 1818.

In reply to your letter of the 9th instant, in relation to the claims of Abijah Dudley and Robert Hamilton for prize money on account of the victory achieved over the British on Lake Champlain, in September, 1814, I have to inform you that George Beale, jun., the prize agent, is ordered to return to the United States; and, on his arrival, proper measures will be taken to cause immediate payment to all having just claims against him for prize money.

I am, very respectfully, sir, your obedient servant,

B. W. CROWNINSHIELD.

JOSEPH WATSON, Esq.—*Present.*

Mr. Blagrove's document.

SIR: WASHINGTON, *March* 26, 1818.

I beg leave to trouble the honorable committee of which you are chairman with a recital of the grievances which have caused my complaints against the conduct of Mr. Homans, and I flatter myself the honorable committee will agree that I am entitled to file this statement with the depositions they have taken upon subjects entirely unconnected with my complaints—subjects, too, *not originally introduced by me to their consideration:* I mean the Epervier fund and the messenger's horse. I have felt, Mr. Chairman, most unhappily situated, in regard to obtaining a correction of abuses, in consequence of the proper channel of complaint being closed against me, and a consciousness of being at the mercy of arbitrary power, possessing within itself the means of oppression or *destruction*, and of self-vindication. Hence I have been brought to this alternative—passive submission and non-resistance, or such an exposure of facts to a committee of Congress as might lead to an effectual corrective. In adopting the latter, I am sensible of having hazarded the imputation of malice and revenge; perhaps my narrative may convince the honorable the committee that I am actuated by neither of these motives, which I most solemnly disclaim. I want justice and right; I want impartial and honorable treatment, and nothing more. Had I been permitted by the Secretary of the Navy to go into a full explanation of the causes which produced the misunderstanding between Mr. Homans and myself, I could have convinced him that he had been deceived as to those causes; that they were altogether of a private nature, and that I had not been so grossly blameable as must have been represented to him. For instance, the odious charge of *ingratitude* has been made against me, from which it would seem the reciprocal acts arising from a state of *friendly* intercourse have been nicely weighed, and those conferred upon me greatly overbalance those I conferred. Perhaps my scales might *reverse* that balance; but, between *friends*, I never knew that these acts were ever weighed. It is the sentiment, the sincere feeling of friendship, which keeps the scales always even; it is perfect equality and community of feeling. Mr. Homans cannot pretend to say I have ever been his dependant; if he does, his numerous assurances of friendship were hollow hearted. Certain it is, I never believed, till latterly, that he could have so much mistaken my character as to think me capable of holding his friendship upon such terms. No, sir, I can safely appeal to all who know me, as well here as in Boston, where I resided fourteen years, that I am not of an *ungrateful*, an *unjust*, a *malicious*, or a *quarrelsome* disposition. I never *coveted or abused power;* and, in my intercourse with society, there is no one who can charge me with intentionally inflicting pain, or withholding redress for unintentional injury. I am, however, not insensible to my faults; perhaps they may be numerous; but be they what they may, *they do not affect the happiness of others.* I pray your forgiveness for speaking so much of myself; *it is not from egotism, or rather a fondness for it*, but to aid in a just estimate of my statements.

In April, 1816, I entered the Navy Department, under an official letter of appointment from the Secretary, as clerk of "the registry"—a situation always considered that of *second clerk.* Previously to accepting this appointment, it was a question of calculation whether it were better to retain my then happy situation of chief clerk under General Mason, and take my chance at the termination of his office, or to accept at once an appointment which promised a permanency. I beg leave to refer to the letter from that excellent man as illustrative of this very question. However, upon the assurances of Mr. Homans that I should have the same income which Mr. Duval, my predecessor, received, the whole of which was enumerated, and amounted to $1,745 per year, to wit, $1,300 regular salary, fifteen per centum surplus upon that at the end of the year, and the secretaryship of the privateer pension fund, of $250 salary, I found the preponderance in favor of the change, and accordingly accepted the appointment. Immediately upon commencing my new duties, Mr. Homans informed me he had found it necessary, to pacify Mr. Boyle, who was calculating upon the same situation, to give him the secretaryship last mentioned. I acquiesced, because I felt certain it was all proper and right, and because I had no disposition to dispute with those I was associated with. At the end of the year I did not doubt of receiving my fifteen per centum; this was then my impression; but in the course of the year it was explained to me that *extra clerks* might be wanted temporarily, and they must be paid out of the surplus money; so it proved, and at the end of the year I received $60 short of the sum at first promised me. I made no remonstrance at this, because I saw it bore as well upon Mr. Homans

and the other clerks as upon myself, and also believed the employment of extra clerks was necessary. Things went on tolerably smooth until last summer. Mr. Homans received twelve thousand and odd dollars for the heirs of the *Epervier* sufferers, and, upon my application to him, he spontaneously told me it was his intention to circumscribe his accommodation to others, in order to render *me* some substantial aid in my then little embarrassments, all of which I had made known to him. Notwithstanding this voluntary assurance, he required me soon after to reimburse what I had borrowed, stating he had lent Mr. Mallory and others so much that he had not sufficient money for his marketing. To one individual he said he had lent eight or ten thousand dollars, but he felt certain of its safety. I told him I could not repay him then; that the money was not borrowed under an idea of my being obliged to repay it until he was obliged to account for the balance of the fund, in two years. Besides, he had not lent me half the amount I wanted, and had been encouraged to expect. I discovered a coldness in his manners, and endeavored to lead him into a candid discussion, but was unsuccessful. An overbearing disposition (perhaps a constitutional infirmity) began plainly to show itself in his conduct to me—a disposition I had frequently seen exercised towards others. I adopted a system of reserve, and avoided him, except upon office business. In the third quarter of the year he withheld all the salaries several days, and mine a fortnight; at the end of the fourth quarter the same was repeated, and he was preparing to cut off from any share of the surplus the two gentlemen in my room and myself; but, being resisted, he made an unequal and unprecedented distribution of it, by which we, to be sure, received a share, though he himself and his favorite received the greatest share. The chief clerk having the distribution of the daily labors of the office, it is always in his power to enable any favorite clerk to make a greater show of work than the rest; and if my predecessor, Mr. Duval, were called before your honorable committee, perhaps he could testify that for weeks, perhaps months, Mr. Homans did not assign him the least employment in the current business of the office. The fact was, Mr. Homans hated him, and hoped thus to show how unnecessary he was to the Department. Many instances have occurred at the Department in which he has extended this hatred to officers of the navy who were friendly to Mr. Duval, and in which those officers have become objects of official slight.

If it should be asked how it happens that a *chief clerk* should possess this power, I can only answer, that, from some cause or other, he has *managed* to get the honorable Secretary to do just what he dictates. The letters to the Department are first opened by him; and it is his usual practice to dictate answers at once, and leave it only to the Secretary to put his signature. Doubtless, the Secretary acquiesces in this course from the fullest confidence that every thing is conducted strictly right. But this confidence has had the unfortunate effect of placing the Secretary almost entirely in the power of the chief clerk. Hence, all he had to do when he aimed at depriving us of our proportion of the surplus money was only to represent to the Secretary that we were inattentive to duty, and often absent during office hours. A bold and open resistance, it is true, prevented the full accomplishment of his design, though it was in part accomplished. On the score of absences, it might be well asked how Mr. Homans could suffer himself to prefer charges against other clerks for *that* which he had himself been most guilty of; for it is a fact that the business of the office has been greatly obstructed by his visits to New York, to Philadelphia, and to Baltimore, at three several periods during the last summer—the latter while the Secretary was also absent. On the score of inattention to the duties assigned the clerks, I assert that they have done whatever has been allotted to them. A particular duty assigned to me—that of preparing a new registering book—furnishes the only exception; but to all my suggestions as to the steps necessary to be taken previously to my commencing the work he turned a deaf ear. There were not materials in the office for making a correct register; and as I had prepared a book, upon a new and acknowledged improved plan, which I did not wish to spoil, I omitted commencing upon it until such materials could be had. But the current business of the office has not suffered for want of this book. It would certainly be a convenient thing for reference; but the great object of facilitating the settlement of accounts by the Auditor is not obstructed by its non-completion. As to all other duties, I assert that the other gentlemen and myself have performed them promptly and cheerfully.

His animosities, therefore, are of a private nature. They have grown out of his imperious manners, his constant attempt to play the tyrant, and a moderate degree of independence on the part of those who were the objects of his tyranny. He cannot exist without a display of this paramount propensity. None, therefore, but *abject sycophants* can please him long.

The last thing he has attempted, and in which he has succeeded so far as to get the Secretary's signature, is the raising the fourth clerk over the heads of the third clerk and myself, not by the open and direct mode of telling us such was the new arrangement, but by describing, in an official letter to the chairman of a committee of Congress, the duties of the *fourth clerk* under the title of *second clerk*, in contradiction to an official report, made only one month before, to the honorable Speaker, and to written instructions, signed by the Secretary, issued in January, this year, wherein we are all designated by name as first, second, third, fourth, and fifth clerks. This was done with a view of securing to Mr. Boyle the salary of $1,600 as second clerk, according to the new bill for graduating the clerks of the respective offices.

I will not longer trespass upon the patience of the honorable committee, trusting that it will be apparent to them that, if I am made the sacrifice to the tyranny and injustice of a vindictive man, to whom I gave no cause to justify hostility, the affairs of an important Department of the Government must still be in a precarious situation, unless an entire change be made in the system now in practice.

I have the honor to be, very respectfully, sir, your most obedient servant,

WM. BLAGROVE.

Hon. JOHN HOLMES, *Chairman of the Hon. Committee of Investigation.*

SIR: FEBRUARY 9, 1818.

In the evidence incidentally given by me on Saturday last, I made a misstatement, which I beg leave to correct. It was impressed upon my mind that the amount of the prize money placed in Mr. Beale's hands was $360,000; but, on reference to our books, I find that the amount was only $290,438 19, and that it was paid over to him in 1815. Permit me, sir, to request the favor of your correcting this error in the testimony subscribed by me.

Very respectfully, I have the honor to be, sir, your most obedient servant,

WM. BLAGROVE.

Honorable Mr. HOLMES, *Chairman of Committee of Investigation.*

15th Congress.] No. 453. [1st Session.

HISTORY OF CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 30, 1818.

Mr. Robertson, of Louisiana, from the committee to whom was referred the memorial of Gales and Seaton, reported:

That the memorialists are engaged in publishing a History of the Congress of the United States from the commencement of the Government to the present day, and a continuation of the same history, to keep pace with the present and future transactions of that body. The memorialists solicit the aid of the Government in this their laborious and expensive undertaking. The committee are fully impressed with the importance of this work. Nothing can be more useful than a correct legislative history of the United States. It is a source of much regret that one has not heretofore existed; and, now that it is proposed to be published, there can be no hesitation in giving it encouragement. The views and opinions of the great actors on the theatre of Government are not less necessary to be known than their acts themselves. The utility of judicial reports is very generally admitted; and, if the reasons of the judge ought to accompany his exposition of the law, how much more proper is it that this should be the case in respect to the views of the legislator, the author of the law itself. To a right understanding of statutes, nothing is more essential than a knowledge of the causes and motives which produced their enactment; and this can in no way be so satisfactorily obtained as by a resort to contemporaneous debate.

That the aid of Congress is necessary to this work arises out of the great labor and expense attending it, whilst, at the same time, no adequate remuneration can be expected from its sale. The agriculturist, the merchant, the mechanic, and the physician, who purchase other books, will feel comparatively but little interest in this, however useful it may be to the politician, the historian, and the lawyer. The work will not afford amusement to the general reader, but without it the archives of the nation are defective.

Congress has not been backward in giving aid to publications of a similar character. Of the new edition of the Laws of the United States a subscription was directed of one thousand copies before the work was commenced. Three or four hundred have been since purchased of that work, and it is now proposed to purchase eight hundred copies more. A subscription was, in like manner, authorized to Wait's edition of the public documents; and it is further proposed to purchase an equal number of copies of an additional volume of that work about to be published. The policy is not less just than liberal which provides for the widest attainable diffusion of whatever concerns the development of the springs and principles of our Government.

With such views it is that, at the present session, the publication of the journals of the convention and of the secret journal of the old Congress has been authorized; and, with such views, the committee ask leave to report a bill authorizing a subscription to the History of Congress.

15th Congress.] No. 454. [1st Session.

CITY OF WASHINGTON: EXPENDITURES FOR REBUILDING THE PUBLIC EDIFICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 3, 1818.

Mr. Tucker, of Virginia, from the Committee on the Expenditures of the Public Buildings, reported:

That, having called on the Commissioner of the Public Buildings for his accounts of expenditures, they received from him the abstract marked A, which accompanies this report.

From this abstract, it will appear that, from the 30th of September, 1816, to the 1st of October, 1817, the disbursements on account of the public buildings were as follows:

For the Capitol, - - - - -	$104,337 27	
For the marble quarry, - - - - -	25,205 43	
		$129,542 70
For President's house, - - - - -	-	116,945 00
For contingent expenses, - - - - -	-	3,247 52
Total amount, - -	-	$249,735 22

From the letter marked B, enclosed at the request of the committee, as appears by the letter C from the commissioner, it appears that the accounts of the commissioner at the Comptroller's office have been settled up to the 30th of September, 1817, and that there was at that time an unsettled balance standing against him of $72,503 58; but, from the letter of the commissioner, marked D, it appears that "the contingent expenses of the office, and the sums advanced upon contracts not yet completed, and for materials and labor, where no regular voucher had been received, amounted, on the 31st of December last, to the sum of $80,576 13." It is alleged, and your committee believe truly so, that the existence of the balance against the commissioner on the settlement at the office of the Comptroller arises from the vouchers not yet being completed for the support of certain items in the account. This may well be the case, as many of the transactions require advances to be made before complete vouchers can be given; and not a few of the articles have been procured from foreign countries, from whence the vouchers may not yet have been received. The incomplete vouchers were submitted to the inspection of the committee.

With a view of obtaining such information as might enable your committee to fulfil the duty assigned them, and afford information to the House, the letter marked E was written to the commissioner, from whom the letter marked F was received in reply; and the papers marked G and H have been received through the same channel.

From a reference to the laws, and from these documents, the following statement in relation to the subject of *appropriation* results:

The appropriations for the public buildings previous to the present session of Congress have been as follows:

Amount appropriated February 13, 1815, - - - - -	$500,000 00
Amount appropriated March 3, 1817, - - - - -	100,000 00
	600,000 00
The disbursements, as per document F, up to the 1st of January, 1818, have amounted to -	681,454 17
Making an excess of disbursement beyond the appropriation of - - -	$81,454 17

But this has been more than provided for by the appropriation, during the present session, of a further sum of $200,000; making the sum hitherto appropriated for the rebuilding of the public edifices in this city equal to - - - - - - $800,000 00

Of which, on the 1st of January last, had been expended - - -	681,454 17
Leaving on that day unexpended only the sum of - - - -	118,545 83
But, from the documents F, G, and H, it appears that on the 5th of February, 1818, the estimate of the sums necessary to complete the public buildings amounted to - -	269,572 00
Making the further sum of - - - - - -	$151,026 17

which it will be necessary to appropriate for the completion of the buildings. Indeed, as experience has proved that the estimates fall far short of the actual cost, and as, in the interval between the 1st of January, 1818, and the 5th of February, when the estimates were made, a considerable sum must have been disbursed out of the sum of $118,545 83, it is probable that $200,000 more, at the least, will be wanting. Hence, the appropriations hitherto having amounted to - - - - - - $800,000 00

And the contemplated appropriations to - - - - -	200,000 00
The cost of rebuilding the public edifices, exclusive of the centre, must amount to at least -	$1,000,000 00

Your committee feel it a duty to call the attention of the House to two facts in connexion with the foregoing:

1st. That the estimated expense of rebuilding all the public edifices in the year 1815 fell short of $500,000, as appears by the report of the committee on the subject.

2d. That, from the document marked F, it appears that the original cost of the whole of the public buildings amounted only to the sum of $1,214,291 94. But this did not include the finishing the large room in the President's house and the contemplated porticoes. Whether the heavy expenses of pulling down walls, removing rubbish, and the other charges arising from the state of destruction in which the buildings were, will account for the cost of rebuilding so far exceeding the estimates, and approaching so nearly the original cost, though so large a quantity of the most expensive materials were on hand, and so much work completed, your committee do not feel competent to decide.

It would have afforded much satisfaction to the committee to have been able to ascertain, with accuracy, the cause of the great excess of expenditure above the estimates, and of the near approximation of the cost of rebuilding to the original cost of the work. The rise in the price of materials and of labor but imperfectly accounts for it, and they are compelled to attribute it to the alterations which take place in the plans, and which occasion the pulling down of vast portions of finished work, not only to the great loss of labor, but to the great destruction and waste of materials. These sources of expense, it is expected, will not again occur.

Your committee have no doubt of the faithful application of the public moneys by the Commissioner of Public Buildings, of whose fidelity and zeal they have no doubt. It is difficult for them to decide, and it is probably not within their province to determine, whether the course which has been pursued has been judicious; but as the quarry has been opened at very considerable expense, from which the columns for the Capitol are procured, they beg leave to refer to the document marked I for the reasons which induced the undertaking of this work.

All which is respectfully submitted.

I.

SIR: WASHINGTON, *January* 24, 1818.

In laying before you the abstract of my disbursements for the last year, it may not be improper to give some explanation of the circumstances under which those charged to the *marble quarry* were made.

The former Commissioners of the Public Buildings had determined to substitute for the columns of the House of Representatives the variegated marble of the upper Potomac in place of the coarse material of freestone heretofore used; but, before they had completed their arrangements for this object, the task devolved on me. A contract was therefore entered into with a marble mason for the columns required, at $1,550 each, delivered in this city; and a sum of money advanced, upon security, to the contractor. But the difficulties and expenses attending an enterprise of this kind proved to be greater than had been calculated upon. In short, the money advanced and the private resources of the contractor were expended before much progress had been made at the quarry; and the contractor being unable to give such security as would authorize further advances, to the extent which might be required, it became necessary to abandon the undertaking altogether, or to adopt some other mode of carrying it into effect.

After a full investigation of the state of the quarry by persons of science and skill, and a consideration of all the circumstances connected with this subject, it was thought best to prosecute the works at the quarry; and, as no contractor of responsibility could be procured, this could only be done by employing artists and hands on the public account. These inquiries, and the necessary arrangements with the owner and lessee of the quarry, were not completed until the latter end of March last.

As much time had already been lost; as the repairs of the Capitol were in danger of being delayed for want of the columns; and as the season for engaging hands had passed by, great and persevering exertions were necessary to procure the requisite number of workmen. Hence, sir, you will observe many charges of agents whom I was compelled to employ in travelling through the country, in different directions, to engage and send on hands.

The quarry being situated in a country where no accommodation could be had for the workmen, imposed on me the necessity of purchasing materials and erecting temporary huts, of laying in provisions, utensils for cooking, bedding, &c., and, in some instances, clothing for servants, hired of their masters with that condition.

The introduction in the repairs and embellishment of the public buildings of a new and beautiful material, inexhaustible in quantity, and conveniently situated in relation to the seat of Government, was thought to be an object of some importance; but to me the establishment has been a source of perpetual anxiety and vexation, which could have been rendered supportable only by the aid of a gentleman of probity and high standing in the county, Mr. Solomon Davis, who, from motives of friendship to me, undertook to superintend the whole. In his judgment, vigilance, and integrity I knew I ought to confide.

This short statement, it is hoped, will suffice to explain some items of a character not usual in public accounts.

I have the honor to be, with great respect, your obedient servant,

SAML. LANE, *Commissioner of the Public Buildings.*

Hon. HENRY ST. GEORGE TUCKER.

15th CONGRESS.] No. 455. [1st SESSION.

DISTRIBUTION OF THE JOURNALS AND OTHER PRINTED DOCUMENTS OF CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 8, 1818.

DEPARTMENT OF STATE, *April* 7, 1818.

In compliance with a resolution of the House of Representatives of the 19th ultimo, requesting information whether a distribution has been made of the journals and documents published under the orders of the Senate and House of Representatives, respectively, pursuant to the joint resolution of the 27th December, 1813, and what further provision is necessary to insure the transmission of the said journals and documents according to the said resolution, the Secretary of State has the honor to report that the documents referred to have, up to the year 1817, been transmitted as prescribed, partly by mail, and partly by water and land carriage.

That, of the documents for the year 1817, twenty-five copies have been deposited in the library of Congress, and that a copy of the same has been forwarded by mail, under the frank of this Department, and in conformity to the fourth section of the act of the 18th of April, 1814, to each of the judges of the Supreme Court of the United States, of the district courts, and of the Territories of the United States, with the exception of the Mississippi Territory, which, during that year, was passing, in part, from the Territorial to the State form of government, whereby it became difficult to identify therein the particular judges who were entitled to the said documents.

That the remainder of the documents for the year 1817 were, as usual, and according to the plan adopted for the distribution of the laws of the United States, deposited in the hands of an agent convenient to navigation, with a view to their being shipped and conveyed, by water and land carriage, to the Executives of the several States and Territories, in the proportions that the acts of Congress are transmitted to the same, and according to the injunctions of the joint resolution of Congress of the 27th of December, 1813.

That none of the documents for the year 1817 have been shipped from this place, owing (as the agent states) to the late period at which they were delivered to him by the bookbinder, and to the want of an opportunity thereafter to ship them hence.

If further provision be necessary to insure the transmission of the journals and documents according to the said resolution, Congress may deem it expedient to make an application of supernumerary copies to be substituted for those which, by casualties and accidents unavoidable in the conveyance of packages so bulky and so liable to take damage to the most distant quarters of the Union, are occasionally prevented from reaching their destinations. Delays of several months must necessarily occur after the expiration of every session of Congress before the laws, journals, and documents of the session can be forwarded in the requisite numbers to all the States and Territories, respectively. By the employment of a greater number of printers and bookbinders these delays might, doubtless, to a certain extent, be abridged, but not, probably, without a considerable increase of expense.

All which is respectfully submitted.

JOHN QUINCY ADAMS.

15th CONGRESS.] No. 456. [1st SESSION.

DISPUTED BOUNDARY WITH GREAT BRITAIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 11, 1818.

Mr. P. P. BARBOUR made the following report:

The committee to whom, by a resolution of the House of Representatives of March 27, 1818, were referred the President's message and accompanying documents upon the subject of the expenses incurred under the fourth, fifth, sixth, and seventh articles of the treaty of Ghent, with instructions to inquire into the nature and causes of said expenses, and into the principles upon which the commissioners under the sixth and seventh articles of said treaty have proceeded in the execution thereof, report:

That they have endeavored, as far as they have been able, to investigate the subjects which have been confided to them, and now beg leave to present to the House the result of their inquiries. They will begin with the sixth and

seventh articles first, though last in numerical order, because their attention has been much more particularly called to them, and they have had more evidence before them in relation to these articles, upon which they feel it to be their duty to make a detailed report.

The sixth article, in substance, authorizes the commissioners, by a report or declaration under their hands and seals, to designate the boundary from the point where the forty-fifth degree of north latitude strikes the river Iroquois or Cataraguy, through the said river, the Lakes Ontario, Erie, and Hudson, through the water communications between said lakes, and to the water communication between Lake Huron and Lake Superior; and to decide to which of the two contracting parties the islands lying within the said river, lakes, and water communications do respectively belong, in conformity with the true intent of the treaty of 1783, by which it was provided that this whole line should uniformly pursue the middle of these waters.

The seventh article authorizes the same commissioners to fix the boundary line from the water communication between Lakes Huron and Superior, to the most northwestern point of the Lake of the Woods, and to decide to which of the two parties the several islands lying in the rivers, lakes, and water communications forming said boundary do respectively belong, in conformity with the treaty of 1783, and to cause such parts of said boundary as require it to be surveyed and marked. It further requires the commissioners to designate the boundary aforesaid, to particularize the latitude and longitude of the most northwestern point of the Lake of the Woods, and of such other parts of said boundary as they may deem proper. These are the duties to be performed. In relation to the manner of their performance, the committee refer to the letter of General Peter B. Porter, the American commissioner, to the Secretary of State, under date of November 3, 1817, marked F;* to a statement in writing of the same gentleman presented to the committee, under date of April 3, 1818, marked G; and to an affidavit of David P. Adams, the astronomical surveyor, marked H; all of which are annexed as a part of this report. The letter and statement of General Porter describe in general terms the manner in which the commissioners proceeded to ascertain the boundary line, but the affidavit of Mr. Adams goes into a minute description of it; from that it will be seen that an accurate survey of the line was considered necessary, and the plan which was adopted was this: a connected series of triangles was arranged throughout all the various channels, and an entire concatenation of them was preserved along the whole extent of the work, being somewhat more than forty miles in extent, executed the last year; all the angles were carefully measured and verified at their respective stations; likewise all the angles of the incurvation and excurvation of the intermediate coast or water lines were minutely measured for the purpose of platting the shores with exactitude. It is obvious that this course must be extremely slow in its execution, and must involve an immense expense; and, consequently, if any mode could be devised which would answer the proposed purpose, and at the same time be much cheaper, and require much less time for its execution, it would be highly desirable. General Porter, in his letter and statement before referred to, goes into reasoning to prove the propriety of the course adopted; he considers that the line cannot be correctly designated but by a map; that, being a water line, it must be delineated by relation to the shores and islands, and that this cannot be done but by actual survey. That the mode adopted is the most precise and accurate one, cannot be questioned; but the committee, though they are not conversant with such subjects, are decidedly of opinion that the accuracy and precision which are produced by the course pursued are not necessary to designate the boundary; they further are impressed with a belief that a map is not required for that purpose, and that even surveying is not necessary, unless in particular situations. Although the treaty of 1783 fixes upon the middle of the river, lakes, &c. as the line, yet it would seem that it must have contemplated the middle of the best navigable channel; otherwise, in pursuing the precise course of the middle, islands would frequently be separated into parts, and one part belong to each of the Governments; and, further, the right of navigation of each would be impaired, if not destroyed, by the line crossing the navigable channel. If this idea be correct, the great subject of inquiry would be to ascertain the best navigable channel; and this, it seems to the committee, might be done by observation, and sounding the depth of the water: all the islands which had names of notoriety might be described by their names; and where they had not such names, monuments might be erected upon them, and, if thought necessary, monuments might also be erected upon the land opposite to them, and their relative position, as well as distance from the shore, might be ascertained by survey. This system, if it would answer, would save much time and money; for, to proceed in the same manner, and with only equal speed, as was done last year, would require a long series of years to complete the work. Mr. Adams states, indeed, that, from the changes which he understands are proposed in the mode of proceeding, they will be able to proceed the next year with double the celerity; and General Porter, in his statement before referred to, expresses the opinion that as the last year was one necessarily in some degree of projection and experiment, and as they have determined to change the mode of proceeding, in the manner pointed out in his statement, they can, with not much increase of expense, proceed with three or four times the speed, and, after passing the St. Lawrence, in which there are many obstructions, with rapidity; but, even with all these changes and improvements, there is no comparison between the mode adopted by the commissioners and that suggested by the committee (if it will answer the purpose proposed) in point of expense, and the time necessary for the completion of the work. The committee are disposed to think that the treaty did not contemplate a map of this boundary, from this circumstance—that the fifth article requires the commissioners to make a map of the boundary therein mentioned, whereas there is no such provision in the sixth and seventh articles. The committee differ in another respect from the commissioners in regard to the manner of executing their duties; they seem to have thought that, with a view to the complete execution of those duties, it was necessary for them to attend in person, and superintend the survey. The committee are disposed to think that, whatever course should have been pursued in order to get the necessary evidence upon which to settle the boundary, whether by survey or otherwise, the commissioners constitute a court whose business is to decide, and that it belongs to the agents to furnish the facts for decision; they, however, do not mean to say that the commissioners may not direct the agents' attention to such points as they may deem necessary, nor that they might not, in particular cases of difficulty, make actual personal observations: this opinion results from what they consider a correct construction of the treaty. The sixth and seventh articles have reference to and adopt the provisions of the fourth, in relation to the oath and duty of the commissioners; by the fourth it is provided that they shall be sworn impartially to examine and decide upon the said claims, according to such evidence as shall be laid before them on the part of His Britannic Majesty and the United States, respectively. After the board of commissioners was organized, a difference arose between them and Samuel Hawkins, agent of the United States, in relation to the boundaries of the respective Powers. The views of the agent, together with his reasons, will be seen by reference to three documents herewith referred to, and numbered from 5 to 7, both inclusive: the first, a remonstrance presented by the agent of the commissioners the 29th May, 1817; the second, a statement addressed to the Secretary of State the 26th February, 1818; and the third, a statement presented to the committee under date of the 2d April, 1818. As connected with this part of the report, the committee also refer to a correspondence between the agent and Secretary of State, numbered from 1 to 4, inclusive. The views of the commissioners will be seen by reference to a document marked R, June 24, 1817. The committee, being referred to the precedent under the treaty of 1794, sought information in relation thereto from the

* This and all the papers subsequently referred to in this number have been omitted.

State Department. The information obtained will be found in the letters from that Department, marked L and N; from the latter of which it appears (the first not being considered sufficiently precise) that the commissioners did personally inspect the rivers respectively alleged to be the St. Croix of the treaty of 1783; but they did not attend at the actual astronomical surveys and the projection of the maps. It ought to be remarked that, for some time after the board was organized, no agent was appointed on the part of Great Britain.

As it respects the principles upon which the commissioners have proceeded, (if thereby be meant the rules of decision by which, as general principles, the individual questions of doubt and difficulty are to be determined as they may occur,) it cannot perhaps be said that any have been solemnly decided. The only information which the committee have will be found by a reference to a part of the document marked G, (General Porter's statement,) that, though the commissioners have had full and frequent conversations as to the principles by which they should be guided in certain hypothetical cases which might arise, yet they have never adjudicated or settled any abstract principles; and he does not feel himself at liberty to give to the committee, as such, the incidental conversations above alluded to.

We come now to the expenses incurred in the execution of the sixth and seventh articles. The document marked E shows the aggregate amount to be $35,283 53½, composed of, first, commissioner's compensation for two years $8,888; secondly, the proportion of the United States, that is, one-half of the contingent expenses, which proportion is $10,357 39½; thirdly, agent's account for two years' salary and contingent expenses, $16,038 14.

The compensation of the commissioner is provided for in the eighth article of the treaty, by declaring that the commissioners shall be paid in such manner as shall be agreed between the two contracting parties, such agreement being to be settled at the time of the exchange of the ratifications of the treaty. The document K shows an agreement between the United States and the British chargé des affaires, declaring the principles of the payment of the commissioners to be the same as under the treaty of 1794, that is, the expense to be equally borne; but it does not fix the amount. It appears, however, by a letter from the Secretary of State, (marked L,) to be *understood* that the American commissioners are entitled to £1,000 sterling.

As to the contingent expenses, the eighth article of the treaty provides that all other expenses (after having provided for the payment of the commissioners) attending the commission shall be defrayed equally by the two parties. The document marked C shows the whole amount of the United States' share of the contingent expenses, and that, together with the one marked M, exhibits the several items composing that amount. From an examination of these, it will be seen that $6,580, part of the $10,357 39½, goes to the salaries and wages of assistant secretary, surveyor, and others employed. The treaty recognises the appointment of a secretary by name, but not of an assistant secretary; and though it authorizes the employment of such surveyors and other persons as shall be judged necessary, yet the committee incline to the opinion that these words do not include the idea of any distinct office: of this, however, the House will judge for themselves. If their idea as to the assistant secretary be correct, then his salary of $2,200 may be saved; and if their opinion also be correct as to the practicability of ascertaining the boundary without actual survey and map, then there would be a very great saving in the other items of the wages and expenses of persons concerned in the survey. According to the opinion of the committee, that part of the expenses which are personal to the commissioners is not properly chargeable to the Government. It is for the House to determine what influence the precedent under the treaty of 1794, hereafter mentioned, shall have as to the expenses of a passage to the river to be decided on. As to the residue, as the document C presents them in minute detail, the House have upon the subject all the information which the committee have. General Porter considers that he was referred by the Government generally to the proceedings of the commissioners under the treaty of 1794 for precedents, and he was of opinion that the precedent of those commissioners justified the charge of his necessary personal expenses. In relation to the opinion of the Government that the commissioners would pursue the rules established in 1794, see letter from the Department of State, No. 4. The committee have procured from that Department one letter (marked L) of the 3d April, 1818, and another (marked N) of the 8th April, 1818; the first of these states, in general terms, that no allowance was made to the commissioners for their personal expenses in addition to their salaries; the second letter states that the commissioners did allow themselves the contingent expenses of their passages by sea between the United States and the British provinces, which became necessary for the execution of their duties, and that no other personal expenses appear to have been allowed to them.

As to the expenses of the agent, the statement before referred to (marked E) shows the whole amount of the agent's account, consisting of two years' salary and contingencies, to be $16,038 14. The account D, therein mentioned, shows the items of which it is composed. Those items are, first, two years' salary, at $4,444 44, equal to $8,888 88; secondly, one year's salary paid the secretary of the agency, $1,000; thirdly, contingent expenses thus charged: "For expenses for myself, Major Roberdeau, boatmen, chainmen, flagmen, &c. on an exploring excursion from St. Regis to Lake Superior, audited in March, 1817, $3,258 12," (see document O;) and fourthly, contingent expenses thus charged: "To amount of expenses for agency for 1817, as per account, $2,891 14." The particulars of the audited part of the contingent expenses do not appear before the committee other than as above stated; but as to the other charge for contingent expenses, to wit, the $2,891 14, not yet audited, (as is believed,) there is a paper before the committee purporting to be an account of them, though not signed by the agent, from which the particulars appear. (See that paper, marked P.) It appears also from a document marked Q, (an audited account,) that $428 was allowed to Major Isaac Roberdeau as topographical engineer on the exploring party with the agent. The agent considers himself entitled to a salary of £1,000 sterling for the following reasons: he says in his statement (No. 7) that, in 1816, the then Secretary of State (Mr. Monroe) assured him his salary should equal that of the British agent; that, though in the formation of the register under a resolution of Congress the sum of $3,000 was set against his name, he was assured by the Department of State that it was not intended by that act to settle the agent's salary. He refers in his statement to the letter of Mr. Rush, then Secretary of State, (No. 4,) in which it is said that it is the wish of the President that his salary should ultimately be equal to that of the British agent, should that exceed $3,000, at which his was then for the present fixed. He states, further, that the State Department having learned that the British agent received £1,000 sterling, both under the treaty of 1794 and that of Ghent, the accounting officer of that Department informed him his salary was fixed at that sum; and, finally, that the agent's salary under the fourth article has been actually fixed at that sum. These are the grounds of his claim; they are submitted to the House. The committee would have doubted much the power of the agent under the treaty to appoint a clerk; the letter, however, from the Secretary of State (No. 4) authorized him to do so, at a salary of $1,000, which is what has been paid. (See also the agent's reasoning as to the necessity of one in his statement No. 7.) As to the residue of the expenses attending the agency, the committee have presented all the evidence in their possession to the view of the House; they will only add that, by the letter from the Secretary of State, (No. 2,) dated 8th July, 1816, the scheme of exploring the whole boundary in dispute, taking an accurate view of each island, the depth of the water, &c., is approved.

In the progress of this inquiry, two intimations were given to the committee, which they thought it their duty to investigate, to wit: 1st. That General Porter was interested in the islands of the St. Lawrence; 2d. That he had

acted improperly in the disbursement of a part of the money which the Government had advanced him towards paying the expenses of the commission. As it respects the first of these subjects, (that is, the interest of General Porter in the islands, &c.,) the committee have examined every person who was suggested to them as probably knowing any thing in relation to it. The various statements subjoined to this report, and sworn to, marked S, T, U, and V, contain the whole of the evidence. From this, the committee are satisfied that General Porter is in no-wise concerned or interested in any island in the St. Lawrence; nor is there any proof that he has any interest in any but one upon the whole boundary line, to wit, in the Niagara; and it seems that there is some doubt whether that belongs to him or his brother, (see document marked V, Ogden's evidence;) and this island is, perhaps, three hundred miles above where they have been surveying. The mistake most probably occurred in this way: Mr. Ogden, of the House of Representatives, lays claim to many of the islands in the St. Lawrence. He also claims a large tract of land on the main land in New York, having no island attached to it, in which General Porter is concerned. It appears that these two speculations have been confounded, and that the rumor of General Porter being concerned in the island speculation has arisen from the circumstance of his being concerned in the other. (See Hawkins's affidavit, marked W; Delafield's affidavit, marked T; Ogden's affidavit, marked V; and Adams's affidavit, marked U, in relation principally to this point.)

As to the subject of the money, the document marked W (the evidence of Samuel Hawkins) contains all the information which the committee have got on that subject. From this it appears that the money advanced by Government to General Porter was in a draft on the Branch Bank at New York; that General Porter paid Mr. Hawkins $1,000, in New York, in Buffalo Bank notes, which were at about three per cent. discount; and that he paid, for provisions and other purposes of the commission, those and other notes of the interior, during the last season. But the witness states that the Buffalo Bank was a specie-paying bank; that its notes were generally current and at par on the frontier; and that the discount in New York was probably owing to the risk and expense of transporting specie; and, further, that he does not know that General Porter is interested in the bank; and that he could not suppose General Porter had deposited the money in the Buffalo Bank for his individual interest. General Porter himself states that he had been interested in the Buffalo Bank, but that he had sold out his interest some months before the transaction above mentioned, and that he in no shape derived, or expected to derive, one cent of profit. He states, further, that he drew on New York, on his own account, and received the notes of the Buffalo Bank; that he expected to expend the money on the frontier, where they were at par; and that he did not know they were at a discount in New York. Upon the whole view of the subject, the committee are decidedly of opinion that he derived no advantage from the transaction. As it respects the other articles of the treaty, the resolution requires the committee to investigate the nature and causes of the expenses incurred under them.

The fourth article, in substance, requires the commissioners, by a declaration under their hands and seals, to decide to which of the contracting parties the islands in the bay of Passamaquoddy, and the island of Grand Menan, in the bay of Fundy, respectively, belong, in conformity with the true intent of the treaty of 1783. Under this article, the documents E and A show the amount of the accounts settled at the Treasury to be $10,406 04, consisting of the compensation of the agent from 11th April, 1816, to 11th December, 1817, at $4,444 per annum, amounting to $7,407 40, and the United States' proportion of the contingent expenses, $2,998 64; and the document X shows the amount of the compensation claimed by the commissioner to be $8,172 48, being the sum which would be due to him, at the rate of $4,444 44 per year, from 16th January, 1816, to 17th November, 1817, inclusive, of which $4,500 has been paid him. Adding the commissioner's claim to the other gives the total amount of the expense to the United States under this article, to wit, $18,578 52. With regard to the commissioners and agents' salaries, it is presumed they will both stand on a common footing with the same officers under the other articles; and, therefore, the remarks already made apply to them. As to the contingent expenses, see the document No. 8, showing them in detail. As far as any of these expenses can be considered personal to the commissioners, the committee would object to them as not being allowable; and, indeed, the commissioners themselves did not intend to charge them, as appears from a letter of Mr. Holmes, the American commissioner, marked AA. Amongst those which devolve on the Government, in that letter, are mentioned the chartering of a vessel to examine the islands, room for commissioners, secretary and clerk's pay. As to the pay of the secretary, it certainly is chargeable to the Government. As to the clerk's pay, that also would be chargeable in like manner, if the commissioners had authority to employ them. The words of the eighth article are, "that they may employ such surveyors and other persons as they shall judge necessary." As to the necessity for their employment, and the amount of compensation paid them, see the statement of Mr. Holmes, American commissioner, marked BB, as also his letter already referred to, satisfactorily showing that economy was consulted by their employment. As to the expense of the passage to the islands, the committee would have thought that not properly chargeable; but the commissioners are justified, not only by the precedent under the treaty of 1794, (see letter from State Department before referred to, marked N,) but also, as appears from the letter of Mr. Holmes, marked AA, by the authority of the Government. He states that he chartered a vessel by order of the Government. As it relates to the room, the question is submitted to the House.

The fifth article of the treaty, in substance, requires the commissioners to ascertain the northwest angle of Nova Scotia, and the northwesternmost head of Connecticut river; and to cause to be surveyed that part of the boundary line which extends from the source of the river St. Croix, directly north, to the northwest angle of Nova Scotia; thence, along the highlands which divide the waters of the St. Lawrence and Atlantic, to the northwesternmost head of Connecticut river; thence, down along the middle of that river, to the forty-fifth degree of north latitude; thence, by a line due west on said latitude, till it strikes the river Iroquois or Cataraguy. In relation to the expenses incurred under this article, it is not in the power of the committee to give the House as precise information as they could wish. All which they possess themselves is contained in the document marked B; from which it appears that the aggregate amount of all the expenses under the fifth article is $27,854, consisting of a charge for commissioner's salary of $8,888, being two years at $4,444, per annum; agent's salary for one year $4,444; United States' proportion of secretary's salary $1,111; salary of principal surveyor, $1,500; and a charge thus stated: "the pay to the assistant surveyor, the necessary number of chain bearers, provision carriers, and other men, expense of instruments, supplies of provisions and other necessary articles, transportation to and from New Brunswick, and other necessary contingent expenses on the part of the United States, in the whole, about $11,911." It will at once be seen that there is not sufficient detail in this on which to form an accurate opinion. It is proper further to state that this is only an estimate of what the commissioner supposes it will be; it has, as yet, not been passed by the board. (See reasons assigned in document B.) The committee having stated the nature and amount of the charge, the House have the same means of forming an opinion as themselves. They will remark that, during the inquiry, they have heard what gives them an unfavorable impression as to the despatch and economy which attended the execution of this article during the last year; but that which they heard could not itself be used as evidence, and the person from whom it is said to have come is not within the reach of the committee; they doubted the propriety of mentioning it, but they thought the House ought to have even the intimations which were given them. The com-

mittee have now presented as full a view of this subject as the evidence before them enabled them to do; they have felt some difficulty in deciding how to attain the object which they have in view; they have, however, finally determined to recommend to the House the adoption of the following resolution:

Resolved, That the President of the United States be requested to arrange with the British Government some mode of designating the boundary line under the sixth and seventh articles of the treaty of Ghent which shall require less time and expense than the one which the commissioners have heretofore pursued.

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES, *April* 14, 1818.

Ordered, That the Committee of the Whole House be discharged from the further consideration of the report of the select committee appointed to inquire into the expense incurred under the fourth, fifth, sixth, and seventh articles of the treaty of Ghent, and that the same be referred to a select committee.

Ordered, That Mr. Taylor, Mr. Williams, of Conn., Mr. Claiborne, Mr. Rich, Mr. Morton, Mr Sherwood, and Mr. Ballard Smith, be the said committee.

Attest: THO. DOUGHERTY, *C. H. R.*

The select committee appointed under a resolution of this House of the 14th of April, 1818, to whom was referred a report of the committee raised to inquire into the expenses incurred under the fourth, fifth, sixth, and seventh articles of the treaty of Ghent, have had the same under consideration, and report:

That they have not attempted to re-examine the various matters detailed by the said committee, but have endeavored to ascertain the cause of the unfavorable impression mentioned in the following sentence, extracted from the last page of that report: "They [the committee] will remark that, during the inquiry, they have heard what gives them an unfavorable impression as to the despatch and economy which attended the execution of this article during the last year; but that which they heard could not itself be used as evidence, and the person from whom it is said to have come is not within the reach of the committee; they doubted the propriety of mentioning it,'but they thought the House ought to have even the intimations which were given them." The committee find that the communication referred to in the foregoing sentence is contained in the letter of Charles Turner, jun., addressed to a member of this House, which, together with a letter of that member, addressed to the chairman of the said committee, is hereto annexed, for the purpose of being considered part of this report. The following resolution is respectfully submitted:

Resolved, That the select committee be discharged from further considering the said report.

DEAR SIR: WASHINGTON, *April* 13, 1818.

In consequence of having mentioned to you the other day a part of the contents of this letter, and observing that it was confidential, it was unexpectedly intimated that the committee would expect to know the contents. I was aware that the letter was confidential, but on your request I attended before the committee and read the letter, concealing the name. The report in relation to the subject requiring, as you think, explanation, and you and I agreeing that the facts contained in the letter are somewhat important, by your request I am constrained to deliver you the letter.

As you have a right to demand it, I cannot be accused of a breach of confidence. I do not see, however, that the letter implicates the American commissioner.

I am yours, respectfully,

J. HOLMES.

HONORED SIR: SCITUATE, MASSACHUSETTS, *March* 26, 1818.

At the time I (probably by your friendship) was requested to attend to the lines under the fifth article of the treaty of Ghent, I was requested to give my opinion upon the arrangements suggested by the agents for progressing in the business. The route prepared for us to get to the mark, with necessary provisions, I knew to be very difficult, and attended with so many embarrassments as would probably consume the season in getting with our baggage to the place of beginning, viz: the monument at the source of the Schaodie, *alias* St. Croix; in this I was supported, though unknown to me, by the opinion of the British surveyor at St. Andrew's, although we were three hundred miles apart, and had no acquaintance, having never seen each other; he, however, had no opportunity to convey his ideas to the agents, but must prepare boats, &c. to be ready on my arrival. I had the good fortune to convince the agents of the impropriety of attempting that route, a distance of seventy to a hundred miles, up a small river, full of falls, rapids, and shoals, and the water would fail us seven to ten miles short of the monument; whereas, by going up St. John's river, we went with the whole company and the whole of the baggage in flat-bottomed boats that would carry ten tons each, without unloading a single article until we were within ten miles of the line, and a passable wagon-road to the line, and we should strike the line about ten miles in advance of the place of commencement. But I was not so successful as to some other things in which I was requested to give an opinion. I suggested a diminution of the number of men, from an apprehension that more were proposed to be employed than could be advantageous; that they would stand in each other's way; that a less number would probably make greater progress; that employing so many men for chainmen, flag bearers, and instrument carriers, did not appear to me to be advantageous; that, to employ so great a number of axemen or laborers, under an idea of their carrying provisions for the company, in a country where packhorses could not be made use of, did not amount to much, for they must eat as well as those for whom they carried provisions; that several men belonging to the United States, settled near the line north of the monument, might be hired as cheap as in any other part of the United States. I requested the sort of provisions which I, from experience, had found best calculated for such business, viz: principally pickled or salted pork of a good quality; hard, commonly called ship bread; perhaps a little good beef; dry pease or beans; a little molasses; black tea; some small quantity of rum, and small articles of very inconsiderable value, such as pepper, mustard, ginger, &c. But to all these suggestions I was answered that this was business done by the two Governments, and that they would not probably wish men to be too much exposed or outdone; they would willingly furnish all things *needful* and *comfortable*, &c., and suggested that they had made arrangements satisfactory to themselves; in these respects intimating, at least, that I might be silent. I took the hint; but I also knew that somebody would eventually be blamed, and it would as probably fall on me as on any others. From the appearance of things in Boston, I apprehended that whoever undertook the running and demarcation of the line would not be allowed to proceed in it to cross St. John's river, (which I knew the line would cross,) and consequently interrupt their line of

communication between the provinces of *Nova Scotia*, *New Brunswick*, and *Lower Canada*, which those employed by the British Government perhaps did not know, or were at least unwilling should be the case. This apprehension I suggested at the time, and it was in my mind confirmed by every step taken; first, by putting the cart before the horse, or, in other words, employing the *principal* surveyors, with all the instruments, to go forward and explore the country, leaving the *assistant*, by them (the British) called *deputy* surveyors, with incompetent instruments, to perform the important service of settling the true line; by increasing the expense at every possible stage, thereby, in my opinion, to discourage the American Government from pursuing the business; and by delays in various shapes to prevent the establishment of the line so far as to cross St. John's river. Shall I say every little intriguing artifice was made use of to prevent a rational progress, and to swerve us from the direct pursuit of the business? This, however, will be denied; but it is not so easy to deny the expense, because the Government will have something to do in that business.

When Mr. Campbell and myself were left by the surveyors general and principal surveyors, they furnished us with a single theodolite, incorrect in construction; but it was a great while before I could convince Mr. Campbell of its incorrectness. He alleged the instrument had been procured by a gentleman of astronomical ingenuity in the province; that it came from the best factory in London; that he had full confidence in its correctness. I invited him to join me in making some sideral observations, to test the correctness of our work, or the correctness of the instrument. This he declined, alleging that the surveyors general had taken all the responsibility on themselves, by fixing, as they termed it, a true meridian line, and given us our directions for the prolongation of it; had ordered their initials to be placed on the monument, and on every milestone or post; that, therefore, he should take no responsibility on himself; and said he had made a declaration to Colonel Bauchettu to that effect. I observed to him that I felt my personal reputation at stake; that it was incumbent on us to see that our line was correct, and, if erroneous, to put it right; and asked if he had any objection to my making use of the instrument in making observations of the stars, &c. He said he had none, and would join me as a mere matter of amusement, but not with a view to correct a line which he was satisfied with, or to attempt to rectify an instrument in which he had full confidence. As soon as the weather would admit I made some observations, but so unsatisfactory in the result that I could not determine whether the line was erroneous, or the amount of the error, if any. Although I was not satisfied of the correctness of the instrument, or of the latter part of the line, I doubted the propriety of taking on myself the responsibility of discontinuing the work until I could convince Mr. Campbell of the incorrectness. Having at length succeeded in this, we left the line, and proceeded home, and to discharge the hands as fast as possible. Had we had competent instruments, and pursued the line twenty days longer, as we contemplated, we should have added much to that line. Whether the business will be resumed, and proceed in the present year, I have not learned. I think it but just to state that it ought to be done with more economy; which it might be, without the Government being chargeable with parsimony. I apprehend some new arrangement will be proposed and adopted; and, from various circumstances, I am induced to believe I shall have leave to retire. I think somebody must be left out of the business, and perhaps it is best those should be left out who disturb the quiet of those concerned; I am, however, conscious that I have obtruded my opinion on none, when it was not asked. I know, sir, I am treading on hallowed ground. I know that I have no right to suggest that the measures pursued by those appointed by the Government are not the best. I have suggested some thoughts to the American agent, perhaps, with too much freedom.

I have, sir, communicated these thoughts and facts for your information, trusting you will consider them as *confidential*, that you may know something of the matter, and be able to make use of any suggestions that I have made; while, at the same time, I am not to be understood as complaining against any gentleman acting under the American Government in the business. I can only regret that I am liable to be made the scapegoat to bear the sins of the people.

We learn that your session is drawing towards a close, and you will soon be allowed to visit your *agreeable* family.

Accept, sir, the respects and best wishes of your humble servant,

Hon. JOHN HOLMES. CHARLES TURNER, JUN.

Estimate of the expenditures under the fifth article of the treaty of Ghent, in the years 1816 *and* 1817.

Commissioner's salary, two years, not yet fixed, but say $4,444 per annum, - -		$8,888
Agent's salary, one year, (no agent having been appointed in the year 1816,) - -		4,444
Salary of the secretary of the board, one year, - - - - -	$2,222	
Deduct the share of the British Government, - - - - -	1,111	
		1,111
Salary of the principal surveyor on the part of the United States, - - -		1,500
The pay to the assistant surveyor, the necessary number of chain bearers, provision carriers, and other men; the expense of instruments; the supplies of provisions and other necessary articles; the transportation to and from New Brunswick, and other necessary contingent expenses on the part of the United States, in the whole about - - - -		11,911
		27,854
Paid by the United States, - - - - - - - -		14,444
Balance, - - - - - - - - - -		$13,410

The accounts which are in this statement estimated at $11,911 will be examined and adjusted by the commissioners at their next meeting, which will be about the 1st of May next. The amount, it is believed, will not materially vary, though it may prove something more or less.

Several of those accounts have accrued in the province of New Brunswick, and under the superintendence of the agents and surveyors. The British agent and surveyor reside, the former at St. John's, in New Brunswick, and the latter at Quebec, in Canada; and it was not possible, after the surveyors discontinued their work last fall, for the board of commissioners and the other persons concerned to convene and close the accounts of the year. Nor was it considered necessary to meet during the winter merely for that purpose, when it had been agreed to hold a meeting of the board about the 1st of May next, to receive the surveys made the last year, and to give the necessary instructions to the surveyors for the present year.

It is contemplated to commence this spring the latitude line from Connecticut river to the river Iroquois, commonly called St. Lawrence, and at the same time to continue the survey commenced last year on the eastern part of the boundary line. This will, of course, render the business of the commission more expensive than the

last year, but it will sooner bring it to an end, by which the Government will ultimately save money. By deducting from the foregoing estimate the salary of the commissioner for the year 1816, the residue is $23,410, which is the amount of all the expenses, including salaries for the last year. Some of those expenses, being peculiarly incident to the *commencement* of an undertaking of this kind, will not again be incurred; of course, the amount required for continuing the survey at the eastward will be less for the present year than it was the last.

I am, therefore, of opinion that the sum of $25,000 will be sufficient for all the necessary purposes, under the fifth article of the treaty of the present year, including the labor to be done, both on the northern and eastern parts of the boundary line designated in that article of the treaty.

Respectfully submitted.

MARCH 3, 1818. C. P. VAN NESS.

Hon. WILLIAM LOWNDES, *Chairman of the Committee of Ways and Means.*

15th CONGRESS.] No. 457. [1st SESSION.

FEES CHARGED BY THE DISTRICT ATTORNEY OF THE SOUTHERN DISTRICT OF NEW YORK ON PROSECUTIONS AGAINST RETAILERS OF SPIRITS WITHOUT LICENSE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 14, 1818.

Mr. HUGH NELSON, from the Committee on the Judiciary, who were instructed to inquire what fees have been charged and received by the district attorney of the southern district of the State of New York, in prosecutions brought by him against retailers of spirits for vending them without license, and also what fees have been received and charged by the other officers of the United States in the said southern district of the State of New York, and who were further instructed to prepare and report a bill of fees for the officers of the United States in the courts of the United States, reported:

That these subjects were brought to the attention of Congress in consequence of a complaint made to the Secretary of the Treasury by certain citizens of New York, contained in a letter addressed to Jonathan Fisk, Esq., district attorney of the said State, which is subjoined to this report. The committee thought it due to Mr. Fisk to give him information of the matters alleged against him, and accordingly did so; whereupon Mr. Fisk appeared before the committee, and gave such answers and explanations as he thought proper. After the return of Mr. Fisk to New York, he transmitted to the committee a written justification of himself, which is also annexed to this report; so that the House may have a full view as well of the allegations made against the official conduct of the district attorney as of his reply to them.

In relation to the costs or fees charged by the attorney in the cases complained of, the committee find that one of them, to wit, the charge of seventeen dollars on the petition for a remission of a penalty, is allowed by no law of the United States or the State of New York, but is entirely defended on an uncertain and limited usage, whose origin is not distinctly understood, and which is known to the committee to exist only in two or three States, and is, of course, unjustly unequal in its operation, both as it regards the officers of the Government and the suitors in their courts. It should also be remarked that the service for which this charge is made is, in many, if not in most cases, but nominal. This charge, however, did not begin with Mr. Fisk, but had always been received by his predecessors in office. Others of the fees charged by Mr. Fisk, but not considerable in their amount, seem to be warranted neither by law nor any usage, and were given up by him on the award of certain arbitrators appointed to examine his bill. His reasons for demanding them appear in his written defence. The whole amount of the fees taxed in the cases mentioned in the resolution for the district attorney seems to the committee to be most unreasonably high, since it is undeniable that in these cases, in which the penalty forfeited and remitted was but one hundred and fifty dollars, the costs of the attorney amount to sixty dollars by some of the statements, and to about fifty-nine dollars by his own, including the seventeen dollars above mentioned on the petition; the whole of which belongs to the attorney, except about two dollars and ninety-one cents, which he pays over to the clerk. The marshal's costs are to be added to this sum, and also seventeen dollars more for the clerk on the petition, which, with other necessary expenses, become almost as burdensome as the payment of the penalty.

The committee are of opinion that an entire reform on this subject must be made, so that the costs to be charged in the courts of the United States shall be uniform, known, and certain; not, as at present, varying in different States, uncertain in their amount, and unknown as to the authority on which they are made. The formation of a fee bill sufficient to reward the services of the officer, but not oppressive to the suitor, is a work of considerable difficulty; and the committee have not yet been able to obtain from the different courts the information necessary to it, but entertain the hope that in the next session of Congress it may be completed.

SIR: NEW YORK, *March* 19, 1818.

I have the honor to transmit to you, for the examination of the Committee on the Judiciary, an explanation of the principles and practice by which costs are charged by the district attorney and clerk of the district court in this district for services in civil causes in this court. To give a full and detailed history of the costs, and of the practice in common law cases in this court, would require a volume larger than the committee would be willing to examine; but as one of the gentlemen of the committee did me the favor to say to me that an explanation upon paper might be advisable, I will endeavor to give a summary statement of the law and practice which regulate costs in civil causes prosecuted in the courts of the United States in this district.

By an act of Congress, the district attorney is authorized to receive such fees in each State, respectively, as are allowed in the supreme court thereof; and in the district court his stated fees in the cases herein mentioned shall be as follows, to wit: for drawing interrogatories, $5; for drawing or exhibiting libel claim or answer, $6; and for all other services in any one cause, $6. (Vide Laws United States, 3d volume, revised edition, page 134, section

4.) The compensation allowed in this section for travel and attendance is repealed. (Laws United States, volume 4, page 700.) So that the compensation to the attorney of this district depends entirely upon the fees established by the acts of Congress, and the statutes of this State prescribing the fees to the attorneys and clerks for conducting causes in the superior court.

The fees allowed to the clerk are one-third more than those allowed to the clerk of the superior court for similar services. (Laws United States, volume 3, page 134, section 3.) These fees are, by the practice of this State, included in, and taxed with, the attorney's bill of costs, and paid by him to the clerk. By the statute of the State of New York regulating fees, (a printed copy of which I enclose,) the items for service to the attorney, counsel, and clerk are stated in pages 14, 15, and 16 of this pamphlet.

By this statute it will be seen that counsel's fees in the supreme court are: for perusing and amending interrogatories, and every special pleading entry and case, $1 25; assisting on special motions, $1 25; trial of a cause, demurrer, special verdict or case, or attending prepared, $3 75; but no costs shall be taxed for counsel in any case but where counsel is actually employed. The attorney's fees are: for a retaining fee, $3 62½; (vide page 15 of the pamphlet;) drawing copy of warrant of attorney, 12½ cents; every term not exceeding three, 62½ cents; drawing all process, pleading, &c., 19 cents for each sheet containing seventy-two words; engrossing the same, 12½ cents for each seventy-two words; for such engrossings as were formerly made on paper, 6 cents for each sheet; for every necessary motion, 62½ cents; arguing every special motion, $1 25; arguing demurrer, special verdict, &c., $3 75; drawing up a judgment, 75 cents; entering the same on the roll, 37½ cents; every notice, copy, and service on the opposite party, 25 cents; copy of a bill of costs to be taxed, if before issue or judgment, 37½ cents; if after, 75 cents.

The fees of the clerk of the supreme court of this State (see pamphlet, pages 16 and 17) are as follows: for sealing a writ, &c., 12½ cents, and the clerk of the district court one-third more, would be 16½ cents; filing a declaration or other pleading, 12½, 16½ cents; entering every rule, 12½, 16½ cents; entering return of writ, 12½, 16½ cents; filing roll, 12½, 16½ cents; docketing a judgment, 25, 33 cents; filing an affidavit or other paper, 9, 12 cents; signing a judgment, 25, 33 cents; taxing a bill of costs, 50, 63½ cents; searching the record for any one year, 12½, 16½ cents.

According to the foregoing rate, and the practice of the supreme court in civil causes, are the bills of costs made out in civil causes in the district court.

What are necessary motions and notices must be decided by the court where the question may arise upon the taxation of costs. The district court may decide a motion to be necessary, and tax the charge for it, which the supreme court of the State may consider unnecessary, and refuse to tax the charge for the service. The statute is considered the standard by which both are regulated.

According to the foregoing rate, the following bill of costs is made out in a cause where judgment has been entered by default, and the declaration contains 33 folios, or sheets of seventy-two words each, in an action founded upon statute.

The district court costs, in a case of judgment by default, a petition for remission, and a motion to be discharged upon paying a portion of the penalty as mitigated by the Secretary of the Treasury, are as follows:

Bill of costs.

Retaining fee,	$3 62½	
Warrant of attorney,	12½	
Filing same,	12½	
Draught of capias, 4 folios, at 19 cents each,	76	
Engrossing same, at 12½ cents each,	50	
Clerk sealing same,	16½	
Motion and leave to enter action,	87½	
Filing capias and entering return,	16½	
Motion and rule for return,	87½	
		$7 21½
Motion and rule for body,	87½	
Draught of declaration, 33 folios, at 19 cents each,	6 27½	
Counsel perusing and amending,	1 25	
Copy to file, and clerk filing same,	2 14½	
		10 54½
Motion and rule to plead,	87½	
Draught of notice of rule to plead,	25	
Copy of narr. to serve,	1 98	
Serving same and notice to plead,	19	
		3 29½
Draught of affidavit service, 3 folios,	57	
Copy of same, 3 folios,	18½	
Oath to same,	12½	
Reading and filing the same,	28	
Draught of recognizance roll, 5 folios,	95	
Engrossing the same with narr. 38 folios,	4 75	
Clerk searching bailpiece and filing roll,	33	
		7 19
Motion and rule for default,	87½	
Motion and rule for judgment,	94	
Draught of record, 4 folios,	76	
Engrossing same with narr. 37 folios,	4 62½	
Draught of judgment, and entering on roll,	1 12½	
Costs, copy, notice, and attending taxation,	1 25	
Signing, filing, and docketing judgment,	66	
Draught of execution, 4 folios,	76	
Engrossing 50, seal 16½ cents,	66½	
Filing and entering return,	16½	
Three term fees,	1 87½	
		13 70
		$41 94½

This would be considered the taxable costs in a case of judgment by default upon a declaration containing thirty-three folios. The attorney, if determined to increase the costs to the highest amount, might, by additional rules and proceedings against the marshal, excepting to the bail, &c., augment the sum to forty-six or forty-eight dollars. But this unwarrantable practice was neither attempted nor thought of by me.

In the cases where complaints have been made to the Secretary of the Treasury against the costs, the Secretary remitted the penalty on condition that the defendants would pay the duties, costs, and charges, and twenty dollars to the informer, within ten days after notice of the remission. Upon being informed of the terms of the remission, the defendants alleged that, inasmuch as they had taken a license and paid the duties immediately after being prosecuted, they were not liable, by the terms of the remission, to pay the duties again; and they accordingly applied to the court to be released from the payment of this part of the mitigated penalty. After argument, the court decided that the duty or the price of a license was required to be paid by the terms of the remission; upon this motion I believe the district attorney had a right to make the following charges:

Brief on motion, - - - - -	$1 12½
Attorney's fee on motion, - - - - -	1 25
Attendance, - - - - - -	62½
Arguing the case, - - - - -	3 75
	$6 75

This sum, however, I did not charge, but agreed to receive the sum of forty dollars as the amount of costs, which was paid without objection at the time, and no suspicion was entertained by me that the amount was too high.

Upon each petition I charged seventeen dollars. This sum was paid without objection, and it has been the invariable practice of all my predecessors to charge it, and of the court to allow it. (Vide Laws United States, vol. 2, page 71, sec. 35.) The authority given by this statute to receive such fees as shall be taxed by the court in which the services are rendered is supposed to authorize the taxation of reasonable fees for such services as have no analogy to any services rendered in conducting a cause in the supreme courts of the States, but which are necessary in conducting the public business before the courts of the United States. This may have been the original authority by which this charge of seventeen dollars was taxed. But the act which authorizes the charge for drawing interrogatories, five dollars; for drawing and exhibiting claim or answer, six dollars; for all other services in any one cause, six dollars, may have been considered the authority sufficient to justify the district attorney in charging seventeen dollars upon every petition presented. The petitioner is examined or may be examined by the district attorney on oath. For this interrogatory to the petitioner, five dollars would be taxable. The district attorney has the right to put in an answer to the claim set forth in the petition, and for this six dollars would be allowed. There are other services to be performed by the district attorney, for which he may claim six dollars, making the amount of seventeen dollars. The general remitting act of the 3d of March, 1797, (2d vol. Laws United States, page 585,) requires a copy of the petition, and notice of presenting it, to be served upon the district attorney, that he may show cause against the remission or mitigation of the forfeiture. Under this act, it has been considered the duty of the district attorney to examine the petition, to attend court at the time it is presented, and that he has a right to examine the petitioner, to subpœna and examine such witnesses as he thinks proper, to show that the forfeiture ought not to be remitted, and to the petition subjoin such an answer as may be deemed correct. When the statement is prepared by the clerk, it is submitted to the examination of the district attorney to see if it be truly and correctly stated. When the decision of the Secretary is transmitted to the clerk, it is the duty of the district attorney to see that its conditions are complied with.

It has been my invariable practice to examine every petition when served upon me, and to attend court when it was presented, to cross-examine the petitioner in all cases where I deemed it necessary. In some instances the Secretary has decided not to remit any part of the penalty, and it is presumed upon the facts disclosed upon the interrogatories proposed by the district attorney to the petitioner. In most of the petitions presented to be relieved from the penalty of retailing without license, the labor and services of the district attorney have been trifling, compared with his services upon some petitions in other cases where the examination of the petitioner and witnesses has occupied several days; but the fees of the district attorney have been understood to be the same in all cases of petitions. The sum of seventeen dollars has been taxed by Judge Story, in Rhode Island, after argument, as the fee to the district attorney upon each claim or petition; (the ship Francis and cargo, 1 Gallison's Rep. 453.) It appears by the report of this case that it was the practice of the district attorneys in Massachusetts, Connecticut, New York, and Pennsylvania, to receive this sum for their fees upon every claim. It will be observed in the case of the Francis that the proceeding, termed claim, was a petition to obtain a remission of the forfeiture from the Secretary of the Treasury; yet Judge Story said he was pressed with the uniformity of the practice to allow seventeen dollars.

In the twelve or thirteen cases now before the Committee on the Judiciary, in which this charge is complained of, the right of the district attorney to claim this sum was submitted to Messrs. Slosson and T. L. Ogden, two professional gentlemen of very respectable standing, and they decided in favor of the right of the district attorney to claim it. A few remarks upon this submission shall close my statement.

Having really made a mistake as to the state of the proceedings in the suit against George Nixon, one of the complainants, I immediately informed him there was a mistake, and, without any complaint or application on his part, returned him the difference between the sum due and the sum received. Shortly after this, Isaac L. Platt called upon me to return him a portion of the costs received from him, and do him the justice I had done Nixon. I explained to him the mistake in Nixon's case, and also informed him that no mistake had been made in his case. With this explanation he was not fully satisfied, and a few days afterwards a letter was addressed to me, signed by George Nixon, Isaac L. Platt, and eleven others, complaining that they had been required to pay too much costs, and requesting me to do them justice. Although they had no legal remedy, even if the costs might have been too high, having, by their attorneys, agreed to the amount, and paid it several months before this objection, yet, willing to satisfy them that my charges were correct, and their complaints without foundation, I offered to submit the question to any respectable professional gentlemen of their own choice, and be governed by their decision. Mr. Slosson and Mr. Ogden were selected. Upon examination of the charges, they decided in favor of my right to charge the seventeen dollars upon the petition, but, from the forty dollars received as the costs of the suit, thought, under all the circumstances, four dollars and twenty cents should be deducted. Having submitted the bill to this taxation, I offered to comply with the decision, and return the difference, less than fifty dollars in the whole. I have had, in all my practice, but twenty-two cases of this kind, in which the proceedings have gone so far as to swell the costs of suit to forty dollars; twelve of these were submitted to be retaxed, and an offer made to comply with the decision

of the arbitrators; but the difference was said to be so trifling as not to be worth notice. I did believe myself perfectly justified in charging the forty dollars, from which this trifling deduction has been made. The items struck out are, in my opinion, taxable, and would be allowed by the court upon a contested taxation—at least such items as would make the amount equal to forty dollars.

The items charged in the bill of costs set forth in this statement, and which Messrs. Slosson and Ogden thought ought not to be charged, are as follows:

1. Warrant of attorney, - - - -	$0 12½
2. Filing warrant of attorney, - - - -	0 12½
3. Motion and leave to enter action, - - -	0 87½
4. Counsel perusing and amending declaration, - -	1 25
5. Execution, engrossing, and seal, - - -	1 52½
	$3 90

The first two items (Nos. 1 and 2) were rejected by Messrs. Slosson and Ogden, on the ground that, the district attorney being a public officer, the court were bound to recognise him as such. Every attorney is known to the court as licensed to practise; his license is a general authority to prosecute and defend suits, but the form of proceedings and the course of practice require him to file a warrant as his authority to act in each suit. The form is short. A B puts in his place C D, his attorney, against E F, in a plea of debt. So with the district attorney: his commission is a general authority to prosecute and defend suits in which the United States are concerned; but it is the practice to state in each suit his warrant to prosecute or defend. These items I therefore supposed proper.

No. 3. Motion and leave to enter action. This item was supposed to be as necessary as the motion and rule for the body, either of which is but seldom actually made, but the latter always taxed in the supreme court. The New York statute (pamphlet, page 15) declares that "No motion shall be allowed upon judgment by confession by virtue of a warrant of attorney, when no suit is brought either for entering the action or rule to plead."

The phraseology of this part of the statute is such as to warrant the construction that a motion to enter the action is allowed as a necessary motion in all but the prohibited case of a judgment by confession by virtue of a warrant of attorney. Whether it is the practice of the supreme court to tax it or not, I cannot say; but I consider it authorized by the statute. And, in fact, no action is entered without an application for a writ, and the leave of the court. It may be considered a matter of right, and so are several other proceedings and motions which are taxed.

No. 4. Counsel perusing and amending declaration, $1 25. This item is charged under that provision of the statute which allows a counsel fee of $1 25 for perusing and amending interrogatories, and every special pleading, entry, and case. I consider the declaration in question, founded upon three several acts of Congress, a special declaration, and such as it was right to make the charge for counsel perusing and amending. I believe it to have been the uniform practice of the bar in the supreme court to make this charge in all cases where the pleading was special, whether it was amended by counsel or not, if the attorney who drew it was of the degree of counsel. A late rule of the supreme court, it is true, requires the certificate of counsel that he perused the pleading, and considered it special, before this charge can be taxed in that court. Upon this question being raised before the district court of this district, it decided that where the pleading was special the district attorney would not be required to produce the certificate of counsel that he had perused it and considered it special. Counsel perusing and amending a special pleading is generally a matter of form to comply with the late rule of the supreme court; no charge is usually made by the counsel for this service. An attorney may act as attorney and counsel in the same cause, and, according to the present practice of the supreme court in this State, receive, in certain cases, the fees of the attorney and counsel, as on all special motions. I have had it taxed in the supreme court invariably without objection.

No. 5. Execution, engrossing, and seal, $1 52½. This item was rejected because execution was not actually issued. After judgment and notice by the plaintiff's attorney to the defendant to pay the judgment, or execution must issue, it is, as I understand, the practice in the supreme court to charge for the execution. It is supposed to be prepared ready to deliver to the officer, and the state of the proceedings justifies the charge for it. The defendant has no reason to complain of it, as it is certainly for his benefit that it is withheld from the officer until the defendant has notice, and an opportunity to pay the amount due, without further costs. This item, however, I did not charge. I have only attempted to show my right to it.

The four items specified as a proper charge upon the motion to get rid of a part of the mitigated penalty, which items amount to $6 75, Messrs. Slosson and Ogden were of opinion belonged to the proceeding upon the petition. If the court is right in the construction it has given to the act which authorizes the charge of seventeen dollars upon the petition, the right of the district attorney to this sum is perfect when the proceedings upon the petition are ended. These proceedings are ended when the decision of the Secretary is made known. If its conditions be not complied with, the suit proceeds; if judgment is entered, as is usual in common law cases, execution issues for the amount; if the remission be litigated, as in the case of the Margaretta, (2 Gallison's Rep. 516,) the proceeding is, in my opinion, rather to be referred to the remission than to the petition. In the case cited from Gallison, the court decreed condemnation of the property, notwithstanding the decision of the Secretary to remit a portion of the forfeiture. From this decree there was an appeal. In the cases under consideration, the petitioners might have appealed from the decision of the district court, and prosecuted this appeal to the Supreme Court of the United States; and, if they had pursued this course, it would have been the duty of the district attorney to have followed them; and would it then be contended that all these proceedings were to be referred to the petition, and the district attorney allowed only $17 fees for all his services? I presume not. But with as much propriety may the proceedings upon this appeal belong to the petition, as the motion to reduce the remission. However, in settling the costs with these defendants, I omitted this charge, as I did the charge for execution, and estimated the whole amount at forty dollars. But, upon the strictest taxation, I should expect to be allowed this $6 75, as proper fees upon the motion made and argued upon the remission. I therefore included it in the bill I prepared and submitted to the gentlemen selected to decide upon it. It was inserted to show that these defendants had not been required to pay more than I had a right to demand.

By the practice in the supreme court of this State, the costs of a suit are made out, and either agreed to by the attorney for the opposite party, or taxed upon notice. If taxed upon notice, and the opposite party does not attend the taxation to object to the bill, the court will not retax it; or, if the costs are agreed to by the opposite attorney, and paid without objection, the court will not order a retaxation. In the few cases in which the amount of the costs has been complained of, the items and amount were stated to the attorney of the opposite party, and agreed to as correct and proper, and the same was afterwards paid by the person himself without objection; and, several months after this payment, I voluntarily submitted to a retaxation, and have been willing to abide by it, although I considered the charge of forty dollars certainly within the sum to which I was legally entitled for the proceedings upon the suit and the motion upon the remission. If an objection had been made at the time of paying the costs,

I should have had the bills taxed before I received any thing. This would have ended all controversy in relation to the subject. But, according to the course of practice in this State, if upon a retaxation a bill of costs is reduced, and the attorney who received the money returns, or offers to return, the excess, it is considered that ample justice is then done to the opposite party. Every party of whom costs are demanded may so proceed as to have the bill retaxed. It is a claim of right, and the retaxation settles and determines the question. And there are, in my opinion, but few bills of costs so accurately made out in this State as would not, upon a strict contested taxation, be altered, either by adding or reducing.

But I forbear to trouble you with further remarks upon this subject. Although conscious of having received in these cases no costs but what I had a right to charge, yet, from the extraordinary course the defendants have pursued, an explanation may be deemed necessary; and the interest I feel, and ought to feel, for the explanation of the transaction, must be my apology for the length of this statement.

I have the honor to be, very respectfully, sir, your most obedient servant,

JONATHAN FISK.

The Hon. HUGH NELSON, *Chairman of the Judiciary Committee.*

SIR: NEW YORK, *August* 30, 1817.

We, the subscribers, whom you have prosecuted for the penalties attached by law to omissions in taking out licenses for retailing foreign merchandise, take the liberty of approaching you with a plain statement of the injuries which, we believe, we have received at your hands. We disclaim the remotest intention or wish to injure your reputation or disturb your repose; but such is the extent of the grievances of which we complain, that we think it due to public justice to make an investigation; and we appeal, in the first instance, to you, that you may have a fair opportunity to correct any mistake as to matters of fact, and to do us voluntary justice without resorting to other measures.

We allege, not as a justification, but as a very strong apology for our offence, that we were ignorant of the law under which we were prosecuted, and so soon as we were informed of it (which was first by a writ issued by you) we immediately complied with it by taking out our licenses. Of this fact you or the collector was forthwith apprized, and we were told that, in order to get rid of a penalty which was $150, a petition must be presented to the Secretary of the Treasury, you referring those that applied to you to Mr. Romaine, and the collector those that applied to him to Mr. Gardner, to prepare such petitions.

These petitions were prepared and presented to the court, for which we paid our attorney $20 in each case; but, before they could be forwarded to the Secretary, we were informed by an official notice that we must severally call and pay you the sum of $17 in every instance, and the like sum to the clerk of the court: these two sums were also paid on your receiving the answer of the Secretary, which contained a remission of the penalty, on condition that we should take out licenses, pay the costs of prosecution, and a certain sum to the informer, designated in each case by him, and varying from $15 to $20, within a certain period you apprized us of; and at the same time informed us, not that you should proceed with the prosecutions originally commenced in case we did not comply, but that you should enforce the penalty by issuing executions against us. By the tenor of this notification, we were led to believe that you had continued the prosecution to judgment in the same manner as if no petitions for relief had interposed, which you have since avowed to one of the undersigned was the fact in every instance except his own. On our waiting upon you to comply with the terms of the Secretary's remission, we need not remind you of the demeanor you manifested, the embarrassments you threw in our way, and the repeated instances in which we were told to call again. When at last you granted us your attention, you stated your own costs to be $40 in each case, in addition to the $17 already paid you, giving us in the most unequivocal manner to understand that the suits had gone to judgment. You also exacted from us the amount of the license, although we informed you we had taken it out and paid for it at the proper office; thus making us pay for two licenses, when neither the law nor the Secretary ever contemplated that we should pay but for one. In this way, in order to get rid of a penalty of $150, we have been obliged to expend, in every instance, about $140, in addition to the loss of time, perplexity, and trouble which it has necessarily given us. By this course of proceeding our attention has been excited, and we have been led both to consider and inquire whether so much expense and perplexity could be sanctioned by those just and equal laws which it is our boast to enjoy. The more we have inquired, (and you must admit that it was not less our right than our duty to make the inquiry,) the stronger have become our suspicions that all has not been right. Our dissatisfaction has been no secret to you. You have addressed a conciliatory note to one of our number, desiring him to call on you; he waited on you, when, with much apparent agitation, but with perfect politeness, you told him that, owing to the great hurry of business, you had made a mistake in the amount charged him for your own costs, adding that his suit did not proceed to judgment, but that all the others did; and you voluntarily returned him $16 60, giving him a bill containing the items for the balance, which you assured him was now perfectly correct. But suspicions once excited are not easily allayed, and we confess this instance has only served to stimulate our inquiries. We have accordingly directed search to be made at the proper office for judgments in the other cases, and we are told that none can be found. Indeed, as it was generally understood that the Secretary would remit the penalty, as a matter of course, we took it for granted, until otherwise directed by you, that no intermediate proceedings would be had till his answer was received.

We also consider it our duty to state to you that we have taken professional advice as to the legality of the items charged in the bill, which only in one instance, as far as we can learn, you have rendered, and which you so solemnly declared to be correct. The result has only increased our suspicions. Not to notice minor objections, (of which there are several,) we content ourselves for the present with noticing the enormous number of folios charged in your declaration; it is no less than *thirty-one*. The suit, you well know, was an action of debt, on a penalty contained in a public act of Congress; and we were told that from eight to ten folios is a very large allowance. We perceive that you charge nineteen cents for each folio, and, of course, the greater the number of folios the larger will be your compensation. We have taken the pains to get a sight of one of these declarations, and, as they are all printed, we found no difficulty in doing it; to our surprise, we discover that at least one-half the declaration consists of recitals of the act imposing the penalty. We are authorized to say that this recital is wholly unnecessary, and that scarcely a precedent can be found to sanction it; and, indeed, the court would frown upon such a practice as tending most unnecessarily to overload its proceedings, and most oppressively to increase the costs.

This opinion appears perfectly reasonable to common sense. Every man is bound to know the public law of the land in which he lives; we have been taught this doctrine pretty effectually by these very prosecutions against us, in which, if ignorance had been any excuse, we should not have been without sufficient justification. The only object of a declaration, as we conceive, is to inform the court and the defendant of the complaints alleged against him. But if the defendant is charged at his peril with the knowledge of a public law, surely much more is the

court, whose appropriate duty it is correctly to administer it; as applied to either, then, the recital of the statute creating the penalty is worse than useless, on account of the accumulation of the costs to which it leads. We also enumerate, among other grievances, the seventeen dollars which you charge in each case as your fee on the presentation of our petitions. We readily admit (for we have no disposition to conceal the truth) that we find this to be the customary charge in similar cases, but we cannot learn there is any law whatever authorizing it, and we believe it to be wholly disproportionate to the services usually rendered. Your only duties are to be served with a copy of the petition, and, if its contents are false, to attend court when it is presented, with witnesses to contradict it. We deny that a single witness was ever examined or offered in any one of our cases to contradict the petition; of course, then, you never performed any service for the seventeen dollars; nor can we view it, in this instance, in any other light than an odious sinecure appendage to your office, which all good men ought to unite in all lawful means to abolish. We protest against the doctrine of usage as conclusive on this point. The distinction between the governors and the governed in this country is not, and we sincerely hope never will be, so firmly established as to deny the latter the right of testing the conduct of the former exclusively by those wholesome and general laws which apply indiscriminately to all. It is impossible for us to ascertain the exact number of prosecutions which you have instituted for offences similar to our own; we believe five hundred to be a moderate estimate. Many of the defendants were in very straitened circumstances, and found the utmost difficulty in raising the money. We forbear to enumerate all the various instances of peculiar hardship which have come to our knowledge, because we have no personal interest in them; but, unless we are grossly deceived, such instances do exist, and, if generally known, could not fail in their effect upon the public mind. We are aware of the respectability and importance of the office which you fill; we know the value of reputation, and the odium that attaches itself to any thing like official oppression; we wish not to bring the office into disrepute, or to injure the standing of its incumbent; but we feel as if we, in common with many others, have been injured. In perfect candor, and with all plainness, we lay before you, in the first instance, the grounds of our complaints; if our facts are wrong, if our inferences from them are incorrect, we ask you to rectify them; but, if true, we then ask of you to do us justice—to refund the moneys which you admit you have received, and to which you are not legally entitled. This course appears to us to be perfectly correct, and dictated by a due regard for you and the public good; but if, contrary to our wishes and our expectations, you will neither correct our mistakes nor right our wrongs, we shall then resort to such ulterior measures as the nature of the case may require, and our consciences approve.

We are, sir, very respectfully, yours,

George Nixon, James Gammel,
Isaac L. Platt, John Witherspoon,
Edward Rockwell, Enos Burrows,
Henry Chevans, David T. Greenoak,
I. Brown, Andrew Dooley.
Paul Lampson,

JONATHAN FISK, Esq.,
Attorney of United States for southern district of New York.

15th CONGRESS.] No. 458. [1st SESSION.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 20, 1818.

SIR: TREASURY DEPARTMENT, *April* 20, 1818.

In obedience to a resolution of the House of Representatives of the 14th instant, requiring various statements concerning the Cumberland road, I have the honor to submit the enclosed papers, marked A, B, and C.

In addition to these statements, it is my duty to observe that the road is cleared of timber to the width of sixty-six feet; that the bed of the road is levelled to the width of thirty-two feet; that twenty feet is covered with stone, eighteen inches in the middle, gradually diminishing to twelve inches at the side. The road east of the Monongahela is graduated so as nowhere to exceed an elevation of five degrees. That part of it which is west of that river is graduated to four degrees and a half.

It will be seen, by comparing statements A and B, that the expense of mason work east and west of the Monongahela is extremely different. This difference has been pointed out to the superintendent of the western part of the road, with a request that he will curtail that part of the expense. There can be no doubt but that a considerable saving will be effected upon the estimate which he has furnished.

No special appropriation has been made for repairs. The expense has been defrayed out of the general appropriation for the road.

I have the honor to be your most obedient servant,

WM. H. CRAWFORD.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

	$7,636 98

N. B. The contracts for the western division of the road embrace only such parts of it as present the most serious difficulties to travelling and the transportation of heavy articles.

B.

A statement of drafts drawn on the Secretary of the Treasury for the purpose of making the United States western road from Cumberland, in Maryland, to Uniontown, in Pennsylvania, 60½ miles.

Drafts No. 1 to No. 172, - - - - - -		$508,410 20
Amount of repairs in 1814, - - - - -	$1,006 92	
1815, - - - - -	1,200 54	
1816, - - - - -	2,202 11	
1817, - - - - -	3,227 41	
		7,636 98
		$500,773 22

Statement of the different sums wanting to complete the United States western road to Uniontown, distant from Cumberland about 60½ miles; seventeen sections of the work are completed and connected to the Big Youghiogeny river.

The sum wanting to complete the 18th section, - - - -	$600
19th and 20th sections, - - -	4,000
The 21st and 22d sections are finished and paid.	
The sum wanting to complete the 23d section, - - - -	4,900
24th section, - - - -	2,000
25th section, - - - -	10,500
26th section, - - - -	850
27th section, - - - -	5,600
28th section, - - - -	12,600
29th section, - - - -	7,800
30th section, - - - -	700
31st section, - - - -	12,700
Will be due on Youghiogeny bridge, - - - - -	10,000
on Red Stone bridge, - - - - -	4,000
for lime, - - - - - -	1,500
for small mason work, - - - - -	5,000
for making that part of the road over the Youghiogeny river over the bridge, -	6,000
Total amount wanting to complete the road to Uniontown, - - -	$88,750

The sum stated as wanting to complete the road to Uniontown may be relied on, except the item of small mason work, which cannot be known until the whole is done; the sum, however, allowed is believed to be sufficient.

The statement of drafts drawn shows the entire sums (up to this date) drawn by me for the use of the road, and, of course, will show the expense of making it, be that expense what it may, except the sum applied to repairs.

The sum drawn, except for repairs, - - - - - -	$500,773 22
The sum yet wanting, - - - - - -	88,750 00
Divide this sum by 60½, - - - - - -	589,523 22

shows the road to cost about $9,744 21 per mile; and this expense includes every species of it: locating, road-making, bridge-making, (two of which are the largest in the United States,) gravelling, superintending; in short, it includes every expense.

DAVID SHRIVER, Jun.

January 12, 1818.

C.

Statement exhibiting the progress made in the construction of the western division of the Cumberland road; also showing the probable amount of funds necessary to complete the contracts made, and bills drawn in payment.

CONTRACTORS, RATES, &c.	Miles.	Poles.	Amount agreeably to contract.	Work done.	Will cost to finish.	Bills drawn in payment.
Section east of Monongahela river, contractors, Bond and Gormly, at $27 75 per rod,	1	92	$11,433 00	$2,858 00	$8,575 00	$1,110 00
George Dawson, contractor for mason work on the above section, at $3 50 per perch for mortared work, and $3 for dry work,	-	-	13,700 00	12,950 00	750 00	11,500 00
Section west of Monongahela river, contractor, Patrick Gormly, at $28 per rod,	1	151	13,188 00	8,792 00	4,396 00	8,300 00
John Krepps, contractor for mason work on the last section, at $3 for mortared work, and $2 50 for dry wall,	-	-	10,000 00	7,500 00	2,500 00	6,500 00
Thomas Bleakley, contractor for part of section east of Washington, at $28 per rod,	1	160	13,440 00	4,480 00	8,960 00	3,000 00
Thomas Bleakley, contractor for mason work on the above part of section east of Washington, at $3 per perch,	-	-	11,300 00	9,300 00	2,000 00	7,600 00
Foster and Penrose, contractors for one mile east of Washington, at $23 per rod,	1	-	7,360 00	6,860 00	500 00	5,510 00
Thomas McGiffin and others, contractors for ten sections, extending from Washington to West Alexandria, including all bridges of four feet chord and under—first six sections at $10,000 per mile, and four sections at $9,750 per mile,	15	94	151,715 50	80,000 00	71,715 50	75,000 00
Loomis, Skinner, and Loomis, contractors, at $3 75 per perch,	-	-	51,505 00	41,505 00	10,000 00	37,900 00
Zadock Patch, contractor for side walls. The work of this contract has been completed,	-	-	200 00	200 00	-	200 00
John Hunter, contractor for side walls, at $3 for the parapet walls, and $2 50 per perch for the dry walls,	-	-	1,650 00	1,600 00	50 00	1,500 00
John Oliver, contractor for mason work, at $2 75 per perch,	-	-	14,000 00	10,000 00	4,000 00	4,709 50
Abel, Gray, and Loomis, contractors for side walls, at $2 75 per perch,	-	-	2,000 00	800 00	1,200 00	750 00
John Doyle, contractor for mason work, at $3 50 for large bridges, and $2 74 for small bridges,	-	-	14,000 00	10,000 00	4,000 00	8,000 00
William Stephenson, contractor for side walls, at $3 per perch for parapet walls, and $2 50 per perch for dry wall,	-	-	2,000 00	1,500 00	500 00	1,300 00
James Bell, contractor for side walls, at $3 per perch for parapet walls, and $2 50 per perch for dry wall,	-	-	2,000 00	1,600 00	400 00	1,500 00
George Paul, contractor for seven sections of road; six sections at $9,000 per mile, and one section at $10,000 per mile, including all the bridges under four feet span,	12	97	112,946 87½	15,000 00	97,946 87½	
Moses Shepherd, contractor for all the mason work except what is included in George Paul's contract from the east foot of Wheeling hill to Alexandria, at $3 25 per perch; and four large bridges across Wheeling creek contracted for, to be finished, complete, for $40,000, agreeably to contract,	-	-	132,000 00	32,000 00	100,000 00	20,375 00
Timothy Caffield, contractor for the eighteenth section—abandoned by him after doing upwards of a thousand dollars worth of work,	-	-	-	-	-	520 00
Daniel Stenrod, for the above abandoned section, at $40 per rod,	1	253	22,920 00	12,000 00	10,920 00	9,600 00
John McClure, contractor for a part of the nineteenth section, at $12,000 per mile; and William Chaplin, for the balance of the nineteenth section, at $10,000 per mile,	2	6	22,206 25	15,000 00	7,206 25	13,000 00
John McClure, contractor for mason work for the nineteenth section, at $3 25 per perch for mortar wall, and dry wall at $2 25,	-	-	7,000 00	1,500 00	5,500 00	1,000 00
Totals,	36	213	$616,564 62½	$275,445 00	$341,119 62½	$218,874 50

The above is the most correct statement I am enabled to make, in the present rough state of the work, and hope it may be satisfactory.

Your obedient servant,

JOSIAS THOMPSON, *Superintendent.*

The Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

15th Congress.] No. 459. [2d Session.

CITY OF WASHINGTON: PUBLIC BUILDINGS.

COMMUNICATED TO THE SENATE, NOVEMBER 27, 1818.

To the Senate of the United States: NOVEMBER 26, 1818.

I lay before the Senate a report from the Commissioner of Public Buildings, made in compliance with a resolution of the 28th of January last, requiring a statement of the expenditures upon the public buildings, and an account of their progress, to be annually exhibited to Congress.

JAMES MONROE.

WASHINGTON, *November* 23, 1818.

In obedience to a resolution of the Senate of the United States, passed the 28th day of January, 1818, requiring a statement of expenditures upon the public buildings, and an account of their progress, to be annually laid before Congress, I enclose the paper marked A, exhibiting the amount of my disbursements from the 1st of October, 1817, to the 1st of October, 1818; and the papers marked B and C, containing statements of the progress made in the public buildings during the current year.

All which is respectfully submitted.

S. LANE, *Commissioner of Public Buildings.*

The PRESIDENT OF THE UNITED STATES.

A.

Amount of disbursements made by Samuel Lane, Commissioner of Public Buildings, from the 1st of October, 1817, to the 1st of October, 1818.

On account of the wings of the Capitol, - - - - -	$204,349 87
On account of the centre of the Capitol, - - - - -	4,071 05
On account of the President's house, - - - - -	44,150 34
On account of offices to President's house, - - - -	1,273 74
On account of graduating President's square, - - - -	3,442 19
On account of additional executive offices, - - - -	59,521 41
On account of contingent expenses, - - - - -	3,871 82
	$320,680 42

Errors excepted.

SAMUEL LANE, *Commissioner of Public Buildings.*

WASHINGTON, *November* 23, 1818.

B.

SIR: CAPITOL, *November* 21, 1818.

In your communication of the 16th instant, you request me to report the state of the public buildings under my charge, and the progress made therein during this year. In compliance with this request, I beg leave to present the following:

ON THE NORTH WING.

The stonemasons have built, on the outside, the entire balustrade of the east and west sides, and the attic of the north front, and the stone cupola over the dome. Inside, they have laid the marble stairs leading to the principal floor, completed the colonnade of the vestibule and part of the gallery of the Senate chamber. The roof has been covered with copper; the apartments and passages of the upper story are plastered and paved; and the doors, shutters, and other carpenter's work will be finished in a few days. The offices and committee rooms of the principal story and lower story are in the same degree of forwardness. The court room is proceeding in a state of preparation for the use of the court in December. The ceiling of the Senate chamber is rough plastered; but a delay has been occasioned in building the marble colonnade and gallery, from a disappointment in receiving the materials from New York, which I will explain more fully hereafter.

ON THE SOUTH WING.

The columns of Potomac marble of the Representatives room have been prepared and set in their places; the stone entablature with which they are crowned, and the brick arches connecting them with the walls, are built; the stone enclosure forming the breast of the gallery is nearly complete; the ribs of the dome ceiling are raised and secured; the outer roof is now raising, and will be covered in a fortnight, and the balustrade is nearly entire.

ON THE CENTRE.

A great body of earth and of old foundation has been removed to prepare for the new work on the west of the centre. The foundations of the basement story are laid, and the cellar walls of the rotundo are carried to the height to receive the arches which will form the ground floor. Large quantities of freestone are prepared, and the workmen are employed in fitting it for its place. The external walls of the basement are commenced, and these, with the partition walls, will be urged on as long as the season will permit. I think I may state with confidence that the work of every description has been executed in the most thorough and satisfactory manner.

As a general expectation existed that the public rooms would be ready for use in some part of the present session of Congress, I beg leave to state some occurrences which have occasioned delay, and caused the building to appear in a more unfinished state than it would otherwise have done.

Towards the close of April, when the workmen were prepared to commence building the stone cupola of the north wing, such evident marks of weakness were seen in the great arch that was to support it that it became necessary to take measures to strengthen it. After considering the best means for this purpose, it was thought proper to take down the work which loaded the arch, and to build up a hollow cone of brick work, from a solid foundation, over the attic story to the opening in the centre of the roof, which might support the cupola and strengthen the arch: this was done with the utmost despatch, but occasioned a delay of one month. The effect of losing so much time in the best season of the year was to prevent the coppering of the roof, which could not be done while the heavy stone work and masonry were executing. The delay of the copper covering prevented the plastering and inside finishing; for it is certain that, if this delay had not happened, the whole of the plastering and wood work of this wing would be now completed. I enclose a copy of the detailed report of the state of the arch, and of the proceedings thereon, which I presented at the time to the President of the United States and to yourself, to which I now refer for those particulars.

Another cause of delay has been occasioned by engaging some work from a distance, of which we have been disappointed—I allude to the rich and costly colonnade and gallery of the Senate chamber. This is to be wholly of marble, and was contracted for in New York, to be executed there, and to be delivered here in November, 1817; but such has been the disappointment that, though the greater portion of it is on hand, many pieces are now wanting, and some indispensably necessary to proceeding. Repeated letters have been written, and two special messengers sent to urge on this work, which was promised long since, and is now hourly expected.

The large columns of Potomac marble were essential to forming the Representatives chamber and building the south wing; attention was paid to this object, when an interruption was put to this, and all other stone work, by a combination among the workmen to demand an increase of wages. This combination was so organized as to threaten, at one time, an entire suspension of the work; but was happily overcome, after a total loss of thirty days, and a partial loss of many more, owing to the derangement of work occasioned by it.

These causes must account, in a degree, for the present unfinished state of the wings. I am not sanguine enough to assert that they could have been fit for use if these circumstances had not occurred; but the north wing would have been finished, and the south wing much further advanced.

The massiness and solidity of the work, and the great elevation to which a large portion of the materials must be conveyed, will account for the apparently slow progress. From three hundred to three hundred and fifty mechanics and laborers have been employed daily; and, in my opinion, a greater number could not have worked to advantage. Permit me to add, that, since the combination among a certain class of workmen was suppressed, the work has proceeded with spirit, and with a remarkable degree of good order and propriety of conduct.

Respectfully submitted by your humble servant,

CHARLES BULFINCH, *Architect of Capitol United States.*

SAMUEL LANE, Esq., *Commissioner of Public Buildings.*

C.

Report of the state of the arch in the roof of the north wing, May 1, 1818.

When I entered upon the duties of my office as architect of the Capitol, and examined the state of the building, I found that a large arch had been built above the third story of the north wing, which was intended to support the stone cupola or lantern on the centre of the dome. I was pleased with the ingenuity and boldness of the design by which it was intended that a great number of chimneys should be carried upon this arch, and rise in the piers of the cupola between its windows. On inquiring of the principal workmen and overseers, I was told that this arch had been constructed under the particular direction of Mr. Latrobe, and that the stones of the band or curb that formed the opening on the crown of the arch were cut by his particular orders, and put in their places before he left the superintendence of the building. I felt perfect confidence in Mr. Latrobe's genius as an architect, and his acknowledged skill as an engineer, that he had well considered the hazard of the proposed construction, and had taken every precaution against danger; and I gave directions to the workmen to proceed strictly according to their orders from him.

By the 23d of April the chimney flues were all brought into their position on the crown of the arch, when the master workman thought it would be proper to loosen the centres, that the arch might be proved and take its bearing before the stone cupola should be built. On loosening the centre, it was found that the crown of the arch settled with it, and that the stones round the circular opening had moved in a few minutes so far as that the opening was four inches larger in one direction than in the other; the joints appearing violently compressed in some parts, and open on the others. The workmen left it in alarm, and considered it very hazardous. The clerk of the works informed me of the circumstance, and I immediately went on the roof to view it, with the clerk, the principal of the stone department, and the master mason. I soon came to the determination that the arch could not bear the weight of the flues and stone cupola, estimated at two hundred tons more than it was already charged with; and, after inspecting the foundation, resolved to build a cone of brick from the bottom of the dome to the circular opening above, for the purpose of strengthening the arch and supporting the cupola.

As I had been informed that General Swift and Colonel Bomford had been formerly commissioned by the President of the United States to examine the north wing to ascertain the state and solidity of the walls, I immediately wrote to those gentlemen to request them to inspect the arch, and consider the mode in which I proposed to secure it; they obligingly came and examined the work, and determined that it could not support any additional burden, and approved of the plan I proposed, of a hollow cone.

The following description of the arch will exhibit some of the causes of its failure:

The great arch in the roof of the north wing is forty feet in span from north to south, and thirty feet wide from east to west, and rises in a semicircle; it is intended to support a stone cupola twenty-two feet in diameter, with six windows in its circumference, and as many piers between them, in which eighteen chimney flues are to be carried up from the different apartments of the building. A circular opening is made in the crown of the arch fifteen feet wide, (the inner diameter of the cupola,) to convey light to the interior, and particularly to the vestibule of the Senate chamber.

One cause of the failure of this arch arises from the circumstance that the circular opening is not in the centre; but while there are ten feet of solid work on the west, there are only five feet to the east of the opening. Of the eighteen brick flues which are to be led round this circle, twelve are brought from the west, three from the south,

and three from the north, but none from the east, to serve as a counterpoise or buttress of consequence. When the weight was brought on the arch, the tendency of the whole was to press on the easterly part, which, being the weakest, and having nothing to assist it to sustain the pressure, was forced out of form.

On taking down the centring, which opened the soffit or under side of the arch to view, another cause of weakness appeared: the arch, which is two bricks thick, is ornamented with large caissons or coffers of three feet square, sunk the depth of one brick, or half its thickness; these destroy the bond and connexion of the work, as is apparent from the cracks round the stone curb in the centre, which take their directions along the caissons. Four of the blocks of freestone which formed the curb are cracked by the great pressure upon them. From these appearances, it is evident that it would be dangerous to trust the arch to bear the weight that is now upon it, and that it would be wholly incompetent to sustain the stone lantern that was contemplated in addition.

CHARLES BULFINCH.

May 1, 1818.

Pursuant to the plan proposed above, a cone of brick work has been made under the opening of the arch; the chimney flues are now brought into their right position, and carried up to the top of the dome roof. The work appears fair and substantial, and capable of sustaining the stone lantern which will now immediately be built upon it The alteration has, however, occasioned a delay of one month in finishing the roof of the north wing.

May 23, 1818.

Washington City, *November* 21, 1818.

Report of James Hoban, Superintendent of the President's house and executive offices, of the state of those buildings, and their progress during the current year.

Of the President's house.

The principal drawing-room, 80 by 40 feet, and 20 feet 6 inches elevation, has been floored, and the walls and ceiling plastered. The cornice, frieze, and architrave, with the centre-pieces in the ceiling, are nearly finished, all in stucco ornament; and the decorations in wood work of the doors and windows are nearly completed.

Early last spring, the arcade of the circular portico to the south front of the President's house, to give a communication from the house to the grounds to the south, had been carried up to the height of the plat band, or to the level of the principal floor of the house. Without this portico, the President can have no access to the south but by the cellar story. A part of the balustrade for the south portico is also prepared; and the upper work of the building to the south, the place of the portico, is insecure from the weather until the portico is completed, as may be seen on examination.

All the doors, doorways, and windows of the offices east and west of the President's house, and attached to that building, containing a temporary stable and carriage-house, ice-house, coal-house, &c., have been finished, with the exception of the plastering, which is in part done.

All the painting and glazing of the President's house and offices attached thereto, inside and outside, has been completed.

A temporary fence has been put up to enclose the area to the north of the President's house. The pedestal wall of granite stone has been built to receive the coping. The piers for gates, of cut stone, and the coping, are preparing. The gates, braces, and lamp-brackets, of wrought iron, and the upright bars, of cast iron, are in a state of preparation.

Of the executive offices.

The foundation of each of the offices has been dug, and the earth carried away. The walls of the basement stories have been built of granite stone, and the principal floors of each building, in extent 157 by 57 feet, have been arched or groined with brick.

The external of the basement stories, for five feet above the surface-level of the building, is faced with freestone, topped with a moulding, which forms a base to the upper stories. The external walls above the base on the outside are all of stock brick, laid in Flemish bond, and neat tuck joint; and the whole walls are built of best hard brick, laid in mortar made of stone lime and sharp river sand. The chimneys are all capped with cut stone, and moulded.

The cornices all round the building, and to the pediments, with the pilasters, bases, and capitals, string-courses, window-sills, and window-heads, are all of cut stone. The columns for the north porticoes, with the pediments and entablatures, are preparing.

The naked timbers of the two upper stories of each of the buildings, as trussed girders, joists, &c., are all in place, and the roofs are put on and boarded, and in part covered with best patent milled slate, screwed on. The gutters to convey water and the dormers are all covered with copper. The window frames are being put in the buildings, and the sashes are nearly ready for glazing. The glass (of best quality, Boston manufacture) is in part arrived, and the balance hourly expected.

I am, respectfully, sir, your obedient servant,

JAMES HOBAN.

Samuel Lane, Esq., *Commissioner of Public Buildings.*

15th Congress.] No. 460. [2d Session.

PRINTING FOR CONGRESS.

COMMUNICATED TO THE SENATE ON THE 17TH DECEMBER, 1818.

Mr. Wilson made the following report to the Senate:

The joint committee of the two Houses of Congress, on the subject of the public printing, beg leave to report, in part:

That they have examined the proposals of the Secretary of the Senate and Clerk of the House of Representatives, and find in them the following stipulation:

"In every instance the printer supplies the paper, and deposites the work, duly folded, (and stitched, when necessary;) and no possible delay is to occur in the *daily* execution and delivery of the work, so that, in all cases *where it is practicable*, the matter ordered to be printed on every given day may be ready for delivery next morning, at the hour to which the House so ordering the printing stands adjourned, except in the printing of the annual reports made from any of the Departments, under any permanent act requiring such reports; in which cases, forty-eight hours longer will be allowed."

In the proposals made by Mr. De Krafft to the Secretary of the Senate and Clerk of the House of Representatives, and which were accepted by the latter, is the following paragraph:

"It is to be expressly understood that I am to receive the *whole* of the printing, &c. of the Senate and House of Representatives for the fifteenth Congress; and for the *prompt execution* and fulfilment of the above propositions, should they be accepted, I offer as surety R. C. Weightman, Esq. of this city."

The committee have afforded Mr. De Krafft an opportunity to afford them all the information and explanation in his power. He avers that the printing has been done as promptly as *practicable*, agreeably to the conditions offered, and insists on his right to *the whole* of the printing, according to the words of his proposals.

The committee are, however, of opinion that *it is practicable*, with a greater number of hands and presses, to execute the business with much greater despatch; that the delays and disappointments experienced during this session, in relation to a number of documents, have not only been inconvenient to the members of both Houses, but highly detrimental to the public interests; and that it is absolutely necessary for the furtherance of the business of the nation to guard against such frequent and long disappointments in future; and they therefore recommend the adoption of the following resolution:

Resolved, That, when any printing is done by virtue of a joint rule or resolution of the two Houses, the Secretary of the Senate and Clerk of the House, jointly, and, when ordered by either House, the Secretary and Clerk, respectively, be authorized and required to employ such printer or printers as will most expedite its execution and delivery, and allow him or them the same prices as are now allowed to the printer employed by the said Secretary and Clerk, giving the latter *the preference* when it shall be *practicable* for him to execute and deliver it as soon as it can be done by any other printer or printers.

15th Congress.] No. 461. [2d Session.

CITY OF WASHINGTON: VINDICATION OF THE OFFICIAL CONDUCT OF THE LATE SURVEYOR OF THE PUBLIC BUILDINGS.

COMMUNICATED TO THE SENATE, ON THE 5TH JANUARY, 1819.

Sir: Washington, *December* 8, 1818.

Not being a resident of the city of Washington, I have only this morning seen and read the report of the Commissioner of the Public Buildings of the United States to the Senate of the United States, of the 23d of November, containing a report of Charles Bulfinch, Esq. of the 21st of November, and also his report of the 1st of May last, on the centre arch of the north wing of the Capitol.

In this latter report my design of that part of the building is censured, and the failure of the arch attributed to my want of professional skill in such unqualified terms, that I most respectfully beg leave to lay before you and the honorable House of Representatives the following representation of facts, appealing to the justice and candor of your honorable House to give to my defence, on a point involving the most important interest of an American citizen, and an old public servant, such consideration as it may appear to merit. When I resigned my office as surveyor of the Capitol, in November, 1817, as my motives were partly personal, I offered, in my letter of resignation, to give such drawings, instructions, and information to the public, as should enable my successor to complete the plans which I had begun, and which could not well be altered; and, although this offer was not noticed, so sensible was I of the disadvantage under which the public interests would labor unless I did give such information, that I employed nearly a month, without even the hope of compensation, in making the drawings which should explain and remove all probable difficulties in the execution of what I had proposed, as far as my plans might be thought worthy of execution. This drawing, and others sent from Baltimore, were sent to the proper authorities, and remain with them. The information thus given was the more necessary, because, a short time before my resignation, the commissioner had removed, against my earnest representations, the clerk of the works of the Capitol, Mr. Shadrach Davis, to the President's house, and had established at the Capitol the clerk of the works of the President's house, Mr. Peter Lenox. Mr. Shadrach Davis was perfectly master of my intentions respecting every part of the building, while Mr. Lenox (to whose skill and character as an able mechanic I most willingly bear testimony) was not only unacquainted with my design, but was inexperienced in the construction of arches generally. The arch in

question was not begun when I resigned my office. Mr. Bulfinch has, therefore, been entirely misinformed when he states (page 11) that the arch was constructed under the particular direction, and the "stones," &c. put in their places before Mr. Latrobe left the superintendence of the building; for, so far is this from being the fact, that, *after my resignation*, my anxiety respecting the proper construction of this arch was so great that I examined the stones which were in progress of cutting, and, finding that the workmen understood my intentions, I went upon the arch, and found the centre set up, but that the workmen did not know in what manner to form some of the caissons. I instructed them, and, visiting the work afterwards, I found the brick work advanced a few feet only; after which time I never saw the arch.

It is here necessary to state how an arch so important and difficult came to be at all necessary. After the 4th of March, 1817, the master stonecutter, without my knowledge or suspicion of such interference with my duties, made a report, which was laid before the President, in which, as I have been informed, he made objections to the construction which I had designed for the principal parts of the building. This report I know only from having been verbally informed by General Swift and Colonel Bomford, the engineers to whom it was referred, of the tendency of assertions in opposition to my opinions and practice which it contained. It occasioned me, however, infinite vexation and embarrassment. Its merit and character may be judged from its having been maintained therein that the marble of the columns could not be wrought and polished; that it would not bear its own weight; that the foundations were not sufficient to bear the columns and the arch above them; and that the columns would crumble under the superstructure; that the set walls of the north wing, to which the vault of the enlarged Senate chamber was to be transferred, would not bear it, although the walls of the Senate chamber, together with its brick vault, was at that moment carried by the arches only of the court room. These objections went to almost the whole of my design, but I believe that I proved satisfactorily to the enlightened judges to whom the President submitted the decision that they were not well founded, and my design was confirmed with the exception of the vaults of the Senate chamber and House of Representatives; and these were ordered to be made of timber, on the ground that, objections having been urged against their security, the moral effect on the apprehensions of the members and of the public was a sufficient ground for their being abandoned. I was therefore ordered to cover these chambers with timber vaults. Of many difficulties into which I was thus thrown, the greatest related to the arch in question.

1st. The existing walls of the House demanded that the vestibule of the Senate and the stairs of the attic should be lighted by a skylight, the centre of which falls six feet to the westward of the centre line of the building.

2d. The very numerous and scattered chimneys required that they should be carried out as high as possible, lest they should smoke by being overblown, and, at the same time, be extremely unsightly objects.

3d. The centre of the north wing demanded light from above; and its symmetry with the south wing, which could only be lighted by a cupola, demanded a similar construction on the north wing.

4th. Therefore it was almost unavoidable, and certainly it was highly advisable, that the chimneys should be carried up as well as concealed in the piers of the cupola. This had been done before, and, although the cupola was never raised above the dome, its base had existed, and, with the arches that supported it, remained unimpaired by the fire of 1814.

Had I been permitted, as formerly, to cover the Senate chamber with a brick vault, I should have had a most substantial foundation for all the weight and works above it, which would have been infinitely more cheap, commodious, and handsome than the arrangement into which I was forced, contrary to my judgment, not only as a professional man, but as a citizen anxious for the interests of the public.

But, deprived of this support, the object I had to attain was this: To construct over the cavity of the Senate chamber and its wooden dome an arch or other support sufficient to bear the cupola necessary to light the centre of the house, and also to carry sixteen or eighteen chimneys concealed in the cupola, and, at the same time, to produce a handsome effect in looking up from the vestibule of the Senate, from which the whole construction would be seen. And I believe that I perfectly attained this object in all its parts, provided the arch had been made to stand.

This, then, is the point which I have now to explain, and I will endeavor to do it in a manner which shall be intelligible even to those who are not conversant in such difficult works.

The arch in question was a semicircular arch, forty feet in diameter or span, extending over the whole vestibule in breadth, and so far beyond over the Senate chamber as to receive and bring the chimneys and cupola into the centre of the wing.

If a semicircular arch in any case were built so that it could not spread at the foot or springing, and were not loaded at the haunches or sides, but were narrow and of equal depth (say one brick thick) in its whole extent, then it would fall, by the sinking of the crown or top, inwards; while the sides or haunches would be thrown outwards. The same effect would be more powerfully produced if the crown were loaded with extraneous weight. It is therefore necessary always to load the haunches of every semicircular arch equally on both sides to a certain extent, which will always be in proportion to the weight on the crown, and which is subject to minute calculation. If the sides or haunches are too much loaded, then the arch will fall by the rising of the crown and the falling in of the haunches. This was nearly effected in the great bridge over the canal on the Jersey Avenue, where, contrary to my direction, the haunches were loaded so as to raise the crown five inches from the centre. It cannot be supposed that, when I designed the arch in question, I was ignorant of these principles, and that, had the arch been built as Mr. Bulfinch asserts, under my direction, I should have depended upon the flues as a counterpoise to the weight of the cupola, (see page 12, paragraph 4,) as Mr. Bulfinch appears to suppose that I should have done. On the contrary, I may, in common justice to the general success of my works, claim a belief that I should have loaded the arch equally on both sides, availing myself of the weight of the flues as far as they would go, and making up the deficiency with the coarsest and cheapest materials which I might have induced the commissioner to provide. In respect to the arch being broader on one side than on the other, that naturally resulted from the position of the cupola to the eastward of the centre of the vestibule. The additional breadth on the west side was not necessary to carry the cupola, but only to cover the vestibule. On the east side there was sufficient strength in the arch, had it remained upright, not only to have carried two hundred but two thousand tons; and the breadth on the west, which added nothing to the strength, could not deduct any thing from it.

I now come to the circular opening in the cupola yielding light to all below it. In the error committed on this part by the workmen, after my resignation, is the second cause of the failure of the arch.

Every *circular* opening in a cylindrical or barrel arch produces lateral pressure; that is, a pressure sideways across the arch. Can it possibly be supposed that I could overlook or be ignorant of this fact, or not have provided against it? The very construction of the base or rim of the opening in freestone, which could have been as well and much more cheaply made of bricks, (as all those of the vaults of the Senate chamber were,) proves that I had some object besides merely bordering the opening with stone to receive plastering. My intention was, when the stone curb or rim should be in its place, to have put an iron hoop round it, *as I have uniformly done* in every circular horizontal opening or springing in the whole Capitol, in which the lateral pressure was not otherwise resisted.

As the surface of the opening was cylindrical, it was not easy for the smith to form the hoop but upon the place itself, nor for the stonecutter to cut the channel to receive it until after the stones were set; and it was my intention, not only to have hooped the curb of the opening itself, but the course above it, and several of the superior courses, even to the very top of the cupola. Nothing, indeed, in the study of this whole design was so powerfully impressed on my mind as the possibility of the well or cylinder of the cupola opening by the settlement of the arch underneath. Whether I explained my intention respecting a distant operation to any one but Mr. Davis, whose duty it was to see it executed, I cannot now recollect. But I certainly consider it a thing so much of course, and of daily example at the Capitol, as possibly to have said little on the subject. But, after my resignation, I went expressly on the arch for no other purpose than to advise Mr. Queen, the master mason, to lay thin hoop iron into each joint in order to prevent the arch from spreading laterally, as he will no doubt recollect. It is, indeed, somewhat extraordinary that these very flues and the lower part of the cupola were, before the conflagration, all of them carried upon the weakest of all arches, a spandrell dome, hooped by broad nail rods *riveted* only together, and resting upon very flat segments, arches fitted with caissons. Now these very caissons, which, while they lightened, did not weaken the arch, and which have been the common ornament of every such arch for more than two thousand years, are, in Mr. Bulfinch's opinion, one of the causes of its failure. That the crack should have passed through them, and that the stones surrounding the rim should have been cracked, and the joints opened, when, by the neglect to load the haunches, and provide against the lateral movement of the arch, it spread from west to east, was to be expected; but it is evident that, unless the materials had been crushed to dust by the pressure (comparatively light) of the cupola, the arch, as long as it stood upright, could not possibly have failed.

In order to meet an objection which may occur, that an architectural work ought to stand firmly by virtue of its construction, and not depend upon iron or any other tie, I beg leave to add that in many cases (and the present is one of them) peculiarities of construction occur in which the strength of mortar or cement must be partly depended upon for the stability of a work; and that, until the cement has time to harden, it is necessary to keep the work together by bands of iron or timber. Both iron and timber, when completely buried in lime or mortar, and entirely secluded from the action of the air, are as indestructible as marble, a proof of which has been discovered in a temple at Athens, built two thousand years ago, in which the cedar pieces inserted between the marble blocks of which the columns were composed, to the perfect exclusion of air, were found in perfect preservation.

It has, therefore, been the practice of the greatest architects to surround circular openings and domes with iron chains or bands. The enormous dome and cone of St. Paul's, (see Wren's Parentalia,) the double dome of the Invalids, and the triple dome of St. Genevieve, and I may say all the great domes that spring above their lower piers and abutments, are thus confined, and, in fact, could not have been constructed by any other method; but especially the several domed stories of Eddystone light-house, which could not otherwise have stood at all, and which have now resisted the attacks of the Atlantic ocean for more than sixty years, are hooped by iron chains. In our own country the flat dome of the Bank of Pennsylvania, weighing more than three thousand tons, and that of the centre engine, loaded on the crown, besides its own weight, with fifty tons and upwards of marble chimneys, depend upon hoops of iron. The double dome of the Exchange of Baltimore, of fifty feet diameter, and that of the Cathedral, of sixty-eight feet, are bound not only by iron chains, but by frames of oak, and are perfectly sound; and all these and some other domes have been constructed by myself, and I will only add that all the domes in the Capitol have been thus secured until now.

It is my opinion, however, from all I have learnt, that the arch would have stood even without a hoop, had it been loaded with judgment, and the centre struck at the proper time. No blame may, however, attach to my successor, who, erroneously believing that I had directed the work, did not think it necessary to give his own instructions respecting it; for had he calculated the amount and direction of lateral pressure, under the circumstances of the case, it cannot be doubted but that he would have given success to the original plan. And this is the more probable, because it appears, from the foundations of the centre, that Mr. Bulfinch is a much bolder architect than myself, as he has ventured to omit all those precautions in securing so heavy a building on so bad a foundation, which I should have thought indispensable.

I now most respectfully solicit indulgence for this defence of my professional character, on the reputation of which the support of my family entirely depends. The report which has attributed to me ignorance or neglect of the plainest principles of my profession is printed, and will be transmitted to posterity with the records of your honorable House; it became, therefore, a duty to submit to you its defence.

I am, with the highest respect, your obedient servant,

BENJ. HENRY LATROBE,
Late Surveyor of the Public Buildings, &c.

The Hon. JOHN GAILLARD, *President of the Senate, &c.*

15th CONGRESS.] No. 462. [2d SESSION.

ROADS AND CANALS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 14, 1819.

SIR: DEPARTMENT OF WAR, *January* 7, 1819.

In compliance with a resolution of the House of Representatives of the 4th of April, 1818, instructing the Secretary of War to report to that House at their next session "a plan for the application of such means as are within the power of Congress, for the purpose of opening and constructing such roads and canals as may deserve and require the aid of Government, with a view to military operations in time of war; the transportation of munitions of war; and also a statement of the nature of the works above mentioned, which have been commenced, the progress which has been made, and the means and prospect of their completion; together with such information as, in the opinion of the Secretary, shall be material in relation to the objects of the resolution;" I have the honor to make the following report:

A judicious system of roads and canals, constructed for the convenience of commerce, and the transportation of the mail only, without any reference to military operations, is itself among the most efficient means for "the more complete defence of the United States." Without adverting to the fact that the roads and canals which such a system would require are, with few exceptions, precisely those which would be required for the operations of war, such a system, by consolidating our Union, and increasing our wealth and fiscal capacity, would add greatly to our resources in war. It is in a state of war, when a nation is compelled to put all of its resources in men, money, skill, and devotion to country into requisition, that its Government realizes in its security the beneficial effects from a people made prosperous and happy by a wise direction of its resources in peace. But I forbear to pursue this subject, though so interesting, and which, the further it is pursued, will the more clearly establish the intimate connexion between the defence and safety of the country and its improvement and prosperity, as I do not conceive that it constitutes the immediate object of this report.

There is no country to which a good system of military roads and canals is more indispensable than to the United States. As great as our military capacity is, when compared with the number of our people, yet, when considered in relation to the vast extent of our country, it is very small; and if so great an extent of territory renders it very difficult to conquer us, as has frequently been observed, it ought not to be forgotten that it renders it no less difficult for the Government to afford protection to every portion of the community. In the very nature of things, the difficulty of protecting every part, so long as our population bears so small a proportion to the extent of the country, cannot be entirely overcome, but it may be very greatly diminished, by a good system of military roads and canals. The necessity of such a system is still more apparent, if we take into consideration the character of our political maxims and institutions. Opposed in principle to a large standing army, our main reliance for defence must be on the militia, to be called out frequently from a great distance, and under the pressure of an actual invasion. The experience of the late war amply proves, in the present state of our internal improvements, the delay, the uncertainty, the anxiety, and exhausting effects of such calls. The facts are too recent to require details, and the impression too deep to be soon forgotten. As it is the part of wisdom to profit by experience, so it is of the utmost importance to prevent a recurrence of a similar state of things, by the application of a portion of our means to the construction of such roads and canals as are required "with a view to military operations in time of war, the transportation of the munitions of war, and more complete defence of the United States."

In all questions of military preparations, three of our frontiers require special attention: the eastern, or Atlantic frontier; the northern, or Canadian frontier; and the southern, or the frontier of the Gulf of Mexico. On the west and northwest we are secure, except against Indian hostilities; and the only military preparations required in that quarter are such as are necessary to keep the Indian tribes in awe, and to protect the frontier from their ravages. All of our great military efforts growing out of a war with a European Power must for the present be directed towards our eastern, northern, or southern frontiers; and the roads and canals which will enable the Government to concentrate its means for defence, promptly and cheaply, on the vulnerable points of either of those frontiers, are those which, in a military point of view, require the aid of the Government. I propose to consider each of those frontiers separately, beginning with the Atlantic, which, in many respects, is the weakest and most exposed.

From the mouth of the St. Croix to that of the St. Mary's, the two extremes of this frontier, is a distance along the line of the coast and principal bays, without following their sinuosities, of about 2,100 miles. On this line, including its navigable rivers and bays, are situated our most populous cities, the great depots of the wealth and commerce of the country. That portion of it which extends to the south of the Chesapeake has, with the exceptions of the cities and their immediate neighborhood, a sparse population, with a low marshy country, extending back from 100 to 150 miles. To the north of the Chesapeake, inclusive, it affords everywhere deep and bold navigable bays and rivers, which readily admit vessels of any size. Against a line so long, so weak, so exposed, and presenting such strong motives for depredations, hostilities the most harassing and exhausting may be carried on by a naval Power; and should the subjugation of the country ever be attempted, it is probable that against this frontier, facing Europe, the seat of the great Powers of the world, the principal efforts would be turned. Thus circumstanced, it is the duty of the Government to render it as secure as possible. For much of this security we ought to look to a navy and a judicious and strong system of fortifications; but not to the neglect of such roads and canals as will enable the Government to concentrate promptly and cheaply, at any point which may be menaced, the necessary force and means for defence.

To resist ordinary hostilities, having for their object the destruction of our towns, and the exhaustion of our means, the force ought to be drawn from the country lying between the coast and the sources of the principal rivers which discharge through it into the ocean; but to resist greater efforts, aiming at conquest, should it ever be attempted, the force and resources of the whole community must be brought into resistance. To concentrate, then, a sufficient force on any point of this frontier which may be invaded, troops must be marched, and munitions of war transported either along the line of the coast, or from the interior of the Atlantic States to the coast; or, should the invading force be of such magnitude as to require it, from the western States; and the roads and canals necessary for the defence of this frontier are those which will render these operations prompt, certain, and economical.

From the coast to the Allegany mountains, and the high land separating the streams which enter into the St. Lawrence from those of the Atlantic, in which the principal Atlantic rivers take their rise, the distance may be averaged at about two hundred and fifty miles; and the whole extent from the St. Mary's to the St. Croix is intersected at short intervals by large navigable rivers, and the principal roads of this portion of our country, through which its great commercial operations are carried on. These, aided by the steamboats now introduced on almost all of our great rivers, present great facilities to collect the militia from the interior, and to transport the necessary supplies and munitions of war.

Much undoubtedly remains to be done to perfect the roads and improve the navigation of the rivers; but this, for the most part, may be safely left to the States and the commercial cities particularly interested, as the appropriate objects of their care and exertions. The attention of both has recently been much turned towards these objects, and a few years will probably add much to facilitate the intercourse between the coast and the interior of the Atlantic States. Very different is the case with the great and important line of communication extending along the coast through the Atlantic States. No object of the kind is more important; and there is none to which state or individual capacity is more inadequate. It must be perfected by the General Government, or not be perfected at all, at least for many years. No one or two States have a sufficient interest. It is immediately beneficial to more than half of the States of the Union, and, without the aid of the General Government, would require their co-operation. It is at all times a most important object to the nation, and, in a war with a naval Power, is almost indispensable to our military, commercial, and financial operations. It may, in a single view, be considered the great artery of the country; and when the coasting trade is suspended by war, the vast intercourse between the north and south, which annually requires five hundred thousand tons of shipping, and which is necessary to the commerce, the agriculture, and manufacture of more than half of the Union, seeks this channel of communication. If it were thoroughly opened by land and water; if Louisiana were connected by a durable and well-finished road

with Maine, and Boston with Savannah by a well-established line of inland navigation, for which so many facilities are presented, more than half of the pressure of war would be removed. A country so vast in its means, and abounding in its various latitudes with almost all of the products of the globe, is a world of itself; and with the facility of intercourse, to perfect which the disposable means of the country is adequate, would flourish and prosper under the pressure of a war with any Power. But, dropping this more elevated view, and considering the subject only as it regards "military operations in time of war, and the transportation of the munitions of war," what could contribute so much as this communication to the effectual and cheap defence of our Atlantic frontier? Take the line of inland navigation along the coast, the whole of which, it is estimated, could be completed for sea vessels by digging one hundred miles, and at the expense of $3,000,000, the advantage which an enemy with a naval force now has, by rapidly moving along the coast, and harassing and exhausting the country, would be in a great measure lost to him. In fact, the capacity for rapid and prompt movements and concentration would be to the full as much in our power. We would have, in most of the points of attack, a shorter line to move over, in order to concentrate our means; and, aided by steamboats, would have the capacity to pass it in a shorter time and with greater certainty, than an enemy, even with a naval superiority, would have to attack us. Suppose the fleet of such an enemy should appear off the capes of Delaware; before it could possibly approach and attack Philadelphia, information, by telegraphic communication, might be given to Baltimore and New York, and the forces stationed there thrown in for its relief. The same might take place if Baltimore or New York should be invaded; and should an attack be made on any of our cities, the militia and regular forces at a great distance along the coast could in a short time be thrown in for its relief. By this speedy communication, the regular forces, with the militia of the cities and their neighborhood, would be sufficient to repel ordinary invasions, and would either prevent, or greatly diminish, the harassing calls upon the militia of the interior. If to these considerations we add the character of the climate of the southern portion of the Atlantic frontier, so fatal to those whose constitutions are not inured to it, the value of this system of defence, by the regular troops and the militia accustomed to the climate, will be greatly enhanced. Should this line of inland navigation be constructed, to enjoy its benefits fully it will be necessary to cover it against the naval operations of an enemy. It is thought that this may be easily effected to the south of the Chesapeake, by land and steam batteries. That bay is itself one of the most important links in this line of communication, and its defence against a naval force ought, if practicable, to be rendered complete. It was carefully surveyed the last summer by skilful officers for this purpose, in part, and it is expected that their report will throw much light upon this important subject. Long Island sound, another part of the line which is exposed, can be fully defended by a naval force only.

It remains, in relation to the defence of the Atlantic frontier, to consider the means of communication between it and the western States, which require the aid of the Government. Most of the observations made relative to the increased strength and capacity of the country to bear up under the pressure of war, from the coastwise communication, are applicable in a high degree at present, and are daily becoming more so, to those with the western States; and should a war for conquest ever be waged against us, (an event not probable, but not to be laid entirely out of view,) the roads and canals necessary to complete the communication with that portion of our country would be of the utmost importance.

The interest of commerce and the spirit of rivalry between the great Atlantic cities will do much to perfect the means of intercourse with the west. The most important lines of communication appear to be from Albany to the lakes; from Philadelphia, Baltimore, Washington, and Richmond, to the Ohio river; and from Charleston and Augusta to the Tennessee—all of which are now commanding the attention, in a greater or less degree, of the sections of the country immediately interested. But in such great undertakings, so interesting in every point of view to the whole Union, and which may ultimately become necessary to its defence, the expense ought not to fall wholly on the portions of the country more immediately interested. As the Government has a deep stake in them, and as the system of defence will not be perfect without their completion, it ought at least to bear a proportional share of the expense of their construction.

I proceed next to consider the roads and canals connected with the defence of our northern frontier. That portion of it which extends to the east of Lake Champlain has not heretofore been the scene of extensive military operations, and I am not sufficiently acquainted with the nature of the country to venture an opinion whether we may hereafter be called on to make considerable military efforts in that quarter. Without, then, designating any military improvements as connected with this portion of our northern frontier, I would suggest the propriety, should Congress approve of the plan for a military survey of the country, to be hereafter proposed, to make a survey of it the duty of the engineers who may be designated for that purpose.

For the defence of the other part of this line of frontier, the most important objects are, a canal or water communication between Albany and Lake George and Lake Ontario, and between Pittsburg and Lake Erie. The two former have been commenced by the State of New York, and will, when completed, connected with the great inland navigation along the coast, enable the Government, at a moderate expense and in a short time, to transport munitions of war, and to concentrate its troops from any portion of the Atlantic States, fresh and unexhausted by the fatigue of marching, on the inland frontier of the State of New York. The road, commenced by order of the Executive, from Plattsburg to Sackett's Harbor, is essentially connected with military operations on this portion of the northern frontier. A water communication from Pittsburg to Lake Erie would greatly increase our power on the upper lakes. The Allegany river, by its main branch, is said to be navigable within seven miles of Lake Erie, and by French creek within sixteen miles. Pittsburg is the great military depot of the country to the west of the Alleganies, and, if it were connected by a canal with Lake Erie, would furnish military supplies with facility to the upper lakes, as well as to the country watered by the Mississippi. If to these communications we add a road from Detroit to Ohio, which has already been commenced, and a canal from the Illinois river to Lake Michigan, which the growing population of the State of Illinois renders very important, all the facilities which would be essential "to carry on military operations in time of war, and the transportation of the munitions of war" for the defence of the western portion of our northern frontier, would be afforded.

It only remains to consider the system of roads and canals connected with the defence of our southern frontier, or that on the Gulf of Mexico. For the defence of this portion of our country, though at present weak of itself, nature has done much. The bay of Mobile, and the entrance into the Mississippi through all its channels, are highly capable of defence. A military survey has been made, and the necessary fortifications have been commenced, and will be in a few years completed. But the real strength of this frontier is the Mississippi, which is no less the cause of its security than that of its commerce and wealth. Its rapid stream, aided by the force of steam, can, in the hour of danger, concentrate at once an irresistible force. Made strong by this noble river, little remains to be done by roads and canals for the defence of our southern frontier. The continuation of the road along the Atlantic coast from Milledgeville to New Orleans, and the completion of the road which has already been commenced from Tennessee river to the same place, with the inland navigation through the canal of Carondelet, Lake Pontchartrain, and the islands along the coast, to Mobile, covered against the operations of a naval force, every facility required

for the transportation of munitions of war, and movements and concentration of troops, to protect this distant and important frontier, would be afforded.

Such are the roads and canals which military operations in time of war, the transportation of the munitions of war, and the more complete defence of the United States, require.

Many of the roads and canals which have been suggested are no doubt of the first importance to the commerce, the manufacture, the agriculture, and political prosperity of the country, but are not, for that reason, less useful or necessary for military purposes. It is, in fact, one of the great advantages of our country, enjoying so many others, that, whether we regard its internal improvements in relation to military, civil, or political purposes, very nearly the same system, in all its parts, is required. The road or canal can scarcely be designated, which is highly useful for military operations, which is not equally required for the industry or political prosperity of the community. If those roads or canals had been pointed out which are necessary for military purposes only, the list would have been small indeed. I have, therefore, presented all, without regarding the fact that they might be employed for other uses which, in the event of war, would be necessary to give economy, certainty, and success to our military operations, and which, if they had been completed before the late war, would, by their saving in that single contest in men, money, and reputation, have more than indemnified the country for the expense of their construction. I have not prepared an estimate of expenses, nor pointed out the particular routes for the roads or canals recommended, as I conceive that this can be ascertained with satisfaction only by able and skilful engineers, after a careful survey and examination.

I would therefore respectfully suggest as the *basis* of the system, and the first measure in the "plan for the application of such means as are in the power of Congress," that Congress should direct such a survey and estimate to be made, and the result to be laid before them as soon as practicable. The expense would be inconsiderable, for, as the army can furnish able military and topographical engineers, it would be principally confined to the employment of one or more skilful civil engineers to be associated with them. By their combined skill, an efficient system of military roads and canals would be presented in detail, accompanied with such estimates of expenses as may be relied on. Thus, full and satisfactory information would be had; and though some time might be lost in the commencement of the system, it would be more than compensated by its assured efficiency when completed.

For the construction of the roads and canals which Congress may choose to direct, the army, to a certain extent, may be brought in aid of the moneyed resources of the country. The propriety of employing the army on works of public utility cannot be doubted. Labor adds to its usefulness and health. A mere garrison life is equally hostile to its vigor and discipline; both officers and men become the subjects of its deleterious effects. But when the vast extent of our country is compared with the extent of our military establishment, and taking into consideration the necessity of employing the soldiers on fortifications, barracks, and roads, connected with remote frontier posts, we ought not to be sanguine in the expectation of aid to be derived from the army in the construction of permanent military roads and canals at a distance from the frontiers. When our military posts come to be extended up the Mississippi and Missouri as far as is contemplated, the military frontier of the United States, not including sinuosities, and the coasts of navigable bays and lakes opening into our country, as was stated in a former report, will present a line of more than nine thousand miles, and, including them, of more than eleven thousand. Thinly scattered along so extensive a frontier, it will be impossible, I fear, without leaving some points exposed, to collect any considerable bodies in the interior of the country to construct roads and canals.

As connected with this subject, I would respectfully suggest the propriety of making an adequate provision for the soldiers while regularly and continually employed in constructing works of public utility. The present allowance is fifteen cents a day, which is considered sufficient in occasional fatigue duty, such as is now done at most of the posts; but if systematic employ on permanent works should be made the regular duty of the soldiers who can be spared for that purpose, a compensation (taking into the estimate the obligation of the Government to provide medical attendance and pensions to the diseased and disabled soldiers) not much short of the wages of daily labor ought to be granted to them. Without such provision, which is dictated by justice, an increase of desertion and difficulty in obtaining recruits ought to be expected. Among the leading inducements to enlist is the exemption from labor; and if the life of a soldier should be equally subjected to it as that of other citizens in the same grade, he will prefer, if the wages are much inferior, to labor for himself to that of laboring for the public. The pay of a soldier is sixty dollars per annum; and if he were allowed, when employed permanently on fatigue, twenty-five cents a day, and suppose him to be employed two hundred days in the year, his compensation, including his pay, would be one hundred and ten dollars per annum—a sum, it is thought, considerably short of the average wages of labor. If this sum should be allowed, the greater portion of it ought to be paid at the expiration of the term of enlistment. If fifteen cents a day were so reserved, and the soldier should be employed one thousand days in the five years for which he is enlisted, it would constitute a sum of one hundred and fifty dollars, to be paid at the expiration of his term, which ought, in the same manner as the bounty land, to be made to depend on an honorable discharge. This would furnish an important hold on the fidelity of the soldier, and would be a powerful check to the great and growing crime of desertion. An honorable discharge is now worth but little to the soldier, and the consequence is, that desertions are more frequent with those enlisted since the war than those who were then enlisted, and are entitled to the bounty in land on their honorable discharge; the latter patiently waits the expiration of his term of service, while the former frequently seizes the first favorable opportunity for desertion.

Should Congress think proper to commence a system of roads and canals for the "more complete defence of the United States," the disbursement of the sums appropriated for the purpose might be made by the Department of War, under the direction of the President. Where incorporated companies are already formed, or the road or canal commenced under the superintendence of a State, it perhaps would be advisable to direct a subscription on the part of the United States, on such terms and conditions as might be thought proper. In other cases, and where the army cannot be made to execute it, the work ought to be done by contract, under the superintendence and inspection of officers of the engineer corps, to be detailed for that purpose. It is thus the Government will be able, it is thought, to construct on terms at least as favorable as corporate companies. The system of constructing all public works (which admit of it) by contract would be attended with important advantages. It has recently been adopted in the construction of fortifications, and, it is expected, will be attended with beneficial effects. The principal works at Mobile and New Orleans have been contracted for on terms considerably under the estimates of the engineers. Such a system extended to military roads and canals, combined with a careful inspection and superintendence by skilful engineers, will enable the Government to complete them with economy, durability, and despatch.

In the view which has been taken, I have thought it improper, under the resolution of the House, to discuss the constitutional question, or how far the system of internal improvements which has been presented may be carried into effect on the principles of our Government; and, therefore, the whole of the arguments which are used, and the measures proposed, must be considered as depending on the decision of that question.

The only military roads which have been commenced are, from Plattsburg to Sackett's Harbor, through the Chateaugay country; from the southern boundary of the State of Tennessee, and crossing the Tennessee river, near

the Muscle Shoals, to Madisonville, Louisiana; and from Detroit to Fort Meigs, at the foot of the rapids of the Miami of the Lakes. Documents marked A, B, and C show the progress which has been made. These roads have been commenced and thus far completed by the labor of the soldiers, who, while they are so employed, receive fifteen cents per day, with an extra allowance of a gill of whiskey. The labor of the troops is the only means within the reach of the Department of completing these roads; and as the troops are so employed only when they are not engaged in active service, it is impossible to state with accuracy when the roads will be completed.

J. C. CALHOUN.

The Hon. HENRY CLAY, *Speaker of the House of Representatives.*

A.

SIR: HEAD-QUARTERS, BROWNSVILLE, *December* 6, 1818.

Your letter, covering a copy of one of the 11th of August, calling for a report of the labor performed on the road leading from Sackett's Harbor through the Chateaugay country, is before me.

My letter of the 29th of November will inform you what has been done, but I fear will not exhibit the progress of this work to the extent you have expected. It may, therefore, be proper to state in this place that, when the President, in the autumn of 1817, directed the road in question to be opened and improved, I did not understand that the second regiment was to be ordered from the duty it was then upon. This regiment, at the time referred to, was employed enclosing with pickets the public ground at Sackett's Harbor, and that duty occupied them the remainder of the season. Expecting, the troops at the Harbor would have been employed in completing the barracks at that place this year, they were not put upon the road, but allowed to be engaged in improving the public grounds for gardens; and, as these grounds were new, it required much labor to put them in good condition.

These causes, and the reasons assigned in my letters from this place and Plattsburg, produced the delay that has occurred in putting Colonel Brady's command upon the road; and, if your letter of the 11th of August had not been received upon my return to this place, I fear that this work would not yet have been commenced.

I pray you to believe that I regret the delay, and I beg you to see good cause for it in the reasons I have endeavored to assign.

It is due to the command of Colonel Brady and that of Colonel Atkinson to say that they have discovered not only a becoming cheerfulness in obeying the orders received for perfecting the Plattsburg and Sackett's Harbor road, but much zeal in the performance of this duty; and if these regiments are continued upon this important work the next season, more than double the length of way will be completed than has been passed the last and the present year.

With respect, I have the honor to be your obedient servant,

JACOB BROWN.

Hon. J. C. CALHOUN, *Secretary of War.*

B.

HEAD-QUARTERS, DIVISION OF THE SOUTH,

SIR: ADJUTANT GENERAL'S OFFICE, NASHVILLE, *September* 19, 1818.

On the eve of setting out for the Chickasaw territory, I deem it necessary to inform you that no reports have been received as yet, of a particular character, in relation to the military road now opening from Columbia, Tennessee, to Madisonville; but I am enabled to inform you, officially, that fifty miles have been completed by the troops on the lower part of the road, making many causeways and bridges of the most durable materials; and the detachment on this end has progressed about forty miles south of Tennessee river, making, in like manner, many bridges and causeways.

It is considered that the most laborious part of the road has been completed, and, from every information, it has been done in the best manner. An increase of men has been recently afforded to the detachment south of Tennessee river, which will enable it to progress with much greater facility.

Should I receive minute reports shortly, I shall communicate their contents without delay.

I have the honor to be, very respectfully, your most obedient servant,

ROBERT BUTLER, *Adjutant General.*

J. C. CALHOUN, Esq., *Secretary of War.*

C.

SIR: HEAD-QUARTERS, DETROIT, *November* 2, 1818.

I have the honor to report that the military way directed to be opened from this place to the rapids of the Miami has progressed as far as the Eight Mile creek, that is, within eight miles of the rapids, making, in all, a distance of seventy miles. The road is truly a magnificent one, being eighty feet wide, cleared of all the logs and underbrush, every low place causewayed, and all the creeks and rivers requiring it bridged in a substantial manner. The number of causeways exceeds sixty, and the bridges are of considerable length. The one on which the troops are now employed is four hundred and fifty feet in length, constructed of strong oak framed work. It was found impossible to complete the road to the rapids this season, on account of the time and labor required in throwing bridges over the larger streams; it was also deemed more essential to complete the bridges than to cut the road this season to the rapids, as the road would be useless without the means of crossing the large streams.

The officers and soldiers who have been employed on this service deserve much credit for the zeal and perseverance they have displayed on this occasion. The work they have performed has proved highly beneficial both to the people of the country and to the Government. Besides greatly adding to the defence and strength of this frontier, the road has been the means of developing the richness of the public lands in this Territory, and greatly augmenting their value.

As soon as Major Anderson, topographical engineer, can complete the survey of the road, a more minute and particular description of the work will be forwarded.

I have the honor to be, with great respect, sir, your obedient and very humble servant,

ALEX. MACOMB.

The Hon. J. C. CALHOUN, *Secretary of War, &c.*

15th Congress.] No. 463. [2d Session.

WEIGHTS AND MEASURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 25, 1819.

Mr. Lowndes made the following report:

The committee appointed to inquire whether it be expedient to make any amendment in the laws which regulate the coins of the United States and foreign coins, having been instructed also to inquire into the expediency of fixing the standard of weights and measures, have obtained, on the latter subject, nearly all the information which they had expected to procure during the present session of Congress, and respectfully submit their report:

The weights and measures in use in all the States of the Union have been derived from England. In Louisiana they were, until lately, French; but a recent law has established such as conform to those of the other States. The laws of the colonies, before the Revolution, evidence some attention to their regulation; but, since that event, there have been very few legislative provisions upon the subject in any of the States. But the highly commercial character of the people, their frequent changes of residence, and the absence of feudal institutions, have prevented the establishment of those local usages which are so embarrassing to the internal trade of most of the states of Europe. Although in some of the United States there are no laws for the regulation of weights and measures, and very defective laws in the others, yet is there more uniformity in the composition and division both of weights and measures in the United States, than there was in France before the ado ption of her new metrical system, or than there is in England now. Indeed, he must be a negligent observer of the manners, the legislation, and even the language of the country, who does not remark the strong tendency to uniformity which prevails everywhere throughout it. This circumstance facilitates the establishment of a national standard of weights and measures, without superseding its necessity. Where standards are established by the laws of the States, they are in general such as exist in a foreign country, and are inconsistent with each other. The difference which subsists between the weights and measures of the different States is certainly less than might have been expected under such circumstances; but it is not inconsiderable.

The documents which accompany this report show a difference of fifty-one grains between the pound weights at Baltimore and Philadelphia; and one of them affords evidence that some banks have used weights for money which are considerably lighter than those of the mint. Our information on the discordance of measures is less precise and authentic; but (although the committee have been disappointed in the hope of obtaining a satisfactory comparison between those of different States) yet the greater difficulties in the comparison of measures of capacity than of weights, and the known inequality between the English models, from which our measures were originally taken, do not allow us to doubt that the difference of measure in the United States is still greater than that of weights.

The measures used in surveying the lands of the United States are all compared, as the committee have understood, with a brass chain, made under the direction of Mr. Rittenhouse; but, in general, the officers of the United States employ the weights and measures which are established, or rather used, in the districts in which they live. The changes which have been made by custom in the weights and measures of the United States are such as add to their simplicity. We have discontinued the use of many English weights and measures, and have introduced no new ones.

Of weights, we use the pound and ounce avoirdupois, and the troy grain, with the pennyweight; and for medicine, the scruple and drachm. The troy pound and ounce have been discontinued.

Of lineal measures, we use, generally, the inch, foot, yard, fathom, perch or pole, furlong, mile, and league.

We have discontinued the barleycorn, palm, link, nail, span, cubit, and pace.

For dry measures of capacity, we use the pint, quart, gallon, peck, and bushel.

We have discontinued the pottle, loom, quarter, wey, and last.

Of liquid measures, we have discontinued the ale and beer measure, and apply to all liquids the English wine measure.

We use the gill, pint, quart, and gallon. We have discontinued the rundlet.

In superficial measure, we use the inch, foot, yard, pole, rood, and acre, and have discontinued the pace.

For the measurement of firewood, we use the English cord; and for coal, the common bushel, heaped. We have discontinued the chaldron.

The committee are unanimous in the opinion that this subject ought not to be left to uncertain usages, or to the various laws of particular States. They will not enlarge upon its importance. Commercial credit is well secured in every part of this country, by enforcing the punctual performance of contracts. But commerce itself could hardly subsist, unless some security were given (beside the judgment of the purchaser) that the article which he buys is of the quantity which the seller describes; that the weight or measure which is employed is fair. The duty of providing this security has been devolved by the constitution upon Congress; and the committee express, with great respect, their opinion that it should not be neglected any longer.

It has been frequently proposed in foreign countries "to employ, as the fundamental unit of all measures, a type which should be taken from nature," and be exempt from the alterations to which arbitrary standards are exposed. In execution of this plan, the Government of France has employed, as the base of its system of measures, that arc of the terrestrial meridian passing through Paris which is contained between the equator and the north pole. It has adopted the ten millionth part of this arc as the unit of measures of length, calling it the metre, and deducing from it all its other measures and weights. It has taken, as the unit of superficial measures, the arc or square of ten metres; as the unit of measures of capacity, both for liquids and dry goods, the litre, or cube of the tenth part of the metre; as the unit of measures particularly intended for firewood, the stere, or cubic metre; and as the unit of weight, the gramme, or absolute weight of a volume of pure water in its state of greatest density, equal to the cube of the hundredth part of the metre.

The standard metre is placed on a rod of platina, and a kilogramme of platina (equal to a thousand grammes) has been declared by a law of 1800 to be the standard of weight.

The Government of the Netherlands has lately adopted the French system without material modification.

The establishment of a standard of weights and measures, which should be deduced from an invariable type in nature, has been more than once discussed in the English Parliament; but nothing definitive has yet been done in it.

In the United States, although the matter has been recommended to Congress by successive Presidents, no progress has been made in determining upon a standard of weights and measures beyond that of receiving a report

from the first Secretary of State, Mr. Jefferson. [See vol. 1, page 13.] Mr. Jefferson considers matter, by its mere extension, as furnishing nothing invariable; and its motion as the only remaining resource. He proposes the length of a metallic rod which shall vibrate seconds of mean time at the level of the ocean, in the forty-fifth parallel of north latitude, as the foundation of a system of measures for the United States. The committee abstain from the free quotations which they would otherwise make from this report, on the presumption that its principal views are in the memory of the House.

They do not know that any attempt at a general reform of weights and measures has of late been made in any other country.

The efforts to establish natural standards sufficiently prove the sense entertained of their advantages. These are strongly stated in the report of a commission of the French Institute, to which the subject had been referred by their Government "on the measurement of degrees of the meridian in France, and on the results which have been deduced from it for the determination of the basis of the new system of measures."

"It is the essential advantage," they say, "of this system, that even if all the standards should be destroyed or annihilated, leaving no other trace but the knowledge that one of them was the ten millionth part of the quarter of the terrestrial meridian, and the other the quantity of water taken in its state of greatest density, and contained in the cube of the tenth part of the first unity, the primitive value of both might be yet recovered."

Of the particular system adopted by France, they observe "that its parts are all intimately connected with each other, all dependant upon the primitive type; and its multiples and subdivisions follow a progression which is natural, simple, easily understood, and always uniform." These advantages were held to justify the expectation that the standard established in France would become the universal standard among civilized nations.

But the plan of obtaining an invariable standard from nature is of no easy execution. The type of such a standard should be equally accessible to all nations. This, indeed, the system is admitted to require. But the figure of the earth is irregular to observation. We do not know that gravitation is uniform in different longitudes, though in the same latitude; nor that the different meridians are similar; nor even that the two hemispheres on each side of the equator are equal. If the establishment of the same meridian be proposed, or for the pendulum the same longitude and latitude, it will follow that every country but one must verify its standard in a foreign state. If the figure of the earth be irregular, the extent of that part of the meridional arc which is obtained by computation must be uncertain; and even in ascertaining the part which is submitted to actual measurement, the most perfect instruments and the highest experience have left the accuracy of such a process in some doubt. The improvement which has been lately proposed in the use of the pendulum seems likely to make it more sensible, but not more uniform; and it is singular that respectable authorities differ by more than half an inch (39-100) as to the length of the pendulum which will vibrate seconds at the same level, and at the very latitude (that of forty-five) which has been proposed for the regulating pendulum. If, however, on either plan, a fixed proportion be established by law between the standard and a natural type, the standard itself, whose name and office imply immutability, must change with every corrected estimate of the type which is its base. The first standard of the French measures was accordingly declared to be provisional.

Whether standards derived from the natural types which have been proposed have all the advantages which have been attributed to them, seems therefore to be questionable; and the inconveniencies of change are not small. If a difference between the measures of two neighboring towns afford opportunities for fraud, how much greater must these be when entirely new measures are first introduced through a whole country? We have reason, from the experience of France, to think that these will be adopted slowly and imperfectly; partially in some places, and in all with the confusion which results from retaining both the old names and the old divisions, and giving them a new and a double meaning. It is obvious, in such a case, whatever benefits uniformity and system may give to posterity, that the present age must pay no scanty price for them. The difference between the weights and measures of the several provinces of France was so great that uniformity could not have been obtained without violent innovations. But such is not their condition in the United States.

The principal advantage of deducing a standard of measure from an invariable type in nature is represented to be, that, in the event of its loss or destruction, it may be restored without variation; but the proportion which either natural or arbitrary standards bear to any object of invariable magnitude, which nature may be thought to furnish, may be ascertained with equal accuracy: the restoration of either, therefore, must be equally practicable. The old toise, although not an aliquot part of the terrestrial meridian, may be as well obtained as the metre, which is supposed to be so, by the measurement of a meridional arc.

On the whole, the committee believe it best, at least in the circumstances of this country, to adopt absolute standards, conformed to the weights and measures which are in most general use among us. If it be thought necessary to provide by law for the loss of these standards, the provision may be formed on the basis of the best experiment and the exactest science which the country can now command, and without change of standard. This provision may be varied whenever the advancement of science shall furnish a better process.

The committee will therefore confine the proposals which they shall submit to the House to the object of the first plan proposed by Mr. Jefferson, "to render uniform and stable the measures [and weights] which we already possess."

In pursuance of this view, they propose that models of the yard, bushel, wine gallon, and pound, supposed to conform to those in most common use in the United States, shall be made under the direction of a commission of ——— persons to be selected by the President of the United States, and, if satisfactory to Congress, that they shall be declared the standard yard, bushel, liquid gallon, and pound of the United States.

If these standards shall be adopted for our measures, the law which will establish them will determine how greater or less measures shall be formed from them. There is no variety in the composition of these in the different States, and, in the opinion of the committee, no adequate motive for proposing a change; there will, consequently, be no difficulty in this regulation.

As to weights, there seems to be no strong objection to confirming the change which general usage has made, by giving up, as is recommended by Mr. Jefferson, the pound and ounce troy, and the quarter and drachm avoirdupois. The pound troy has been long disused; there is no coin as heavy as a troy ounce, and no coin of the United States as heavy as an ounce avoirdupois. The silver or gold contained in the largest coins is stated generally in grains, without the use of any higher denomination. In the sale of drugs or bullion, indeed, large weights are necessary; but drugs are now sold by avoirdupois weight; and the suppression of the pound and ounce troy will produce no change in the weights used for bullion in the United States, as these are now multiples of the pennyweight as far as five thousand. But if it were not so, neither the mint, the banks, nor the merchants who deal with them, can be embarrassed by employing in their large transactions, not a new weight, but the common pound and ounce of the country.

If we suppose the proportion between the common pound of the United States and the grain used in money and medicine to be as 1 to 7,000, we shall probably not be materially wrong. It is the difference ascertained

between those weights in England, from which our weights were derived originally, and observations made, as the committee believe, with great care, at the Bank of the United States, [the result of which] gives 7,000 grains of the weights of that bank as equal to the pound used in the most commercial city of the United States, (New York.) Assuming this proportion, it will follow that, of weights that are in use below a pound avoirdupois, (if we omit the drachm and quarter avoirdupois, and the pound and ounce troy,) the ounce, the scruple, and the grain are aliquot parts of the pound; the pennyweight and drachm are not so; nor are the drachm, pennyweight, scruple, or grain, aliquot parts of the ounce. The want of a series in which all the weights should be multiples of those which are below them, and aliquot parts of those above them, may be inconvenient, and is certainly not systematic; but the inconvenience is not great. There is the same defect in the coins in common use. The quarters of a dollar are not multiples of a dime, nor the eighths multiples of a cent. The eighths of a dollar, indeed, are foreign coins, but the irregularity is found to be of little consequence.

The committee think that the defect in the series of weights can produce no real embarrassment if we have a uniform pound with subdivisions descending regularly to the sixty-fourth part of the pound, or quarter ounce; if we have a uniform grain, which is an aliquot part of the pound, (7,000th,) and of the eighth of the pound, or double ounce, and which bears to the ounce a proportion which, though expressed by a fraction, is represented and may be ascertained by weights in common use, (18 dwts. $5\frac{1}{2}$ grs., or 7 drms. $2\frac{1}{2}$ qrs., or $437\frac{1}{2}$ grs.) Small, however, as the defect is, if it can be removed without inconvenience, it ought not to be overlooked. They know no better plan for removing it than that suggested by Mr. Jefferson.

This is substantially to divide the pound into 6,912, instead of 7,000 grains, and the ounce into 18, instead of 20 pennyweights. The grain would be increased by this plan by about $1\frac{1}{3}$ per cent; the pennyweight by somewhat less. The eagle would contain three less of the new than of our present grains; or, if it were thought important that it should contain the same number of grains, its value would be about twelve cents greater. In medicine, it may be feared that the knowledge that there was a change might produce some uneasiness in those who could not exactly estimate its extent; nor would it much improve the system of apothecaries' weights, since, though it would make the grain an aliquot part of the ounce, neither the scruple nor the drachm would be so.

The committee think it best that the pound and the grain, which may be considered, for different purposes, as both units of weight, should be neither changed nor be suspected of being so. They propose, therefore, that the commission should ascertain the proportion between the grain and pound, and that that proportion should be maintained unalterably.

In respect to the composition of large weights, it seems proper that the discordance between the use of the hundred and the long hundred, (or 100 and 112 pounds,) and their divisions, should be removed; and of the two sets of weights, that of the hundred pounds, and its divisions, is the simpler and better. As to weights above the hundred, except the ton of shipping, they are properly but the names of vessels of capacity, of no very determinate contents, and ought not to be recognised as weights.

The modes of measurement and the allowances and tares which are used in the different States require correction as well as the measures themselves. The subject was brought to the view of the House by a report of the Secretary of the Treasury, in January last; but in that laborious session there was not time to undertake it. It will still be better to defer the provisions which it may require until they can be included in the law which shall establish the standards.

In fixing standards of weights and measures, it will be proper that Congress shall determine the means which shall be employed for their preservation, and, perhaps, as connected with this object, for their restoration, if they shall be lost; for the distribution of models with which the weights and measures employed in commerce may be compared, and for enforcing the use of such as correspond with these models.

The committee propose that the standards shall be deposited in the office of the Secretary of State. These will be employed but rarely to verify the models which may be issued under the authority of Government. The law which establishes the standard will determine the temperature at which it is to be used.

The means which may be employed for the restoration of the standards, if they should be lost or impaired, are sufficiently analogous to some of those which may be used for securing the accurate execution of the models, as well as the weights and measures in common use, to make it convenient to consider the two subjects together. Indeed, it must be an extravagant fondness for system which would lead us to deny that the models, if proper precautions be taken to secure their fidelity, will probably furnish a sufficiently correct as well as an easy mean for the restoration of the standards, if they should be lost.

The careful observation of the proportions which the standards of measure bear to each other, and that of the relations which each of these holds to the dimensions of a quantity of pure water, of a given temperature, which is equal to the weight of the standard pound, will sufficiently provide for the contingency of the loss of any number of these standards less than the whole. The committee propose that these relations shall be ascertained and reported by the commission whose appointment has been already suggested.

If it be thought prudent to provide for the contingency of the loss, at the same time, of all the standards and all the models on which a just reliance might be placed, it may be done by ascertaining the relation between the standard measure of length and the second pendulum and an arc of the meridian. Which of these relations can be most safely relied upon for the restoration of the standard, can be best determined when its loss shall occur. The designation of these relations by a commission may also facilitate a comparison with the measures of foreign countries. The committee do not, however, recommend the difficult and costly expedient of measuring a large arc of the meridian in this country; but the commission may ascertain the proportion between our standard and the great arc which has been measured by the French mathematicians, or the quarter of a meridional circle inferred from it. They can do this, indeed, only by a comparison with the French measures in which the result of that operation has been stated. The length of a pendulum or rod which shall vibrate seconds of mean time is an object of more convenient comparison; and the commission may probably think it necessary to ascertain the relation between this and our standard of length by their own observation.

The most accurate designation of the relation between the standard of length and the pendulum on an arc of the meridian cannot be expected to be of any direct service in promoting the accuracy of measures in common use. Considerable variation is less to be apprehended in the models of lineal measure than in any other; and the determination of the proportions between lineal measures and measures of capacity, and between both of these and weights, may have some effect in enabling us to detect, without too difficult a process, the defects of measures of capacity, and possibly of weights, in common use. For this purpose, it would, perhaps, be convenient to establish, not merely the cubical contents of the common measures of capacity, but to fix determinate forms for all these, and dimensions the correctness of which might be ascertained by the common measures of length. What these forms should be it would be proper to leave to the decision of the commission, although the strength of the cylinder, its general use, and, according to the commission of the French Institute, the greater exactness which may, in practice, be given to that figure, are strong reasons for employing it.

The designation of measures of capacity, the contents of which, if of rain water of a *convenient* temperature, would be equal in weight to a pound, or any part or multiple of it, would furnish a test which might sometimes be applied to common weights. But it will be easier to avoid considerable variation in the models of weight than of cubic measure; and the determination of the weight of rain water of a convenient temperature, which ought to be contained in the several measures of capacity, furnishes a security of easy employment for the fairness of such measures.

It will be necessary that models of weights and measures, exactly compared with their several standards, shall be deposited in the different States. To prevent unnecessary delay, it may be proper to allow the commission intrusted with the charge of preparing the models which are to be proposed as standards to cause to be prepared also a number of models for distribution. The committee think that there should be sent to each State, to be distributed as may be directed by its Legislature, a number of each of these models equal to the number of members to which the State is entitled in the House of Representatives of the United States, and that models of each standard should be deposited with the marshal of each State, and with every collector of customs throughout the United States. To enable the Government to make this distribution, and to reserve the number of models which it may be proper that it should have at its disposition, the committee propose that ——— of each model should be provided.

The committee are not unaware of the difficulty in the accurate execution of models of measure. There are too many memorials of this to allow them to doubt that it is in the province of the artist that the great impediment to uniform measures will be found. They believe, however, that all the practical advantages of uniformity may be obtained by a degree of skill and attention which it is not unreasonable to expect.

The committee do not deem it necessary to propose any penal provisions for enforcing the use of the standards which may be established by Congress. The constant interference which such provisions would imply with the minutest and most frequent transactions of society might be justified by the words, but, unless they shall be found indispensable, would ill comport with the general spirit and character of the constitution. It was right that there should be a provision for uniform standards of measures and weights as of coins throughout the United States. The only authority capable of establishing these was the General Government. But the power of enforcing the use of measures and weights which shall conform to these standards may be most conveniently and effectually exercised by the State authorities. The laws of many, and perhaps most of the States, are adequate to this purpose without much amendment. But, to admit of amendments where they may be necessary, it may be well, if Congress shall approve the standards proposed, that it should determine on a more distant day than would otherwise be proper, after which no other weights and measures than such as conform to these standards should be esteemed legal. For the execution of contracts made before that day in States whose legal weights and measures have been different from those which shall be prescribed by Congress, a table of equivalents between the new and old weights and measures must be formed; or, in this class of cases, comparatively few, and which will every day become fewer, the old ones may continue to be used without inconvenience.

There does not, however, appear to the committee to be any objection to the employment of the models of weight and measure (as soon as the standards shall have been established) in all the cases in which the Government is a party, either in sales or purchases, or the collection of duties. In old contracts, the same provision must apply to the Government, and to any other party.

The committee are sensible how large a part of their report consists rather in objections to the plans of others than in the recommendation and development of their own. They propose, indeed, that little should be done; that standards conformed to those in most common use among us should be accurately made, and carefully preserved at the seat of Government; that correct models should be placed in the different districts of the country; and that the proportions and relations between these should be ascertained.

The committee have directed their chairman to move the resolutions which will be necessary to carry into effect the proposals contained in their report.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President shall be authorized to appoint a commission of —— persons, for the purpose of carrying into effect the following resolutions:

Resolved, That the commission so appointed shall cause to be traced on a rod (of whatever metal they shall deem best adapted to the purpose) the yard measure which is in most common use throughout the United States.

Resolved, That the commission shall cause to be made (of whatever material and shape they shall deem best adapted to the purpose) a vessel, whose capacity shall be the same as that of the bushel in most common use throughout the United States.

Resolved, That the commission shall cause to be made (of whatever material and form they shall deem best adapted to the purpose) a vessel, whose capacity shall be the same as that of the wine gallon in most common use in the United States.

Resolved, That the commission shall cause to be made (of whatever metal they shall deem most advisable) a pound avoirdupois, of the weight of that which is in most common use throughout the United States.

Resolved, That the commission shall cause experiments to be made, under their direction, to ascertain with the utmost exactness which the state of science permits, the proportion which the yard measure of the United States bears to the length of a pendulum, vibrating seconds of mean time, at the level of the sea, and at the place and temperature at which they shall deem it most advisable that the experiment shall be made.

Resolved, That the commission shall ascertain the proportion which this yard bears to an arc of the terrestrial meridian, intercepted between the equator and the north pole, according to the most accurate measurements which have been made of degrees of a meridional circle, and the best established computations of such arc.

Resolved, That the commission shall cause to be ascertained the number of cubical inches contained in the bushel of the United States, and the dimensions and forms of vessels of equal capacity to such bushel, and to the half, fourth, eighth, thirty-second, and sixty-fourth parts thereof, to which the common measures of length may be conveniently applied, to ascertain such capacity.

Resolved, That the commission shall cause to be ascertained the weight of rain water, at any temperature which they may deem it most advisable to use, which would be contained in the bushel of the United States.

Resolved, That the commission shall cause to be ascertained the number of cubical inches contained in the wine gallon of the United States, and the dimensions and forms of vessels of equal capacity to such gallon, and to the fourth, eighth, and sixteenth parts thereof, to which the common measures of length may be conveniently applied, to ascertain such capacity.

Resolved, That the commission shall cause to be ascertained the weight of rain water, at any temperature they may deem it expedient to employ, which would be contained in the wine gallon of the United States.

Resolved, That the commission shall cause to be ascertained the number of cubical inches of distilled water, at any temperature they may deem it most advisable to use, the weight of which shall be equal to the pound of the United States.

Resolved, That the commission shall cause to be ascertained the proportion between the pound of the United States and the grain employed for weighing medicines and the precious metals.

Resolved, That the commission shall cause to be prepared a number of the models of the yard, bushel, wine gallon, and pound, not exceeding ——— of each, of the form and material which may be most convenient for distribution and comparison among the States.

15th Congress.] No. 464. [2d Session.

OFFICIAL CONDUCT OF THE JUDGE OF THE SOUTHERN DISTRICT OF NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 17, 1819.

Mr. Spencer, from the committee appointed on the 10th day of April last to inquire into the official conduct of William P. Van Ness, Esq., judge of the southern district of New York, of Matthias B. Tallmadge, Esq., judge of the northern district of New York, and of William Stephens, judge of the district of Georgia, reported:

That, in reference to the conduct of William P. Van Ness, Esq., judge of the southern district of New York, the committee have endeavored, by the examination of voluminous documents and of a number of witnesses, to arrive at a knowledge of the transactions to which their attention was necessarily directed by the report of the Judiciary Committee made to this House on the 5th day of March last. That report stated that $117,307 01 of the funds of the district court of the southern district of New York was unaccounted for by Theron Rudd, the late clerk thereof, and that it has been most grossly and nefariously purloined. As the resolution under which this committee was appointed emanated from the Judiciary Committee, it became the first object of inquiry to ascertain how far Judge Van Ness was implicated in the misconduct of the clerk. After a diligent examination, no evidence has been discovered to establish any participation by Judge Van Ness in the embezzlement of the funds of the court; nor does it appear that he has received any of those funds, or derived any benefit from them. That there was, however, a remissness on the part of Judge Van Ness, a want of constant vigilance of the money of the court, and of rigor in enforcing the provisions of the law and the rules of court, will, in the opinion of your committee, appear from a statement of the facts. Rules had existed in the court from the 1st day of November, 1811, requiring the clerk to keep a distinct account in the bank where the court moneys were deposited, as clerk of the court, subject to the inspection of the judge and the district attorney, and forbidding the withdrawing any such money from the bank without an order signed by the clerk and countersigned by the judge, stating the title of the cause, and the party to whom the same was to be paid. Soon after Judge Van Ness took his seat on the bench, he repealed that part of the rule requiring his signature; the reasons for which, as assigned by Judge Van Ness on a former occasion, were, that the clerk was the responsible and accountable officer, in whose custody the law placed the funds of the court; and that the check contemplated by the rule would give great and unnecessary trouble to the judge in adjusting the claims of individuals, and to the suitors who might apply to him during the vacations, at his residence, one hundred and thirty miles from New York. The committee, however, think that, in most cases, the claims of suitors must have been ascertained in the judgment of the court; and to them it appears that, although the rule may have been originally adopted on a special occasion, yet the object of security to the funds was so great as to supersede all considerations of inconvenience, and to require its continuance. The rule subjecting the clerk's account to the inspection of the judge and the district attorney was also so modified by Judge Van Ness as to confine the right to the judges only.

It had been one of the rules of the court, and was adopted by Judge Van Ness, that the clerk should exhibit to the court on the first day of each August and February term a full account of all moneys in his hands, or standing to his credit as clerk, to be examined by the court or a judge, and to be filed in the office of the clerk of the northern district. From the certificate of the clerk of the southern district, it appears that no such account has ever been rendered. His certificate embraces a portion of time in which Judge Tallmadge presided in the southern district, and the whole time when Theron Rudd was clerk.

An old act of Congress requires the clerks of district courts to give bonds in the sum of $2,000 for the faithful discharge of their duties. Although this sum is altogether inadequate to the security of such large amounts as were paid into the district court of New York during the time Theron Rudd was clerk, yet the hazard of losing even that amount would induce some watchfulness on the part of the clerk's sureties. Theron Rudd had been clerk of the district of New York some time previous to the act dividing the State into two districts, which passed 9th April, 1814, and, pursuant to that division, on the 11th April, 1814, he was appointed clerk of the southern district. From the certificates of the clerk of that district, and of the clerk of the northern district, it appears that there has not been filed, in either of their offices, any bond by Theron Rudd for the faithful discharge of his duties as clerk of the southern district. The omission is the more remarkable as Mr. Rudd had previously given several bonds as clerk, under various reappointments, after having been removed.

It appears from the statements of the Hon. Mr. Dagget and the Hon. Mr. Hunter, of the Senate, that so late as the last of February, 1817, Judge Van Ness appeared to be ignorant of the perilous condition of the funds of the court, at a time when apprehensions were entertained by several gentlemen of the city of New York, who had communicated them to their friends in Congress. Judge Van Ness appeared before the Judiciary Committee of the Senate on the 1st March, 1817, and stated his objections to the passage of a bill then pending before that committee, and which afterwards became a law, by which moneys in the courts of the United States were directed to be deposited within sixty days from the 3d March, 1817, in the office of the Bank of the United States, when there should be one within the district, and requiring the signature of the judge to an order for the payment of such moneys. The objections were substantially the same as the reasons urged for the repeal of the rule before mentioned, viz: that it would be unnecessary, and would give much trouble. He assured the committee of the Senate that the money was perfectly safe; that it was in the Middle District Bank, north of the highlands, where it had been carried from apprehensions of danger during the war; that the bank was respectable, and the clerk was responsible

under his bond; and that it became his duty to see to the security of the money. The law passed, making it the duty of the judges of the different courts to cause the payment of the money, as before stated, and directing that any officer refusing or neglecting to make such payment should be proceeded against by attachment for contempt. On the 30th April, 1817, a rule was entered by Judge Van Ness, directing the clerk to pay over the moneys of the court, according to the provisions of the law, within sixty days from the 3d day of March then last. On the 16th day of June, 1817, an order was entered for an attachment against Theron Rudd for not complying with the rule of the 30th April. A copy of an attachment is furnished the committee, dated the 30th day of June. It appears from a rule of the court, entered on the 23d day of June, that the clerk had then absconded. On the 8th January, 1818, Thomas Morris, the marshal of the district, returned that, by virtue of several writs of attachment, he had arrested Theron Rudd, but found him in the custody of a sheriff by virtue of an execution issued out of one of the State courts of the State of New York, and had therefore committed him to the common jail of the county where he had found him. Further proceedings on the attachment were discontinued by direction of the Secretary of the Treasury, who instructed the district attorney to proceed by action against the clerk. The great delay in these proceedings is apparent, and it cannot be ascribed wholly to the district attorney, as the law seems to have made it the special duty of the judge to cause the money to be deposited according to its provisions.

According to the fair import, if not to the letter of the act of April 18, 1814, it became the duty of every court of the United States to designate a bank where its money should be deposited, if there should be any incorporated bank within the judicial district. On the 3d August, 1814, Judge Van Ness made a rule that all moneys which should thereafter be paid into his court should be paid to the clerk, who should deposite the same to his credit in some bank or banks to the north of the highlands, in the State of New York, until the further order of the court. The reason given for this rule was, the apprehension of danger from invasion by the enemy. Your committee do not perceive how that reason could operate to prevent the designation of some certain bank or banks. The report of the Judiciary Committee, made at the last session, states the inability of that committee to prosecute its inquiries, from a want of knowing the particular bank where the money was deposited. It is obvious that the omission of such a designation removed a considerable check upon the improper disposition of the funds by the clerk. The committee cannot discover any satisfactory reason to account for the money being suffered to remain in that situation for two years after the peace was known in this country, or for its not being deposited in some bank in the city of New York.

The report which this committee have already made respecting the official conduct of Judge Tallmadge will exhibit the courts held by Judge Van Ness, in the northern district, during the time he received an additional allowance for his services in that district. Those services do not appear to have been so great as Congress expected. With regard to the southern district, Judge Van Ness appears to have given great attention to its business. He has held all the stated terms of that district, excepting two, which have occurred since his appointment, and he has also held many long and arduous special terms.

There have been complaints against some decisions and orders of Judge Van Ness. But the respect which this committee entertain for the constitutional rights of a judge, and for the laws, which provide adequate remedies for any errors he may commit, forbids their questioning any judicial opinions.

One instance, however, appears, from the papers they have examined, to partake more of the ministerial than judicial character. It was the case of a cargo which was a prize to the privateer Tickler, which had been sold, and the money brought into court. The judge authorized the clerk to draw out the money, exceeding $145,000, and to pay it over to the claimants, instead of directing the payment to be made to the claimants immediately; and he ordered the duties and the two per centum belonging to the navy pension fund, exceeding $15,000, to be paid to the clerk, who was to pay it over to the collector, whenever the court determined the amount due to that officer. It is not perceived why the money was not as secure in the bank as in the hands of the clerk. It appears to have been entirely lost; and, from the papers before the committee, it cannot be discovered that the court has yet determined what amount should be paid to the collector.

Under a sense of the duty imposed upon them, the committee submit these facts and observations, although, in their opinion, they do not furnish any ground for the constitutional interposition of the House.

15th Congress.] No. 465. [2d Session.

OFFICIAL CONDUCT OF THE JUDGE OF THE NORTHERN DISTRICT OF NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 17, 1819.

Mr. SPENCER, from the committee appointed on the 10th day of April last to inquire into the official conduct of William P. Van Ness, judge of the southern district of New York, of Matthias B. Tallmadge, judge of the northern district of New York, and of William Stephens, judge of the district of Georgia, reported, in part:

Respecting the official conduct of Matthias B. Tallmadge. The committee have not been apprized of any other charge against the official conduct of Judge Tallmadge than his having omitted to hold the terms of the district court for which he was appointed, according to law. It appears that Judge Tallmadge took his seat on the bench as judge of the district of New York on the 16th day of July, 1805. From that time until May, 1810, he held all the stated and regular terms of the court, (excepting that the August term in 1809 was postponed two days,) and held thirty-five special sessions. The May and August terms, 1810, were not held; the November term was held, and he presided at a special court in December of that year. In 1811, the stated terms of February, August, and November were adjourned without being opened; the May term was held, and special courts also were held in June, October, and November of that year. The February and May terms of 1812 were not opened, but two special courts were held in May. On the 29th April, 1812, the act passed authorizing the appointment of an additional judge of the district, and on the 3d of July, 1812, Judge Van Ness, who had been appointed under that act, took his seat on the bench. After that period, Judge Tallmadge held eight stated terms and special courts at New York; two of the special courts with Judge Van Ness. Special courts were held in August, September, October,

and December of that year, and also the stated November term, by Judge Van Ness, who held a special court also in January, 1813. The February and November terms of that year were adjourned, the latter by Judge Tallmadge, the former by Judge Van Ness, who held special courts in March, April, May, June, July, September, and November, and the stated terms in May and August.

On the 9th April, 1814, the district was divided, and Judge Tallmadge was assigned to the northern district. Three stated terms and one special court had been held in the northern part of the State previous to the division in September and October, 1812, by Judge Van Ness. The May, one of the September, and the October terms, in 1813, had been adjourned; a special court was held in June, and one of the September terms in that year was held by Judge Van Ness. No courts appear to have been held in that district after that period, until September, 1814, when Judge Van Ness held the stated term in that month, and also the stated terms in October, 1815, and April, 1817, and a special court in November, 1817. One of the September terms, and the October term of 1814, were adjourned, and also the September term, 1815, and the September and October terms, 1816, and the January and Utica May terms, in 1818. The May terms in 1814 and 1815, the September term, 1815, and the May and September terms, 1816, in that district, entirely failed.

On the 7th September, 1815, and the 21st October, 1816, Judge Tallmadge held special courts, and the stated term in October, 1816, at Salem. He held the stated terms in July and October, 1817, a special court in May, 1818, and the stated terms in May, June, and November, 1818.

It appears satisfactorily, from the testimony of several physicians, and of the honorable Nathan Sanford, given on a former inquiry into the conduct of Judge Tallmadge, that in 1810 his health became extremely delicate, and that very great exertion of body, or any unusual agitation of mind, invariably produced severe sickness, so as to disqualify him for any official duties; and that his life was prolonged by visiting a more genial climate in the winter season.

On entering upon the duties of his office in 1805, Judge Tallmadge encountered a mass of business which had accumulated from the ill health and the death of his predecessor, and from the want of any judge in the court for the time immediately preceding his appointment. The sickness of Judge Patterson, who should have presided in the circuit court, materially increased the labors of the district judge.

The committee are of opinion that there is nothing established in the official conduct of Judge Tallmadge to justify the constitutional interposition of the House. They have deemed it their duty, however, to present the facts, to enable the House to form an opinion on the merits of the case.

15th Congress.] **No. 466.** [2d Session.

PRINTING FOR CONGRESS.

COMMUNICATED TO THE SENATE, FEBRUARY 19, 1819.

Mr. Wilson, from the joint committee on the subject of the public printing, made the following report to the Senate:

That, regarding the subject committed to them as connected with the convenience of the members, the information of the community, the economy of time and money, and the character of the country, they have given it all the consideration which their other engagements permitted.

That three different modes of procuring the printing of Congress to be executed have undergone their discussion and deliberation:

I. Offering the work by advertisement (as at present) to the lowest bidder.

On this mode the committee would remark that, although at the first glance it may strike the mind as the most economical, experience and observation do not prove it so. Competitors for the work underbid each other, until it is undertaken for a less sum than it can be afforded at; and too small an establishment and too few workmen are consequently employed to execute the printing with the necessary promptitude. Hence, both Houses have frequently to wait long for interesting and important communications from the President or heads of Departments, reports, bills, resolutions, &c., upon which they are called to act; and the loss of time thus incurred, considering the daily expense at which Congress sits, costs the nation much more than the difference between the present price and a liberal allowance, which would justify the application of a greater capital to insure the despatch of the work.

Another disadvantage attending the present mode is, that the reduced price of the work prevents that care and attention from being bestowed on it which is necessary to its neatness and accuracy. And documents are not only distributed through this nation, but dispersed through Europe, which are executed in such an inelegant and incorrect manner as must bring disgrace and ridicule on the literature and the press of our country.

That the present price of printing is too low would be readily discovered by any of the profession; and the fact that no other printer in the District could be found by the Secretary or the Clerk who would execute the work at the contract prices must satisfy the mind of every gentleman of the truth of what the committee have asserted. How far it is reputable for Congress to endeavor to get their work done below a fair and reasonable price, may be a matter of doubt; but it does not admit of a question that the compensation ought to be adequate to the object of procuring that work to be done at a proper time, and in a suitable manner.

II. A second mode suggested to and considered by the committee was the establishment of a national printing office, (with a bindery and stationary annexed,) which should execute the work of Congress while in session, and that of the various Departments of Government during the recess; and should do all the binding and furnish all the stationary for the Departments as well as for Congress. To ascertain the amount of expenditures on these objects, inquiries were addressed by the committee to the heads of Departments, Attorney General, and Postmaster General; and an answer received from each. Some of the reports were made in such a manner as not to enable the committee to separate the accounts for printing from those for binding and stationary; but the whole amount exceeds $41,000. Add to this the expenditures of the Senate and House of Representatives on the same objects, viz: the former $8,000, and the latter $15,000, and the aggregate cost of the public printing, binding, and sta-

tionary, is about $65,000 a year, of which probably one-half is for printing. And this, it will be remembered, does not include the great variety and number of blanks executed elsewhere than at the seat of Government, from copies furnished by the Departments of the Treasury, War, &c., and which might all be done here at a much less expense were a national printing office established.

The committee are of opinion that such an establishment, under the superintendence of a man of activity, integrity, and discretion, would be likely to produce promptitude, uniformity, accuracy, and elegance in the execution of the public printing; and they are not certain that it would not, in the result, connecting with it a bindery and stationary, as already suggested, be found the most economical. But as the principle is somewhat novel, and the details would require some deliberation, the committee have not deemed it advisable, at this late period of the session, and amidst the pressure which both Houses experience from the accumulation of business important to the nation, or interesting to individuals, to submit a proposition on which there would probably be a considerable diversity of opinion and consumption of time.

III. Under all circumstances, the committee have deemed it their duty to recommend that a tariff of prices for every kind of printing required to be done for Congress be fixed by a joint resolution of the two Houses, to continue in force for two years; and that, before the close of the present session, each House make choice by ballot of a printer, to execute its own work during the next Congress. The prices should be adequate to the employment of sufficient capital and workmen to perform the work expeditiously, and to insure such care and attention as shall give it such a degree of accuracy and elegance as shall not dishonor the literature and typography of the country. With former contracts before us, and with the professional knowledge which may be called in aid, no difficulty would occur in forming the tariff alluded to on principles at once liberal to the printer and advantageous to Congress; and, in the selection of its printer, each House would doubtless take especial care to choose a man of capacity, probity, and responsibility. In addition to the bond and security to be required of them for the faithful performance of their obligations, a provision might be added, that in case of any unreasonable delay another person might be employed to do the work at such a price as the Secretary or the Clerk might be able to get it done for, and that the public printers should, respectively, be responsible for any difference between the sum allowed them and that which it might be necessary to give him. The committee, therefore, submit the following resolution:

Resolved, That the joint committee on public printing be instructed to report a resolution for carrying the foregoing proposition into effect.

15th CONGRESS.] No. 467. [2d SESSION.

DEAF AND DUMB ASYLUM OF CONNECTICUT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 22, 1819.

Mr. TERRY, from the committee to whom was referred the petition of the Connecticut asylum for the education and instruction of deaf and dumb persons praying for a donation either in money or land, reported:

That an association of a number of citizens of the State of Connecticut was formed in the year 1815, for the purpose of establishing a school for the instruction of the deaf and dumb. Finding great numbers of this unfortunate description of persons in our country without education, and without any attempts being made to give them the education which they are capable of receiving, and actuated by a benevolent desire to rescue them, as far as was practicable, from their state of ignorance and degradation, and to fit them for social intercourse and happiness, the associates, by voluntary contribution, raised a sum of money sufficient to defray the expense of sending the reverend Thomas H. Gallaudet to Europe, for the purpose of learning the modes of instruction practised there. Mr. Gallaudet went to England, to Scotland, and to France. In London, he did not find a disposition in the teachers to communicate instruction so readily as the benevolence of his mission seemed to entitle him to expect; but he had the good fortune to meet there the Abbé Sicard, the principal of the institution for the instruction of the deaf and dumb at Paris, a gentleman distinguished for talents, benevolence, and devotion to the interests of these unfortunate persons. The Abbé assured him that, if he would go to Paris, every facility should be afforded him of acquiring a knowledge of their modes of instruction; which assurances he found fully realized upon going there. The Abbé kindly took him into the school, and explained to him every thing relating to their modes of instruction and management; but Mr. Gallaudet found that the time which his arrangements would permit him to spend in Paris would be much too short to enable him to acquire the knowledge necessary for an accomplished instructor; and having become acquainted with Laurent Clerc, a pupil of the Abbé, and for eight years an assistant instructor, he engaged him to come to this country as an instructor in the school about to be established in Connecticut. They arrived here in August, 1816, and Mr. Clerc is still an assistant to Mr. Gallaudet in the Connecticut asylum. The Legislature of Connecticut, in May, 1816, incorporated the said associates by their aforesaid name. There are at present in the school more than fifty pupils, from the States of New Hampshire, Massachusetts, Vermont, Rhode Island, Connecticut, New York, Pennsylvania, Maryland, Virginia, and Kentucky, who are taught by five instructors, and who pay $200 per annum, each, for tuition, board, washing, and lodging. The institution is open for the reception of pupils from every part of the Union; but its funds (which have arisen almost entirely from voluntary contribution) are too small to admit of its becoming extensively useful; they are not sufficient even to erect the buildings necessary for the accommodation of the present number of pupils.

Considering that this institution is calculated not only to afford instruction to the deaf and dumb who are to be found in all parts of our country, but also to qualify teachers for other schools which may be established in other parts of the Union, and considering that it is the first attempt of the kind in the United States, and that it has been raised to its present condition by the care and at the expense of charitable individuals, most of whom had no particular interest in its success, the committee are of opinion that it is worthy of the patronage of Congress, and that the prayer of the petition ought to be granted; and for that purpose they report a bill.

15th Congress.] No. 468. [2d Session.

LONGITUDE OF THE CAPITOL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1819.

Mr. Hugh Nelson, from the committee appointed on a memorial of William Lambert, accompanied with astronomical calculations to ascertain the longitude of the Capitol, in the city of Washington, from Greenwich observatory, in England, reported:

That the subject of a first meridian for the United States was presented by the memorialist to the consideration of Congress in the month of December, 1809, on which a select committee of this House made a report on the 28th of March, 1810. [See No. 277, page 53.] The memorial and other papers relating to it were afterwards referred to the Secretary of State, who also reported favorably thereon, but no decision of Congress has yet been had. In the present case, the committee have attentively examined the subject; and, to enable them more fully to satisfy themselves of the accuracy of the calculations, they have made application to, and received the opinions in writing of, scientific gentlemen in different parts of the United States, which accompany this report. It rests with Congress to determine on the utility of establishing a first meridian, in conformity to the practice of most, if not all, of the commercial nations of Europe which appear to have considered the object of sufficient importance not only to authorize observatories to be erected, and furnished with suitable instruments and other apparatus, at the seats of Government, or some other convenient places within their respective dominions, but as an appendage of sovereignty, which they are not disposed to relinquish. The committee believe that if a general meridian could be fixed, by the consent of all Powers materially interested in the pursuits of commerce and navigation, it would be attended with advantages which the establishment of many meridians would not afford; but this desirable coincidence in opinion and practice is not within our control, and probably never will take place. Your committee are, therefore, of opinion that it would tend to the promotion of science and national credit to fix a first meridian for the United States somewhere within their territories; and, as the Capitol was originally contemplated by the plan of the city of Washington for that purpose, it may be proper to select it, or some convenient place in its vicinity. The committee will not take upon themselves to recommend that an observatory be erected, but they deem it advisable to comply so far with the request of the memorialist as to submit to the House the following resolution:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States be authorized to cause such number of astronomical observations to be made, by methods which may, in his judgment, be best adapted to insure a correct determination of the longitude of the Capitol, in the city of Washington, from Greenwich, or some other known meridian in Europe, and that the data, with accurate calculations, or statements founded thereon, be laid before Congress at their next session.

15th Congress.] No. 469. [2d Session.

EXTRA PAYMENTS TO THE ATTORNEY GENERAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1819.

Sir: Treasury Department, *March* 3, 1819.

In obedience to a resolution of the House of Representatives of the 27th ultimo, which has been this day received, directing the Secretary of the Treasury to inform the House what sums of money have been paid to the Attorney General of the United States for extra services, designating the services and the fund from which the money has been paid, I have the honor to state that, on the 18th of December, 1818, there was paid to the Attorney General the sum of $950, and, on the 21st of the same month, the further sum of $550. These two sums were paid on the requisition of the Secretary of State for services rendered by the Attorney General in the trials which took place in Baltimore for violations of the provisions of the "act in addition to the act for the punishment of certain crimes against the United States, and to repeal the acts therein mentioned," passed on the 20th day of April, 1818.

The former of these sums was paid out of the appropriation of $6,000 "for the discharge of such claims against the United States, not otherwise provided for, as shall have been admitted in due course of settlement at the Treasury;" and the latter out of the appropriation for the contingent expenses of foreign intercourse. The whole sum would have been paid out of the former appropriation if the amount unapplied to other objects had been sufficient to discharge it.

Copies of the requisitions from the State Department, upon which the money was paid, are enclosed.

No other payments have been made to the Attorney General from the Treasury for services rendered to the United States, except the sum of $100, in the year 1814, for services rendered in the case of the United States against Brown and others, upon certain protested bills of exchange. This sum was paid out of the fund first above mentioned. The services for which compensation has been made to the Attorney General from the Treasury were not rendered in the Supreme Court of the United States.

I have the honor to be your most obedient servant,

WM. H. CRAWFORD.

Hon. Henry Clay, *Speaker of the House of Representatives.*

SIR: DEPARTMENT OF STATE, *December* 17, 1818.

By direction of the President, I have the honor to request you to cause the sum of $1,500 to be paid to Mr. Wirt, Attorney General of the United States, for his late services in the circuit court of the United States at Baltimore, as additional counsel to the district attorney in certain criminal prosecutions at the suit of the United States, to be taken out of the fund usual in such cases.

I am, with great respect, sir, your obedient and very humble servant,

J. Q. ADAMS.

WILLIAM H. CRAWFORD, Esq., *Secretary of the Treasury.*

TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *December* 26, 1818.

DR. *Wm. Wirt, Attorney General, to the United States.*

To Treasury warrants for amount of the following issued in his favor, viz.	
No. 336, dated 18th December, 1818, - - - - -	950
No. 348, dated 21st December, 1818, - - - - -	550
	$1,500

CR.

By amount allowed to him by direction of the President, (agreeably to the letter of the Secretary of State, herewith, dated December 17, 1818,) "for his late services in the circuit court of the United States at Baltimore, as additional counsel to the district attorney in certain criminal prosecutions at the suit of the United States," - - - - - - $1,500

AUDITOR'S OFFICE, *December* 24, 1818. WM. PARKER.

16th CONGRESS.] No. 470. [1st SESSION.

PROHIBITION OF SLAVERY IN NEW STATES.

COMMUNICATED TO THE SENATE, DECEMBER 15, 1819.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled: The memorial and remonstrance of the American convention for promoting the abolition of slavery, &c., held at Philadelphia, October 5, 1819, *respectfully showeth:*

That, strongly impressed with apprehensions of the evil consequences which inevitably must result to the United States by enlarging the sphere and protracting the duration of domestic slavery, your memorialists deem it their duty respectfully to present this remonstrance against the admission into the Union of any new States which may hereafter be formed, unless on the conditions that the further introduction of slavery therein be prohibited, and that the duration of slavery therein be confined to those who shall be held in such bondage at the time of their admission.

Principles of plain and acknowledged justice may sometimes have been suspended or overruled, from a belief of state necessity. In the origin of political associations, mutual concessions are sometimes required, and an overruling public urgency suggests, while it regrets, the adoption of measures the danger of which is even partially anticipated.

Of this nature was the toleration of slavery in the formation of our present constitution.

But when no political urgency exists, when no necessary concession to circumstances is required, when the General Legislature has the power to lay down the principles of admission into the Union, as broad and pure as truth and justice themselves, it is hoped an occasion so noble will not be suffered to pass unimproved.

It is obvious that the voluntary toleration of slavery in those additions of territory which are made to us by the steady and gradual increase of population would not only afford an argument that the people of the United States feel no repugnance to it in principle, and thereby subject us to the charge of inconsistency in the eyes of mankind, but would also yield an encouragement to the continuance of that odious traffic pursued only by the basest of men, to whom a new and extensive market will thus be opened; and it is much to be feared that the utmost vigilance will render it impossible to prevent it. The certain effect will be greatly to increase the number of slaves beyond their gradual augmentation by birth. The love of ease is natural to mankind, and the owner of landed estate will take every opportunity of acquiring by purchase those whose forced labor will diminish the necessity of his own. The price of these unhappy beings will then be raised, the pecuniary attractions of this inhuman traffic will be increased, and the baseness of the motives which originally suggested it will presume to shelter itself under the false pretext of national sanction.

If the market will thus be enlarged, it will also be perpetuated, or at least continued for an almost indefinite duration. What is allowed to one new State will be claimed by the next that is formed as a sort of right, and the hydra of slavery will in time extend its reprobated form from the Atlantic to the Pacific.

No power, however carefully conceived or faithfully executed, will be able to arrest the progress of this illegal increase. No compensation can ever be made to the additional multitudes who will thus be doomed to suffering and sorrow, and no political ablution can ever efface this voluntary stain from our national character.

Nor can any countervailing benefit be suggested to meet these evils. If the population of our western wilds should proceed more slowly by the exclusion of slavery, is rapidity evidence of strength and firmness? And will not an industrious, hardy yeomanry, accustomed to till their own fields and perform their own labors, be more valuable additions to our strength than the enervated dependants on the labor of others? Your memorialists appeal, with respect and confidence, to the acknowledgments of distinguished men among the southern planters, that slavery is in this respect, as in many others, a sensible and serious evil, which they lament the more because they conceive that it cannot be remedied.

Why should it be introduced again without necessity, to effect an injury to ourselves, which, in a short time, will become too deeply rooted to be removed?

Your memorialists forbear to trespass further on your time. The subject is of awful importance. It is closely connected with the future destinies of our country. The convenience and cupidity of the western settler are alone arrayed against the consistency of our public conduct, the happiness and greatness of the nation. If their erroneous wishes be consulted in the arrangements that shall be made, the day may not be very distant when the assent of our Legislature will be deplored as the cause of incurable regret by those who now so earnestly solicit it.

But between motives of mistaken local interest on one side, and the high consideration of national character, public stability, and acknowledged justice, on the other, it is most respectfully hoped that Congress will not be at a loss to decide.

Signed by order:

RICHARD PETERS, JUN., *President.*

16th CONGRESS.] No. 471. [1st SESSION.

PUBLICATION OF THE JOURNAL, ACTS, AND PROCEEDINGS OF THE FEDERAL CONVENTION.

COMMUNICATED TO THE SENATE, DECEMBER 20, 1819.

WASHINGTON, *December* 17, 1819.

To the Senate and House of Representatives of the United States:

In compliance with a resolution of Congress of 27th March, 1818, the journal, acts, and proceedings of the convention which formed the present constitution of the United States have been published. The resolution directs that one thousand copies should be printed, of which one copy should be furnished to each member of the fifteenth Congress, and the residue to be subject to the future disposition of Congress. The number of copies sufficient to supply the members of the late Congress having been reserved for that purpose, the remainder are now deposited at the Department of State, subject to the order of Congress. The documents mentioned in the resolution of the 27th March, 1818, are in the process of publication.

JAMES MONROE.

16th CONGRESS.] No. 472. [1st SESSION.

UNIFORM SYSTEM OF BANKRUPTCY.

COMMUNICATED TO THE SENATE, DECEMBER 27, 1819.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled: The memorial of the merchants and traders of the town of Boston, and of other towns within the State of Massachusetts:

The wise framers of our excellent constitution, foreseeing the necessity in a maritime community of laws peculiarly affecting commercial relations, caused, upon due deliberation, the power of establishing "uniform laws on the subject of bankruptcies" to be among those expressly delegated by the people to their representatives in Congress assembled. Several of our sister States, at the time they became members of the confederated republic, did not hesitate to declare freedom from imprisonment for debt, except when there might be a violent presumption of fraud, an inherent and constitutional right; and many others, when the creative power thus vested in the General Government has been suffered to lie dormant, have from time to time expressed, by their numerous insolvent laws or acts of private relief, a strong sense of the propriety of measures mitigating the common execution of the law. But, without enumerating the multiform declarations of State Legislatures to this effect, it is enough if no one will deny that the greatest possible exemption from personal restraint bears the closest analogy to the common sentiments and habits of Americans, and is highly congenial to that pure and equal spirit of liberty which animates our whole civil and political character.

Notwithstanding its remarkable conformity to our national physiognomy, nearly sixteen years are now elapsed since we have enjoyed the benefit of a bankrupt law. During a great part of this momentous and eventful period, amidst the concussion of foreign arms, and the violence of nation lifted up against nation, the neutral flag of America enjoyed a degree of commercial prosperity unparalleled in the annals of human history. The granaries of the world were open to us alone, and the mighty empires of Europe may be said, in some measure, to have depended upon our supplies. By these remarkable facilities, immense revenues were accumulated in the coffers of our citizens, which were constantly re-embarked in larger and more perilous adventures, till our commercial engagements were stretched to their utmost extent. At this crisis the restrictive system was commenced, and war shortly succeeded—measures which, however necessary in their origin, and however important in their political results, could not fail of being greatly embarrassing to the commercial and trading interests. Those of our merchants who were enabled to struggle through the distresses invariably attendant on these often inevitable evils were induced, on the return of peace, to put forth all their energies, in the hope of reaping unusual harvests, and thus speedily re-establishing their broken fortunes; but, during the suspension of commercial pursuits, foreign relations had been (for them, at least) unfortunately changed; trade in its accustomed channels had been choked, and necessity had opened new ones which were already pouring in their resources to feed the enormous consumption of a most extensive war.

But when the great belligerants of Europe had laid aside their long-cherished hostilities, and pacific arts were everywhere reassuming their legitimate superiority, England was again ready to step forth, in the plenitude of her maritime might, and monopolize the trade of a larger portion of the globe, at the same time that many Powers who, when occupied in arms, had been entirely dependant upon us as the general carriers and factors of the world, found their advantage in calling to light hidden resources, and establishing a commerce of their own. From such a singular concatenation of events, the most prudent and the most opulent have been obliged to meet peculiar embarrassments and unexampled pressure; so that many who had withstood the perils and losses of the war have been drawn into ruin by the unexpected fatalities of peace.

Struck with this prominent example of the extreme mutability of commercial affairs, subjected as they are to innumerable and inevitable casualties, and aware of the constant regard which the representative Legislature of an enlightened maritime republic must preserve towards the interests of commerce and the cause of humanity, your memorialists, the merchants and traders of Massachusetts, as well those who have been severely laboring under the evils we have above related as those who are of a more fortunate description, beg leave respectfully to suggest the expediency of establishing throughout the United States a uniform system of bankruptcy, to the end that personal liberty and the equitable discharge of contracts may no longer be subjected to the caprice or dishonesty of individuals, but that over our civil transactions as well as our political rights we may enjoy "a government of laws, and not of men."

It might appear unnecessary, but for the strong attachment we are apt to bear even to the injurious customs of our ancestors, to set forth the unreasonable hardships towards merchants and traders of that law which gives unlimited satisfaction upon the goods, estates, and body of the debtor. In what respect, it may be asked, is it superior to the much deprecated law of the twelve tables? We do not, indeed, countenance the partition of the unhappy debtor among his enraged creditors, but we do allow his estates and his expectations to be torn in pieces; we do allow him, without mercy or remorse, to be stripped at once of present possessions and future possibilities; to be left without means and without hopes—an outcast and a reproach. If it be against the policy of our code that the unfortunate insolvent and his miserable family should be subjected to domestic servitude or sold to foreign slavery, by how much are we more merciful when we award against him the ignominy of perpetual imprisonment and perpetual poverty? But we are often told, while the debtor suffers justly for his folly or his crime, his innocent dependants not only do not, as in some parts of the world, participate in his punishment, but are, in truth, rescued from want by the more humane provisions of the law. Not to dwell upon the unavoidable insufficiency of provisions for pauperism to supply the accustomed comforts and luxuries of life, your memorialists would humbly submit to your consideration whether there be not something of mistaken humanity in a system which creates the poor for whom it provides? whether it does not argue somewhat of inconsistency if we seem to generate evil for the sake of doing it away? whether that may not be an unreasonable prejudice which prefers to establish a partial remedy by poor laws rather than a very general prevention by bankrupt laws? Neither, perhaps, will it appear, upon investigation, that the commercial debtor commonly or often suffers justly for his folly or his crime. An enlightened Legislature will undoubtedly be well aware that a circulating medium is the life-blood of commerce; that the obtaining of credit, or what in other men than traffickers and traders might justly be called running in debt, is an essential part of the system of exchange: it is the borrowing from one in order to pay to another in some less valuable form which constitutes the gain of the merchant; and it is the foreseeing how to effect this advantageous commutation which constitutes his skill. This is a game of hazard as well as of calculation, and it is sufficiently clear that any unforeseen check between these successive steps—some inevitable loss, some unexpected disappointment, or even some temporary delay—may prevent his meeting his engagements, and thus involve him in irretrievable ruin. Certainly we cannot say much for the justice which views these dispositions of fortune in the light of criminality, and puts their victim on a level with the idle, the extravagant, and the profligate.

Our humane and admirable law seems, indeed, to depart from its own spirit every way in the case of the unfortunate debtor. It not only renders him obnoxious to an unmerited weight of punishment, but it puts out of its own hands all discretionary right of measuring or apportioning that punishment, and vests an unlimited power in the interested and the irritated. To no purpose are we told that the true interest of the creditor would be to release his prisoner, to put him in a way of honest industry, and to restore him to his credit with the world; for here we find men blinded by avarice rather than guided by interest; and particularly as each creditor reflects that the mercy which he would willingly extend, his neighbor will certainly reject. Thus is the merciless remunerated, while he who indulges the common feelings of humanity loses, or at least hazards, the debt without benefiting the debtor. Where there are many claimants, there will always be some unfeeling or unjust; and we cannot refuse to recollect how much it is in the power of a single individual, for how insignificant a sum, after other means of satisfaction are exhausted, to produce all the evil we have in part attempted to describe. That this unyielding hardness on the part of the creditor is by no means so unfrequent as we could wish to believe, does but too plainly appear when we call up the condition of the English jails, at a former period, during more than a century and a half. From the moment that imprisonment for debt was first granted by law, to the time when the benevolent system of bankruptcy was fully and effectually introduced, we find them crowded and overflowing with the miserable victims of insolvency to an almost incredible degree; and we much fear that the great cities and commercial marts of our own country, even in this enlightened and philanthropic age, will afford ample evidence of a strong disposition in creditors to enforce the right of imprisonment in its severest extent.

Hitherto we have considered this important subject principally on the side of mercy. Your memorialists would likewise represent it on the side of justice. The law, as it now stands, appears to leave a wide opening, and to

create a powerful temptation to fraud. The debtor, who has nothing to expect from compassion, and nothing to fear from detection, has little inducement to an honest disclosure of effects, which, if utterly surrendered, would probably but ill satisfy the rapacity of the vultures who surround him. To what but the hopeless severity of our law can we attribute the frequent instances of fraudulent conveyances in trust; of fictitious transfers of property; of the security of endorsers before any liability has attached, or who have perhaps generated a spurious credit by the accommodation of their names, with an understanding that no liability ever should attach; of the collusive preference of one or more creditors to the total exclusion of the rest; and the whole complicated tissue of deceit which may be observed in daily operation to sustain the credit of a tottering house, or raise it from its fall? The system of palpable fraud and oppression which has thus grown out of the abuses and imperfections of the law must obviously occasion vast impediment to commercial enterprise and skill. By it credit is greatly affected, both at home and abroad. General insecurity begets mutual distrust. We know not who may be honest till he has been tempted, and we have no certain hold on dishonesty in the law. If, then, it should seem that our State insolvent acts, so far as they may tend to impair the obligation of contracts, are unconstitutional and void, your memorialists would suggest to your impartial inquiry whether the practical obligation of contracts is not, in point of fact, as seriously and more frequently impaired by the existence of the evils we have thus briefly enumerated.

There is one other remaining ground upon which your memorialists beg leave to suggest the expediency of amendment in the present law of satisfaction for debt. Its effects upon society are believed to be pernicious in an alarming degree; and your memorialists do not doubt that moral and political results are the chief and peculiar solicitude of enlightened legislation. Its moral effects are believed by your memorialists to be pernicious in an alarming degree, when it is seen that in cases of insolvency no distinction is made between the unfortunate and the profuse; that innocence and guilt are alike tenants of the common jail; that the compassionate are plundered, and justice is cheated of its right; that the honest insolvent is strongly tempted to sacrifice his integrity, and often overpowered; in short, that only the fraudulent debtor, by the secretion of property no longer his, escapes the chief penalties of the law, and only the hard-hearted creditor, by rigorously persisting in his claim, obtains its full benefit. Its political effects may be thought not less alarmingly pernicious, when a large number of respectable and industrious citizens are reduced to idleness and indigence; when they are maintained at the charge of others in utter uselessness and sloth, as a rotten excrescence that is draining the resources of the community; when they may have been driven by long continuance of unmerited punishment to absolute despair; and when the infamy of interminable poverty may have rendered them disaffected and factious.

These abuses and dangers your memorialists humbly conceive may be obviated by the establishment of a uniform and permanent bankrupt law—a law which shall at once satisfy justice and humanity; which shall empower the creditor to check his debtor's ruinous career before it has wholly divested him of means; which shall compel the insolvent, under heavy penalties, to a full disclosure of his effects and of his credits; which shall destroy all collusive intercourse with fraudulent creditors, and remove all probability of secret or fictitious conveyance; which shall enforce an absolute cession and an equal distribution of the bankrupt's property in satisfaction of all lawful claims—a law which, while it shall threaten fraudulent bankrupts with its severest visitation, shall, on the other hand, discharge the person of the fair and honorable debtor from an odious and unreasonable confinement; which shall rescue his future acquisitions from a retrospective liability; and which shall establish some pecuniary emolument as a reward for prudence and good faith, that he may be enabled to renew his blighted hopes, and by the strength of honest industry reattain to usefulness and honor.

Your memorialists can perceive no evil resulting from a system of bankruptcy sufficient to counterbalance these many and great benefits; and they would particularly represent that, in their opinion, the agricultural interest can never suffer from a law by which they do not see that agriculturists are in any way affected, excepting as they may acquire an additional hold upon the merchant for the recovery of their just debts.

Your memorialists have thus far trespassed on the attention of the Legislature from a deep conviction of the importance and interest of the subject which they urge, as well as a firm belief that their suggestions, at the present juncture, when commerce, in an especial manner, demands the fostering hand of Government to protect and assist it, and when the Supreme Court of the United States have recently declared that all State insolvent acts which affect the discharge of the contract are unconstitutional and void, will be noticed with that indulgence which their necessities may seem to require, and that the United States of America will no longer be, as we believe it now is, the only commercial nation in the civilized world utterly destitute of any general provision in the nature of a bankrupt law.

These considerations the undersigned, merchants and traders of Boston, and of other towns within the State of Massachusetts, humbly submit, with the hope that such measures may be adopted for the relief of a numerous and unfortunate class of citizens as Congress in its wisdom may think adequate to that desirable end.

16th Congress.] No. 473. [1st Session.

CHANGE OF VENUE.

COMMUNICATED TO THE SENATE, DECEMBER 28, 1819.

To the honorable the Congress of the United States: The memorial of James Brown, a citizen of the State of Tennessee, and town of Nashville:

Your memorialist humbly represents to your honorable body that he purchased in the city of Philadelphia, about the last of October, 1818, a number of German redemptioners; advanced a considerable sum of money in their behalf; and took their indentures for three years and five months, commencing when they should arrive at the place of their destination. Your memorialist, before indenturing of said servants, described to them the climate, and explained to them the kind of business which they would be required to follow. Your memorialist further represents to your honorable body that he informed said servants, and also suggested to some gentlemen in Philadelphia, that, if he did purchase said slaves, it was not with the prospect of great emolument to himself, but that he thought their residence in the State of Tennessee or Alabama would greatly ameliorate their condition, and, at the same

time, their particular avocations would be of incalculable advantage in that section of country. With these laudable objects in view, your memorialist made the purchase, selecting vine-dressers and mechanics for the purpose above stated to your honorable body, and said servants urged with much solicitude your memorialist to make said advances for them; and your memorialist, in conformity with the agreement between himself and said servants, and at a very great expense, conveyed the said servants on their way to the place for which they had indented themselves as far as Marietta, in the State of Ohio, when, by the interposition, persuasion, and aid of Caleb Emmerson, Timothy Buell, David Putnam, David Ward, John Taylor, Stephen Shepherd, and Paul Ferring, with many others whose names are unknown to your memorialist, the said indented servants were induced to make their escape from out of the possession of your memorialist, and were conveyed away and secreted by the said persons, or some of them, before mentioned. Your memorialist applied to the proper authorities for the purpose of reclaiming said servants, but all his efforts were defeated by the violent, oppressive, and illegal conduct of said persons, your memorialist being by the said persons unjustly arrested and imprisoned, together with the officer who had in his possession a precept authorizing the apprehension and arrest of said servants, the details of which transaction will more fully appear by the accompanying documents, to which your honorable body is particularly referred. Your memorialist would have sought redress by an appeal to the laws of his country at the time that this extraordinary proceeding took place, but was advised by counsel that there was no probability, under the present state of public feeling, that restitution would be made for the injury which your memorialist had sustained both in person and property; and your memorialist was further advised by several respectable citizens that, if he went into the country again for the purpose of arresting his servants, his life would be jeopardized. Application was made through his excellency Joseph McMinn, Governor of the State of Tennessee, on behalf of your memorialist, to the Governor of the State of Ohio; and he, in reply to the Governor of the State of Tennessee, in substance acknowledges the wrong and injury which your memorialist had sustained in that State, and regrets, in language equally just and proper, that such individuals should be permitted to disturb the public tranquillity, and concludes by stating that he has been informed that justice had been rendered your memorialist: which is not the fact; for the six which he arrested by authority from the honorable Judge Bird were forcibly taken from him by the citizens of Cincinnati, as can be seen by the depositions of William Eastham and Roderick Osborn. And your memorialist represents to your honorable body that he has lost his servants entirely, and that he has no other redress than by suits at law; and your memorialist begs leave to state, furthermore, that such is the extent of the influence of the individuals, and such their activity in exerting that influence, and that such is the temper and feeling of the people generally, that your memorialist believes he would be unable in the State of Ohio to have justice done in the trial of his suits; and your memorialist is advised that there is no law which authorizes a change of venue from one State to another. Your memorialist therefore prays your honorable body to pass some general law authorizing such change of venue upon the case made out before the judge of the federal courts, or a special law to permit it in this particular case, so that your memorialist can have a trial in Virginia or Kentucky, or some adjacent State.

And your memorialist, as in duty bound, will ever pray, &c.

JAMES BROWN.

STATE OF KENTUCKY, *Jefferson County*, *ss.*

Personally appeared before the subscriber, a justice of the peace in and for the said county, George Ross, who, being duly sworn according to law, doth depose and say: That he met with Mr. James Brown at Wheeling, Virginia, who had twenty-two German servants with him; that a boat was purchased at Wheeling, and we proceeded to Marietta, Ohio, with the Germans, where the boat was landed, and the Germans refused to go on board again; Mr. Brown then applied to Daniel H. Buell, Esq., a justice of the peace, for permission to carry his Germans out of the State of Ohio, who, upon satisfactory proof being adduced that service was due from the following enumerated persons to James Brown, granted him a certificate to remove John Gold, and Elizabeth Gold, his wife, Jacob Kopp, and Agatha Kopp, his wife, Joseph Geizer, and Caroline Geizer, John Beck, and Magdalena Beck, his wife, and Lorenz Beck, Johan Weirtzburger, and Maria Weirtzburger, his wife, John Hell, and Scolastico Hell, his wife, Anton Frytag, and Anna Maria Frytag, Christian Sherrer, Ferdinand Bengle, Jacob Fohr, Francez Anton Klohr, Carl Zimmerman, Sebastian Hog, and Johan Frederick Genevine. And this deponent further saith, that he was present when the above-named servants personally appeared before Justice Buell, in the town of Marietta, Ohio, on the 30th day of November, 1818, and severally acknowledged that they had signed the several indentures produced before the said justice; that, through the interference of the citizens of Marietta, as this deponent believes, the Germans refused to go with Mr. Brown, and they absconded into the country, when a warrant was issued by Justice Booth, and the Germans were brought before him; and Caleb Emmerson and David Putnam, Esqs. appeared as their counsel, and, after hearing, the said Justice Booth refused to grant Mr. Brown a certificate to remove his servants, although he admitted the evidence of the validity of the indenture. This deponent further saith, that James Brown was in the custody of the sheriff, on a writ issued from the court of Washington county, Ohio, and that a *habeas corpus* was issued on the application of the said James Brown, who appeared before Judge Sharpe, and, when the writ of *capias* was produced, it appeared from the return of the sheriff thereon made that Caleb Emmerson, Esq. had directed the writ to be discontinued. And further this deponent saith not.

GEORGE ROSS.

Sworn and subscribed this 17th December, 1818, before

D. FITZHUGH, *J. P. J. C.*

I, the clerk of the county court of Jefferson county, in the State of Kentucky, do certify that the above-named D. Fitzhugh, before whom the foregoing affidavit appears to have been sworn to, was on this day an acting justice of the peace in and for the county and State aforesaid, duly commissioned and sworn, and that to all his acts as such full faith and credit is and ought to be given.

In testimony whereof, I have hereunto set my hand, and affixed the seal of said county, this 17th day of December, 1818, and in the 27th year of our Commonwealth.

WORDEN POPE. [L. S.]

STATE OF OHIO, *Hamilton County*, *ss.*

Personally appeared before me, a justice of the peace in and for the said county, William Eastham, who, being duly sworn according to law, doth depose and say: That he met with Mr. James Brown at Parkersburg, Virginia, who had six German servants with him, and that he, with the said servants, embarked on board this deponent's boat on the fourteenth day of March, one thousand eight hundred and nineteen, for the purpose of descending the river as far down as Louisville, Kentucky; that, on Sunday, the twenty-first of the same month, this deponent arrived at Cincinnati, State of Ohio, and landed his boat at the upper end of the town, and left said Brown and the

German servants all on board, and went into town, and, on approaching the boat after an absence of near two hours, the deponent discovered a considerable assemblage of persons down on the shore near the boat, and said Brown in conflict with others on the top of the boat, and that, in going on board, the deponent met the last of the aforesaid six German servants going on shore, when the crowd, throwing away the stones which they had in hand, dispersed; that, after a short interval of time, an increased number of persons reappeared, and came hastily down the bank to where the boat lay with every appearance of hostility, and were coming immediately on board, which the deponent forbade their doing at their peril; they then demanded the boat to be put in close to the shore, and, on the deponent's refusing to comply with their demands, a part of them commenced pulling up the point of the oar by which the boat was propped out, while others, at the same time, seized the cable and drew the boat up to land, and came on board and took such things as they chose, stating them to be the property of the aforesaid German servants; when the mob retired with their booty.

This deponent further says that he knows of no just cause of complaint on the part of the aforesaid servants while on board his boat, the conduct of the aforesaid Brown towards them having been uniformly humane and tender in the extreme; and at all times when the deponent has heard the aforesaid servants express any sentiment respecting their usage by the said Brown, it has been in terms of entire approbation. And further this deponent says not.

WILLIAM EASTHAM.

Done at my office, in Cincinnati, in the county of Hamilton, and State of Ohio, March 23, 1819, before me,
ETHAN STONE, *J. P.* [L. S.]

STATE OF OHIO, *Hamilton County, ss.*

Personally appeared before me, a justice of the peace in and for the said county, Roderick Osborn, who, being duly sworn according to law, doth depose and say: That he was hired by William Eastham, at Parkersburg, Virginia, to work on board the said Eastham's boat as a hand; that he has been on board said boat since she left Parkersburg; that he was on board at the time of the boat's landing at Cincinnati, and did not leave the boat during the time of her lying at Cincinnati; that he was an eye-witness to all the proceedings of the mob who forcibly entered the said Eastham's boat; that the mob or body of men were preceded by five men, who called themselves citizens, who came down on the shore opposite to the boat, and manifested a disposition to come on board by remaining on shore some time near the boat, and commencing conversation with one of the German servants who was standing on the top of the boat, and requested the liberty of coming on board; that he, Mr. Brown, at first refused, but, upon these five persons disclaiming any evil design towards the master or servants, they were given permission to come on board; that they had not been on board long before it was apparent that their intentions were not of that character which they had expressed while on shore, and Mr. Brown requested this deponent to go forward to the bow of the boat, where the wood was kept, and get him a stick, and put it at some convenient place on top of the boat; that he was satisfied that the intention of these persons was to seize his servants, or enter into a contest so as to give them an opportunity to make their escape, and that he should be under the necessity of driving them from on board; that this deponent, on his going on top of the boat, saw a number of persons standing on the shore near the boat; that, on his going to the bow of the boat, he heard Mr. Brown order the persons who had come on board ashore, charging them with trying to seduce off his servants; that these persons refused to go, after repeated orders; that a contest ensued between the said Brown and the five persons under the roof; that, on this deponent's getting on the roof at the bow of the boat, he discovered the said Brown followed by the five men who had come on board, mounting the top of the boat from the other end, and heard the aforesaid Brown then repeatedly order them from on board; that they refused, and observed that they would go when they got ready, or when they pleased; that he saw the said Brown seize one of them, who appeared to be the ringleader; that a scuffle ensued between the said Brown and those persons, and that they could not be got from on board for the want of physical strength, until after all the servants had escaped; that, after a short interval of time, a number of persons came on shore near the boat, and manifested a disposition to come on board, which Mr. Eastham, the owner of the boat, forbade; they then demanded the things which they said were on board and belonged to the Germans who had gone from the boat, (alluding to the servants,) when Mr. Eastham observed they had no right to make such demand, and that he would have nothing to do with them, and repeated his commands to them not to meddle with his boat. Some of the company then took hold of the oar by which the boat was propped out, and raised the point out of the earth, while others seized the cable and hauled the boat to land, contrary to the repeated protestations of Mr. Eastham, and crowded on board in considerable numbers, and took such things as they chose, and then retired to shore with their booty. And further this deponent saith not.

Interlined, before signed, two sentences, to wit: "saw a number of persons," and "and raised the point out of the earth."

RODERICK OSBORN, his × mark.

Done at my office in Cincinnati, in the county of Hamilton, and State of Ohio, March 23, 1819, before me,
ETHAN STONE, *J. P.* [L. S.]

STATE OF TENNESSEE, *Davidson County:*

Personally appeared before the subscriber, a justice of the peace in and for said county, James Brown, of Nashville, Tennessee, who, being duly sworn according to law, doth depose and say: That he purchased in the city of Philadelphia, on the 30th day of October, 1818, the following twenty-two German servants, viz: John Gold, Elizabeth Gold, Jacob Kopp, Agatha Kopp, Joseph Geizer, Caroline Geizer, John Beck, Magdalena Beck, Lorenz Beck, John Weirtzburger, Maria Weirtzburger, John Hell, Scolastico Hell, Anton Frytag, Anna Maria Frytag, Christian Sherrer, Ferdinand Bengle, Jacob Fohr, Francis Anton Klohr, Carl Zimmerman, Sebastian Hog, and Johan Frederick Genevine, who severally indented themselves to this deponent for the term of three years and five months after their arrival in the Alabama Territory. That he (the deponent) left Philadelphia on the 2d day of November, 1818, in company with the above-named servants, and arrived at Wheeling, Virginia, about the 23d of the same month; that he there purchased a boat to descend the river Ohio; that this deponent left Wheeling about the 26th day of November, with all his servants on board, and arrived within seven or eight miles of Marietta, Ohio, on the evening of the 29th, where this deponent had to land his boat in consequence of high wind; that this deponent's boat proceeded on her voyage next morning; and that this deponent, accompanied by Mr. George Ross of Pennsylvania, and one of the servants, left the boat in a skiff about three miles above Marietta, and proceeded in advance to said town, for the purpose of laying in an additional stock of provisions, and to have them ready by the time the other boat would get down. That this deponent did purchase the provisions, and had them ready to put on board, when he discovered his boat landing some distance above, and the servants going on shore; that he had the provisions put on board the skiff, and carried up and put on board the boat where she then lay; that he (the

deponent) then went up into town, and told the servants that the boat was ready to proceed on, and that they must go on board immediately; that the servants made several frivolous excuses; that the deponent then ordered them on board, when they refused to obey, as this deponent believes, in consequence of advice given them by the people of Marietta. This deponent states that he then, for the purpose of putting down insubordination of the citizens and servants, made application to Daniel H. Buell, Esq., a justice of the peace, for a precept; that he (Justice Buell) asked this deponent to call in counsel, as he (Buell) stated that he did not know the law upon the subject; that this deponent did call in John P. Mayberry, Esq., attorney at law, who accompanied this deponent to said Buell's office, and showed the said Justice Buell the constitution of the United States, and the act of Congress of the 12th February, 1793, upon the subject. When the deponent's servants were brought before the said Justice Buell, and on their acknowledging that they owed service to this deponent, and that they had signed the several indentures then presented, he (the said Buell) gave to this deponent a certificate of property, and permission to remove them out of the State of Ohio.

The deponent states that he then ordered his servants on board of his boat, who still refused to go; that he consulted John P. Mayberry, his counsel, to know what was to be done to compel them to submit to the law; that he (Mayberry) advised this deponent to get Enoch Hoff, constable, to put them on board; that this deponent went to Hoff's house; that he was informed that the said Hoff was not at home, and would not be until late in the evening; that this deponent returned to Justice Buell's office, where the said Mayberry was, and communicated to him the result of his visit; that the said Mayberry then advised this deponent to get men enough in the town of Marietta to put his servants on board his boat; that he (Mayberry) accompanied this deponent while trying to procure the necessary aid, and, after repeated trials, not more than one man could be got who would lend any aid or assistance. This deponent states that he refrained from making any further attempts to recover his property until the return of Hoff, the constable, when Mayberry, this deponent's counsel, who accompanied this deponent on his second visit, communicated to the said Hoff what had transpired, when he (Hoff) readily undertook to enforce obedience, and went immediately to procure some physical aid, and, after having made repeated trials, returned and reported that not more than one man could be got. This deponent states that it was then suggested to him by Hoff that Captain John Mills (whom Hoff represented to this deponent as being a very clever young man, and who commanded the town company of militia) might feel himself authorized, by the certificate of Daniel Buell, Esq., to turn out his company and enforce obedience to the law.

This deponent, accompanied by Hoff, the constable, and Daniel H. Buell, justice of the peace, did call on Captain John Mills to know if he felt himself authorized to turn out his company to put the deponent's servants on board; that this deponent and his company had been but a few minutes in Captain Mills's store before Caleb Emmerson, county solicitor for the county of Washington, and two other persons, came in; when he (Emmerson) inquired what was the news, and what was to be done with the Germans who had been claimed by this deponent; that this deponent replied, "to be taken out of the State," as he had Justice Buell's certificate, which he then showed to the said Emmerson, who replied "that they should not be taken out by force." This deponent states that next morning (1st December) he applied to his counsel to know what was to be done, communicating what had transpired the evening before; that he (Mayberry) made a second attempt to procure in the town of Marietta the necessary aid; so did Hoff, but with no better success; that he (Mayberry) then recommended to this deponent to go over to Levi Wells's, who lived on the opposite side of the river, in Virginia, and communicate to him the transaction, who, no doubt, would afford the necessary aid; that this deponent did cross over to Levi Wells's that night, and at ten o'clock next morning the asked-for aid was ready, and crossed over with this deponent to Marietta, for the purpose of putting this deponent's servants on board his boat, and that when this deponent and his company arrived within a short distance of the house where his servants were, they were met by the landlord and a young man by the name of Willard, as well as many others, and were informed that the doors of the house were closed by the orders of Caleb Emmerson, county solicitor, and others, and, if any force was attempted, the people inside were armed and would repel force by force. This deponent then made application to Justice Buell for a warrant to arrest his servants, which he declined giving, and requested this deponent to get some other justice, stating that he had been censured for the certificate which he had given, and which he was authorized to give under the act of Congress of the 12th February, 1793; that, discovering a very great reluctance on the part of the said Buell to have any thing more to do in the business, this deponent then applied to James M. Booth, another justice of the peace, who appeared equally loath to act; but after getting them together, and after the right of this deponent was argued at the instance of Caleb Emmerson, county solicitor, and after the servants had been run off into the country by David Ward and John Taylor, and the day had nearly elapsed, a warrant was issued by James M. Booth, and given to Enoch Hoff, constable; that two of the servants were arrested that evening, and Hoff found the next day the balance, twenty in number, at John Taylor's. That he arrived in the town of Marietta late in the evening of the 3d of December, with the servants in company, and left them at James M. Booth's office, while he went in search of this deponent; that he came down to this deponent's boat, and informed this deponent that he had left the servants at Booth's office, and that he wanted this deponent to go up immediately; that they were proceeding immediately to the office, and had to pass near Captain John Mills's storehouse, and that, discovering a number of persons collected together at the door, he was induced to approach, when this deponent, discovering they were armed, was led to inquire the cause, but did not receive any answer until Timothy Buell, Esq., sheriff, came out of the store accompanied by Captain John Mills, and informed this deponent and Enoch Hoff constable, that they were his prisoners, and must go with him to Justice Booth's office; and that they (deponent and Hoff) were marched to the office with Captain Mills's company of militia armed at their heels; that this deponent and said Hoff were arrested, as stated in the *capias*, at the instance of John Gold, one of the deponent's servants, for an alleged assault and battery and false imprisonment, damages five thousand dollars; that he was ruled to bail, which he refused to give, and that he had not seen John Gold for forty-eight hours, during which the assault and battery and false imprisonment was said to have been committed. This deponent further states that, from the time when this servant arrived at Marietta, when brought back by the officer, and the time when he was arrested, it was impossible, as he believes, for the servant to have made a complaint, and the precept to have issued; that the servants were taken out of the custody of the constable by arresting him (Hoff;) that the precept or *capias* was issued on application of David Putnam and Caleb Emmerson, as this deponent was informed by the clerk; that this deponent was cited to appear at the court-house the next morning at ten o'clock; that he attended, and that, previous to the sitting of the court, David Putnam, as this deponent believes, for the purpose of enlisting the prejudices of the people, did say "that he believed that the money for the cost and expenses of this deponent's servants could be made up, and if he did not take that, he might whistle for them;" that the court did convene, composed of two justices; that they went into the trial of property, and after the lapse of nearly thirty-six hours, and after one of the justices had left the bench, the court set the servants of this deponent at liberty, and that the servants were congratulated by the court, most of the bar, and nearly all of the spectators. Despairing of being able to obtain justice under the authority of the State, and not knowing or being able to learn where the United States district judge for that district resided, he (the deponent) determined on returning home,

and, being held in duress, made application to Judge Sharpe for a writ of *habeas corpus*, to make the counsel of this deponent's servants show cause why he (the deponent) was detained; that a writ of *habeas corpus* was issued; and when this deponent appeared before Judge Sharpe, and when the *capias* was produced, it appeared from the return of the sheriff thereon made that Caleb Emmerson, Esq. had directed the writ to be discontinued on the 4th day of December, but that he (this deponent) was held in custody on the 7th of the same month, notwithstanding the return made on the *capias;* and that, during the time which his boat lay at Marietta, stones were frequently thrown at her during the night. That this deponent did return to Tennessee, and, after obtaining letters of introduction, and a letter of remonstrance from his excellency the Governor of Tennessee, to his excellency the Governor of Ohio, upon the subject of this deponent's servants, that he (the deponent) returned to the State of Ohio in February last, and obtained from the honorable Charles W. Bird, United States judge for that district, a warrant to arrest his (the deponent's) servants. That he proceeded to Marietta, *viâ* Parkersburg, Virginia, to procure physical aid to assist in arresting his servants; that he arrived at Marietta on the 27th of February, and the next day arrested six, and sent them to Virginia; that he found two of his servants in the employ of Caleb Emmerson, Esq., county solicitor, who had been the zealous advocate for their emancipation, who made a matter of conscience about delivering them on Sunday, and, on this deponent's having occasion to leave Emmerson's house without taking the servants with him, returned a short time after, found the doors closed, the family at home, and no admittance to be had. This deponent further states that, on the night of 28th February, a number of persons crossed over the river to Levi Wells's, on the Virginia shore, for the purpose of rescuing the six servants whom he had arrested and sent over; that he (the deponent) next morning went to Emmerson's house, and was informed by his wife that neither he nor the servants were there; that they had left town.

This deponent doth further depose and say, that, some days after, he was informed where ten or twelve of his servants had been seen the day before; that he procured at Parkersburg, Virginia, four men to go with him; that they crossed the Ohio river at Marietta, and proceeded immediately to the place where his servants had been seen, as this deponent was informed; and that, when the deponent and his company arrived there, none of the neighbors appeared disposed to give to this deponent any information, and pretended not to know of any such people having been seen in the neighborhood; but, having every confidence in the intelligence that the servants had been seen there the day before, and supposing that they were making off to get into the interior of the country, he (the deponent) was induced to continue the search until two o'clock next morning, when he stopped at a house, and, learning that the servants were not far off, and being much fatigued, called a halt, with the intention of renewing the pursuit by sunrise; that he (the deponent) was roused from bed by the visit of one of the neighbors, at whose house this deponent's servants had been seen a day or two before, and at whose house this deponent had been but a few hours before, and whose visit, this deponent believes, was to see if this deponent and his company were there, and to give the intelligence to Timothy Buell, the sheriff, and Caleb Emmerson, county solicitor, who had collected between one and two hundred men, and had stopped in the woods until the preconcerted signal could be given, who soon appeared, variously armed, when this deponent was arrested by Silas Cook, constable, for an alleged assault and battery said to have been committed by this deponent on his servants while acting under the warrant of the district judge of the United States; that he (the deponent) was carried back to Marietta under a guard commanded by Sheriff Buell, consisting of between one and two hundred men.

That the warrant or precept was issued at the instance of Caleb Emmerson, county solicitor; that he (the deponent) was tried upon the warrant; and that the county solicitor, upon whose affidavit the warrant or precept had issued, and who was the prosecuting attorney, abandoned the prosecution, when this deponent was dismissed. This deponent further states that he had not been out of custody more than one hour before he was again arrested, upon a warrant or precept issued upon the affidavit of Charles Sylvester, whom the county solicitor had but a little while previously introduced as a witness for the same alleged offence; and that, when this deponent again appeared before Justice Whitney, he was again dismissed, no one appearing to prosecute. This deponent states that, having no hopes of being able to obtain any more of his servants, from the disposition manifested by a large majority of the people of Marietta and the adjacent parts of the State of Ohio, and receiving no answer to Governor McMinn's letter, which was transmitted to his excellency E. A. Brown, Governor of Ohio, by William Craighton, jun. Esq., of Chilicothe, the deponent determined on returning home to Tennessee, and took his departure from Marietta for Parkersburg, Virginia, where his six German servants, whom he had arrested under the authority of the United States, were; that he left the latter place some time in the month of March last, on board of a flat boat, owned and commanded by William Eastham, with his six servants on board, for the purpose of descending the Ohio as far as Louisville, Kentucky; that the boat, with all on board, arrived at Cincinnati, Ohio, on or about the 21st of March, and were landed by William Eastham, for the purpose of transacting some little business; that, during the absence of the owner of the boat, several men came down on the shore opposite, and, hearing one of the deponent's servants speak to one of the others in the German language, asked permission to come on board, which this deponent at first refused, from the belief that they (the visiters) might or would excite this deponent's servants to revolt, but, on these persons declaring that they were friendly disposed, this deponent at length consented to their coming on board; that these persons had not been on board long before the deponent discovered that they were trying to seduce off his servants, when he (the deponent) ordered them from on board; that they refused to go, and, after repeated orders, a combat ensued between this deponent and three of the visiters, and that, during the conflict, all of this deponent's servants were conveyed off; that, in the course of a short time, some of the former persons, with many others, returned, and ordered Mr. Eastham (who by this time had returned) to put his boat to land, and, on his refusing so to do, forcibly seized the cable and oar, and drew the boat ashore, when they came on board, and took from the boat what they were pleased to call the property of the deponent's servants.

The deponent states that he made repeated trials in Cincinnati to find out some of the names of those persons who entered the boat, but could not obtain any intelligence, and that he was compelled to return home without any of his servants; that he has expended a considerable sum of money for the passage, clothing, feeding, and transporting these servants; and that, previous to these servants indenturing themselves to this deponent, in Philadelphia, the country and climate, and every thing incidental thereunto, were explained to the servants by the agent for German redemptioners, and others of their countrymen; and that all of this deponent's, and many more of the passengers on board of the vessel, voluntarily agreed to indent themselves. Lastly, this deponent doth depose and say that he always treated his servants humanely.

JAMES BROWN.

Sworn to before me, this 8th day of November, 1819,

W. TANNEHILL, *Justice of the Peace for Davidson county, State of Tennessee.*

16th Congress.] No. 474. [1st Session.

CANAL TO CONNECT THE ILLINOIS RIVER WITH LAKE MICHIGAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 28, 1819.

SIR: DEPARTMENT OF WAR, *December* 28. 1819.

In compliance with a resolution of the House of Representatives of the 15th instant, directing the Secretary of War "to lay before that House the several topographical reports that have been made to the War Department, in pursuance of instructions to that effect, respecting the practicability of uniting, by a canal, the waters of the Illinois river and those of Lake Michigan, and such other information as he may be in possession of on that subject," I have the honor to transmit an extract of Major Long's report, and a copy of a report made by R. Graham and Joseph Philips, Esqs., which comprehend all the information on the subject in this Department.

I have the honor to be, very respectfully, sir, your most obedient servant,

J. C. CALHOUN.

Hon. HENRY CLAY, *Speaker of the House of Representatives U. S.*

Extract from a report of Major Stephen H. Long to George Graham, Esq., acting Secretary of War, dated

WASHINGTON, *March* 4, 1817.

The Illinois is formed by the union of three considerable rivers—the Desplain, the Despage, and the Kankakee; the last of which is nearly double the size of either of the two former. The Illinois is about three hundred miles in length, and is of variable width, from seventy yards to one mile. It has a very moderate current, and a depth of water sufficient to render it navigable, at all times, for boats of considerable burden, about two hundred and thirty miles from its mouth. At the mouth of the Vermilion there are rapids, perceivable only in the lower stages of winter. Farther up, the water is not generally so deep as it is below the Vermilion.

The valley of the Illinois varies in its width from three to ten miles; is generally flat and marshy; and, for the most part, subject to inundation when the river has no more than a medial height. In some parts of it, however, prairies and bottoms of considerable extent are to be met with, elevated much above high water mark. In ascending the river, the bluffs gradually decrease in height, being about one hundred and fifty feet high at the mouth, and about one hundred feet at the head of the river. Imbedded in the bluffs are strata of limestone, slate, and coal, which occasionally make their appearance along the surface of the declivities.

The river Desplain is a small stream rising in the low lands bordering upon the west side of Lake Michigan, and has its general course in a southwesterly direction. The valley of this river has an average width of about one mile, and is terminated on both sides by regular banks, nearly parallel to each other, extending along the river about thirty miles from the head of the Illinois. In ascending this river, also, the banks or bluffs gradually decrease in height, being, as before mentioned, about one hundred feet high at the mouth, and only twenty or twenty-five at the distance of thirty miles higher up the river, where, instead of maintaining their parallel direction, they form nearly right angles with the course of the river—that on the right taking an easterly, and that on the left a northwesterly course; but, being gradually inflected from these courses, they form an extensive curve, encircling a large tract of flat prairie, in no part elevated more than twelve or fourteen feet above the common level of the water in this vicinity. The river, throughout the above-mentioned distance, has four or five short rapids or ripples that make their appearance only in times of low water. In every other part it has the appearance of being a chain of stagnant pools and small lakes, affording a sufficient depth of water for boats of moderate draught.

In the flat prairie above mentioned is a small lake, about five miles in length, and from six to thirty or forty yards in width, communicating both with the river Desplain and Chicago river by means of a kind of canal, which has been made partly by the current of the water, and partly by the French and Indians, for the purpose of getting their boats across in that direction in time of high water. The distance from the river Desplain to Chicago river, by this watercourse, is about nine miles; through the greater part of which there is more or less water, so that the portage is seldom more than three miles in the driest season; but, in a wet season, boats pass and repass with facility between the two rivers.

The rivers Despage and Kankakee bear nearly the same character, in regard to their bluffs, valleys, &c., that has been given to the Desplain. The former of these rivers takes its rise a few miles west of that of the Desplain, and has a course nearly parallel with it. The latter rises in a flat, marshy country, in the neighborhood of the St. Joseph of the Lake, and runs a meandering course westwardly, passing the southern extremity of Lake Michigan, at the distance of twenty or thirty miles from it. Near the head of this river is a small creek falling into the St. Joseph, through which boats have passed in time of high water from the St. Joseph to the Kankakee. The country through which the Desplain, the Despage, and the Kankakee rivers take their course appears to be underlaid with a vast bed of limestone, which occasionally makes its appearance in the valleys of those rivers, covered with a soil too thin to support vegetation.

Chicago river is merely an arm of the lake, dividing itself into two branches, at the distance of one mile inland from its communication with the lake. The north branch extends along the western side of the lake about thirty miles, and receives some few tributaries. The south branch has an extent of only five or six miles, and receives no supplies, except from the small lake of the prairie above described. The river and each of its branches are of variable widths, from fifteen to fifty yards, and for two or three miles inland have a sufficient depth of water to admit vessels of almost any burden. The entrance into Lake Michigan, however, which is thirty yards wide, is obstructed by a sand-bar, about seventy yards broad, upon the highest part of which the water is usually no more than two feet deep. The difficulty of removing this obstruction would not be great. Piers might be sunk on both sides of the entrance, and the sand removed from between them. By this means the river would be rendered a safe and commodious harbor for shipping—a convenience which is seldom to be met with on the shores of Lake Michigan.

The St. Joseph of the Lake is navigable for bateaux to a very considerable distance, in all stages of the water.

The St. Joseph and the St. Mary's of the Maumee are rivers of considerable size and extent. The latter, in wet seasons, is navigable for perogues to Fort St. Mary's, one hundred and fifty miles from its confluence with the former, by the course of the river. Its branches interlock with those of the Wabash and Big Miami. The St. Joseph is

navigable about fifty miles, its tributaries interlocking with those of the St. Joseph of the Lake, the Kankakee, and the Wabash. The Maumee of the Lake is one hundred miles in length, and is navigable for bateaux and perogues throughout its whole extent, in all stages of the water. About thirty miles above its mouth are the Wolf Rapids. The face of the water, however, is not so great as to occasion any very serious obstruction to the navigation of the river.

The courses and relative positions of the several rivers and creeks may be seen by recurring to the plans.

Proposed canals and roads.

A canal uniting the waters of the Illinois with those of Lake Michigan may be considered the first in importance of any in this quarter of the country, and, at the same time, the construction of it would be attended with very little expense compared with the magnitude of the object. The watercourse, which is already opened between the river Desplain and Chicago river, needs but little more excavation to render it sufficiently capacious for all the purposes of a canal. It may be supplied with water at all times of the year by constructing a dam of moderate height across the Desplain, which would give the water of that river a sufficient elevation to supply a canal extending from one river to the other. It would be necessary, also, to construct locks at the extremities of the canal, that communicating with Chicago river being calculated to elevate about six feet, and that communicating with the Desplain about four feet.

To render the Desplain and the Illinois navigable for small boats and flats requiring but a small draught of water, nothing more is necessary than the construction of sluices in a few places where there are ripples of a sufficient width to admit the boats to pass through them. This may be effected by clearing away the loose stones from the bottom, and forming banks, riveted with stone two or three feet high, on each side of the sluice. Thus, a water communication between the Illinois and Lake Michigan may be kept open at all times sufficient to answer all the purposes for which a canal will be wanted for many years to come. A canal uniting the St. Joseph of the Lake with the Illinois, by way of the Kankakee, may be constructed also in a similar manner, and with great facility, except that the distance by this route is considerably greater.

There are various other places where water communications may be opened in this quarter, by means of canals, to great advantage, of which the following are but a small proportion, viz: Between the St. Joseph of the Lake and the St. Joseph of the Maumee; between the latter and the Wabash; and between the Illinois and the Wabash, by way of the Saginaw river. A canal also uniting the Mississippi and the Ohio, a little above their junction, would be of great public utility, particularly should a general depot for military stores be established near the mouth of the latter. The objects of this canal would be to shorten the distance by water from the contemplated site of the depot, northwardly, to avoid a part of the Mississippi difficult to navigate, and to render the depot accessible, by an easy and safe communication, both from the Ohio and the Mississippi.

SIR: KASKASKIA, *April* 4, 1819.

In addition to the notes of Mr. Sullivan, the surveyor, which describe the face of the country over which the lines were run, we beg leave to suggest some views which occurred to us on the subject of communications between the river Illinois and the Michigan lake.

By reference to the map herewith forwarded, it will be seen that the little river *Plein*, [Desplain,] coming from the northwest, approaches within ten miles and a quarter of Lake Michigan, and then, bending to the southwest, unites with the *Theakiki* [Kankakee] at the distance of about fifty miles, and forms the river Illinois.

The country between the lake and the *Plein*, at this point of approach, is a prairie (natural meadow) without trees, covered with grass, and, to the eye, a perfect level. From the bank of the *Plein*, standing on the ground, the trees are distinctly seen, with the naked eye, at Fort Dearborn, on the shore of the lake; from Fort Dearborn they are, in like manner, seen on the bank of the *Plein*. Standing on any intermediate point between the lake and the river, the judgment is at a loss to say to which side the ground declines, and whether the level of the *Plein* or the lake is the highest. It was, however, determined, from certain data, that the level of the river was two feet, or thereabouts, above the level of the lake. From this view, it would seem that the cutting of a canal in this place, between the *Plein* and the lake, would be a work of neither skill, difficulty, nor expense. Small, however, as the labor would be, under this view, it is still diminished, upon a close examination, and by finding that an arm of the lake, called *Chicago*, puts out in the direction of the *Plein*, and that an arm of the *Plein*, also called Chicago, puts out in the direction of the lake. They approach within two miles of each other; so that, in *common* water, there is only dry ground to that extent between them. The character of these two arms is essentially different: that of the lake being about sixty feet wide, and from ten to forty feet deep; that of the river being, in high water, from four to six feet deep, and, in places, a mile wide, and in low water either dry or reduced to a gutter. Between the heads of these two arms is also a gutter, which is dry in the dry seasons of summer and fall, and full of water in the spring; and, when thus filled with water, the boats, of six or eight tons, engaged in the Mackinaw and Mississippi trade, run through, backwards and forwards, so as to make no portage between Mackinaw and the Mississippi. This gutter, judging from the appearance of others now forming, was, at first, a path worn out by the feet of those who carried things across the portage, and afterwards deepened by the attrition of the waters, until formed into a little canal. The wind alone gives the water a current in this little canal, and its direction depends upon the course of the wind. Objects have been seen to float out of it, from the same point, to the river and to the lake.

It is incontestably true that an east wind will drive the water of the lake through this gutter into the *Plein*, and that water from Lake Michigan has been discharged by this outlet into the Mississippi, and thence into the Gulf of Mexico. It is equally incontestable that the waters of the *Plein* have been driven, by the same channel, into the lake; and these phenomena may now be witnessed at any time when the waters are high and the wind blows hard. It follows, therefore, that, to finish the canal begun by nature in this place, would require, as we have already said, but little of skill, time, or expense. On opening the canal, however, two difficulties would be experienced:

1st. The *Plein* would be found to be above the level of the canal; its water, of course, would be diverted from its natural channel, and pass by the canal into the lake.

2d. Supposing that evil remedied by a lock to lift vessels into the *Plein;* yet the *Plein*, during half the year, does not contain water enough to float a boat, and so could not become useful as a national highway.

To remedy this defect of water in the *Plein*, two projects suggest themselves: 1st. To sink the bed of the *Plein* below the level of the canal, and thus increase the depth of the *Plein*, as well by feeding it out of the lake as by collecting its water into a narrower channel. 2d. To make the canal unite with the *Plein* lower down in its course. A few miles lower would be sufficient to give the water of the lake a descent into the river, as the *Plein* has a sensible descent in this place, insomuch that the people of Chicago call it "The Rapids," having no other

word to distinguish moving water from that which stands still. Of the *Plein*, below its point of approach to the lake, we would remark that it has hardly the attributes of a river, being, in most places, without current and without banks, lying as a sheet of water in the prairie, sometimes a mile wide, and so shallow that the tall grass appears almost everywhere above its surface. Having said thus much of the facility of communication by the *Chicago*, we would now remark that several other routes are perfectly practicable. 1st. From a point in the lake south of *Chicago*, to enter the *Plein* below Mount *Juliet*, at or near what is called Lake *Despage*, but which is only a dilatation of the waters of the *Plein*. This route would lie over level prairie, through a multitude of small lakes or ponds, which have neither name nor place in any map. 2d. By a canal leaving the lake near its south end, and uniting with the *Theakiki* just above its confluence with the *Plein*. Both of these canals would be fed from the lake; would require few or no locks; would go over ground of the same sort; would be fifty or sixty miles long, and would join the waters of the Illinois at points from which it is constantly navigable. A third route was spoken of, but not seen by us. It would lie between the Theakiki and the St. Joseph's of the lake. Information says that it has been practised by French traders. You will perceive, sir, that we have not spoken of the nature of the soil through which these several routes would pass. It not being our business to search for, and report upon the practicability of water communications, our observations were limited to what fell under the eye while engaged in another duty; and, in making this report to you, it is our object to excite inquiry, not to furnish plans of practicable projects. We shall, therefore, only say, on this point, that the country in general, and the bed of the Plein, exhibited much loose stone and pebble and firm ground.

To conclude: the route by the *Chicago*, as followed by the French since the discovery of the Illinois, presents at one season of the year an uninterrupted water communication for boats of six or eight tons burden between the Mississippi and the Michigan lake; at another season, a portage of two miles; at another, a portage of seven miles, from the bend of the Plein to the arm of the lake; at another, a portage of fifty miles, from the mouth of the Plein to the lake, over which there is a well-beaten wagon road, and boats and their loads are hauled by oxen and vehicles kept for that purpose b the French settlers at the Chicago.

Respectfully, your obedient servants,

R. GRAHAM,
JOSEPH PHILIPS.

The Hon. J. C. CALHOUN, *Secretary of War, Washington.*

16th CONGRESS.] No. 475. [1st SESSION.

APPLICATION OF MISSOURI FOR ADMISSION INTO THE UNION AS A STATE.

COMMUNICATED TO THE SENATE, DECEMBER 29, 1819.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled: The memorial of the Legislative Council and House of Representatives of the Territory of Missouri, in the name and behalf of the people of said Territory, respectfully showeth:

That their Territory contains at present a population little short of one hundred thousand souls, which is daily increasing with a rapidity almost unexampled; that their territorial limits are too extensive to admit of a convenient, proper, and equal administration of Government; and that the present interest and accommodation, as well as the future growth and prosperity of their country, will be greatly promoted by the following division, which your memorialists propose, to the end that the people may be authorized by law to form a constitution and establish a State Government within the following limits:

Beginning at a point in the middle of the main channel of the Mississippi river, at the thirty-sixth degree of north latitude, and running thence in a direct line to the mouth of Big Black river, (a branch of White river;) thence up the main branch of White river, in the middle of the main channel thereof, to where the parallel of thirty-six degrees thirty minutes north latitude crosses the same; thence, with that parallel of latitude, due west, to a point from which a due north line will cross the Missouri river at the mouth of Wolf river; thence due north to a point due west of the mouth of Rock river; thence due east to the middle of the main channel of the river Mississippi, opposite the mouth of Rock river; and thence down the river Mississippi, in the middle of the main channel thereof, to the place of beginning.

These are limits which, to a superficial observer, glancing over the chart of our country, would seem a little unreasonable and extravagant, but which a slight attention to its geography (or more properly to its topography) will be sufficient to satisfy your honorable body are not only proper, but necessary. The districts of country that are fertile and susceptible of settlement are small, and are detached and separated from each other at great distances by immense plains and barren tracts, which must for ages remain waste and uninhabited. These distant frontier settlements, thus insulated, must ever be weak and powerless in themselves, and can only become important and respectable by being united; and one of the great objects your memorialists have in view is the formation of an effectual barrier for the future against Indian incursions, by pushing forward and fostering a strong settlement on the little river Platte to the west, and on the Des Moines to the north.

Your memorialists are free to declare, and are happy in declaring, that they do not feel the necessity of enforcing their wishes by an elaborate detail of the blessings of self-government, or a particular enumeration of the rights and immunities guarantied to them by the treaty of cession. Your memorialists feel a firm confidence, founded on the wise and generous policy heretofore pursued by your honorable body, (and to which they owe their existence as a portion of the great American family,) that they need only pray to be incorporated in the Union, and to show that it is not only "possible," but convenient and proper, (according to the principles of the federal constitution,) to have their prayer answered.

There are many grievances of which your memorialists might complain, and complain heavily, too, and many that are much more easily felt than described; yet most of them, it must be confessed, are inseparable from the form of government under which they live, and none of them have been imposed through choice by the General Gov-

ern ment; and your memorialists can feel no wish or motive now to complain of old grievances they have long borne with patiently; cheered with the hope that their sufferings must soon have an end, they would choose rather to forget them. There are, however, rights, privileges, and immunities belonging to citizens of the United States, which your memorialists would proudly claim, to which they aspire, and with which they pray to be invested. These, they fondly believe, should not, and will not now, be regarded by your honorable body as mere matters of grace and favor.

And though the enclosed documents are not so satisfactory as your memorialists would wish to have forwarded, they may still serve to show you that the population included within the counties of New Madrid, Lawrence, St. Genevieve, Cape Girardeau, Washington, St. Louis, St. Charles, and Howard, (which are within the above limits,) is more than equal to the number of inhabitants heretofore required by the laws and constitution of the United States, upon the admission of any new State into the Union; and that, whilst every thing is hoped for from the spirit of a generous and enlightened policy, much might have been claimed in justice on the faith of the treaty of cession.

DAVID BARTON,
Speaker of the House of Representatives.
BENJAMIN EMMONS,
President of the Legislative Council.

ST. LOUIS, *November* 21, 1818.

The foregoing is a true copy of the original.

D. BARTON,
Speaker of the House of Representatives of the Territory of Missouri.

16th CONGRESS.] No. 476. [1st SESSION.

CONTESTED ELECTION OF ORSAMUS C. MERRILL, A REPRESENTATIVE FROM VERMONT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 5, 1820.

Mr. TAYLOR made the following report:

The Committee of Elections, to whom was referred the petition of Rollin C. Mallary, contesting the election of Orsamus C. Merrill, who is returned as one of the Representatives of the State of Vermont in the present Congress, and praying to be admitted to a seat in his stead, have had the same under consideration, and report:

That the law of Vermont requires that, after the poll of the election shall be closed, and the result ascertained, a certificate of the number of votes given for each candidate, (of which a record shall be made in the town clerk's office,) signed by the presiding officer, shall be by him sealed up and superscribed, and shall be delivered to the Representative of the same or an adjoining town, who shall deliver it to a canvassing committee, to be chosen by the General Assembly. That the committee shall, on the Monday next following the second Thursday of October, sort and count such votes, and shall declare the six persons having the greatest number of votes duly elected as Representatives to represent the State in the Congress of the United States, and shall give notice thereof to the Chief Magistrate of the said State. The canvassing committee are required to make a list of the certificates by them considered legal, and also a list of such votes as are deemed illegal, and lodge a copy thereof with the clerk of the General Assembly, and the original certificates with the Secretary of State, to be by him preserved until after the first session of the Congress for which the election was held. The Governor is required to execute proper credentials to the persons declared to be elected agreeably to the said act.

The election in that State for Representatives in the present Congress was held by general ticket, on the first Tuesday of September, 1818, under the said election law. Thirteen candidates were supported by the freemen at the said election. The canvassing committee, in executing the duty required of them by the act above mentioned, counted and allowed to the sitting member 6,955, and to the petitioner 6,879 votes. They rejected, of the votes returned for the sitting member, in the town of Wardsboro', 24, and in the town of Berlin 59. They rejected, of the votes returned for the petitioner in Fairhaven, 90, and in Plymouth 42. These votes are claimed by the petitioner. He also claims to be allowed the following votes, which, from the copies of the town records laid before the committee, appear to have been given in his favor according to law, but which were not returned to the canvassing committee—in Woodbury 56, and in Goshen 27. If the votes in these four towns be added to the poll of the petitioner, it will give him 57 votes over the sitting member, even if the Wardsboro' and Berlin votes be counted in his favor. The petitioner admits that these votes ought to be allowed to the sitting member; but no evidence of their legality has been submitted to the Committee of Elections.

It is sufficiently proved that, in Fairhaven, Plymouth, Woodbury, and Goshen, the votes were given according to law, and certificates thereof were duly recorded in the town clerk's office of the several towns. But the presiding officer of the election in Fairhaven did not, as the law directs, seal up the certificate of votes after it had been recorded in the clerk's office, but sent it unsealed to the canvassing committee. For this cause, it was by them rejected. No fraud is alleged, nor has the mistake done any injury to the sitting member. The town clerk's record is doubtless designed to guard against fraud. And it has not been the practice of the House of Representatives to allow votes legally given to be defeated by the mistake or negligence of a returning officer, especially in mere matter of form. The committee are of opinion that the votes of this town ought to be allowed to the petitioner.

The votes of Plymouth were rejected by the canvassing committee on account of the informality of the certificate of the presiding officer. It is in the following words:

"*Votes for Representatives to Congress.*

"Mark Richards, 42 votes; Rollin C. Mallary, 42; William Strong, 42; Charles Rich, 42; William A. Griswold, 42; John Peck, 42.

"At a freemen's meeting, legally warned and holden in Plymouth, on the first Tuesday of September, 1818, the above gentlemen were voted for Representatives to Congress.

"LEVI SLACK, *Constable.*

"MOSES PRIEST, *Town Clerk of Plymouth.*

"PLYMOUTH, *September*, 1818."

According to the statute, the certificate ought to have been thus:

"At a freemen's meeting, legally warned and holden at Plymouth, on the first Tuesday of September, A. D. 1818, the votes for Representatives to Congress having been duly taken, sorted, and counted, the following persons had the number of votes annexed to their names, respectively:

"Mark Richards, 42 votes; Rollin C. Mallary, 42; William Strong, 42; Charles Rich, 42; William A. Griswold, 42; John Peck, 42.

"Given under my hand, at Plymouth, this first Tuesday of August, A. D. 1818.

"LEVI SLACK, *First Constable.*"

The Committee of Elections are of opinion that the form prescribed has been substantially adhered to, and that the votes ought to have been received and counted by the canvassing committee. It moreover appears that the town clerk's record is strictly formal, and that Levi Slack was first constable. These votes, also, are to be added to the petitioner's poll.

In the town of Woodbury, fifty-six votes were given for the petitioner, and a record thereof was duly made in the town clerk's office, but, in the certificate sent to the canvassing committee, through the mistake of the presiding officer, the names of Rollin C. Mallary and Charles Rich were omitted, and the names of Pliny Smith, Thomas Crawford, and Thomas Hammond, who were candidates for the office of councillors of the State of Vermont, but in whose favor not one vote was given for Representatives to Congress, were inserted. The committee are of opinion that the error ought to be corrected, more especially as there exists a record the verity of which is not impeached, by which the correction can be made.

In Goshen, twenty-seven votes were given for the petitioner, and one vote for the sitting member. The certificate of the election was made in due form, and recorded in the town clerk's office. The original was, according to law, delivered to the Representative of the town to the General Assembly, whose duty it was to deliver it to the canvassing committee. From some cause, which does not appear, he neglected to attend the General Assembly, and did not send it by a Representative of an adjoining town, because (as he alleges) such Representative left home for the General Assembly at an earlier day than usual. The certificate still remains in his possession. It is the opinion of the Committee of Elections that the petitioner ought not to be deprived of the votes of this town by reason of the circumstances above mentioned. The votes of Woodbury and Goshen are therefore added to the petitioner's poll.

The committee annex to this report a brief statement presented by the petitioner in support of his petition, (marked A;) also, an answer to the same, presented by the sitting member, (marked B,) and respectfully submit the following resolutions:

Resolved, That Orsamus C. Merrill is not entitled to a seat in this House.

Resolved, That Rollin C. Mallary is entitled to a seat in this House.

A.

The fifth section of the first article of the constitution of the United States provides "that each House [of Congress] shall be the judge of the elections, returns, &c. of its own members."

It is respectfully considered that the term "*election*," in a political sense, must mean the *designation* or *choice* of a person to perform the duties of some office. An "*election*" is an act performed by freemen possessing proper qualifications. The manner of performing it is immaterial, only as it may or not be sanctioned by some particular law. If by *viva voce*, when the declaration of the electors is made, the election is complete. If by ballots, when these are deposited by the people in the custody of the legal receiver, the designation is consummated. The electing power has then performed its office. The choice is perfect. All that follows is but the collection or preparation of evidence to ascertain the fact.

The sorting, counting, and recording of the ballots by town officers, and the re-examination and computation by others, are but so many steps taken, not to make or complete an election, but to discover in what manner it has terminated.

To judge of an election, therefore, must of necessity imply the right of taking cognizance of the *exercise* of the electing power; of this, also, at the time when the designation is accomplished by the suffrages of the freemen.

The laws of individual States, from convenience or necessity, created a tribunal to determine for themselves, in the first instance, the election of Representatives. They have determined what shall be the evidence, and when produced. If no one is injured, no reason exists for a re-examination.

It is true that the laws of a State may be binding on Congress, when supported by the constitution. That instrument has defined the limits of State power on this subject. It seems to be confined to the qualifications of electors, the times, places, and manner of holding elections. A State cannot prescribe to the House the rules of evidence, nor the time when that evidence shall be produced. It cannot declare that the report of a canvassing committee shall be conclusive in all cases whatsoever, nor that the testimony on which it is founded is all that may be used.

By the laws of Vermont, all the provisions for securing the evidence of an election are calculated solely for the State tribunal. The power of the House to interfere is not acknowledged. It would be unreasonable to say that the House should be bound by laws never intended to operate on its privileges, and, if intended so to operate, must be nugatory. It cannot be inferred that, because the canvassing committee are required to receive the certificate of a town clerk or constable as evidence, Congress is to receive no other.

Again, each House shall be the judge of the election. How can this be done if the State authority has the power to create an intervening obstacle? How can the House judge of a fact which they are not allowed to examine? How are they capable of judging, if the errors and mistakes of every petty officer through whose hands the suffrages of the freemen must pass are to be a perpetual bar to all knowledge of the original transaction? To have the right

to judge of an election, and not be allowed to approach it—to be governed by the voice of the electors, and not be permitted to hear it, must appear deeply laden with inconsistency.

I have understood that a distinction is to be taken between the cases of votes *illegally* returned by the town officers, and on *that* account not allowed by the canvassing committee, and the cases where votes were given by the freemen, *and not returned at all.* The latter was the fact as relates to the votes of Goshen and part of the votes of Woodbury. This is explained by the evidence.

It seems rational that a return, manifestly illegal, must be the same as no return at all. It appears difficult to discover a legal or equitable difference between a *neglect* to return the votes of the freemen, and a *return* so *defective* that no notice can be taken of it.

Hence, it is respectfully inferred that an *election* is complete when the electors have delivered their suffrages or ballots into the hands of the legal depositary; that no mistakes or neglects of the agents of the freemen can alter or annihilate the fact; that no power exists, or can exist, to prevent the House from ascertaining that fact by such evidence as it may choose to admit.

A different construction would deprive that body of one of the most salutary restraints upon ignorance and corruption, and would rob the electors of the most effectual safeguard to their political rights. It would, in effect, be an admission that the honorable House must be composed of such as the officers of towns and counties should think proper to send, and not those whom the freemen by their suffrages had elected.

The proceedings in the State may always be considered, *prima facie*, correct. If no impeachment is offered, they need not be doubted.

But few decisions have come to my knowledge. All that may have an influence on the present case will readily present themselves to the minds of the honorable committee.

Permit me, however, respectfully to refer to the case of Willoughby and Smith from the State of New York. The votes of the electors were given for "*Willoughby, junior.*" A part were returned by the inspectors as having been given for "*Willoughby.*" Smith was declared elected by the State authority. The House received evidence to prove for whom the votes were given by the freemen.

The name is *descriptio personæ*. The addition of *junior* describes another person, as different as Hammond from Mallary. To correct one requires no more power than the correction of the other. I make a reference to the evidence from Woodbury; Crawford, Smith, and Hammond were returned to the canvassing committee by the officers of that town, in the room of Rich and Mallary. To the latter persons the votes of the people of that town were given.

I understand that the *qualifications* of freemen at the time they appeared at the poll have been after examined by the House. It is submitted whether this is not decidedly more independent of State authorities, a greater extension of the right of judging than the simple allowance of the undisputed votes of the electors, which, by the negligence of their servants, had not been returned in season for computation.

It is said that, in 1804, a case from Georgia was decided that seems to have some relation to the principle embraced in the present. A reference is made to that case in the report of the honorable Committee of Elections in 1817. By the laws of that State, the votes are to be returned within a given number of days. Some of the votes for one candidate were not returned within the limited time. The person for whom a less number of votes were given was declared elected. The votes given for the other, and not seasonably returned, were allowed by the House, and the person for whom they were given was admitted to his seat.

Should, therefore, the honorable House be pleased to inquire whether Mr. Merrill or your petitioner was elected by the freemen of Vermont, the following statement of facts, it is believed, will be supported by ample testimony:

The State of Vermont was entitled to six members. The election was by general ticket. The six who received the greatest number of votes were elected. Messrs. Richards, Rich, Crafts, Strong, and Meach were chosen, to whom no opposition can be made. Mr. Merrill, the sixth, received the least number of votes of any one declared elected; his seat is the one contested.

The whole number of votes counted to Messrs. Merrill, Griswold, and Mallary, are as follows. From the state of the poll, these are the only persons concerned.

	For Mr. *Merrill.*	*Griswold.*	*Mallary.*
	6955	6908	6879
The votes given in the following towns were not counted, viz:			
Woodbury, - - - -	-	-	56
Fairhaven, - - - -	-	90	90
Goshen, - - - -	-	27	27
Plymouth, - - - -	-	42	42
	6955	7067	7094

Which gives Mallary 27 votes over Mr. Griswold.

It gives Mallary over Mr. Merrill, - 139 votes.
It is said that Mr. Merrill lost in Berlin 59
Do. do. in Wardsboro' 24— 83

Which leaves Mallary over Mr. Merrill 56 votes when all are counted, exclusive of the 8 votes given Mallary in Mansfield.

The votes in Berlin and Wardsboro' were undoubtedly given for Mr. Merrill, and he is entitled to their allowance.

The following is an abstract of the testimony:

1. The copy of canvass rolls. This shows the whole number of votes allowed to each candidate. It gives copies of the certificates from Fairhaven, Woodbury, Plymouth, and Mansfield. It shows that no votes were counted for Mallary from Fairhaven, Plymouth, Woodbury, Goshen, and Mansfield.

2. In Woodbury, Richards, Mallary, Rich, Strong, Griswold, and Peck, each had fifty-six votes.

The officers in Woodbury, in making out the certificate which was returned to the canvassing committee, omitted the names of *Rich* and *Mallary*, and returned, in the room of them, the names of "*Crawford*, *Smith*, and *Hammond*," for whom no votes were given.

Mr. Griswold's were returned and counted; Mallary's were not. By the statement from the canvass rolls, it appears that Griswold had counted twenty-nine votes more than Mallary. By allowing Mallary the fifty-six votes given for him in Woodbury, Mallary will have over Griswold twenty-seven votes. Mr. Griswold's pretensions will then be set aside, as in all the other towns Mallary and Griswold had an equal number of votes.

The votes of Fairhaven were lost on account of the certificate of the votes being returned *not sealed.*

The votes of Plymouth were rejected on account of an informal certificate.

The votes of Goshen were not returned.

Notices were given by the magistrates of the time and place of taking testimony, which are returned with the depositions.

I gave notice of my intention to contest the election, as by the letter forwarded with the evidence. I also wrote Mr. Merrill desiring him to inform me at what time it would be most convenient for him to attend the taking of testimony. A copy of that letter is also transmitted.

All which is respectfully presented to the honorable committee.

R. C. MALLARY.

The Hon. JOHN W. TAYLOR, *Chairman of the Committee of Elections.*

B.

To answer some principles assumed by Mr. Mallary in his remonstrance, and to abridge, if practicable, the inquiry commenced by him in support of his claim to a seat in the House of Representatives in my stead, I solicit the indulgence of the committee to the following exposition of the claims, rights, and principles I urge in defence.

It would seem at the first impression that it was alone necessary to bring the conflicting claims and the just rights of the freemen summarily to the law of the State, and the practice and adjudications under it. Further reflection indicates the necessity of a more prolix and minute view of the case, and chiefly so by reason of the positions assumed by my opponent, and the principles connected with it, and which are of the first importance.

The question embraces the important rights of suffrage, and it takes within its scope the State laws, authorities, and sovereignty.

Comment upon the important and sacred character of the right of suffrage need not be indulged, as this is familiarly known, abundantly recognised, and clearly illustrated in all our rules, codes of rights, and constitutions. Its value, its guards, its tenure, and the practical rules for the exercise of its power, are therein delineated with sufficient perspicuity and ability. However unnecessary it may be to enlarge upon this bearing of the case under consideration, I apprehend it is not only pertinent but essential to advert to it. It is equally important to consider that, from the quiet and pure character of the right of suffrage, contrasted with the turbulence, caprice, and passions of men, its exercise must necessarily be subject to such general and uniform rules of order as may be prescribed by the legislative power of the respective States or of the Union. The constitution of the Union has so declared; reserving to "the Congress," as the paramount power, the right "by *law* to alter the regulations of the respective States." "The Congress" refraining to do this, the State regulations are plenary, and must be sustained. The wise and experienced are therefore not at liberty to let it escape consideration that the exercise of this right of sovereignty is not left a vagrant, capricious, or despotic act of power. In all well-regulated communities it must be a creature of law; and it is our pride and boast that this principle is recognised and protected. Our Government is emphatically a Government of laws, and not exactly a Government of precedents, which may be arbitrary, and shape an individual case. If the prescribed provisions of law are not strictly observed in this exercise of sovereignty, it is difficult to define the rules by which it is regulated and secured. It is apprehended to be a point established, that, in every legitimate exercise of the right of suffrage by the freemen, they are to yield obedience to existing ordinances and regulations, and cannot be supposed to act in their sovereign capacity except they act in obedience to the express laws they have caused to be enacted. A perfect conformity to all the requirements would seem, therefore, essential to the consummation of the act of election. I also consider that, while without the law, whether in their individual or corporate capacity, the freemen are estopped from claiming any right or privilege, nor can they confer any. Any non-conformity to the statute of elections by one portion of freemen is never to be construed to impair the rights of another portion of freemen who hold rights in consideration of their fidelity to the laws in such case made and provided. *Imperfect rights* can never sustain competition with *perfect rights.*

From this view of the principles bearing upon the case, I am persuaded that the depositing, assorting, and counting of the ballots rendered by the freemen, and the sealing up and returning the amount deposited, in the form, time, and manner expressly prescribed, to the ultimate State tribunal of decision, in order that the aggregate will of the freemen may be known, is imperatively required to consummate the act of election and perfect a choice. The requisites of the statute of the State are guards placed around the sacred character of the elective right: to preserve its purity, and give to its exercise all the necessary protection and solemnities, are, therefore, to be considered parcel of it, and essential; and their particular application, by the law and usages of Vermont, is by the freemen; and I dwell with much emphasis upon the fact, *it is their act;* as they select and appoint special agents, whose character and conduct they know, and in whom they repose especial confidence.

This settled order of business, touching elections, as prescribed by the respective States, it would seem, is obligatory on the decisions of the House of Representatives, regarding the elections of its members, unless "the Congress, by *law*, have altered such regulations." This conclusion is founded on the fourth section of the constitution of the Union; it is also founded on the broad basis of good sense, so far forth as it limits discretion and the range of decisions to the system of rules prescribed in the law of each respective State. It shields, also, from the imputation of caprice and irregularity the exercise of the right of suffrage, the manifestations of the will of the freemen, and the decisions of the representative body of the nation; and, inasmuch as the law of the State is not in derogation of the constitution or any law of the Union, but pursuant to the constitution, I feel much confidence that the statute of the State, the practices of the freemen, and the official expositions and decisions under it, will be respected.

That I may not be misunderstood, I ask leave to remark that, under a case of impeachment of State proceedings, the power of the House, and the duty of its committee, I apprehend, are to inquire whether, in all the stages of proceedings, the constitution of the Union, and the State regulations as to time, place, and mode of proceedings, have been observed; and if, in the investigation, it is found the State regulations are agreeably to the constitution, and the requisites of the law have been regarded, the proceedings of the freemen and decisions of the State tribunals are in good faith to be recognised and accredited; otherwise the State law is an act of supererogation, and a nullity. Hence, I admitted the persuasion that the House of Representatives would never assume a power which can only be exercised by the Congress, and, therefore, the State laws and proceedings would be adjudged *plenary*, except previously *modified by a law of Congress;* and that, on the contrary, if the law is in derogation of the constitution, or the proceedings are not pursuant to the statute, or provided the agents of the freemen have been fraudulent, or the tribunals of decision have been perverse and corrupt, then, indeed, the procedure is nugatory, and will be so declared; then the power of the House will be found remedial, and sufficiently ample.

As a regard to the will and prerogatives of the freemen, and a tender care of their interests, are ever a paramount inclination and duty with a faithful Representative; and as this case may seem to involve their rights and in-

terests, and a mistake in reasoning on this case may happen, whereby their just rights may, in fact, be sacrificed, I would inquire, for whom is this investigation instituted? Not for the freemen; they have no petition here; their rights are not implicated; they do not feel injured. I repeat, the freemen of Vermont have preferred no claim; and yet, as Representatives, it becomes the House and its committee to cherish the rights of those freemen who have been industrious and faithful to their own rights, and who, by their diligence, have shown fidelity to the law. I repeat, they ask no other intervention; they have taken no step; they care not. The law is the guardian of their rights, and they know it; and they ask no other exercise of guardianship here. The freemen of Vermont are also aware that vigilance is their only safeguard, the title-deed of their immunities. They ask not for the *few* who have not been industrious and faithful to their rights; they ask not that the beneficial and liberal system of legislative wisdom and providence should be made a sacrifice on the unhallowed altar of indolence and indifference, or that the consummated rights of the faithful should be immolated.

I beg leave to say, had I respected the rights of the freemen less, or had I been less sensible of the paramount motives which influence honorable members, I should have withheld reiterations of these facts; I should have contented myself with saying the freemen are not injured. Decide as members may, the freemen of Vermont have their full representation; the freemen of the Union are not injured, for Vermont has but its due proportion of representation.

Who are these petty town and county officers whom my opponent speaks of as giving members to this House? They are the fathers and guardians of the freemen's interests; the choice men of each corporation; selected—yes, approved and appointed by the freemen themselves, as their legal and respected depositaries, and their agents to perform and fulfil for them the law, that not one jot or tittle thereof fail of its accomplishment: their acts are the acts of the freemen. This question should be stripped of all bias for the freemen, except to sustain the institutions which define and regulate their immunities. By whom is it asked that State regulations should be disregarded? Certainly not by the freemen. Such as have neglected the legal modes and certainties, and abandoned their rights which the law sustains, would have been estopped, by reason of their own laches, from asking the prostration or suspension of a State system, for the favor of law is not towards them.

I beg leave to ask, of whom is the destruction of a State system required? The constitution and law of the Union are not asked; but it is asked of a branch of Congress—the people's representatives. And shall one branch of the law-making power do it, under the arbitrary doctrine of precedent alone? No. Ours is a Government of express laws. Adjudicated precedents of practice are not unfrequently beneficial, and perfect the provident work of a Legislature; and in all cases of doubt and ambiguity they the rather lean to prop freemen's diligence and fidelity. For any *individual*, then, should "shame light" upon a *system* established by a State sovereignty? The answer is to the case, and in point. The case is a case of strict right between individuals.

In this view of the subject, I proceed to remind the committee of my opponent's remark, that "the proceedings in the State may always be considered *prima facie* correct." The proceedings in a State, done fairly, and conformably to law, in my opinion, are more than *prima facie* correct; they are as record evidence, which cannot be contradicted or altered by parol testimony. *Neglect* or *mistake* may defeat the rights of the freemen, by reason of not perfecting the evidence of a fact, or the legal manifestation of their will. The plea of *neglect* or *mistake* cannot be urged to contradict, vary, or destroy a legal proceeding, or defeat a legal and vested right. State proceedings may be *destroyed* by showing there was *corruption*. Actual fraud or corruption in any stage of the proceedings, and in whatever shape it satisfactorily appears, eradicates an otherwise consummated right, because it determines it *no record—no act*. I urge these doctrines the more strenuously, because the case under consideration is a question of strict right between two individuals. My opponent does not allege corruption, or prove fraud; his parol testimony, therefore, is inadmissible, and altogether insufficient to impeach legal State proceedings, and my rights, which are sanctioned by the highest tribunal thereof, and consummated by the signature of the Chief Magistrate and the seal of the State. I consider my right to a seat in the House of Representatives identified with the rights of the greatest number of diligent freemen, with the law, and the decisions of the State authorities.

I contend, for yet other reasons, that the statute of Vermont is to be in force, and its requirements to be held inviolate. Deducible from it are the soundest rules of evidence, the best of which the case is susceptible. I hold on to this ground with the more confidence, because, in so doing, I conform to the decisions of the last and final tribunals of the State—I mean the tribunal of canvass, and the Representatives of the State in General Assembly, to whom the committee of canvass report. Here it was solemnly and explicitly decided by actual vote, after due debate and deliberation, that the votes of the freemen in any incorporated town, *wanting in any of the requirements of the law, must be deemed illegal, and be rejected.* Comment is probably unnecessary, yet I trust I shall be indulged in remarking it is an acknowledged principle that the *will* of the freemen, unaccompanied by any *act*, cannot consummate a *choice*, because there can be no manifestation of their *will*. In towns where the choice is to be determined by ballot, the will of no individual freeman can be accounted any thing, except he makes deposite of his vote in the ballot boxes for canvass, at the legal time and place. And in order that the aggregate vote of the freemen may be manifested, every political corporation must make deposite of the amount of its votes at the legal place, to the appointed board, and in legal time. As, in the first instance, the ballot deposite is the highest possible manifestation of the will of the individual freeman; precisely in the same manner, in the second instance, the deposite is the highest and most solemn manifestation of the aggregate will of the freemen of the State. The portion omitting to do this prescribed *act* have *abandoned* their rights, and by their own *laches* have rendered their rights imperfect and inchoate, and the power of reclaiming or perfecting them is lost.

Before I proceed to an examination of the precedents quoted by my opponent, I respectfully ask leave to urge that the use of precedents arrayed against the check usages or precautionary ordinances of States is only to be justified on an extraordinary occasion. They are to be used with great caution and the soundest discretion at all times, and are never to be adopted to destroy legal certainty, or to extend the consummation of an act beyond the statute period of conclusion. Even the sovereign power of Congress has its limitations, and an integral portion of that authority has its restraints. I hold it correct in principle, that until the constitution shall have been modified, or until the Congress shall have altered by law the State election regulations, and made a uniform course of practice, the decisions touching elections cannot be uniform, but must be graduated to the varying and peculiar regulations of each State, respectively. The requisites of return, &c., prescribed in the law of Vermont, were suggested by practical abuses, or well-founded apprehensions of imposition on the fair rights and will of the freemen, and were intended as checks and adequate guards against their recurrence and existence. The like evils may only sectionally occur, and the like apprehensions may arise from causes purely local. The like remedies and precautions will not, therefore, generally demand legislative interposition. And to break down provisions of this character by the power of precedents, adopted under other circumstances, cannot be friendly to the dearest rights of freemen.

The uniform principles of decision in the New England States, as I have been informed by honorable gentlemen, have been strictly with their laws. And if the laws and decisions of States are to be held as of no weight, and

nugatory, I am of opinion the safer course is for "the Congress" to alter the State regulations by *law;* and that the altering or nullifying them by mere precedents is questionable, and rarely to be tolerated.

Inasmuch as precedents of this character are alleged by my opponent to exist, I proceed to examine them. The detailed report of cases, with all the facts and reasons governing the precedent, is necessary to find its analogy and relationship to the case in consideration. The cited case of Georgia is an entirely different case. The reasons for non-compliance with the law regarding returns was not urged as a *laches* of the freemen, but was a providential prohibition. The maxim that the "act of God injures no man," in this case has all its force, and is not to be disputed; the decision was correct. It can have no bearing in the present case, which was an *abandonment* by the freemen of their legal rights, as, in the case of the town of Goshen, they neglected to make return, not only within the legal period, but even to this day. And in the towns of Fairhaven, Plymouth, and Mansfield, the case was determined against them, under solemn adjudication, by reason of their *own acts.* They did not obey the law, by reason of indolence or a want of diligence, neither of which is a competent plea to delay or change the operation of law, or to arrest and subvert its commandments. The case of Georgia, by an examination of it in its details, shows that the returning officer is admitted to have made use of all due diligence. And the allegation was, that, by reason of an unusual and tremendous storm, or hurricane, by which the country was inundated, bridges were swept away, and the ways were rendered impassable, he was prevented, by this act of God, from fulfilling the law. There is, therefore, no similitude in the cases, and the precedent does not apply, and, in fact, is no precedent; it is a solitary case. The *fact* to be decided was as to the *admission of proof* of the alleged act of providential prohibition regarding return. So far as regarded this point, it may be received, and stand as an unsettled, solitary precedent. Inferences, remarks, or decisions beyond the point in issue, or submission, are extra-judicial, and without the case, and cannot be drawn in as precedent. This I judge to be a distinction, correct in principle, and warranted by practice. The present case was a non-observance of law, without any alleged providential excuse—it was an essential legal *laches* of the freemen; the *fact* is acknowledged by my opponent that the *law* was not complied with. The decision called for was, I repeat, as to evidence regarding the cause of failure, and they decided not to "receive any evidence on that point:" all besides is to be considered argument. It might be logic in that peculiar case. There is, however, an important distinction in that from the present case which I have mentioned. The doctrines of precedent should never set statutes at defiance, and bring into contempt the acts of a Legislature; they are to be taken in their most strict sense, and are never to abolish express, fixed, constitutional law. The doctrine of precedent, in any other view, is perilous and dangerous in the extreme. It "assumes power without control, on the spur of the occasion, and after the fact, and makes its decision the *law* and the *judgment.*" If there is "fixed law," it must be followed; if there is no law, "the judgment on any particular case is the law of that single case only, and dies with it." And this is more emphatically a sound principle under our Government.

The extra-judicial remarks in the cited precedent case are of such dangerous measure as to place States in a humiliating predicament. The freemen, in their sovereign capacity, pursue duties and perform acts agreeably to their laws, which they enacted as barriers of safety, and within which they reposed in confidence. Yet, after all, a precedent never promulgated can sink its character and importance; destroy, by a touch, the mainspring of its power, and dissolve all its sanctions and securities. It is a predicament which exhibits a most unnatural state of things, as the only power competent to create a new power is "the Congress," and they may do it by *law.* In the present case, I desire it may not be forgotten that the return is the *act* of the freemen, and the omission of return by any portion is their own *laches*, as the returning agent is a creature of their own appointment, and his legal neglect concludes a forfeiture.

The case from Massachusetts, of Baylies and Turner, named by an honorable member of the committee, regarding the addition or omission of "jun.," is a case, in my apprehension, distinctly marked as inapplicable. The freemen, in that case, felt aggrieved, and they petitioned. In the investigation of the case in which this decision was had, it was found that Turner, senior, lived out of the district, and was ineligible by the law, and as *dead;* and, therefore, the freemen are not to be supposed to vote for a person dead in law, or naturally dead. I believe it is a settled principle in judicial proceedings, that the affixing or omitting the appellation of "jun." may be sufficiently *certain;* and it becomes a *fact* to be inquired into, whether the person be well designated and known by either description, as well by one name as the other; and I consider, in a case of ineligibility or actual death, the fact is clearly ascertained. The cases of "jun." are a matter of *fact*, and may be inquired into, and are not to be measured by the same rule as *legal laches*, which produces a forfeiture. It is to be judged of according to the best evidence produced. And, in my judgment, the distinction is palpable between this class of cases and the present case, where, in the *original return*, an entirely distinct name is entered. Mallary and Hammond, in no case, can come under one and the same description of person, or be understood, under any circumstances, less than legislative interference, which may give a new name, as designating one and the same person. The case of Woodbury, by my opponent, was brought to this class of precedents; the cases are not analogous, for the reasons assigned. If we pass to the evidence which my opponent has produced, we shall find that the settled rules of evidence in constant practice in our courts invalidates his evidence. The original officially sealed certificate returned is the declared and best evidence, and made so by express law. And this evidence, by my opponent's exhibit, shows no such *fact* as his having received any vote in the town of Woodbury. The copy record of a town is by no means equal evidence. The case appears to me analogous to the case of a deed of conveyance; for instance, the original and sealed deed conveys two hundred acres of land; the *copy* of it spread upon the record puts down the amount conveyed at one hundred acres. I apprehend no legal doubt could be raised on a question made, which ought to have the precedence, and which is the highest and best evidence, the *original* or the *copy.* The statute in section 6, in my view, intimates that the Legislature had the same view. They not only made the sealed, original certificate, done in statute form, the legal evidence, in the previous sections, but in the cited section they direct "that the committee appointed by the General Assembly, for the purposes mentioned in the act," "shall preserve and lodge the *original certificates* with the Secretary of State until after the first session of Congress for which the said election is held."

The guards and provisions of the act of the Legislature of Vermont are to be regarded as so many admonitions of the fallibility of human conduct and testimony, and are, therefore, to be held as a definitive standard whereby is to be ascertained the highest and only legal manifestation and expression of the will of the freemen. I therefore feel constrained to repeat that the original certificate, made out and sealed in the presence of the meeting of freemen, and returned to the tribunal of aggregate canvass, and which is sustained by all the prescribed legal forms and official solemnities, is the *best* evidence; and that the copy of the record of the town of Woodbury, and the affidavits procured and adduced by my opponent to contradict the original certificate, to make the most of them, are as objectionable and uncertain, and their admission to even an equality would be a disregard of settled principle, unlawful, and dangerous in practice. Indeed, it is unsafe to forget that the treacheries of memory, and the perverse motives which too often actuate human conduct, are usually more multiplied after the general result is known in

defeat, and revived by contest, than they are at the consummation of a fact happening before the case is made out; and, besides, any adjudication, under the circumstances of the case, and after the fact, repudiating statute evidence, would, in its character and consequences, be *ex post facto*.

Neither the petitioner nor the sitting member is to be put in contest with express law; nor can they be injured by the fair and full operation of the law of election. By this only can either be entitled to the honor of a seat as a member on the floor of Congress; and they ought not only to disclaim, but disdain to occupy, a seat on any other tenure.

The freemen are not injured by the law. The question, so far as regards them, is this: Shall a majority of the freemen who have regarded the integrity of their rights, been diligent in their duty, and obedient to law, prevail? or, Shall that portion of freemen prevail who, like the unwise virgins, did not trim their lamps, who neglected their rights and duties, and who were unfaithful to the law?

Mr. Mallary, who instituted the present contest, received a less number of the legal votes of the freemen of Vermont than did either of the sitting members from that State; and I declare this in all soberness, under the authority of express law, and by virtue of the sanction of the legal State authorities, who have so declared the law and the fact; and I do it more boldly, as collusion or fraud is not alleged in any stage of the proceedings.

The habits of the freemen, by usage, are in conformity to the law. They have decided for the law, and, in practice, they have observed it in its strictness, except the small number of from two to three hundred. The agents of the freemen and the tribunals of the law have decided for it. The constitution of the Union authorizes it; and, from an imperative sense of duty to the freemen, to the law and the State authorities, and to the constitution of the Union, I solicit the representative branch of Congress, and its committee, to confirm the law of the State, and every and all of its provisions, guards, and solemnities, according to the long-settled judicial usages of construction, and the rules of evidence. Nor can I doubt it. Detection of frauds upon the law and impositions upon the freemen will receive rebuke. A prodigal use of power will not be sanctioned anywhere.

I therefore would move the committee to view the case in the following order, and make their decision accordingly; the facts and statements of my opponent justify this classification of the points in contest, viz:

1st. Ought the adjudications of the State legislative tribunal of canvass to be overruled, and their decisions to be reversed, which were made in conformity to the law and the usages of the State, and in all verity and good faith?

This point involves the towns of Fairhaven, Plymouth, and Mansfield, whose votes my opponent claims.

The attention of the committee is respectfully called to the law of the State entitled "An act for electing Representatives to the Congress of the United States, and directing the mode of their election." The policy and provisions thereof are easy to be understood; and the decisions were conformed to the letter and spirit of the law.

2d. Can the votes of Goshen be adjudged legal; and ought they, upon any principle, to be counted for the petitioner?

The votes of this town were not returned at the legal period, nor have they been returned to the present day: there is, therefore, no legal evidence of any votes having been given at all by the freemen of said town of Goshen. The original certificate has not been exhibited, nor is it believed there is any precedent or any decision relating to this case.

3d. Is the petitioner's claim to the count of votes said to be given in the town of Woodbury substantiated by the best evidence? and ought the said votes, claimed to be given for my opponent on the evidence exhibited, to be taken down in the estimate of votes to be made here to defeat my rights? and is the statute evidence, the original official return of the returning officer, repudiated?

I cannot allow myself for a moment to entertain an idea that the House of Representatives, or its committee, will so decide as virtually to repeal or render nugatory the cautious and prudent enactments or the express law of a State sovereignty, or the deliberate decisions of its authorities, or that the plainest and most settled rules of construction and evidence will be prostrated, or that these guaranties of the freemen will become as lodgers or exiles in the metropolis.

The present period, marked by the absence of political asperity and party prejudices, is perhaps a favorable period to *alter by law* the election regulation of States, and to substitute a uniform system: this, however, is a different consideration, and only advanced at this time in allusion to arguments before suggested touching power.

It is a remark frequently made, that precedents are not necessarily, and ought rarely to be, binding on a legislative body. The views taken of a subject may be different; motives extraneous may bias the judgment, and give to it erroneous tendencies. The times through which we have just passed, I think, give additional force to the remark, and induce the necessity of caution and technical nicety in their admission, if admitted at all, to justify a contested and doubtful exercise of power. I wish it most distinctly understood that I rest my case on the law of the State and the constitution of the Union. I strenuously and boldly urge that the power of the House of Representatives and its committee as judges of the election, returns, and qualification of members, is limited to the law of the State and the constitution. They are to inquire and decide whether either has been infringed, and whether all proceedings have been done in good faith. They are not authorized to step behind a constitutional statute, except to see whether its provisions have been regarded. The statute is the act of the freemen, and is the expression of their will, and it is as vitally important to them as the deposite of their ballots. The House of Representatives, without the co-operation of the other branch of Congress, cannot pass behind the law of Vermont to alter or contradict it, without the exercise of unconstitutional and dangerous power. They would do no act of friendship to the freemen by throwing to the winds all their statutes, and their policy, and exercises within it. I have examined the manuscript decisions touching elections, and I find none at variance with the ideas and principles I have suggested. The decisions on points in issue, from my observation, either sound in fraud, or are matters of fact, which, by settled judicial precedent and practice, have been considered suitable matters to be inquired into under proper pleas. They have never decided that rights legally *abandoned*, or rights lost by *legal laches*, might be reclaimed and perfected out of legal "time, place, and manner." They have attached to and involved in their reports extra-judicial inference and remark which I think no man will declare is to be drawn in as precedent. The cases of "junior," as I have treated them, I consider familiar to lawyers and judges, and known under legal authority. Other cases of inquiry and decision as to qualifications of voters, whenever acted upon, were, I believe, expressly alleged to have been received contrary to law, and by reason of imposition or deception. The general character of questions made and decisions had are of this class, and did not arise or appear in decision in opposition to express law. I can find no case where, in the course of inquiry as to qualifications of voters, the State statutes have not been esteemed the standard tests. Should I have overlooked any cases of a different character, and which may bear on the present case, they should be published, in order that conflicting decisions, tribunals, and laws may find the necessary remedy.

I remember (and presume it is within the knowledge of others) at the last Congress, in the case of Mercer and Mason, a question as to the legal construction of the election law of Virginia was raised incidentally in committee. The section in point was considered ambiguous and susceptible of two constructions by several professional mem-

bers of the committee; inquiry was therefore gone into to ascertain the practical definition or exposition of the law by the State of Virginia; and when that was satisfactorily found, the decisions of the committee took the same direction.

I therefore, for my constituents, protest against the relevancy and authority of inference and remarks made extra-judicially and extraneous of the point strictly in issue, and the more especially when they tend to nullify State laws, repudiate State practice, and consequently draw after them unlicensed and dangerous power.

If, however, it be deemed correct that decisions made here, under any circumstances, are paramount law, wherefore are they not promulgated? And the mode and reasons which gave them being and power should have equal publicity. It should be generally known whether they passed after solemn argument and profound investigation, or whether silently and without question. States then might modify or repeal their laws altogether, and "the Congress" might direct that original votes be received and returned without the mediation of State authorities, as a course less humiliating to State sovereignties, and for both more dignified than a conflict between written and unwritten law.

I make no pretensions to legal precision, still I feel a degree of confidence that members having legal acuteness will recognise the distinctions to which I have alluded.

I have treated the subject as I honestly view it, and as involving policy, principles, and interests of more than individual concern, chiefly in consequence of doctrines assumed by my opponent, possibly by the loose manner of putting down precedents he has urged, and the danger of their extension or progression in application beyond points not definitively in issue under the original reported case.

I respectfully submit to consideration my views of the case and the case itself.

O. C. MERRILL.

The Hon. JOHN W. TAYLOR, *Chairman of the Committee of Elections.*

16th CONGRESS.] No. 477. [1st SESSION.

VACCINATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 5, 1820.

To the honorable the Senate and House of Representatives of the United States of America: The memorial of the undersigned respectfully represents:

That, at a late meeting of a number of gentlemen friendly to vaccination, held in this city, in pursuance of a public notice given for that purpose, your memorialists were chosen a board of managers, in conjunction with Dr. James Smith, the agent appointed by the President under authority of the act of Congress entitled "An act to encourage vaccination; to organize a national vaccine institution for the United States of America, agreeably to a plan which had been previously proposed by him, and for the support of which considerable sums have been subscribed." It has therefore become the duty of your memorialists to solicit your serious attention to this important subject, and, if the views of our association fully meet with your approbation, we most respectfully petition and pray that you will grant us an act of incorporation to enable us with more certainty to carry into effect the plan which has been adopted by the society we represent, "to secure the preservation and distribution of the true vaccine matter for the use and benefit of the citizens of the United States."

Your memorialists do not deem it necessary to enter into any detail of facts to prove to you the necessity which exists of your giving greater encouragement to vaccination; nor yet to demonstrate the many advantages which the public may reasonably expect to derive from the institution now proposed to be established for this purpose. But, in an undertaking which appears to us to be so intimately connected with the convenience, health, and general welfare of our fellow-citizens in every part of the United States, it becomes us to submit for your consideration some of the most prominent reasons which have induced us to engage in it.

1st. The smallpox, which is a contagious disease, and one of the most fatal and destructive plagues that ever afflicted the human race, yet exists in our country, and annually destroys the lives of many of our fellow-citizens. The rich and the poor, the old and the young, are alike liable to take this disease. It is not confined to any particular place, but pervades alike our cities and villages; and, searching everywhere for its victims, penetrates within our inmost and most solitary settlements. Neither are the untutored natives of our land secure from this plague; it is frequently carried into their camps and villages, and produces among them the utmost consternation and despair.

2d. It is now proven, in a manner so fully and clearly as to admit of no doubt whatever, that the true kine-pock is a certain preventive of smallpox, as well as of all the calamities which are naturally attendant on it. This remedy is never attended with any danger, and may be safely applied by any intelligent person who is furnished with the matter, due care being taken to follow the simple and easy directions which are now given with it for its proper management.

3d. The matter of the true kine-pock (and no other can have any effect to prevent the smallpox) is of foreign origin, and is not known, as has been asserted by some, to be indigenous in our country. The peculiarly delicate nature of this matter likewise renders it so extremely liable to perish, that, even when we have it in our possession, we cannot keep it active in our hands, except for very short periods of time, (depending much upon the state of the weather,) without renewing it from one subject to another, with the greatest regularity, care, and attention. From these unalterable circumstances, and peculiar qualities in the nature of the vaccine fluid, there are but few persons who can ever pay such constant and unremitted attention to its preservation as would enable them to furnish it with any degree of certainty when it might be most wanted. The act of Congress to encourage vaccination has been attended with many good effects. The agent appointed under this law has been successful in his endeavors to preserve the genuine virus; and from him the surgeons of the army and navy, as well as the citizens of the United States in every section of our country, have obtained, without interruption, a supply of this remedy as often as they have found it necessary to apply to him for it.

In England, where the vaccine remedy was first discovered, a solicitude proportionate to the difficulty of preserving it has been uniformly manifested; and various institutions have been established there for this purpose, under

the direction of the most respectable characters. Of these establishments, the London Vaccine Institution is, perhaps, the most celebrated in the world. In many other parts of enlightened Europe, the most zealous philanthropists have taken an active part in disseminating the kine-pock, and in protecting their fellow-men from destruction by smallpox.

4th. The use of spurious and other kinds of improper infection, taken in mistake for the real kine-pock matter, has often occasioned fatal accidents, and checked the progress of vaccination in places where otherwise it would have been cherished and esteemed. This was particularly the case when the kine-pock was first attempted to be introduced into New York, Marblehead, Norfolk, and some other places in this country. Citizens who have been disappointed in this way, or who take the smallpox after being assured that they have had the true kine-pock, are very apt to be led to doubt the efficacy of vaccination, and to turn a deaf ear forever thereafter to every proof or fact which can be adduced in support of the Jennerian discovery. There is no point, indeed, in which the friends of vaccination are so liable to be assailed, or in which they are so often found vulnerable, as in their liability to use spurious instead of the genuine virus. The most skilful physicians have not been always exempt from making mistakes in this particular. The illustrious Jenner, when he at first promulgated his discovery to the world, had more difficulties to contend with on this score than on any other. He then informed us of "the extreme delicacy of the nature of the vaccine fluid," and showed us how easily it could be "disorganized." He also informed us that, with all his care and attention, "an unnatural deviation in this virus from its perfect state frequently occurred to him." Dr. Waterhouse, of Boston, likewise informs us that, "about the latter end of the autumn or beginning of the winter of 1800, the vaccine disease had deviated, in his opinion, from its original character, and assumed a face with which he was not acquainted." In a discovery which has been so recently made known to the world, and which is yet so imperfectly understood by any of us, all these difficulties may be reasonably expected; and whenever they do occur to any practitioner, it is indispensably requisite that he should desist at once from operating, and not attempt to vaccinate any one until furnished with fresh matter, taken from some true and genuine source. The application of the vaccine matter is in itself a very simple business, and has been often intrusted to operators of very little skill; but it requires some considerable knowledge of this matter to enable any practitioner to select the best for his use, or to discriminate, with accuracy, between the true vaccine and the many counterfeit affections which are liable to be mistaken for it. We, therefore, deem it to be of essential importance that some central and responsible institution should be established wherein an uninterrupted supply of genuine matter should be maintained, and from which it ought to be regularly dispensed, on the most free and liberal terms possible, to all who want it. To relieve the public from all doubt or uncertainty in a matter of so much importance to them, the purity and efficacy of this virus should be occasionally tested, and the result of these necessary precautions should be faithfully communicated to the public from time to time.

5th. Another and a very important advantage of such an institution as has been proposed must arise from its great convenience to the whole community. The public authorities, as well as private citizens, are all alike interested in this establishment. The surgeons of the army and navy require a constant supply of the vaccine matter; and they cannot procure it with certainty on any terms except through the medium of some institution of this kind. An honorable committee of the House of Representatives, in a report on this subject dated February 3, 1818, gave it as their opinion, and the Government of our country has adopted it as a just and proper precaution, that "the vaccination of those persons belonging to the army and navy who had never had the smallpox was dictated by duty as well as interest." But the preservation of the vaccine matter, as has been already intimated, is altogether incompatible with the duties which the surgeons in service are bound to perform; it therefore becomes necessary for us to supply them with this remedy as often as they may have occasion to use it. But, independent of these facilities which the public authorities will derive from this institution, our fellow-citizens of every description will be most happily accommodated (when necessity perhaps may compel them to resort to it) by knowing how and where they can obtain with certainty a proper supply of this matter. There are but few among us who regard as we ought any danger which is at a distance, or out of our immediate view; and there are many who, under these circumstances, cannot be persuaded to make any provision whatever against it. Many families who, when the best opportunity was offered, could not be prevailed upon to use the kine-pock, have afterwards, when they became accidentally exposed to the contagion of smallpox, searched with avidity for this remedy, and risked their lives upon the first portion of matter they could procure from any source. Many persons, in the moment of danger to a whole neighborhood, have sent messenger after messenger, and one express after another, to very distant places, in the greatest precipitation, and sometimes without being able to procure any matter upon which they could place their dependence. The fatal consequences which are liable to flow from proceedings of this kind point out to us in the plainest and most forcible manner the necessity of preserving this invaluable matter with the greatest care in some convenient and well-known place, from whence it may be obtained at a moment's notice, and distributed free of every impediment, and to any extent it may be demanded.

6th. There is at this present time a very large majority of the citizens of the United States liable to take the variolous disease; and, of those who are liable to be affected by it, there is not one-half of them who are willing to submit to be vaccinated unless they are urged to it by their immediate exposure to the contagion of smallpox. This universal carelessness or unwillingness in most people to give themselves any trouble, or to incur any expense on this account, unless impelled by some immediate danger, cannot be too harshly condemned; it is discouraging in the extreme, and seems to forbode to our country, at some future period of time, a more serious calamity by smallpox than we have ever experienced from it. We should therefore take heed in time, and endeavor, by our constant care and unremitted attention, to preserve the kine-pock in its purity and excellence. The more universal its use, the more effectual and certain will be our future protection and safety from smallpox.

In the years 1815 and 1816 the cities of New York and Philadelphia became much infected with the smallpox, and from them it was soon carried into many other towns and seaports within the United States; from these, again, it was communicated to others, and carried into the interior of our country, where it has existed ever since. Between the months of February, 1815, and April, 1816, their records inform us that *one thousand one hundred* persons had been diseased of smallpox in the city of New York alone, and that of these *two hundred and ninety-three* had died. In Philadelphia, from January 2, 1807, to January 1, 1817, (omitting three years, for which no account was received,) *six hundred and twenty-five* persons died of smallpox! We have thus indubitable proof that upwards of *nine hundred* of our fellow-citizens have fallen a sacrifice within a few years past to this plague in these two cities alone. But if it were possible for us to bring into one view the sum total of all the mortality and consequent injury which has been sustained in different parts of the United States by smallpox *within even a few years past*, the exposition could not fail to excite a corresponding feeling in yours, as well as in the mind of every person who is capable of comprehending its extent or magnitude. If this destruction of our fellow-creatures were unavoidable, it would certainly be most proper for us to be silent, and to submit to it with due humility of heart, as is our duty under every dispensation of Providence. But the evils here complained of are not unavoidable; they might with greater propriety be said to be of our own creating, for most certainly they are the natural effects of our neglecting

an acknowledged duty. In corroboration of this opinion, we can state to you, on authority which cannot be controverted, that during the same period of time above mentioned, when the smallpox committed such ravages in New York and Philadelphia, it was likewise introduced into the city of Baltimore, but it was soon extinguished again with very little difficulty; and we are well convinced, from experience, that, if proper care were always taken to vaccinate immediately when the smallpox first appears in any place, we could soon subdue and eradicate this plague entirely from our country. If that disheartening apathy, however, which pervades the community in regard to the danger of smallpox when out of view cannot be roused into action by any means within our power, the smallpox must continue to exist among us, and we must occasionally suffer severely for our neglect of the extraordinary remedy which a merciful and kind Providence has furnished us to prevent it.

Every citizen, therefore, of a discerning mind, who has the prosperity of his country and the welfare of the human family sincerely at his heart, will, we hope, give the proposed plan of a "*National Vaccine Institution*" his zealous support, and endeavor to bring as many individuals as he can under the healing influence of vaccination. Every child properly vaccinated will afford to the rest of the community one additional security, at least, against the future prevalence of smallpox; and in the same proportion as we can increase these securities, so also we will raise up numerous impregnable barriers to the introduction and spreading of the variolous contagion among us.

JOSIAH MEIGS,

JAMES SMITH.

WASHINGTON CITY, D. C., *January* 1, 1820.

16th CONGRESS.] No. 478. [1st SESSION.

UNIFORM SYSTEM OF BANKRUPTCY.

COMMUNICATED TO THE SENATE, JANUARY 10, 1820.

To the Senate and House of Representatives of the United States in Congress assembled: The memorial of the Chamber of Commerce of the city of New York respectfully showeth:

That, when the framers of the constitution of the United States gave Congress power to establish uniform laws upon the subject of bankruptcies throughout the United States, they must have foreseen that the commercial intercourse among the several States might at some future period become so extensive and important as to render it advisable, if not necessary, for Congress to exercise the power thus given to them. Your memorialists beg leave most respectfully to suggest for the consideration of Congress whether the period has not arrived which the convention foresaw, when the interests of the country require that the power vested in Congress upon this subject should be exercised.

Among other things which bind the people of the United States together as one nation, our commercial intercourse with each other must be considered by every enlightened statesman as a band of no insignificant importance; the regulation of it was, therefore, wisely intrusted by the constitution to Congress. To an extensive and flourishing internal and foreign commerce, it seems to your memorialists that a general system of bankruptcy throughout the United States is essential. In cases where misfortune overtakes and ruins a merchant in any part of the United States, (and what merchant is there whom misfortune may not overtake and ruin?) it is certainly important that some plan should be adopted by which his creditors in every part of the United States should stand upon an equal footing, have an equal chance of receiving a dividend of his estate, and equal means of knowing in what manner his property is to be disposed of.

Your memorialists believe that no other plan than a uniform bankrupt law can be adopted to effect these desirable ends; without it, in cases where a merchant fails, his creditors do not all stand upon the same footing. In some of the States, in case of a debtor absconding, a difference is made by law between the remedies against him afforded to persons residing within the State and those residing in other States. In the State of New York, if a merchant fails and absconds from the State, leaving property within it, a citizen of New York may sue out an attachment against the property which he has left behind him, but a citizen of another State cannot. It is true, indeed, that the property when attached is for the benefit of all his creditors; but it is equally true that if, before he absconds, the debtor has foresight enough to pay his creditors in New York, he may leave his property in the State with perfect safety, and his creditors in other States cannot touch it.

Without a general bankrupt law, all the creditors of a merchant who fails have not an equal chance of receiving a dividend from his estate. When a merchant's affairs become embarrassed in any of our commercial cities, (the practice is so uniform that it has become a perfect system,) he assigns all his property in the first place to pay his confidential friends, who have lent him their names and their money, and thus given him a false credit, which has been the means of his imposing upon others; or he has already assigned, as security for usurious loans procured from some of the harpies who infest all our cities, every thing that he has of any value; his honest business creditors get nothing. The truth of this has been felt and will be acknowledged by almost every commercial man in the United States.

Without a general bankrupt law, it is manifest that all the creditors of an unfortunate or dishonest merchant have not equal means of knowing how and in what manner his property is to be disposed of, unless they can be presumed to be intimately acquainted with the laws of every State in which they may have a debtor residing.

Your memorialists cannot but express their strong conviction, founded upon experience, that a general bankrupt law is essential to secure any thing like a just and equal distribution of property among the creditors of unfortunate merchants. Your memorialists, however, beg leave most respectfully to suggest that, although the security of cred-

itors is the first and great object of a bankrupt law, yet the relief of unfortunate debtors, who have honestly given up their property for the benefit of their creditors, is another object of it.

Your memorialists forbear to urge those arguments which are calculated to operate upon the heart, by approaching it through the feelings of compassion in favor of the unfortunate, for reasons which will readily suggest themselves; but they beg leave to state that the situation of the United States seems in their opinion to require, as a mere matter of state policy, that merchants who have become unfortunate should not from that moment be considered as drones in the political hive, unable in any way to contribute to the general welfare. Misfortune is apt enough to drive mankind to desperation, to palsy all manly exertion, and to make the stoutest man a mere infant. The laws of the country should encourage the unfortunate to future exertion, and not sink them yet deeper in despair; they should hold out, as objects worthy of his future industry, the support of his family, who by his exertions may yet become respectable, and the re-establishment of his own reputation, which, although sullied by misfortune, may yet, through honest industry and exertion, become brighter than ever. By doing so, the state is certainly benefited, because it is its interest to encourage industry, and to excite as much as possible the exertions of all its citizens in some honest pursuit. The Supreme Court of the United States having decided that the State Legislatures have no authority to discharge insolvent debtors from their debts, unless Congress in their wisdom shall think proper to interfere and pass a general bankrupt law, a merchant who becomes unfortunate in the United States must be content for the residue of his life to become a charge upon his friends or his country. The consequences of such a state of things upon the commercial prosperity of the United States your memorialists leave to those to determine upon whom the duty of regulating and protecting our commerce is intrusted by the constitution.

Your memorialists most respectfully pray that Congress will pass a law establishing a general system of bankruptcy throughout the United States, which they believe is called for by the best interests of the country.

And your memorialists will ever pray, &c.

WILLIAM BAYARD, *President.*

JOHN PINTARD, *Secretary.*

16th CONGRESS.] No. 479. [1st SESSION.

PROHIBITION OF SLAVERY IN MISSOURI.

COMMUNICATED TO THE SENATE, JANUARY 12, 1820.

NEWPORT, *Wednesday, December* 22, 1819.

At a late and numerous meeting held at the State-house, pursuant to notice, for the purpose of taking into consideration the expediency of presenting a petition to Congress to prohibit the introduction of slavery into any State or Territory that may hereafter be admitted into the Union, Thomas G. Pitman, Esq. was called to the chair. After reading the circular letter from the New York committee on this very interesting subject, and likewise their address to the American people, which was followed by considerable debate and many applicable remarks, the following resolutions were almost unanimously adopted:

Resolved, That Dutee J. Pearce, Caleb Green, John Slocum, Thomas Peckham, and Edward W. Lawton, be a committee to draught a memorial to Congress, praying them to prohibit the further extension of slavery into any Territory that may be admitted into the union of the States.

Resolved, That David Buffum, David Buffum, jun., Benjamin Hadwen, John Slocum, Stephen Gould, Clarke Rodman, Job Sherman, Thomas H. Mumford, and Edward W. Lawton, be a committee to obtain signatures to the said memorial, and forward the same to Congress as soon as may be.

Agreeably to the first recited resolution, the undersigned, having prepared the annexed memorial, respectfully submit the same to the citizens of the town of Newport and its vicinity for their approbation and signatures.

THOMAS PECKHAM,
DUTEE J. PEARCE,
CALEB GREEN,
JOHN SLOCUM,
EDWARD W. LAWTON,
} *Committee.*

To the honorable Senate of the United States: The memorial of the inhabitants of the town of Newport, in the State of Rhode Island, with reference to the bill now pending before your honorable body, authorizing the people of the Territory of Missouri to form a State Government, and for other purposes, respectfully showeth:

That slavery, as it now exists in the United States, in the opinion of your memorialists, can never be made a matter of reproach to the existing Government or the present generation. It was an evil introduced into the colonies by the parent state, and acquiesced in to a great degree by the colonies themselves, in an age when the traffic in slaves was pursued by all nations without a suspicion of its enormity.

The northern colonies participated in it equally with the southern, and the navigation of the New England ports, and particularly of this town, was employed continually on the African coast, in the transportation of slaves to the different American markets, and by means of American capital. There can be no reproach, therefore, cast upon our southern brethren for the introduction of this evil, which, as your memorialists conceive, will not equally attach itself to ourselves and to the English nation. We were all equally disposed to embark in the traffic, and to avail ourselves of its proceeds, and the guilt, if any there be, must be shared in an equal degree by the parties concerned. The constitution of the United States, as is well known to your honorable body, after giving Congress an unlimited power to regulate commerce, with certain reservations as to the intercourse between the respective States, provides "that the migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight; but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person."

As the reservation here mentioned related merely to the direct trade, an act was passed as early as A. D. 1794 making it unlawful for any citizen of the United States, or alien residing therein, to transport in American bottoms the inhabitants of any kingdom, place, or country, to any other foreign kingdom, place, or country, to be sold and disposed of as slaves, or from the United States to any foreign kingdom, place, or country; and, by a subsequent act, it was made penal to hold property in any vessel whatever so employed, or to serve on board such vessel, whether American or foreign. The direct trade, as is known to your honorable body, had become limited to one or two States, by the enlightened views that prevailed in the south, even before Congress had the authority to interpose for itself. And when the constitutional period to which the limitation on their power extended was about to expire by the prospective act of March 2d, A. D. 1807, it was declared unlawful to import or bring into the United States any negro, mulatto, or person of color, with the intent to hold, sell, or dispose of such negro, mulatto, or person of color, as a slave, after the 1st day of January, 1808. This law, as is well known to your honorable body, has since been modified by another act, principally with respect to its penalties; and, finally, enforced by a law of the last session of Congress, authorizing the President to employ the armed vessels of the United States on the American and African coasts, to appoint agents to reside in Africa, and to offer bounties for the slaves released. Thus, the United States have the honor of being the first to advocate and the first to adopt those humane and enlightened measures which, after twenty years' earnest and eloquent exhortation, have become the pride and the glory of the states of Europe.

If the people of this country, as is the opinion of your memorialists, were responsible for the continuance of the slave trade after the government of the States and the Union had passed into their own hands, it is equally incumbent on your memorialists, and all others who enjoy the protection of our mild and equal laws, to confine the existence of slavery within the narrowest limits possible. To say nothing of its utter inconsistency with the genius of our republican institutions, and of its fatal effects on the principles and morals of men, the simple circumstance that the Government of the United States has entirely prohibited the importation of slaves, directly or indirectly, as your memorialists have set forth, is sufficient of itself to enforce on us the duty. But it will be in vain that Congress shall prohibit the traffic in slaves under the severest penalties, or that the President be disposed to exert himself to the utmost to enforce these provisions, if an immense market is to be opened in the Territories of the west for the unhappy victims of this traffic. The inevitable result of such a course of proceedings must be, as your memorialists apprehend, to increase the temptations to introduce them illegally, already too great, and fatal to the morals and industry of your constituents. It cannot, then, escape the notice of your honorable body that the outlet of the Mississippi and its tributary waters, and generally of the streams that flow into the Gulf of Mexico, is placed by nature in a region, beyond almost any other in the Union, open to an illicit trade—a low alluvial country, abounding in inlets, remote from any dense population, in the vicinity of Cuba, a great depot and slave mart—and affording temptations innumerable to a traffic in slaves from the education and habits of the people of Louisiana. The experience of the Government has exactly corresponded to what your memorialists would have presumed to be the case. We refer your honorable body to the explicit testimony of the collector of the customs at New Orleans, (Mr. Beverly Chew,) in his letters to the Secretary of the Treasury on the subject of the piratical establishment at Galvezton; and to the statement made at the last session of Congress, and never contradicted, that above 14,000 slaves were introduced into the United States in that year, and principally through these outlets. We would ask, then, with all deference to your honorable body, what can be more feasible to the unprincipled men engaged in this business than, after the Louisiana market is glutted, to introduce slavery to any extent, and with perfect impunity to themselves, into the Missouri State, if Congress should unhappily countenance its existence? Your memorialists cannot doubt for a moment that this would really be the case, and they are persuaded that it has already taken place, to an alarming extent, under the Territorial laws.

But admitting, for the sake of the argument, as your memorialists are willing to admit, that the number of slaves introduced into the Union from foreign countries, and in violation of your laws, must ever be inconsiderable, your memorialists are still of opinion that it would be unwise in Congress to permit the extension of slavery in the new States. The slaves which might then be introduced into Missouri, from the Union at large, would multiply, as your memorialists conceive, to a degree hitherto unknown in this country, not only from the increased facilities of subsistence, but the comparative mildness of her climate. Whilst these causes were operating to perpetuate the evil in the west, the slave population in the Atlantic States must of necessity rise with the demand for labor and the means of life; and the event would be, as your memorialists can confidently predict, that the number of persons of this unhappy description in the United States would be a thousandfold greater than if the slaves were confined, as your memorialists would advise, to the States now holding them.

We would ask, with all deference to your honorable body, when and where is this evil to cease? If it be permitted to the people of Missouri, there is no reason that your memorialists can conceive why it may not be allowed to the inhabitants of every part of Louisiana within the treaty of limits. And, without pretending to any uncommon sagacity on this subject, it is easy for your memorialists to foresee that this will certainly be the case, without the interposition of the General Government. If the United States had no experience whatever of the effects of slavery, and it were still a problem how far it might be beneficial to a State to tolerate its existence in the mildest form, it would appear more credible to your memorialists that citizens of the United States might be found who would be willing to make the untried experiment in our new Territory.

But, with the convictions which our colonial history and every day's experience are forcing on the minds of your constituents; with the acknowledged and lamented fact that slavery was introduced among us in an unenlightened and fanatical age, and that for nearly two centuries it has been progressively fruitful of the most unhappy results in this country; and knowing, as we well do, its effects on the state of agriculture, the manufacturing and mechanic arts, and generally on the industrious and profitable habits of a people, and their domestic peace—to think of introducing such a state of things, and of choice, too, into a new country, is to your memorialists perfectly inconceivable.

Your memorialists are well aware that it may be a very obvious reply to the statement of your memorialists, that, admitting the reasonableness of what your memorialists have set forth, it is still incumbent on them to show that Congress have a right to prescribe this condition to a sovereign State. Your memorialists might be content, on this occasion, to refer to the uniform practice of the Government, and to the well-known fact that this very condition, and many others besides, have been made in almost every instance the bases of their admission into the Union whenever new States have been formed out of our old domain. There is nothing, as your memorialists can perceive, in the treaty of Paris, by which Louisiana was ceded to this country, that makes it necessary for the United States to depart from the practice. It simply requires of this Government that the Territory in question shall be admitted into the Union as soon as possible, and upon the principles of the federal constitution—that is, as your memorialists understand it, precisely in the same manner as other States have been admitted. And, in point of fact, when the southern section of this Territory, under the name of Louisiana, was about to be formed into a State, it was required of it to conform, not to the condition we have mentioned, indeed, (for the situation of the Territory entirely forbade it,) but other conditions were made preliminary to this favor, and implying an equal de-

gree of power in the party prescribing them. It is well known to your honorable body that it was made a positive condition with Louisiana, not only that the lands of the United States within her jurisdiction should never be taxed, and that all purchasers of said lands should enjoy the same immunity for five years after their purchases, but, what is equally remarkable, it is provided that the trial by jury shall be secure to her citizens in all criminal cases, and that the laws which such State shall pass shall be promulgated, and its records, of every description, shall be preserved, and its judicial and legislative written proceedings conducted in the language in which the laws and the judicial and legislative written proceedings of the United States are now published and conducted. Your honorable body is doubtless well informed that, in the Spanish and French colonies established on this continent, the civil law, which never recognised our institution of juries, was introduced at a very early period. And in the province of Louisiana, though it had often changed masters, and had been by times the property of France and Spain, the French language was principally in use. These were circumstances, as your memorialists conceive, of no small import to the people of Louisiana, considering the nature of their education and descent, and, to the apprehension of your memorialists, quite as much a matter of internal regulation as the holding of persons to involuntary servitude. And yet your honorable predecessors of the twelfth Congress, in the exercise, as your memorialists conceive, of their rightful constitutional power to make the admission of a State into the Union conditional, and of the duty incumbent on Congress to guaranty to each State a republican form of government, did prescribe to Louisiana as your memorialists have set forth.

But your memorialists are persuaded that, if no such precedents were to be found in the laws of the Union, and the constitutional history of this Government were not full of examples to confirm their theory, it would still be very manifest that Congress has ample power to impose this condition, particularly from an examination of the constitution, in the third and fourth sections of its fourth article, and that the objections drawn from the nature of the State sovereignties are altogether unfounded.

But your memorialists forbear to pursue a discussion to which your honorable body must be far more competent than they can pretend to be. They will merely observe to the Senate that, to their apprehension, a question of greater magnitude, and involving considerations of higher moment to the interests and happiness of the American people, has never been submitted to the decision of Congress. They believe that your honorable body must be ambitious of remembrance, and of grateful remembrance, in after-times; and they cannot conceive of a more enviable distinction than that it shall be the happy result of your beneficent measures that in the widest and most fruitful region of this great continent, and at no remote day, not one human being is denied his natural and unalienable rights. And your memorialists humbly pray that a provision may be inserted in the bill now pending before your honorable body authorizing the people of the Territory of Missouri to form a State Government, and for other purposes, forbidding the extension of slavery in said State.

16th CONGRESS.] No. 480. [1st SESSION.

CONTESTED ELECTION OF EBENEZER SAGE, A REPRESENTATIVE FROM NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 12, 1820.

Mr. TAYLOR made the following report:

The Committee of Elections, to whom was referred the petition of James Guyon, junior, contesting the election of Ebenezer Sage, who is returned as one of the Representatives of the State of New York in the present Congress, and praying to be admitted to a seat in his stead, have had the same under consideration, and report:

That the first congressional district of the said State is composed of the counties of Richmond, Kings, Queens, Suffolk, and the first and second wards of the city of New York, and is entitled to elect two Representatives. That, at the late election for members of this House, Ebenezer Sage, James Guyon, jun., Silas Wood, and John Garretson, were the only candidates; 2,171 votes were returned for Silas Wood; 2,085 for Ebenezer Sage; 1,992 for John Garretson; 1,701 for James Guyon, jun.; and 396 for James Guyon. From the affidavits of Abraham Crocheron, Richard Crocheron, and John Hillyer, inspectors of the said election, of the town of Northfield, in the county of Richmond; of John Doughty, John Freek, Jeduthan Johnson, Noah Waterbury, and Abraham A. Remsen, inspectors of the said election, of the town of Brooklyn, in the county of Kings; of Edward A. Clowes, Thomas Tredwell, William Everitt, and John D. Hicks, inspectors of the said election, of the town of Hempstead, in the county of Queens; and of Jacobus Monfoort, Micah Townsend, Jarvis Frost, and Daniel Youngs, inspectors of the said election, of the town of Oyster Bay, in the same county, it appears that, in the said towns, 391 votes were, through the mistake of the said inspectors, returned for James Guyon, which, in truth and in fact, were given for James Guyon, *junior*, and ought to have been so returned. These votes, added to the poll of James Guyon, junior, give him a majority of seven votes over Ebenezer Sage, the returned member. Mr. Sage has admitted the receipt of copies of the affidavits aforesaid, and has not controverted the truth of the matters therein contained. He has hitherto omitted to appear and claim his seat, and no evidence has been adduced of his intention to make such claim. The committee, therefore, submit the following resolutions:

Resolved, That Ebenezer Sage is not entitled to a seat in this House.

Resolved, That James Guyon, junior, is entitled to a seat in this House.

BROOKLYN, *November* 24, 1819.

The subscribers certify that they were inspectors of the election held in the town of Brooklyn, in Kings county, on the 28th, 29th, and 30th days of April, in the year 1818, for the purpose of electing Representatives to Congress for the first congressional district of the State of New York.

At the said election Ebenezer Sage, Silas Wood, John Garretson, and James Guyon, junior, were candidates; and that we, the said inspectors, did canvass and estimate the votes given at said election, and made out certificates of such canvassing, and filed the same in the clerk's office of the county and town aforesaid; from which certificates it appears that 183 ballots were estimated as the number of votes given for James Guyon, which the subscribers verily believe was an error made by them in making out their certificates; and that the said number of 183 votes was given by the electors of said town for James Guyon, *junior*, and ought to have been estimated and certified by us as the number of votes given for that gentleman.

JOHN DOUGHTY,
JN. FREEK,
JED. JOHNSON,
NOAH WATERBURY,
ABRM. A. REMSEN.

WILLIAM SCHENCK, *one of the clerks at the election.*

The persons who have subscribed the foregoing certificate have severally sworn that they believe the matter therein stated to be true.

Sworn before me this 24th day of November, 1819.

ISAAC NICHOLS, *Justice of the Peace.*

SAG HARBOR, *January* 3, 1820.

This may certify that, on or about the 20th of the month of December, I received from James Guyon, junior, a copy of the within certificates, perfectly according with the same.

EBENEZER SAGE.

I, Abraham Crocheron, clerk of the town of Northfield, in the county of Richmond, and in the State of New York, do certify and say: That I was one of the inspectors of the votes taken at the anniversary election held in the said town of Northfield, and in the county aforesaid, on the 28th day of April, 1818, at the house of John Johnson, inn-keeper, and held, by adjournment, the two subsequent days, for two members of Congress to represent the first congressional district of said State of New York in the House of Representatives of the United States; and, being so an inspector, did make a return in the clerk's office of the said county, as well as with Richard Crocheron, John Hillyer, and Sylvanus Decker, inspectors with me, that Ebenezer Sage had seventy-five votes, and James Guyon had seventy-five votes, when, in fact and in truth, the ballots *were given*, canvassed, and read James Guyon, *junior*, and were returned to the said clerk, through a mistake or error, without the *junior*, when, in fact, in truth, and in justice, it should have been given and written James Guyon, junior.

Given under my hand the 16th day of November, A. D. 1819.

ABRM. CROCHERON.

RICHMOND COUNTY, *State of New York, ss.*

Personally appeared before me Abraham Crocheron, who doth depose and say that the above statement, as subscribed by him, is just and true: and further this deponent saith not.

Sworn before me this 16th day of November, 1819.

DAVID MASEREAU, *Judge.*

SAG HARBOR, *January* 3, 1820.

This may certify that, on or near the 20th of the month of December last, I received from James Guyon, junior, a copy of the within certificates, correctly according with the same.

EBENEZER SAGE.

HEMPSTEAD, N. Y., *November* 20, 1819.

I, Edward A. Clowes, clerk of the town of Hempstead, and I, Thomas Tredwell, one of the inspectors of the town, do hereby certify that, at an election held in the aforesaid town for Congressman, on the 28th, 29th, and 30th days of April, 1818, the return was made by us to the clerk's office of the county of Queens for James Guyon as Congressman, whereas we verily believe that the returned number of votes ought and should have been made in the name of James Guyon, *junior*, which junior was omitted in our return to the clerk of said county, according to the best of our knowledge and belief.

EDWARD A. CLOWES, *Town Clerk.*
THOMAS TREDWELL.

Sworn before me this day.

EDWARD PARKER, *Deputy Clerk of Queens County.*

HEMPSTEAD, *November* 20, 1819.

I, Robert D. Clements, one of the clerks to the inspectors of the town of Hempstead, do solemnly swear that the statement of the within certificate is true, to the best of my knowledge.

ROBERT D. CLEMENTS.

Sworn before me this day.

EDWARD PARKER, *Deputy Clerk of Queens County.*

OYSTER BAY, *November* 19, 1819.

I, Jacobus Montfoort, clerk of the town of Oyster Bay, in the county of Queens, and State of New York, do hereby certify that the certificate of the return of the election for two members of Congress to represent the first congressional district of said State, held in the aforesaid town on the 28th, 29th, and 30th days of April, 1818, was written by me, and transmitted to the clerk of the said county of Queens. And I do hereby further certify that the return of James Guyon, of eighty-three votes, was a mistake made by me, and that the true and proper return for the aforesaid town of Oyster Bay is James Guyon, junior, for Congressman, eighty-three votes; and the tickets were canvassed and read James Guyon, junior.

Note.—One vote of the above number of eighty-three votes was written, read, and canvassed James Guyon.

JACOBUS MONTFOORT, *Town Clerk.*

Sworn before me this day.

EDWARD PARKER, *Deputy Clerk of Queens County.*

SAG HARBOR, *January* 3, 1820.

This may certify that, on or near the 20th day of the month of December, I received from James Guyon, junior, a copy of the within certificates, perfectly according with the same.

EBENEZER SAGE.

QUEENS COUNTY, *ss.* JAMAICA, *January* 6, 1830.

We, Edward Parker, of the town of Jamaica, county of Queens, and State of New York, and Thomas Hazard, junior, of Staten Island, State aforesaid, do solemnly swear that we were present on the day and date when Ebenezer Sage signed the annexed certificates, and did see him subscribe his name thereunto; and he acknowledged that he did receive a copy of the annexed certificates enclosed to him in a letter from James Guyon, junior, declaring his intentions to claim his seat in the House of Representatives of the United States.

EDWARD PARKER,
T. HAZARD, JUN.

Sworn before me this day.

JAMES DENTON, *Justice of the Peace,*
and one of the Judges of the Court of Common Pleas for Queens County.

16th CONGRESS.] No. 481. [1st SESSION.

PROHIBITION OF SLAVERY IN MISSOURI.

COMMUNICATED TO THE SENATE, JANUARY 18, 1820.

At a meeting of the citizens of Hartford and its vicinity, held at the State-house, on Friday, the 3d day of December, 1819, pursuant to public notice, for the purpose of taking into consideration the subject of permitting slavery in such States as may hereafter be admitted into the Union, John T. Peters was appointed chairman, and J. W. Edwards, secretary.

The following resolutions were adopted:

Resolved, That the existence of slavery in this republic is an evil deeply to be lamented, and utterly repugnant to the principles of a republican Government.

Resolved, That, in the opinion of this meeting, the peculiar phraseology of the preamble to the declaration of independence, declaring that "all men are created equal," &c., shows conclusively that the illustrious authors of that document never contemplated the further extension of slavery in these United States.

Resolved, That, in the opinion of this meeting, Congress possesses the clear and indisputable right to prescribe the terms upon which any Territory may be admitted into the Union as an independent State; and that a contrary doctrine would not only tend to destroy that order and harmony so indispensable to the happiness and union of these States, but would prostrate the powers confided to the General Government by the constitution.

Resolved, That it is a duty the American people owe to their republican character, and the honor and glory of their country, to endeavor, by all honorable and lawful means, to prevent the further extension of slavery, which we consider to be contrary to the spirit of our free and excellent constitution, and injurious to the highest interests of the nation.

Resolved, That, while we lament the efforts which the Representatives in the last Congress from the slaveholding States made to extend an evil which all unite in deploring, the thanks of this meeting are eminently due to those members who so ably and zealously opposed the admission of slavery into the proposed State of Missouri.

Resolved, That the Senators and Representatives in Congress from this State be requested to use every honorable and constitutional exertion to prevent the admission of slavery into any new State which may be formed.

Resolved, That the Hon. Thomas S. Williams, Rev. Thomas H. Gallaudet, Hon. Sylvester Wells, and Hon. John T. Peters be a committee to draught a memorial to Congress upon this subject, which shall comport with the spirit of these resolutions.

Resolved, That the chairman of this meeting be, and is hereby, requested to forward a copy of these resolutions and memorial to the Senators and Representatives in Congress from this State.

Resolved, That Michael Bull, Nathaniel Goodwin, Charles Babcock, Oliver E. Williams, Charles L. Porter, Thomas Huntington, Joseph B. Gilbert, Edward Bolles, Samuel Huntington, Elihu Olmsted, Azor Hatch, and Roderick Terry be a committee to solicit signatures to the said memorial; and that the several printers of newspapers in this State be requested to publish the proceedings of this meeting.

JOHN T. PETERS, *Chairman,*
JONATHAN W. EDWARDS, *Secretary.*

To the Senate and House of Representatives of the United States of America in Congress assembled: The memorial of the undersigned, inhabitants of the city of Hartford and its vicinity, in the State of Connecticut, respectfully represents:

That, as your present session will probably furnish the occasion of deciding a question which deeply involves the character and prosperity of the vast republic over whose interests you are called by Providence to preside; the welfare of that countless posterity who are to inherit from us all that can render human life a blessing or a curse; and the fate of thousands of our fellow-men, whose dearest rights have been so long sacrificed to the plea of necessity or of interest, we deem it a sacred duty which we owe to ourselves, to our country, and to our God, to make use of that invaluable privilege which our excellent constitution affords us, of attempting to influence the councils of the

nation, by every consideration and motive which justice, honor, and a sound policy will sanction, ere the final step be taken, which, if a wrong one, will shroud the prospects of our country's happiness and glory in shades of the deepest gloom.

In doing this, we avow that no influence actuates us but the purest patriotism. We would rise superior to that ignoble jealousy which weighs all political questions in the petty scale of mere state interest, and measures every proceeding of the National Legislature by the contracted standard of advantage to the northern or southern, the eastern or western sections of our common country. We would feel as Americans, and present to your respectable body only such considerations as are worthy of the regard of those who, in their least important as well as most momentous decisions, should fix a single eye upon the general happiness of the millions who are to constitute, under the auspices of prudent and magnanimous councils, a great and happy people.

We are inspired with a lively hope that what we may venture to suggest will be weighed with carefulness and candor when we call to mind the honorable and energetic measures which Congress has of late adopted to check the future progress of slavery in the United States—measures which, we trust, will yet derive resistless efficacy from the co-operation of the whole Christian world, from a vigilant enforcement by those officers whose province it is to carry them into effect, and from the repeated adoption of such future auxiliary provisions as the elusive cunning of the traffickers in human blood may yet render necessary to wipe from the character of man one of its foulest stains. Most unhappy will be the result if the accession of new States to the Union, by granting them the privilege of holding a portion of their fellow-men in bondage, should prove to be the discomfiture of those generous efforts which are made to prevent our vast portion of this western hemisphere from being any longer the disgraceful prison-house of the unfortunate sons of Africa.

That the constitution invests Congress with ample power to impose a restriction with regard to slavery upon such States as may from time to time be admitted into the Union, the territory of which lies out of the original limits of the United States, we think there can be no doubt. The Union is indeed a compact of independent and sovereign States; but it is a compact whose base rests on the *principles* which all the States avowed in their combined struggle for freedom; on the principles of relative justice, of mutual sacrifices of interest for the general welfare, and of a surrender of individual rights to promote the strength and prosperity of *one common republic.*

These principles, which, under Providence, gave vigor to the resistance of the colonies against the usurpations of the mother country, and a happy result to that resistance, did not cease to have a binding force upon the States when the conflict for liberty was over, and when, assuming again for a little while their original sovereignty, they deliberated in their individual capacity upon the adoption of such a form of government as would best secure to them and their posterity the blessings for which they had been contending. They were unshackled, it is true, by the restrictions of any *written instrument*, but they were still bound to each other by the ties of *honor and justice.* When we find them proclaiming to the world as one of the principles—nay, as the fundamental principle under which they had acted in concert—"that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness," can we cast such a reproach upon the worthies who conducted their councils as to suppose that they meant entirely to abandon this principle, or not to feel its force? Its application, indeed, was waived with reference to those States whose policy led them to make it a condition of their adoption of the federal constitution that they should retain the privilege of holding slaves, and that these slaves should go to increase the mass of their population who should be entitled to a voice in our national councils. But this was done in the *spirit of compromise;* and the original principle which was avowed in the declaration of independence *revives, in all its primitive force*, with reference to any *new States* which may be admitted into the Union, and which lie out of the limits of those States who made the compromise; so that no argument in favor of the absolute and entire sovereignty of new States is more fallacious than that drawn from a supposed analogy between *their* relation to the Union and *that* which existed between the States who *originally* formed this Union.

There has never been a period in our history since the time of our first resistance to Great Britain that a greater or less surrender of the rights of State sovereignty has not been made for the general good; and if, for the same object, such a surrender is now demanded of any portion of our country that wishes to enjoy the privilege of becoming a State, it has no right to complain of partial treatment; and unfounded indeed is such a complaint, when the surrender required, or the restriction imposed, is sanctioned by one of the fundamental principles of the great charter of our liberties; a departure from which, for reasons that *no new State* can now urge, was once reluctantly made in order to secure the unanimous adoption of the federal constitution.

Surely, if the States who were the original parties to the compact had a right to stipulate with each other with regard to the surrender which each should make of some portion of its sovereignty for the common weal, they have now the right, through Congress, as their organ, to make similar stipulations for the *same object* with those who are to become new parties to the compact. The only question, then, that remains is, has the constitution empowered Congress to act as this organ? The third section of the fourth article of that instrument says: "New States may be admitted by the Congress into this Union; but no new States shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress." The fair construction of this language is, that Congress is to judge of the expediency of admitting new States into the Union, and also of the terms of their admission; and, lest this power vested in Congress should seem to encroach upon the sovereignty of the States who were actually parties to the compact, their consent is made necessary in case new States are formed out of them, or by their junction; which evidently proves that, *in all other cases*, the power of Congress was to be complete and unrestricted. As the constitution nowhere gives any portion of territory, or any mass of population, the right to force itself into the Union; and as it nowhere describes the precise conditions upon which new States may be admitted, but refers the whole subject in the most *general terms* to Congress, it seems to result from the very necessity of the case, as well as from the fair interpretation of the constitution, that Congress must judge of the expediency and of the conditions of all such admissions. This power Congress has more than once exercised; nor have the various restrictions which it has imposed upon several of the new States, as the terms of their admission into the Union, been heretofore considered any infringement of the constitution, or undue encroachment upon State sovereignty. Good faith, therefore, will be strictly kept with those who have become subject to the Government of the United States by the treaty of the cession of Louisiana, if, upon their wishing to be made a new State, they are required, as a condition of this, to pledge themselves to interdict slavery within their limits; for, although the treaty stipulates that they shall be incorporated into the Union of the United States, and admitted as soon as possible to the enjoyment of all the rights, advantages, and immunities of citizens of the United States, yet all this is to be done, as the same treaty stipulates, "according to the principles of the federal constitution." Like every other citizen of the United States, a citizen of the contemplated new State will have the privilege of holding slaves in those States where slavery is *permitted;* and, like other citizens, be debarred this privilege in States where slavery is *not permitted.* Nor does it at all affect the merits of the case that *his own* happens to be one of these States.

Without going into any detail of argument, the same reasoning applies, *mutatis mutandis*, with conclusive force to the objection which is raised to the proposed restriction against the existence of slavery in any new State, from that article in the constitution which provides that "the citizens of each State shall be entitled to all privileges and immunities of citizens in the several States."

So far from injustice being done to the slaveholding States by the proposed restriction, which it is contended by many would be the case, we feel it a duty we owe to ourselves, as citizens of a State in which slavery is forbidden, to urge upon the consideration of your respectable body, the constituted guardian of our political rights and liberties, that the permission of slavery in the new States will be an unwarrantable departure from the *principles* of *that compromise* which it is confessed led to the formation of that part of the constitution which gives to the slaveholding States such an influence in the councils of the nation from a great mass of the population who are not recognised or treated as freemen. This was, in fact, a bargain made between distinct and independent contracting parties, and, in good faith, this bargain ought not to be stretched in its application to any *new* parties, without the consent of all those who *originally* made it.

But these considerations are merged in the more important ones of national policy and interest. The evils which are already felt, and the more dreadful ones which are to be feared, from the existence of slavery in our country, will, in the opinion of your memorialists, be greatly enhanced by the extension to new States of the privilege of holding their fellow-men in bondage. With all due regard to the best interests of those of our fellow-citizens who are at present immediately exposed to these evils, we do sincerely believe that their safety, as well as that of the Union, depends upon keeping the slave population of our country within the narrowest possible limits. If coercion be necessary, it can be most easily, promptly, and successfully applied. If dangers are to be apprehended, they will most quickly be perceived. If plans of gradual emancipation are to be adopted, they will be most efficaciously carried into effect. Philanthropy has, indeed, pleaded in behalf of those who are in bondage, that their condition will be meliorated by scattering them over a greater extent of territory. Admitting that this might in some instances be the case, yet the prospect of a final deliverance from this miserable captivity would be diminished, if not destroyed; and that cupidity, which now is cunning enough to elude the watchful eye of civil authority, would have new temptations presented to excite its more insatiable desires; new markets would be opened for its cruel enterprises; and the places of those who might be carried to spread the contagion of this terrible moral disease into regions which are yet unsullied by its contamination would soon be supplied by a succession of fresh victims. Besides, we deprecate the diffusion of the *slaveholding spirit*, so incompatible with the noble and ingenuous character of freemen; so unhappy in the associations which it forms in the minds of the rising generation, who are the hope and stay of our country; so inconsistent with the manly attitude which we have taken among the nations of the earth as the asserters of human freedom; so destructive of the physical strength of a State, by impressing on the brow of honest labor the mark of servitude and disgrace; so discouraging to the gradual progress, through a vast and growing territory, of a bold and hardy yeomanry, tillers of their own soil, and its most able defenders; so hostile to the temper of that religion which is at once the brightest ornament and surest strength of a people; and so ungrateful in its exercise towards that Being to whose justice we appealed for protection when we ourselves felt the pressure of that *very yoke of bondage* which now bears with a more galling and cruel weight on thousands of our fellow-men. He delivered us from that yoke, and he has crowned that deliverance with a profusion of the choicest blessings. What do we not owe to his goodness?

In making such appeals, we boast of no moral superiority over our southern brethren. We well know that this dreadful curse was entailed upon them, and that too many of our own citizens have contributed to its continuance. We sympathize with them in any evils from this source which they feel, or dangers which they may fear. We rejoice with them, too, in any prospects which a kind Providence may be opening for the gradual and complete deliverance of our common country from this stain upon its reputation and canker of its prosperity; we hail, with them, the dawning of a happier day, when the combined efforts of our own and the other nations of the earth shall generously redress the wrongs of injured Africa, and, if possible, repay her sufferings, by raising her from her present state of moral and political degradation to the enjoyment of all those privileges for the possession of which she is now stretching forth her supplicating hands.

It is to give our own favored nation the best opportunity to take such a part as wisdom and prudence may suggest in this noble work of benevolence; to shield it against the imputation under which it has too long labored, that it can wield with one arm the weapons of war against its oppressors, while it rivets with the other the chains of bondage upon its unhappy victims; and, in the mean time, to furnish it with the best safeguard against the evils which may result from its misfortune or its crime, that we have united with others of our fellow-citizens in the object of this memorial, which we lay before your respectable body, with the assurance that, as it rests upon the immutable basis of truth and justice, its influence will not be lost.

16th Congress.] No. 482. [1st Session.

DUTIES OF THE ATTORNEY GENERAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 7, 1820.

OFFICE OF THE ATTORNEY GENERAL OF THE UNITED STATES,

SIR: *February* 3, 1820.

The order of the House of Representatives of the United States of the 28th January last, "that the petition of Joseph Wheaton, and the accompanying documents, together with the report of the Committee of Claims, of the 6th January instant thereon, be referred to the Attorney General of the United States, and that he be requested to report his opinion thereupon to this House," was handed me by Major Wheaton (the petitioner) this evening, together with the documents, which are now returned.

The duties of the Attorney General's office are specified by our laws, and are confined to the following heads:

1. To prosecute and conduct all suits in the Supreme Court in which the United States shall be concerned.

2. To give his advice and opinion upon questions of law, when required by the President of the United States, or when requested by the heads of any of the Departments, touching any matters that may concern their Departments.

3. To discharge the duties of a Commissioner of the Sinking Fund.

The Attorney General is sworn to discharge the duties of his office *according to law*. To be instrumental in enlarging the sphere of his official duties beyond that which is prescribed by law, would, in my opinion, be a violation of this oath. Under this impression, I have, with great care, perused all the documents which have been handed to me in this case, for the purpose of ascertaining whether the order with which I have been honored from the House of Representatives falls under either head of my official duties; and it appears to me that it does not. A reference to the law will show, I think, that this is indisputably clear.

I had the honor to intimate this impression in answer to the case of Major Thomas, referred to me officially by the House of Representatives in the session of 1818–'19, in the hope that, if it was thought advisable to connect the Attorney General with the House of Representatives in that character of legal counsellor which he holds, by the existing law, towards the President and heads of Departments, a provision would be made by law for that purpose. No such provision having been made, and believing, as I do, that, in a Government purely of laws, it would be incalculably dangerous to permit an officer to act, under color of his office, beyond the pale of the law, I trust that I shall be excused from making any *official* report on the order with which the House has honored me. It is true that, in this case, I should have the sanction of the House for the measure; and it is not less true that my respect for the House impels me strongly to obey the order. The precedent, however, would not be the less dangerous on account of the purity of the motives in which it originated. The maxim is as old at least as republican Rome that *omnia mala exempla ex bonis orta sunt*. On this ground I hope to be excused by the House of Representatives for declining their request: and I assure you, sir, that it gives me more pain to be thus obliged to decline it than it would give me trouble to make the report; but, in a conflict between my wishes and my sense of duty, there ought to be no question which I should obey.

I may be wrong in my view of the subject; the order may be sanctioned by former precedents; but my predecessors in office have left nothing for my guidance, and I am constrained, therefore, to act on my own construction of the law as it stands.

I have the honor to be, sir, very respectfully, your obedient servant,

WILLIAM WIRT.

The Hon. HENRY CLAY, *Speaker of the House of Representatives U. S.*

16th CONGRESS.] No. 483. [1st SESSION.

PLAN FOR ENFORCING THE SPEEDY PAYMENT OF MONEY DUE FROM INDIVIDUALS AND CORPORATE BODIES TO THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1820.

SIR: TREASURY DEPARTMENT, *February* 11, 1820.

In obedience to a resolution of the House of Representatives of the 4th instant, directing the Secretary of the Treasury "to report to this House such measures as, in his opinion, may be expedient to enforce the more speedy payment of public moneys due from individuals and corporate bodies to the United States," I have the honor to submit the two enclosed extracts of reports made by the heads of the principal Executive Departments during the second session of the fourteenth Congress, and an extract from a report made by the Secretary of the Treasury to the House of Representatives on the 2d of February, 1817.

From these extracts it will appear that the difficulties of enforcing the payment of public money in the hands of persons who have obtained possession of it as officers consists, first, in the defect of power to compel the party to render his accounts; and, secondly, to enforce the immediate payment of what may be found to be due. The evils described in those reports have been increasing, and will continue to increase until an appropriate remedy shall be provided.

Immense sums will be lost in the settlement of the accounts which accrued during the late war for the want of an efficient remedy against defaulting officers.

On the 20th of April, 1818, an act was passed, entitled "An act supplementary to the several acts relative to direct taxes and internal duties;" by the eighth and ninth sections of which a remedy was intended to be given against banks which should fail to discharge their notes, on demand, in the hands of the Government. Under this act, a suit has been instituted against a bank in one of the States, but which has hitherto been without effect, as, by the laws of the State in which the suit has been brought, there is no process by which a corporation can be brought into court. The defect in the act of the 20th of April, 1818, which was not then foreseen, has not been removed by legislative interference. It is, therefore, respectfully submitted that it be enacted that a service upon the president or cashier of a bank, by leaving a notice at the banking-house, or at the house of such president or cashier, be a sufficient service within the provisions of the said act; and that, on default to appear and plead, judgment shall be entered by default against such corporation; and that the proceedings therein directed against the persons summoned as garnishees shall be had. As some of the banking companies, corporate and unincorporate, the notes of which, during the general suspension, were received on account of the Treasury, have been dissolved, and are no longer represented by officers of the above description, it may be proper to provide for such cases.

The individuals who are indebted to the Government are, generally, the importers of foreign merchandise and the purchasers of public lands.

The refusal of credit at the custom-house, as long as a revenue bond shall remain due, if rigidly enforced, will insure sufficient punctuality in the discharge of debts of that description, except in extraordinary circumstances. But the purchasers of public land have no strong inducement to punctuality.

The failure to pay the instalments upon previous purchases as they become due does not, as in the case of custom-house bonds, deprive them of credit at the land offices.

The payment of interest at the end of five years, as the condition upon which the term of payment for five years longer is usually granted, is the only penalty attached to the want of punctuality in this class of the public debtors. As long as this course shall be pursued, it cannot be expected that any considerable degree of punctuality will be observed by the purchasers of the public land. The abolition of the credits now allowed to purchasers, or the refusal of credit in all cases where an instalment is not paid when it becomes due, will be necessary to secure the collection of that portion of the public revenue which is to be derived from the national domain.

Of the sum of $22,000,657 54, now outstanding, on account of sales made prior to the 30th of September, 1819, and the payment of which has not already been postponed by law, the sum of $4,520,340 49 will be payable during the current year. During the year 1821 there will, from sales already made, be payable a sum exceeding $5,000,000. If to these sums should be added the money that will be paid on account of purchases which will probably be made during those years, and the sums which will become due, where the time of payment has already been extended, the annual receipts during that period, it is believed, would not fall short of $6,000,000 if punctuality should be enforced. Experience, however, forbids the expectation that a sum exceeding the half of that amount will be received during the present or ensuing year.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

Hon. SPEAKER *of the House of Representatives.*

Extract from a report of the Secretary of the Treasury, prepared in obedience to the resolution of the House of Representatives of the 2d February, 1817.

It may be proper, in closing this report, to bring into view subjects which, though not strictly embraced by the resolution, are fairly incidental to it. Among these may be mentioned the inconvenience and loss to which the Treasury is subjected by suffering, in particular States, landed property to be set over to the United States, upon appraisements, in discharge of debts arising from custom-house bonds.

The property is always appraised for more than it will sell for. It has, therefore, been generally retained, with a view to realize the sum at which it has been received. In the mean time, for want of proper agents, or, indeed, agents of any kind, it remains not only unproductive, but generally becomes less valuable. This principle seems to have been adopted from a respect to the State laws. Its inequality is, however, a sufficient argument against its continuation, independent of the loss which the treasury suffers from it. In some of the States where the United States are subjected to this inconvenience, the States have taken better care of their own interests, by excepting them from the operation of it. If the law, in this regard, be not changed, it will be necessary to authorize the appointment of agents in those States to take charge of the real property to which the United States are already, or may hereafter become, the owners; or else it will be necessary to make sale of them, with as little delay as possible, without regard to the loss which may be incurred.

If it be judged expedient to legislate upon the subject, it may be proper to authorize the sale of those lands by the marshal, with the power to make titles to the purchaser. Under the existing law, the practice is for the Secretary of the Treasury to execute the titles.

Extract of a letter from the Secretaries of the several Departments to the Chairman of the Committee of Ways and Means, respecting the accountability of the public officers and agents, dated

DECEMBER 31, 1816.

We have the honor to acknowledge the receipt of your letter of the 22d instant, requesting information on the following subjects, viz:

1. Is it intended to apply the power of imprisonment and sale of property, proposed in a late report to the Senate from the Secretaries of Departments, to cases of property, as well as money, which may be withheld from the Government by its officers?

2. Is it proposed to allow any judicial examination into the claim of the United States, either when an officer who has received money from the Government claims credits not admitted in his accounts, or when a citizen is charged by a Department as a depositary of public moneys which he denies having received?

3. Would the accountability of public officers be sufficiently secured if the different proposals contained in the report above referred to were all to be adopted, with the exception of that for the establishment of a new Department?

In answer to the first inquiry, it is proper to observe that the reasons for resorting to the arrest and imprisonment of the defaulting officer, where property is embezzled or withheld, are equally strong as in the case of money. It is presumed that imprisonment would be resorted to only where there is a deficiency of property to satisfy the demand, or in the case of a refusal to settle accounts when adjustment of the accounts of others is dependant upon such settlement. In both of these cases, but particularly in the latter, the most rigid exercise of the powers vested in the Government would be indispensable.

A judicial examination, where the officer should allege that injustice had been done in the settlement of his accounts, would perpetuate the delays in the settlement of the public accounts, which have produced the derangement in the accounting offices, that are intended to be remedied by the summary procedure recommended by the report. It is highly improbable that injustice will be practised by the auditing officers; but, if it should happen in any case, the appeal should be to Congress, who will always grant relief.

It is not intended to apply the summary procedure proposed in the report to the Senate to any other persons than officers of the Government. If the Government confides the public property to other persons than officers, their rights as individuals ought not to be affected. It is not proposed to extend the principle beyond the necessity which has produced its application to a certain description of officers. Justice and consistency require that it should apply to the disbursing as well as to the collecting officers of the Government.

Extract from the report of the Secretaries of the different Departments to the Senate, respecting the prompt settlement of the public accounts, dated

DECEMBER 6, 1816.

If the officer intrusted with the recovery of public money were authorized to issue an execution for the sum appearing to be due, either upon the settlement, or the failure to settle when called upon for that purpose, and that the execution so issued should be satisfied by the distress and sale of the delinquent's property, and that of his securities, one of the most formidable obstacles to the annual settlement of the public accounts would be surmounted.

It is believed that there is no constitutional objection to the adoption of this principle in relation to the officers of the Government who improperly hold the public money. Under the law imposing the direct tax, the collector, on default of payment, is authorized to make the amount due by the levy and sale of the defaulter's property.

In this case, there is nothing on the part of the defaulter but a breach of the general implied obligation, which every citizen owes to the community, to contribute to the wants of the State in proportion to the property which he possesses. This breach may frequently be the result of inevitable necessity, and but seldom brings his integrity in question. In the case of the delinquent officer, there is, in most cases, a direct breach of special confidence, involving the odious charge of peculation or embezzlement. Is there any reason why the remedy of the Government should be more summary in the former than in the latter case? Is there not, on the contrary, a clear distinction between the two cases, entirely in favor of the defaulter? Can it be considered more important to the community that the revenue should be rigidly collected than that it should be faithfully and honestly disbursed? Has the difference in the remedy arisen from the consideration that the one has withheld from the Government a hundred cents which he ought to have paid, whilst the other has embezzled a thousand dollars of the public money thus summarily collected? There can be no doubt that the different remedies in the two cases have resulted from the want of sufficient reflection, and not from design. The subject is now presented to the view of the Senate; and no doubt is entertained but that enlightened body will satisfy the demands of reason and of justice.

It may be proper to observe that the principle now recommended has been applied by the laws laying direct taxes to the collectors of the internal revenue. The Legislature, in relation to that class of officers, has even authorized the arrest and imprisonment of collectors who fail to collect, or neglect to pay after collection, and the seizure and sale of the property, real and personal, of his securities, during the imprisonment. As the principle has already been applied to cases arising out of the collection of the revenue, it is respectfully conceived that reasons more cogent call for its application to the disbursing officers of the Government. The different rules established in relation to these two classes of officers, if persevered in, cannot fail to present the idea that the Government is more astute in devising means to raise and collect revenue than in enforcing a faithful application of it when collected.

16th CONGRESS.] No. 484. [1st SESSION.

CITY OF WASHINGTON: PUBLIC BUILDINGS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 16TH FEBRUARY, 1820.

Mr. COBB made the following report:

The Committee on the Public Buildings, in reporting the accompanying bill, making appropriations for continuing the work on the centre building of the Capitol, and other purposes, would take occasion to observe:

That, since the conflagration of the public buildings in 1814, appropriations have been made by Congress for the following purposes: 1. Rebuilding and repairing the north and south wings of the Capitol. 2. Rebuilding and repairing the President's house. 3. Rebuilding and repairing the two old executive offices. 4. Covering with slate the two old executive offices. 5. Building and enlarging the offices to the President's house. 6. Repairing and finishing the wall, gates, railing, &c. north of the President's house. 7. Graduating and improving the President's square. 8. Erecting two new executive offices. 9. Purchasing a lot of land, and furnishing a supply of water for the use of certain public buildings. 10. A temporary building for committee rooms. 11. Enclosing and improving the Capitol square. 12. Purchasing fire engines, and building houses for the same. 13. The erection of the centre building of the Capitol.

1. *Rebuilding and repairing the north and south wings of the Capitol.* On examination, the committee find that the sum of $679,159 14 has been expended upon this object, between the 13th of February, 1815, and the 1st January, 1820, and for which sum the accounts are in a course of settlement at the proper office. There are other expenditures for which the accounts have not been settled; but it is believed the appropriation made at this session for supplying the deficiency in former appropriations will be amply sufficient to cover them. A further appropriation is called for, towards the completion of the wings, of $1,500, as contained in the estimates of Mr. Bulfinch, the architect, for "painting the inside of both wings," and which he thinks indispensable. The expenses of such additions and alterations as the two branches of Congress may order for their greater comfort and accommodation, must be provided for as the cases arise. The expenses of this nature, already incurred and directed during the present session, amount, as appears by the paper marked A, to the sum of $1,367, which, with the $1,500 mentioned above, is all that will be required at this time for the wings.

2. *Rebuilding, repairing, and finishing the President's house.* From the 13th of February, 1815, to the 1st of January, 1820, the expenditures on this building have amounted to $246,490, as appears from the accounts of the commissioner. The porticoes which were to have been erected on the north and south fronts of it, according to the original designs, are the only material parts remaining unfinished. The committee think it unnecessary to erect them at this time. Annual repairs, incident to every building, and some alterations for greater comfort, the expenses of which will be inconsiderable, are the only purposes for which an appropriation will now be necessary.

3. *Rebuilding and repairing the two old executive offices.* Within the same period, the sum of $68,317 09 has been expended upon this object. It appears that the work was done by contract with certain individuals by the

former commissioners. The materials employed, and the workmanship of a large part of the wood work, are highly objectionable, and will require to be renewed within a very few years. At present, a further appropriation is not deemed necessary.

4. *Covering with slate the two old executive offices*, for which an appropriation of $10,000 was made by an act of Congress of March 3, 1819. This object has not yet been accomplished, from circumstances not necessary to be mentioned; but the committee think it highly essential for the security of the buildings and their contents.

5. *Building and enlarging the offices to the President's house*, to which, by the acts of the 20th of April, 1818, and the 3d of March, 1819, the sum of $15,137 was appropriated. The work is yet unfinished, but is in progress, and an assurance is given to the committee by the commissioner that the sum will be sufficient to complete it.

6. *Repairing and finishing the wall, gates, railings, &c. north of the President's house*, for which the appropriations made by the acts of the 20th of April, 1818, and the 3d of March, 1819, amount to $8,862. The committee are informed that this sum will be sufficient for the object, upon the plan adopted. The work is not yet finished.

7. *Graduating and improving the President's square.* By the estimates submitted in the year 1818, the sum required for this purpose was $16,333. By the act of the 20th April, 1818, Congress appropriated $10,000, which is not yet entirely expended. It is ascertained that to finish the work according to the design on which it has been commenced, and in a style corresponding with the buildings and other improvements of the square, a considerable sum will yet be required. Believing, however, that the work is not indispensable at this time, the committee do not think proper to recommend a further appropriation.

8. *Erecting two new executive offices.* The expenditures upon these buildings have been $191,756 71, being $11,015 71 more than the appropriation. This excess has been supplied by the act of this session, and it is not known to the committee that any further sum is necessary at this time. As far as they could judge, the work upon these edifices has been done in a most substantial manner and handsome style.

9. *Purchasing a lot of land, and furnishing a supply of water for certain public buildings*, (those on and adjacent to the President's square.) By the act of the 3d of March, 1819, the appropriation for this object was $9,125. The high price asked by the owner of the lot, and other circumstances, prevented the expenditure of the money, and, as heretofore stated, it was transferred, for a time, to another purpose. It is now replaced, and the committee believe the object too important to be yet relinquished. Although they are not satisfied that the sum will be sufficient, they do not think it necessary now to recommend its increase.

10. *Erecting a temporary building for committee rooms*, for which the sum appropriated was $3,634, by the act of the 20th of April, 1818. The building is completed and now in use, and it is understood the appropriation will be amply sufficient, and perhaps more than sufficient.

11. *Enclosing and improving the Capitol square*, for which, by the acts of April 29th, 1816, and March 3d, 1817, the aggregate sum of $68,658 was appropriated. The expenditures, according to the accounts shown by the commissioner, have amounted to the sum of $71,602 57, and a further sum of $1,147 25 remains due and unpaid. The committee refer to Colonel Lane's letter, marked B, as well to account for this excess, as for the manner in which a part of it has been supplied. The wall and iron railing have been completed. The gates (being seven in number) are yet to be made and fixed. The committee are of opinion that the work is well done, of lasting materials, and upon unobjectionable terms. It is scarcely necessary that the gates should be undertaken this year. The work upon the grounds has been commenced; but, until the materials, workshops, &c., now spread over them, and wanted for the centre building, can be removed, it is inexpedient to appropriate money for its completion. The architect, in his estimate, herewith submitted, has called for the sum of $1,500 for graduating the hill in some parts, and for raising the earth in others, as well for greater convenience in carrying on the work of the centre building, as eventually improving the appearance of the grounds on the west side of the Capitol. If, indeed, this is *necessary*, in the progress of the centre building, (and the committee have been assured that it is,) there can be no objection to the appropriation.

12. *Purchasing fire engines, and building houses for them.* The sum appropriated for this purpose by the act of the 3d of March, 1819, was $4,500; the appropriation was diverted to the completion of the wings of the Capitol, but has been replaced by the appropriation already made during this session. The engines have been procured, and the sum is believed to be sufficient to answer the purposes intended.

13. *The erection of the centre building of the Capitol.* A committee of this House, in the session of 1817–'18, by their report, recommended the commencement of this work; and, by an act passed on the 20th of April, 1818, the sum of $100,000 was appropriated for this purpose. The act of March 3d, 1819, appropriated a further sum of $136,644 for the same object. With these sums the walls of the building have been raised as high as was contemplated; and the expenditures have conformed as nearly as could be to the estimates. Upon the requisition of a former committee of this House, the plan has been changed from the design of the late architect, Mr. Latrobe, so as to afford more convenience, and a greater number of necessary rooms. This alteration has been approved by the President, and it is believed that it will not affect either the beauty of the building, or increase the cost of erection, inasmuch as its external appearance is substantially preserved, and its size diminished. The committee have examined the materials and style of workmanship of what has been done, and have been well satisfied with both. Having an eye to the necessity of curtailing the expenditures of Government at the present period as much as possible, their first inquiry was as to the expediency of suspending this work until a more flattering account of the state of the treasury should be presented. They do not hesitate in saying that prudence and economy both require that the building should be urged as fast as a proper regard for its faithful execution will permit, until the walls shall be raised to the intended height, and the whole covered, so as to be effectually protected from injury by the action of the weather; leaving to future deliberations of Congress to judge of the propriety of completing its interior. To this object the committee directed the commissioner and architect to prepare and conform their estimates for the ensuing year. The estimate is hereto annexed, marked C, amounting to $114,769, inclusive of the two sums required, as hereinbefore stated, for painting the inside of the wings, and the improvement of the grounds west of the Capitol.

Before closing their report, the committee think it proper to observe that, in so far as the public buildings have advanced, the unexpected expenses of their repairs, since their conflagration inclusive, the appropriations heretofore made, and to be made until they shall be completed, can only be considered, for the most part, as advances made at the Treasury, which will be reimbursed by the sales of the public property in the city of Washington, which has cost the Government but little. At the time of the cession of this territory as the seat of the General Government, this property was considered as a source of revenue which would be amply sufficient for the erection of all the public buildings; and, if the document herewith presented, marked D, is not unreasonable, it will yet be sufficient to complete such as are undertaken. But for their destruction, there is no doubt of the correctness of the calculation, made many years since, of the sufficiency of the fund for its object.

A.

Account of work done on the wings of the Capitol since December 1, 1819, *by order of the two Houses of Congress, viz:*

Alterations of President's seat, Senate chamber, making canopy, &c.	$20 00
Repairs on four committee rooms, north wing, viz:	
Plasterer's and painter's work,	100 00
Setting four chimney-pieces, at $20 each,	80 00
Four hearths, at $12 each,	48 00
One stone chimney-piece,	12 00
South wing:	
Making necessary,	40 00
Iron rods, and fixing chandeliers, 539½ lbs. at 20 cents per lb.,	107 90
New skylight, viz:	
Carpenter's work,	100 00
Painter's work, and glazing,	40 00
Glass,	130 00
Bill of iron work,	189 20
	867 10
Estimated cost of making skylight in Representatives room, to conform to the curve of the ceiling, with necessary scaffolding, repairs, and pipes for conveyance of water,	500 00
	$1,367 10

CHARLES BULFINCH,
Architect of Capitol United States.

FEBRUARY 9, 1820.

B.

OFFICE OF COMMISSIONER OF PUBLIC BUILDINGS,
WASHINGTON, *February* 4, 1820.

SIR:

In carrying into effect the act of April 29, 1816, for enclosing and improving the Capitol square, after determining the plan of the work, it was thought most advisable to offer the execution of it to the competition of the public. Notices inviting separate proposals for each part of the work were accordingly issued, and the proposals of Griffith Coombe being accepted, a contract was entered into with him, and the work immediately commenced. The act above mentioned authorized the enclosure of that part of the square lying east of the Capitol only; but, at their next session, Congress directed a semicircular area west of the Capitol to be included. By this arrangement, the line of enclosure intended to pass on the east front of the Capitol, and embraced by Mr. Coombe's contract, was rendered unnecessary, and a modification of the contract followed. It was finally agreed between Mr. Coombe and myself that his contract should be extended to embrace the semicircular area, in lieu of the straight line referred to, with such additional allowance for *circular* work as should be awarded by referees to be mutually chosen after the work was completed. Colonel George Bomford and Mr. Robert Leckie were chosen for this purpose. From the nature of the agreement, the amount payable to Mr. Coombe could not be ascertained until the work was done. It happened to exceed the sum I had calculated upon. The payments already made amount to $71,602 57, and there remains due to Mr. Coombe the further sum of $1,147 25. After exhausting the appropriation, I resorted, for the payment of some pressing claims, to the centre fund. In this way the appropriation has been unintentionally exceeded by the sum of $4,091 82. I need not add that this sum is greatly wanted.

I have the honor to be, with great respect, your obedient servant,
SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. THOMAS W. COBB, *Chairman of the Committee of Public Buildings.*

C.

SIR:

JANUARY 18, 1820.

Agreeably to your desire, I enclose, to you an estimate of the amount that will be wanted for the further progress of the work on the Capitol of the United States, for the year 1820, as follows:

For preparing and setting stone work now on hand for the east wall, and walls of western projection, and colonnade of lower rotundo,	$15,600 00
Six hundred tons of freestone for upper rotundo, at $10 per ton,	6,000 00
Working and setting the same,	5,400 00
Fifteen hundred perches blue stone for backing the walls, labor and mortar included, at $5 per perch,	7,500 00
Two million bricks, labor and mortar included, at $13 per thousand,	26,000 00
Timber and boards for roof of west projection, for centring of arches for doors and windows, scaffold poles, erecting the same, and labor,	3,600 00
Carpenter's work, making centres, frame, roof, &c.,	15,585 00
Laborers attached to carpenters,	1,878 00
Nails and spikes,	1,500 00
Two iron bands bedded in the stone, to surround the walls, 5,000 lbs. each, is 10,000 lbs. at 10 cents per lb.	1,000 00
Carving capitals to pilasters and trusses to windows,	10,000 00
15,890 feet of copper for the roof, 16 ounces to the foot, at 40 cents per foot,	6,356 00
1,000 lbs. block tin for do., at 35 cents per lb.,	350 00
Painting the inside of both wings,	1,500 00
Work on regulating grounds, west side,	1,500 00
1,000 tons of freestone, to be procured for use in 1821, and worked in the winter,	10,000 00
Carting the same,	1,000 00
	$114,769 00

CHARLES BULFINCH,
Architect of Capitol United States.

SAMUEL LANE, Esq., *Commissioner of Public Buildings.*

D.

Expenditures on the wings of the Capitol to the destruction of the same, August, 1814,	$788,071 08	
On the President's house, do.	333,207 04	
On the public offices, do.	93,013 82	
		$1,214,291 94
Erecting two additional buildings for executive offices,		191,671 08
Repairs on wings of Capitol to January, 1820,	679,159 14	
Repairs on the President's house,	246,490 00	
Repairs on the public offices,	68,317 09	
Contingent expenses,	15,673 02	
		1,009,639 25
		$2,415,602 27

Statement of resources for erecting Public Buildings in the city of Washington.

Donation from the State of Virginia in 1791, towards public buildings,	$120,000 00	
Donation from the State of Maryland,	72,000 00	
Amount of sales of public lots to January 1, 1820,	706,811 88	
		898,811 88
Valuation of public property, viz:		
5,155 building lots for sale, at $180, the average price of former sales,	927,900 00	
542 acres of ground reserved for the use of the United States, at same rate,	740,000 00	
Land and freestone quarries, wharves and water lots,	48,000 00	
		1,715,900 00
		$2,614,711 88

From the foregoing statement, it appears that the donations and actual sales, together with the public lands, at a very *low estimation*, will more than balance the amount of expenditure at the present time.

But if we add to the amount expended of	$2,415,602 27
The probable expense of the centre of the Capitol, and completing the square,	800,000 00
The amount will be	$3,215,602 27
And if to amount of resources of	$2,614,711 88
Is added on the value of the land	1,668,800 00
To make double the present low estimate, this amount will be	$4,283,511 88

It seems but reasonable to anticipate the above increase in value of this property, from the natural growth of the city, under the fostering care of the Government.

If this expectation should be realized, it will appear that the public buildings have been erected from the proceeds of property *created* by locating the seat of Government in this place, and that a fund will remain for further improvements.

E.

SIR: WASHINGTON CITY, *February* 1, 1820.

The following statement is respectfully submitted of work and materials required for the preservation of the President's house and its appurtenances, to keep them in a complete state of repair, and to make good dilapidations from the weather, &c. during the current year.

To work of fixtures, repairs, &c.,	$600 00
To lumber, glass, nails, &c.,	500 00
	$1,100 00

I am, respectfully, sir, your obedient servant,

JAMES HOBAN, *Architect President's House.*

SAMUEL LANE, Esq., *Commissioner of Public Buildings.*

16th Congress.] No. 485. [1st Session.

EXPENSES OF THE JUDICIARY IN THE DISTRICT OF COLUMBIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 7, 1820.

SIR: TREASURY DEPARTMENT, *March* 3, 1820.

In obedience to a resolution of the House of Representatives of the 20th of January last, directing the Secretary of the Treasury "to report to the House the amount of fines, penalties, and forfeitures imposed, levied, and collected in the District of Columbia by order of the circuit court of the United States for the said District, in each year, from the year 1801 to the year 1819, both inclusive; and that the said Secretary also state what part of the expenditure stated in his report to this House made at the present session* of the expenses of the judicial system of the said District since the assumption of jurisdiction by Congress has been incurred on account of the district court of the United States, and on account of the sittings of the Supreme Court of the United States within the said District," I have the honor to submit the enclosed letter and statements from the Register of the Treasury.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

SIR: TREASURY DEPARTMENT, REGISTER'S OFFICE, *March* 3, 1820.

I have the honor to transmit the following statements, prepared and collected in obedience to a resolution of the House of Representatives of the United States of the 20th January, 1820, viz:

No. 1. A statement of the expenses of the judicial system of the District of Columbia since the assumption of jurisdiction by Congress, showing the amount incurred on account of the district court of the United States, and on account of the sittings of the Supreme Court of the United States within the said District.

No. 2. Statement of fines, penalties, and forfeitures laid and collected by the circuit court of the District of Columbia for the county of Washington, from the year 1801 to the year 1819, both inclusive.

No. 3. Statement of fines, penalties, and forfeitures in the circuit court for the District of Columbia for the county of Alexandria from the 1st April, 1801, to the 1st April, 1819.

No. 4. Statement of moneys accounted for to the levy court of Washington county for fines, penalties, and forfeitures.

No. 5. Certificate of Tench Ringgold, Esq., marshal, of the amount of fines, penalties, and forfeitures collected by him from April, 1818, to February, 1819.

No. 6. Letters from William Brent, Esq., clerk of the circuit court for the county of Washington.

No. 7. Letter from Edmund I. Lee, Esq., clerk of the circuit court for the county of Alexandria.

I have the honor to be, with great respect, sir, your most obedient servant,

JOSEPH NOURSE, *Register.*

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

* That report varies from this only by showing the disbursements for the salaries of the circuit judges to have amounted to $106,878 32 since 1801 to the close of 1819.

No. 1.

A statement of the expenses of the judicial system of the District of Columbia since the assumption of jurisdiction by Congress, showing the amount incurred on account of the district court of the United States, and on account of the sittings of the Supreme Court of the United States within the said District: prepared in obedience to a resolution of the House of Representatives of the 20th of January, 1820.

1809,	142 09		1809,	92 28	53 53
1810,	369 82		1810,	40 04	4
1811,	188 67		1811,	19 75	50 06
1812,	39 54		1812,	17 50	
1813 & 1814,	756 06		1813 & 1814,	22 50	136 00
1815,	43 02		1815.		
1816,	235 00		1816,	2 50	10 00
1817,	172 56	20 00	1817,	20 15	150 00
1818,	503 02		1818,	18 75	300 00
1819,	515 02		1819,	3 75	60 01
	$6,790 30	$525 00		$1,365 30	$1,295 83

According to the records in this office, it appears that, of the above fines, penalties, and forfeitures, imposed within the periods above stated, the President of the United States has remitted at different times to the amount of $545 01.

In some cases, the offenders have proved insolvent, and no executions have been issued; and in others, no returns have been made by the marshal.

EDMUND I. LEE, *C. C.*

FEBRUARY 28, 1820.

No. 4.

Statement of moneys accounted for to the levy court of Washington county for "fines, penalties, and forfeitures," from June term circuit court, 1801, to December 31, 1812, as taken from the accounts of the marshals on file.

Periods of time for which the annexed amounts have been accounted for.	By whom accounted for.	Amount.
June and December term, 1801, - -	D. C. Brent, marshal, - -	$218 17
March and July, 1802, - -	D. C. Brent, marshal, - -	101 62½
December, 1802, and July and December, 1803, -	D. C. Brent, marshal, - -	350 85
December, 1803, and July, 1804, - -	D. C. Brent, marshal, - -	190 67
December, 1804, - - -	D. C. Brent, marshal, - -	152 83
From December, 1807, to December 31, 1812, -	W. Boyd, marshal, - - -	708 52

FEBRUARY 21, 1820.

No account has been exhibited by the marshals since the above date. It appears that a considerable portion of the above amounts has been expended at various times by the marshals in repairs to the jail in Washington city; the balance by the levy court itself on account of general expenses of the county. I am aware that the above statement is not so particularly detailed as you have requested, but I am possessed of no document which will enable me to state the subject-matter more in detail and fully.

I am, sir, very respectfully, your obedient servant,

JOHN MOUNTZ, *Clerk Levy Court.*

J. NOURSE, Esq.

No. 5.

MARSHAL'S OFFICE, D. C., *February* 22, 1820.

I certify that the amount of fines, forfeitures, and penalties collected by me, from the day I received the commission of marshal of this District to this date, is $836 38.

TENCH RINGGOLD, *Marshal District of Columbia.*

I received the commission of marshal in April, 1818. T. R.

No. 6.

SIR: WASHINGTON, *February* 22, 1820.

I send you enclosed an account of the fines, penalties, and forfeitures imposed, levied, and collected by order of the circuit court of the District of Columbia for the county of Washington, in compliance with the request contained in your letter of the 25th of January last. This account, so far as it depended upon my office, was prepared in a week after I received your first letter, and I only waited for the information contained in the enclosed certificate of Mr. Ringgold, of the fines, &c. collected by him, to enable me to forward it to you, which, owing to his engagements in the Supreme Court, I did not receive from him till this day.

I have the honor to be, very respectfully, sir, your obedient servant,

WM. BRENT.

JOSEPH NOURSE, Esq., *Register of the Treasury.*

SIR: WASHINGTON, *March* 2, 1820.

I have received your note of yesterday's date, with the enclosures. Mr. Lee informs me that his statement was made from returns rendered to his office annually since the origin of the court by the marshal. Not having received similar returns in my office from the marshal, I have not the means of altering my statement so as to make it conform to that of Mr. Lee, and I am therefore obliged to return it to you in the same shape it was originally sent. The second section of an act of Congress passed on the 3d of March, 1801, entitled "An act supplementary to the act entitled 'An act concerning the District of Columbia,'" directs how the moneys collected for fines shall be accounted for and paid over by the marshal; and I presume he has conformed to the provisions of that act. The statement made by me is derived from the returns of the marshal on executions issued for fines and costs. He has never stated to me how he applied the moneys thus collected by him.

I am, dear sir, very respectfully, your obedient servant,

WM. BRENT.

JOSEPH NOURSE, Esq., *Register of the Treasury.*

No. 7.

SIR: ALEXANDRIA, CLERK'S OFFICE, *February* 28, 1820.

According to your request, I now do myself the honor of enclosing to you the amount of fines, forfeitures, and penalties imposed, levied, and collected in the District of Columbia, for the county of Alexandria, by order of the circuit court of the United States for the county of Alexandria. I have, in my return, brought up the statement to the 1st of April, 1819, because the marshal is allowed until the 1st of next April to make his return to the office for the year beginning on the 1st of April, 1819. He makes his report annually, and that on the 1st of April in each year.

I am, respectfully, your most obedient servant,

EDM. I. LEE.

JOSEPH NOURSE, Esq., *Register of the Treasury.*

16th Congress.] No. 486. [1st Session.

CUMBERLAND ROAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 10, 1820.

SIR: TREASURY DEPARTMENT, *March* 10, 1820.

It is ascertained by the examination of the accounts of Josias Thompson, late superintendent of that part of the Cumberland road which is west of the Monongahela river, that the sum stated in the estimates of the current year for satisfying the arrearages due under the contracts made in 1817 will not be sufficient for that purpose. To discharge the demands admitted by the superintendent, an additional appropriation of forty-four thousand dollars will be necessary. Doubts having arisen of the correctness of the conduct of the superintendent, he has been removed, and an investigation has been directed, with a view to ascertain whether impositions have not been practised upon the Government. This investigation, after having been commenced, was postponed until the 20th instant, when it will be resumed and brought to a speedy conclusion. It is not improbable that it will result in the exclusion of some part of the demands which have been admitted by the late superintendent, and are still unsatisfied. It is believed, however, that it will be expedient to make the appropriation, as no part of it will be expended but what is indispensable to the fulfilment of the public engagements made in 1817.

I enclose, for the perusal of the committee, a copy of the instructions under which the examination has been commenced, and of the report which has been made, assigning the reasons which had rendered its postponement necessary. A copy of my letter to the late superintendent is also enclosed.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

Hon. SAMUEL SMITH, *Chairman Committee of Ways and Means.*

SIR: TREASURY DEPARTMENT, *February* 10, 1819.

The estimate for completing that part of the Cumberland road which was contracted for in the year 1817, which is presented in the general estimates for 1819, was founded upon the estimates and statements furnished by the superintendents, and communicated to the Committee on Internal Improvement towards the latter end of the last session of Congress. On the 1st of September last, the superintendents were instructed to furnish on the 1st day of November a statement of the expenditures which had been made by them, respectively, and an estimate of the sums which would be necessary to satisfy the contracts which had been made in the above-mentioned year. This instruction was not complied with by the superintendent of the western part of the road until the commencement of the present year. The estimates which he has furnished, and which were immediately communicated to the Committee on Internal Improvement, exceed those made by him the last year by about $180,000. This sum, however, will be diminished by refunding of about $30,000, which was advanced to several of the contractors at the commencement of their undertakings. The sum now necessary to meet the demands under the existing contracts may be estimated at $150,000, in addition to the sum presented in the general estimate. It may be necessary to state that no new contract has been authorized since the meeting of Congress in 1817.

I am now authorized to state that contracts can be made for that part of the road between Uniontown and Washington at the rate of $9,500 per mile, including culverts, bridges, and all other incidental expenses, except the bridge across the Monongahela, if it should be deemed expedient to erect one over that river. The persons proposing are capable of complying with their engagements, and will bind themselves to complete the whole extent to be contracted for within two years from the date of their contract. Estimating the part yet to be contracted for at thirty miles, the expense of completing it will be $285,000.

I respectfully refer you to the estimates of the superintendent for the last and present year, which are in the possession of the Committee on Internal Improvement.

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

The Hon. SAMUEL SMITH, *Chairman Committee of Ways and Means.*

GENTLEMEN: TREASURY DEPARTMENT, *November* 30, 1819.

Doubts having been suggested that alterations in the location of the road, and in the manner of constructing it, in the dimensions of the bridges, and in the mode of constructing them, have been made or consented to by the late superintendent, injurious to the interest of the United States, it has been judged expedient by the President, as well from a sense of justice to the late superintendent as from a due regard to the national interests, that a full and complete examination be made into the premises, in order that justice may be done.

In the execution of this important and delicate service, he is desirous of obtaining the aid of persons in whose justice and impartiality unlimited confidence may be reposed. He has, therefore, directed me to request that you take upon yourselves this examination, and that you will proceed to the execution of it with as little delay as possible.

The superintendent will furnish you with such information as may be necessary to enable you to discharge this duty with intelligence and satisfaction to yourselves and to the parties. Mr. Thompson will also be informed of the institution of this inquiry, and you are requested to give him notice of the time when the examination will commence.

In drawing your attention to the principal causes of complaint, it is not intended to restrain your examination to them. On the contrary, you are invited to extend your inquiry to all and every other departure from the conditions of the contracts which may have occurred, and from the instructions which prescribed the duties of the superintendent. You will especially inquire into the mode of admeasurement adopted by him in ascertaining the price of bridges and mason work, and report your opinion of its propriety and justice. If, in your opinion, there has been an unnecessary expenditure of money in side walls, you will state the amount of such unnecessary expenditure.

By the instructions it will be seen that alterations of any kind were prohibited to the superintendent, without the previous sanction of this Department, except where they were very limited indeed. Should alterations have been made by him not warranted by the instructions, you will report them at large.

I am, &c.

WM. H. CRAWFORD.

To A. Lacock, Tho. Wilson, and Tho. McGiffin, Esqs.

Sir: Treasury Department, *December* 1, 1819.

The President has determined that it is expedient to cause the road constructed under your superintendence to be examined, as well to ascertain whether it has been constructed agreeably to contract, as to determine whether you have conformed to the instructions under which you acted. The persons requested to execute this service will give you notice of the time and place at which it will commence, in order that you may be present, if you think proper, and may furnish such explanations as may be necessary to the ends of justice, as well to yourself as to the Government.

I am, &c.

WM. H. CRAWFORD.

Josias Thompson, Esq., *Washington, Pennsylvania.*

Sir: Washington, Pennsylvania, *January* 3, 1820.

On Monday, the 20th ultimo, the undersigned met at Brownsville, and immediately entered upon the duties requested of us relative to that part of the United States' road lately superintended by Mr. Thompson, Mr. Mc Giffin advising us that he was unavoidably detained for some days at home by indisposition in his family, and would probably join us at Washington in the course of the week.

On our arrival at Washington, Mr. McGiffin being still detained, after a consultation with him, we concluded to proceed to Wheeling, which we accordingly did; and, after making such observations and general inquiries as the time and season permitted, returned to this place with a view of proceeding, if deemed practicable, to the actual investigations, inspections, and measurements necessary to ascertain all the material facts which might enable us to present a full report satisfactory to ourselves and the parties concerned.

On our arrival, Mr. McGiffin being present, we immediately entered into a deliberate consideration of the subject of inquiry, and the delays and difficulties to be encountered during the inclemency of the winter. The cold has become intense, the ground frozen, the snow of considerable depth, and increasing daily. Under these circumstances, we are convinced, by the attempts which we have already made, that much time would be consumed, and the result of the utmost vigilance likely to be very unsatisfactory should we proceed: in short, we are unanimously of opinion that a satisfactory inspection is impracticable at present, and that the uncertainty which must attend the appointment of any day during the winter requires a postponement until the spring. We have, accordingly, concluded upon an adjournment, to meet again on the 20th of March next, unless otherwise advised by the superintendent or the Secretary of the Treasury in the mean time.

So far as we have proceeded in viewing the road and examining the works, our observations having been necessarily general, we are not enabled to state results with precision; but deem it proper to present such a view of the subject as the present stage of the inquiry suggests. In doing this, little more is necessary than to observe that general appearances strongly corroborate the allegations which seem to have pointed out the particular subjects of inquiry embraced in your letter of instruction.

We are decidedly of opinion that unnecessary expense to a large amount has been incurred in the erection of bridges, when culverts would have been sufficient; side walls, when fillings of earth would have been less expensive, more permanent, and, in many instances, would have been effected at the expense of the road contractor; in unnecessary increase of dimensions of side and wing walls; the erection of expensive bridges where the stream might have been turned or avoided at a much less expense; and in the number of arches to each bridge. Deviations from the location are by Mr. Thompson admitted in several instances, one of which he admits to have been adopted without advising the Department. The effect of such deviations we have not ascertained, nor have we been able to examine the reasons assigned by Mr. Thompson in justification of them.

It is due to Mr. Thompson to state that he appears satisfied, and even solicitous, that the inquiry proceed with as little delay as possible; evinces every disposition to afford all the lights and facilities in his power; and is now engaged in preparing copies of the grading notes, accounts of the dimensions, and calculations of the mason work; which accounts are lengthy.

One circumstance connected with the inquiry, and which, in our opinion, presents the strongest objection to its postponement, we feel ourselves called upon to state particularly, and to recommend a provision which may diminish the inconvenience which the delay appears likely unavoidably to occasion. The sub-contractors under Colonel Shepherd's contract have, as they allege, (and not improbably,) nearly completed their different works. They and their workmen and laborers state (and we believe correctly) that they are in great want of money; that they are without the means of providing winter clothing and subsistence; and many who reside in distant parts, having small sums due them for labor, &c., will be subjected to great hardship, by either going to their homes or being detained for the winter unpaid.

This circumstance presents considerable difficulty which, in our opinion, should be lessened as far as may be. It is one which strongly urges the earliest inspection that may be practicable; and since this cannot be, in our opinion, begun before the time before mentioned, nor finished before the first week of April, at least, we respectfully recommend that the superintendent (Mr. Shriver) be authorized to make payments on account of the sub-contractors, with the consent of the original contractors, and on bonds, if deemed necessary, to an amount not exceeding $6,000.

This communication was intended to be subscribed by Messrs. Lacock and Wilson only; but Mr. McGiffin being satisfied, from his separate acquaintance with the subject, with the statement and views which it presents, consents to subscribe his name also.

We have the honor to be, sir, your obedient servants,

A. LACOCK,
THOMAS WILSON,
THOMAS McGIFFIN.

16th Congress.] No. 487. [1st Session.

PUBLICATION OF THE LAWS IN NEWSPAPERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 20, 1820.

Mr. Pendall, from the select committee to whom was referred the letter of the Secretary of State of the 7th February, 1820, in relation to the publication of the laws in the newspapers, reported:

That the act of the 20th of April, 1818, made an unnecessary increase of the compensation payable to the proprietors of newspapers for the publication of the laws. There had been no difficulty in procuring the publication at the price previously established; and it is believed that the Secretary of State, who is now forced by law to give the increased compensation, could, if authorized to use his discretion, have the business performed on as reasonable terms as before the act of 1818.

The committee cannot believe that the act of 2d March, 1799, (since re-enacted, and extended to the Territories,) providing for the publication in one newspaper of each State, and authorizing the publication in three of the papers, when the publication in one should be found insufficient, was passed under any expectation that the expense of publication in three newspapers of every State would be incurred, or that it would at any time be found requisite to employ two newspapers in each of the towns of New Haven, Wilmington, Lexington, and Natchez, whilst none were employed in Richmond, Fredericksburg, Petersburg, Fredericktown, Lancaster, or Louisville; or that the publication of the laws in the city of Richmond should be suspended, merely that they might be printed in a county adjacent to the District of Columbia, where three newspapers were engaged at the expense of Government in the same business; or that newspapers, scarcely known out of the county in which they were published, and of a very limited circulation within, would have been selected for this purpose. But that the law has been thus executed, is evidenced by the letter referred to the committee.

Newspaper publication might afford a cheap method of multiplying copies of the public acts. Few, however, in proportion to the whole number of the patrons of the press, read those publications, and still fewer preserve them; and, for all practical purposes, the publication in volumes or pamphlets is found to be more advantageous.

On subjects of great national concern, the interest of popular editors usually will (as it has hitherto done) furnish a sufficient inducement to inform their customers of the transactions of the Government.

The public derive but small, if any, advantage from the newspaper publication of Indian treaties; although their insertion, as appears by the letter of the Secretary of State, is among the causes of increasing the expenditure for promulgating the laws from less than $5,000 in 1816, to near $20,000 in 1820.

The sum payable on each newspaper is, in most instances, sufficiently large to make Government the best customer to the proprietor, and has sometimes been found sufficient to establish or continue small printing establishments in the country. In the opinion of the committee, the present law is not less objectionable by reason of its evident tendency to confer on the State Department a direct patronage and influence (useless or pernicious) over many of the sixty-nine presses which the Government has taken into its employment. But as the laws in relation to the impost and public lands sometimes, on their passage, become of immediate public interest in certain sections of the country, the committee think a modification will be preferable to a repeal of the law.

Assuming the estimate of the Secretary of State, it will be found that, by reducing the number of newspapers to twenty-five in the States and Territories, and one in the District of Columbia, restoring the old price for the printers, and dispensing with this manner of publishing Indian treaties, the expenditure in relation to the laws of the present session will be reduced from $19,750 to $4,678 34; and, with a view to effect that object, the committee herewith report a bill.

16th Congress.] No. 488. [1st Session.

CITY OF WASHINGTON: PUBLIC BUILDINGS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 21, 1820.

Mr. Meigs, from the Committee on the Expenditures upon the Public Buildings, reported:

That they have, in pursuance of their duty generally, and in obedience to the resolution of the House of Representatives requiring the committee to ascertain whether the expenses upon the public buildings cannot be lessened without arresting their progress, made such inquiries as seemed to the committee necessary to obtain the requisite information; that the paper annexed (marked A) containing an account of the expenditures from the 13th of February, 1815, to the 1st of January, 1820, was, at the request of the committee, rendered to them by Samuel Lane, the Commissioner of Public Buildings. This statement exhibits an expenditure of $1,491,363 24, of which nearly one million of dollars was expended on repairs of the damage done by the enemy in 1814. The paper annexed, (marked B,) also rendered by request from the commissioner, exhibits a view of the total expenditures upon the public buildings in the city of Washington, from the commencement to the 1st of January, 1820, and also a view of the value and proceeds of the public lands in the District of Columbia. The latter statement is exhibited in order that the House of Representatives may know the just relation of the national expenditures upon edifices in the District to the national acquisitions in the same. According to this view, it appears that the valuation of the public lands and actual amount of sales, added to donations from the States of Virginia and Maryland, exceed the national expenditures upon public buildings within the District by nearly $400,000.

The committee, having obtained this general information relative to the subject of their appointment, proceeded to ascertain, as far as was in their power, the relative prices of materials and wages of artists and laborers at different periods during the progress of the works done in the District, and present a table thereof, which is annexed, (marked C;) also a letter from the Commissioner of the Public Buildings, with another table, (marked D,) in which the estimate of prices of materials is not made for 1820; but it is stated that these are reduced, particularly the price

of brick. The wages of workmen are here estimated much lower than they have been in former years, as will appear on examining the same.

It does not appear to the committee that lower wages than those exhibited for 1820 can be expected in this District; and the committee believe that the commissioner has used every exertion in his power to regulate these expenditures by similar expenses in Baltimore, Philadelphia, and New York, and has obtained workmen and materials upon as good terms as could reasonably be expected, when it is considered that many of the workmen, and some of the materials, are not to be obtained except from distant parts of the country.

The committee have endeavored to make themselves acquainted with the general character of the work which is designed to be bestowed upon the centre building of the Capitol; and it appears to them that it cannot properly be conducted with less attention to ornament than is designed, without injury to that fitness of parts which becomes a whole; and they are pleased to find that the principal ornament of the centre work will not consist of expensive sculpture, but of its simple form—the rotundo. The committee think proper to suggest to the House, however, that, as it is contemplated to form the dome of the centre of brick work, in imitation of the Pantheon at Rome, and as such work will, when added to the great weight of the edifice, require the most serious attention to the foundations of the whole edifice to secure its safety, and as, from the examination which the committee have had occasion to make, they feel convinced that these foundations require attention, it is worthy the consideration of the House whether effectual means should not be taken to give perfect security, especially on the westerly side of the edifice, by means of walls of sufficient weight and compactness to counteract the apparent tendency of damage to the Capitol in that direction.

This consideration ought to precede the execution of the massive work which is destined to complete the centre building.

The latter suggestion may not appear to fall precisely within the bounds of duty prescribed to the committee; but as the prevention of damage to the public buildings will be a saving of expense in the end, they have thought it not proper to omit it.

It appears to the committee desirable that the Capitol should be finished as soon as may be conveniently done with regard to the goodness of the work. It is evident that the unfinished parts are injured every winter by that exposure to the weather which they seem unavoidably to sustain; and the prosecution of the work ought to be encouraged by the reflection that the national acquisition in the District approaches so nearly its expenditure, that it may be presumed the total expenditure will not (when the Capitol shall be finished) much, if at all, exceed the acquisition, and would not have equalled it unless that expenditure had been swelled one million by the ruthless vandalism of the enemy, who applied the torch of destruction to the first national ornaments he approached.

All which is respectfully submitted.

H. MEIGS, *Chairman.*

A.

Abstract of appropriations and expenditures on account of the public buildings in the city of Washington, &c. between the 13th of February, 1815, and the 1st of January, 1820.

APPROPRIATIONS.

1815. February 13,	For repairing the Capitol, President's house, and public offices,	$500,000 00	
1817. March 30,	Do. do. do. do. -	100,000 00	
1818. January 27,	Do. do. do. do. -	200,000 00	
1818. April 20,	For completing the wings of the Capitol, - -	80,000 00	
1818. April 20,	For finishing the President's house, - -	15,214 00	
1819. March 3,	For finishing the wings of the Capitol, - -	51,332 00	
			$946,546 00
1818. April 20,	For offices to the President's house, - -	7,000 00	
1819. March 3,	Do. do. - -	8,137 00	
			15,137 00
1818. April 20,	Wall, gates, and railing north of the President's house, -	3,518 00	
1819. March 3,	Do. do. do. - -	5,344 00	
			8,862 00
1818. April 20,	For graduating and improving President's square, - -	-	10,000 00
1818. April 20,	For erecting two additional executive offices, - -	-	180,741 00
1818. April 20,	For centre building of the Capitol, - -	100,000 00	
1819. March 3,	Do. do. - -	136,644 00	
			236,644 00
1816. April 29,	For enclosing and improving Capitol square, - -	30,000 00	
1817. March 3,	Do. do. do. - -	38,658 00	
			68,658 00
	Amount of appropriations, -	-	$1,466,588 00

EXPENDITURES.

1820. January 1,	On the wings of the Capitol, to this date, - -	$679,159 14	
Do.	On President's house, do. - - -	246,460 00	
Do.	On Treasury Office, do. - - -	36,984 79	
Do.	On War Office, do. - - -	31,362 30	
Do.	On contingent expenses, - - - -	15,673 02	
			$1,009,639 25
Do.	On offices to the President's house, to this date, - -	-	10,378 30
Do.	On wall and gates north of do. do. - -	-	5,887 73
Do.	On graduating and improving President's square, to this date, -	-	8,478 85
Do.	On erecting two additional executive offices, - -	-	191,671 08
Do.	On centre building of the Capitol, - - -	-	193,705 46
Do.	On enclosing and improving Capitol square, -	-	71,602 57
	Amount of expenditures for which regular vouchers, admissible at the Treasury of the United States, had been received on the 1st day of January, 1820, - - -	-	$1,491,363 24

Errors excepted:

SAMUEL LANE, *Commissioner of Public Buildings.*

WASHINGTON, *January* 22, 1820.

SAMUEL LANE, *Commissioner of Public Buildings.*

C.

A table showing the price of materials and labor, at several different periods, as given at the public buildings in Washington city.

	From 1793 to 1800.	From 1800 to 1812.	From 1815 to 1818.
Stonecutters' wages per day, - - -	$1 25 to $1 33	$1 50 to $1 75	$2 50 to $2 75
Bricklayers' wages per day, - - -	1 50 to 1 75	1 50 to 1 75	2 00 to 2 25
Carpenters' wages per day, - - -	1 00 to 1 50	1 00 to 1 50	1 62 to 1 88
Laborers' wages per day, - - -	75 -	75 -	1 00
Freestone, per ton, - - -	7 00 to 8 00	8 00 to 9 00	10 00 to 12 00
Brick, per thousand, - - -	7 00 -	7 00 to 7 50	9 00 to 9 50
Plank flooring, per 100 feet, - - -	4 66⅔ -	4 66⅔ -	7 50
Plank, inch, clear, per 100 feet, - -	1 50 to 2 00	1 50 to 2 00	3 00 to 4 00
Plank, inch, rough, per 100 feet, - -	1 00 -	1 25 to 1 50	2 00

WASHINGTON, *January* 25, 1820.

SAMUEL LANE, *Commissioner of Public Buildings.*

SIR: WASHINGTON, *March* 11, 1820.

In consequence of the desire which you expressed to ascertain the wages given at the public buildings in this city, I beg leave to submit the annexed table, exhibiting as well the prices of labor at different periods as of the principal materials. Since this business has been confided to me, I have procured semi-annually from New York, Philadelphia, and Baltimore, reports of the wages given at each of those places, and have endeavored, as far as practicable, to regulate the wages here accordingly. These reports have generally shown a small advance at Baltimore over Philadelphia, and at the latter over New York. I have been compelled to continue nearly the same rate of advance at this place, notwithstanding my efforts to check it by employing agents at New York and Philadelphia to engage and send on hands. So great and general has been the demand for workmen, until latterly, that it was only by great exertions that we could retain the requisite number without yielding to exorbitant demands. Labor and materials of most kinds are now rapidly approaching their minimum, and it is calculated that buildings may be carried on this season for at least one-third less than could have been done two years ago.

I have the honor to be, with great respect, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

Hon. HENRY MEIGS, *Chairman, &c. &c.*

D.

A table showing the wages and prices of materials at the public buildings in Washington city.

	From 1793 to 1800.	From 1800 to 1812.	From 1815 to 1818.	1819.	1820.
Stonecutters' wages per day, -	$1 25 to $1 33	$1 50 to $1 75	$2 50 to $2 75	$1 50 to $1 75	$1 33 to $1 50
Bricklayers' wages per day, -	1 50 to 1 75	1 50 to 1 75	2 00 to 2 25	1 50 to 1 75	1 33 to 1 50
Carpenters' wages per day, -	1 00 to 1 50	1 00 to 1 50	1 62 to 1 88	1 33 to 1 50	1 00 to 1 25
Laborers' wages per day, -	75 -	75 -	1 00 -	88 -	75
Freestone, per ton, -	7 00 to 8 00	8 00 to 9 00	10 00 to 12 00	6 00 to 10 00	No purchases of mater'ls this year, but the prices are reduced, particularly brick.
Hard brick, per thousand, -	7 00 -	7 00 to 7 50	9 00 to 9 50	7 50 to 8 50

SAMUEL LANE, *Commissioner of Public Buildings.*

16th CONGRESS.] No. 489. [1st SESSION.

ATTORNEY GENERAL.

COMMUNICATED TO THE SENATE, MARCH 29, 1820.

SIR: ATTORNEY GENERAL'S OFFICE.

I beg leave to call your attention to the state of this office, and to some material defects which, I think, exist in the laws in relation to it, with the view that the subject, if you shall think it of sufficient importance to merit this course, may be presented, through your committee, to the consideration of Congress before they rise.

The commission of the Attorney General "authorizes and empowers him to execute and fulfil *the duties of that office according to law.*" The only law which points out those duties is the act of Congress of the 24th of September, 1789, entitled "An act to establish the judicial courts of the United States," the thirty-fifth section of which act creates the office, and designates its duties in the following words: "And there shall be appointed a meet person, learned in the law, to act as Attorney General for the United States, who shall be sworn or affirmed to the faithful execution of his office; *whose duty it shall be* to prosecute and conduct all suits in the Supreme Court in which the United States shall be concerned, and to *give his advice and opinion upon questions of law, when requested by the President of the United States, or when requested by the heads of any of the Departments, touching any matters that may concern their Departments.*" It is to be observed that there is no duty which the President or any head of Department performs which does not involve some principle of law under the head either of the national or conventional law of nations, constitutional law, or municipal law; consequently, there is no duty which belongs to either of those officers on which he has not the right to require the opinion of the Attorney General, and on which it is not continually required; and, in relation at least to questions on municipal law, (which are incessantly occurring,) it is understood that the heads of Departments consider the advice of the law officer conclusive.

In the operations of an office whose sphere of action is so wide, and whose decisions are of such extensive and unremitting practical effect, it would seem to be of consequence to the nation that some degree of consistency and uniformity should prevail; but it is obvious that these can be attained in no other way than by putting the incumbent for the time being in full possession of all the official opinions and acts of his predecessors.

Under this impression, when I had the honor of receiving the appointment, my first inquiry was for the books containing the acts of advice and opinions of my predecessors. I was told there were none such. I asked for the documents belonging to the office, presuming that at least the statements of cases which had been submitted for the opinion of the law officer had been filed, and that I should find endorsed on them some note of their advice in each case; but my inquiries resulted in the discovery that there was not to be found, in connexion with this office, any trace of a pen indicating, in the slightest manner, any one act of advice or opinion which had been given by any one of my predecessors, from the first foundation of the Federal Government to the moment of my inquiry. Thus, the gentlemen who have held this office in succession, having no guide as to the past, have been in constant danger of being involved themselves, and involving the Departments which depended on their counsel, in perpetual collisions and inconsistencies, and exposing the Government to that kind of degradation which never fails to attend an unsteady and contradictory course.

In noticing the omission to keep these records, and preserve the statements and documents, I am very far from intending any censure on my predecessors, for no law had enjoined it on them as a duty; and from the multitude and variety of questions which are unavoidably pressing upon this office throughout the year, it is very apparent that the plan which I suggest could not have been executed without an expense in clerk hire, fuel, stationary, &c., for which there is no provision by law.

After this explanation, I submit it to you, sir, with great deference, whether it would not be expedient that some provision be made, by law, for keeping a record of the opinions and official correspondence of the Attorney General in his office, and for preserving in his office the documents submitted for his advice.

Again: the subjects on which the Attorney General is occasionally consulted, and those on which he has to act in the Supreme Court, turn not unfrequently on the local laws of the several States; but these have not been furnished to his office, and the omission is a serious practical evil. Would it not be well that the office of the Attorney General should be supplied with these laws?

Another defect seems to me to exist in the law as it now stands. You will observe that the only law which prescribes the duty of the Attorney General, and which I have already quoted, limits the obligation upon him, and consequently limits *his right to give official advice and opinions* to cases in which he shall be called upon *by the*

President, or by any of the Departments, touching any matters which may concern their Departments. But I am told (and, in my short experience, I have already found it true, in part) that the advice and opinion of the Attorney General, *in his official character*, are called for by the committees of Congress, standing and special, by all the district attorneys, collectors of customs, collectors of the public taxes, and marshals throughout the United States, by courts-martial (military and naval) wheresoever they may sit, &c. &c. If it be advisable to open the office of the Attorney General to applications of this kind, I submit it to you, sir, whether it would not be expedient to have it provided for by law—1st. That the several officers and public bodies which have been mentioned, instead of resting on the personal courtesy of the Attorney General, may be authorized to call for his opinion *as a matter of right;* and, 2dly, (which strikes me as being of equal, if not superior importance,) That the Attorney General himself may be justified in giving an *official opinion* in these cases; for in a Government of laws like ours, it seems to me of importance that the influence of every office should be confined within the strict limits prescribed for it by law. It cannot be questioned, from the connexion of the Attorney General with the executive branch of the Government, and his advice and opinions, *given as Attorney General*, will have an *official influence* beyond and independent of whatever intrinsic professional merit they may possess; and whether it be sound policy to permit this officer, or any other under the Government, even on the application of others, to extend the influence of his office beyond the pale of the law, and to cause it to be felt where the laws have not contemplated that it should be felt, is the point which I beg leave to submit to your consideration.

There is, however, a strong objection to any new provision which should go to open the office of the Attorney General, *as now organized*, to applications beyond the provision of the act of 1789. It is this: I am convinced that *no single, unassisted* individual, whatever may be his strength, his habits of industry, or the system and celerity of his movements, could discharge, in a manner satisfactory to himself or the nation, the vast load of duties which would be thus thrown upon him, without devoting himself to them *solely and exclusively*. The very frequent calls which are regularly and properly made upon his office under the act of 1789, and the careful and elaborate examination which it is often necessary to bestow upon these subjects, are found to be sufficient, in connexion with the Attorney General's duties in the Supreme Court, to give the office, at present, almost constant occupation; and if, in addition to these duties, he shall be placed under a legal obligation to answer all the other calls which have been mentioned, he must unavoidably abandon entirely the individual pursuits of his profession, and rest for the support of his family on the salary attached to the office. Even under the duties as they now exist, *very little time* is left to the Attorney General to aid the salary of his office by individual engagements—a fact which may explain, in part, the frequent resignations of this office which have heretofore occurred.

I would not have troubled you with these suggestions at this time, but that the subject strikes me as being of so much practical importance *to the nation* as to merit consideration, and that it relates to an office the defective organization of which, however grievous to the incumbent, or *injurious to the public*, would not be apt to force itself on the notice of others.

I have the honor to be, &c.

WM. WIRT.

The Hon. HUGH NELSON, *Chairman of the Judiciary Committee H. R. U. S.*

DEAR SIR: WASHINGTON, *March* 28, 1820.

I understand that the appropriation bill, as it passed the House of Representatives, is now before the Senate; and, not having observed who is the chairman of the committee to whom the subject will belong, I beg leave to call your attention to a change which has been made in the appropriation relative to the office of Attorney General.

In the year 1818, I addressed a letter to the chairman of the Judiciary Committee of the House of Representatives, relative to the state in which I had found the office of the Attorney General, and the causes that had produced it. Mr. Strother, of the House of Representatives, has now a copy of that letter, which you will please receive from him. This representation made it manifest that the public good required the appointment of a clerk to record those official opinions of the law officer of the Government by which the movements of the several Departments were regulated, in order to preserve consistency and harmony in the operations of the Government in execution of our laws, under every change of the public officers. A clerk was accordingly appointed, at a salary of $1,000 per annum; but as it was idle to appoint a clerk, and allow rooms for an office, without allowing also stationary, fuel, and a boy to attend to the menial duties of the office, a small contingent fund of $500 was allowed to procure these articles, the whole of which were strictly for the public good.

I understand that the House of Representatives have stricken off $200 from the salary of the clerk, and have stricken out also the whole of the $500 for contingencies; thus leaving a clerk, indeed, at a reduced salary, but not leaving *the means to employ him*, to wit, stationary, fuel, &c. The manifest injustice of requiring me to furnish these articles *for public use* will, I doubt not, produce a reinstatement of the allowance of the contingent fund, which, indeed, is scarcely adequate to its object; since, out of this allowance of $500, there are to be supplied fuel, stationary, a boy to attend to the menial duties of the office, carry messages, &c., and the printer's bills for all the statements required for the United States cases in the Supreme Court. You will learn, on inquiry, that the whole $500 will scarcely pay a messenger in any other office.

If you think the case worthy of attention, I would thank you to represent it to the chairman of the committee who have the subject under consideration, and to the Senate, if necessary.

Your friend and servant,

The Hon. NINIAN EDWARDS. WM. WIRT.

16th CONGRESS.] No. 490. [1st SESSION.

ADJUSTMENT OF THE BOUNDARY BETWEEN KENTUCKY AND TENNESSEE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 14, 1820.

The States of Kentucky and Tennessee, desirous of terminating the controversy which has so long subsisted between said States in relation to their common boundary, and of restoring the most perfect good understanding and

harmony between them, have for that purpose appointed their respective commissioners, that is to say: the State of Kentucky, on her part, has appointed John J. Crittenden and Robert Trimble; and the State of Tennessee, on her part, has appointed Felix Grundy and William L. Brown, who, after a reciprocal communication of their respective powers, have agreed upon the following articles and stipulations:

ARTICLE 1. The line of boundary and separation between the States of Kentucky and Tennessee shall be as follows, to wit: The line run by the Virginia commissioners in the years 1779 and 1780, commonly called Walker's line, as the same is reputed, understood, and acted upon by the said States, their respective officers and citizens, from the southeastern corner of Kentucky to the Tennessee river; thence with and up said river to the point where the line of Alexander and Munsell (run by them in the last year, under the authority of an act of the Legislature of Kentucky, entitled "An act to run the boundary line between this State and the State of Tennessee, west of the Tennessee river, approved February 8, 1819,") would cross said river; and thence, with the said line of Alexander and Munsell, to the termination thereof on the Mississippi river, below New Madrid.

ART. 2. It is agreed and understood that, from the point where Walker's line strikes the Tennessee river to the point where the line of Alexander and Munsell would cross the same, the said Tennessee river shall be the common boundary of said States, and subject to their common use and concurrent jurisdiction. Any island or islands in that part of the river Tennessee which forms the common boundary between the two States shall be within the exclusive jurisdiction of Kentucky; but any appropriations thereof by individuals, heretofore made under the laws of North Carolina or Tennessee, shall be valid.

ART. 3. Whenever the Governor of either State shall deem it expedient to have the boundary between the two States which is east of the Tennessee river, or any part thereof, run and plainly marked, he shall cause a notification thereof to be communicated to the Governor of the other State, and thereupon, with all convenient despatch, two surveyors shall be appointed for that purpose, one by the Governor of each State; and the surveyors so appointed shall have power to employ a competent number of chain-carriers and assistants, and they shall ascertain, survey, and mark said line plainly and durably, having due respect to the provisions of the first article hereof; and it shall be the duty of said surveyors to make out and sign duplicate plats and reports of their surveys and proceedings, to be communicated by each surveyor to the Governor of his respective State, to be deposited and preserved in the office of the Secretary of State, for a testimony and memorial of the boundary between said States; and all cost and expense that may be incurred under the provisions of this article, and in surveying and marking said boundary line, shall be paid by said States jointly and equally.

ART. 4. The claims to lands lying west of the Tennessee river and north of Alexander and Munsell's line, derived from North Carolina or Tennessee, shall be considered null and void; and claims to lands lying south of said line and west of Tennessee river, derived from Virginia or Kentucky, shall in like manner be considered null and void.

ART. 5. All lands now vacant and unappropriated by any person or persons claiming to hold under the State of North Carolina or Tennessee, east of the Tennessee river, and north of the parallel of latitude thirty-six degrees thirty minutes north, shall be the property of and subject to the disposition of the State of Kentucky; which State may make all laws necessary and proper for disposing of and granting said lands, or any part thereof, and may, by herself or officers, do any acts necessary and proper for carrying the foregoing provisions of this article into effect; and any grant or grants she may make therefor, or any part thereof, shall be received in evidence in all the courts of law and equity in the State of Tennessee, and be available to the party deriving title under the same; and the land referred to in this article shall not be subject to taxation by the State of Tennessee for five years, except so far as the same may, in the mean time, be appropriated by individuals.

ART. 6. Claims to lands east of the Tennessee river, between Walker's line and the latitude of thirty-six degrees thirty minutes north, derived from the State of Virginia in consideration of military services, shall not be prejudiced in any respect by the establishment of Walker's line; but such claims shall be considered as rightfully entered or granted, and the claimants may enter upon said lands, or assert their rights in the courts of justice, without prejudice by lapse of time, or from any statute of limitations for any period prior to the settlement of the boundary between the two States, saving, however, to the holders and occupants of conflicting claims (if any there be) the right of showing such entries or grants to be invalid and of no effect, or that they have paramount or superior titles to the land covered by such Virginia claims.

ART. 7. All private rights and interests of lands between Walker's line, from the Cumberland river, near the mouth of Oby's river, to the southeastern corner of Kentucky, at the point where the boundary line between Virginia and Kentucky intersects Walker's line on the Cumberland mountain, and the parallel of thirty-six degrees thirty minutes north latitude, heretofore derived from Virginia, North Carolina, Kentucky, or Tennessee, shall be considered as rightfully emanating from either of those States; and the States of Kentucky and Tennessee reserve to themselves, respectively, the power of carrying into grant claims not yet perfected; and in case of conflicting claims (if any there be) the validity of each claim shall be tested by the laws of the State from which it emanated, and the contest shall be decided as if each State, respectively, had possessed the jurisdiction and soil, and full power and right to authorize the location, survey, or grant, according to her own rules and regulations.

ART. 8. It is agreed that the foregoing articles shall receive the most liberal construction for effecting the objects contemplated; and should any disagreement arise as to the interpretation, or in the execution thereof, two citizens of the United States, but residents of neither Kentucky nor Tennessee, shall be selected, one by the Executive of each State, with power to choose an umpire in case of disagreement, whose decision shall be final on all points to them submitted.

ART. 9. Should any further legislative acts be requisite to effectuate the foregoing articles and stipulations, the faith of the two States is hereby pledged that they will unite in making such provisions and respectively pass such laws as may be necessary to carry the same into full and complete effect.

ART. 10. The foregoing articles and stipulations, if ratified by the Legislature of Kentucky during their present session, shall forever be obligatory and binding on both States, and take effect from this day.

In faith whereof, we, the respective commissioners, have signed these articles, and have hereunto affixed our seals. Done in duplicate, at Frankfort, the 2d day of February, 1820.

JOHN J. CRITTENDEN. [SEAL.]
ROBERT TRIMBLE. [SEAL.]
FELIX GRUNDY. [SEAL.]
WILLIAM L. BROWN. [SEAL.]

16th Congress.] No. 491. [1st Session.

ROADS CONTEMPLATED BY THE TREATY OF BROWNSTOWN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 12, 1820.

Mr. Woodbridge, from the committee appointed to inquire whether any, and, if any, what further provision may be necessary to give effect to the provisions of the treaty made at Brownstown, in the Territory of Michigan, reported:

That the treaty referred to was concluded on the 25th day of November, 1808, [see Indian Affairs, vol. 1, page 757,] and that its exclusive object appears to have been to obtain the establishment of a practicable and convenient road from the interior settlements of the United States to those of the Territory of Michigan.

Many of the tribes of Indians with whom that treaty was concluded were, in virtue of previous treaties, entitled to receive within that Territory large annuities; there never had been any artificial road leading to it, except through the province of Upper Canada; delays had consequently occurred in the transmission of those annuities, and reiterated complaints were made because they were not received; or, if received, frequently damaged. To obviate such difficulties, and in the expectation that many important advantages would result to them from a measure which promised to bring them more immediately under the observation and protection of the Government, the Indians, parties to the treaty, without any further remuneration than such incidental benefits as they anticipated from the establishment of the proposed road, voluntarily ceded to the United States a tract of land of one hundred and twenty feet in width, extending from the "foot of the rapids of the Miami of the Lake" to the western line of the "Connecticut Western Reserve," and all the land within one mile of said tract on each side of it; and, also, another tract of land of one hundred and twenty feet in width, extending from Lower Sandusky, southerly, to the boundary line established by the treaty of Greenville. This treaty is, in the body of it, declared to be reciprocally binding; but it is observable that no *new* obligation, of any nature, seems to have been imposed by it upon the United States, unless it may be fairly inferrible, from its context, its avowed object, and the circumstances attending its conclusion, that this Government became bound to establish and maintain the contemplated road.

The intention of the parties to the treaty your committee believe to be obvious; the history of the transaction, the repeated declarations of the Indian chiefs who were parties to it, and the sentiments of Mr. Jefferson, then President of the United States, and who directed the negotiation, as they are disclosed in his message to this House of the date of January 30, 1808, which accompanied a copy of the treaty of Detroit, [see Indian Affairs, vol. 1, page 752,] combined with the evidence furnished by the context of the treaty, indicate, conclusively, the establishment of a safe and convenient road as the sole object of the negotiation.

No measures, however, seem to have been adopted with a view to the attainment of that object until, by an act of Congress of the date of December 12, 1811, the President of the United States was authorized to appoint three commissioners to explore, survey, and mark the most eligible course for the proposed roads; and the sum of $6,000 was appropriated to defray the expenses of executing the law.

Before any progress, however, could be made in giving effect to the views of Congress, war existed between this nation and Great Britain; and, of that war, the firstfruits were the temporary loss of that entire province, to open an avenue to which was the object of the law referred to. The lamentable consequences which resulted from so humiliating an occurrence it is quite unnecessary to detail; it is sufficient to ask the attention of the House to the fact, that the barrier interposed by the northwestern posts having been broken down, the congregated force of the northern Indians was immediately felt along the whole interior and incurvated frontier of Ohio and Indiana. Such a state of things was not favorable to the purpose of exploring the country and establishing roads. The money which was appropriated for the purpose of giving effect to the treaty of Brownstown was soon lost in the immense aggregate of disbursements rendered necessary to enable the northwestern army under the command of General Harrison to advance: the greater part of the sum was expended in opening a road—of the first importance, certainly, for without it the northwestern army could have made no progress; but quite useless as it regards the permanent and paramount object contemplated by the treaty of Brownstown—that of obtaining a good road over the Black Swamp. Not a solitary traveller now finds his way along that avenue; it is principally indicated by the broken remnants of baggage-wagons and gun-carriages, scattered remains of flour barrels, and the mouldering skeletons of horses and oxen, remaining, as they were left, just visible above the surface of the mud and wet which destroyed them. The road being found thus entirely useless, the President was authorized by an act of Congress of April 16, 1816, to alter its location. It is believed that some progress has been made, through the War Department, in the selection of a better site for a road, but no progress has been made in opening it; and it seems to your committee quite impossible, by the aid only of the small and diminished military force of the Government at Detroit, to effect at any time so desirable a work.

Such had been the proceedings in reference to the treaty of Brownstown, and such the small progress made towards the accomplishment of its purpose, when, in September, 1817, the treaty of the Rapids of the Miami was concluded; by the subsequent ratification of which, the Indian title to the whole country within which the contemplated roads were to be located became vested in this Government.

It has not escaped the observation of your committee that this treaty may be considered to affect materially the relation in which the General Government previously stood in reference to the treaty of Brownstown; yet they have supposed that if the obligation imposed upon this Government by the last-mentioned treaty were an absolute one, if no election were given to the United States originally to make the roads contemplated and accept the cession, or, at their pleasure, to dissent from the grant and refuse to make and continue the roads, then the obligatory force of the treaty of Brownstown cannot justly be deemed to have ceased in consequence of the treaty of the 29th September, 1817; but that, in good faith, this Government is still bound to fulfil all its requisitions.

Without endeavoring, however, to arrive with technical precision at the only true construction of which these treaties may now be susceptible, your committee remain entirely satisfied that other considerations, founded in motives of the truest economy and the soundest policy, imperiously require the positive accomplishment of the views disclosed by the parties to the treaty of Brownstown.

The Black Swamp, so celebrated in the annals of our recent history, is an extensive morass, which winds round the southeastern border of Michigan; it terminates on the north at the border of Lake Erie, comprehending a width of about thirty miles; it extends so far southerly and southwesterly as to interrupt all communication by land between the settlements in Michigan and those of the interior of the United States. It consists of an elevated

basin of impervious clay, upon which rests a thick stratum of fertile black loam; there is so little inclination in its general surface that, though numerous streams pass through it, there is little opportunity for the water with which it is sometimes almost entirely covered to escape from it, except by the slow process of evaporation; while, at the same time, there exist unequivocal indications that its surface is elevated so far above the level of the watercourses and of the lake as that, by artificial drains, it may be made subservient to all the purposes of profitable agriculture.

No reliance, however, can be placed upon the individual industry of that country to construct a road over such a morass. The construction of a road must *precede* the establishment there of any considerable population.

The State of Ohio, within whose limits this morass is principally situated, if she possessed more ample funds than she does possess, could find no sufficient inducement to such an undertaking, for she has, comparatively, no inhabitants beyond it to protect; it forms the boundary of her population in that direction. Such a road must, therefore, be a national work. And, in addition to all those political considerations which so obviously and so powerfully dictate the construction throughout the Union of artificial roads and canals, there are others of local application, which, in the opinion of your committee, do imperiously call for the attention of the General Government to this particular section of the Union.

Such a road as is proposed would pass through a vast country of uncultivated land, the whole of which yet remains the exclusive property of the Government. Public lands are here considered a legitimate source of public revenue. To carry into effect the provisions of the treaty of Brownstown would not only bring into market the beautiful country which is beyond the Miami, with the certain prospect of better and more accelerated sales, but would induce the settlement of that country, now so repulsive in its aspect, which lies between the Sandusky and the Miami, over which the road would go; it would soon be reclaimed; the construction of the road itself would uncover a considerable portion of the adjacent land, and fit it, with little additional expense, for immediate cultivation.

Your committee feel that they hazard nothing in the proposition that, in a pecuniary point of view alone, this nation would soon find itself more than remunerated for the expense which might be incurred in the construction of the road, by the increased value of the public lands, and the accelerated sales it would induce.

There remains another and a distinct view of this subject, which your committee feel it a duty briefly to present. In examining the topic referred to them, your committee could not fail to consider it in regard to the military defences of the country.

The situation of the Territory of Michigan, in relation to the province of Upper Canada, renders that frontier, more than any other perhaps, peculiarly exposed; its settlements, rarely penetrating into the interior, in no place presenting a very dense population, extend along the meandering shores of the lakes and straits from Lake Erie to Lake Huron, and approach the very verge of the national boundary; they lie at the foot of that vast avenue which leads through Lakes Huron and Superior into the immense country of the northwest, and down which, with surprising facility, a formidable Indian force may at any time be brought upon them. In its rear, and intervening between it and the interior settlements of Ohio and Indiana, there still continues a numerous and powerful Indian population of many thousands, while its southeastern termination rests upon that formidable morass which so entirely separates that Territory from the strength and the power of this nation. So circumstanced, this prolonged line of settlement is opposed in front by the most thriving population of Upper Canada—a population increasing with a rapidity unprecedented in the annals of Canadian history, and which, whether its moral or physical character be considered, will hereafter be found more formidable, it is believed, than that of any other portion of either Canada.

Opposed by difficulties on all sides, and completely isolated, it would be unreasonable to suppose that the people of the Territory of Michigan, though influenced by the most devoted patriotism, could alone successfully resist so complicated a pressure as, in the event of a future war with Great Britain, may be brought to bear upon them. But, how much soever it concerns the honor of this nation to sustain its authority and to protect its people in every part of the empire, yet any consideration founded alone in the exposed condition of the inhabitants of Michigan becomes of diminished importance when the situation of that Territory is adverted to, as it has relation to the interior frontier of Ohio, Indiana, and even Illinois. It is on the peninsula of Michigan alone that the exposed parts of that frontier can be cheaply and securely defended against Indian or English hostile incursions. The military positions of Detroit, Fort Gratiot, and Michilimackinac, and their intervening and neighboring settlements, are, in relation to that greatly extended interior frontier, a perfectly effectual *redoubt*. No enemy can approach it, except the citizens of that remote country, and the authority of this nation there, be first prostrated in the dust.

Your committee do not deem it important to fortify the proposition which on this point they advance by any train of deductions; they only beg leave to advert to two distinct periods in the history of that country, feeling entirely satisfied that an allusion to them, in connexion with the subject of this report, will be found to justify any practicable measures which may tend to increase the effective strength of the Territory, or render more safe and practicable its communication with the interior of the Union.

In all that period which intervened between the treaty of peace of 1783 and the surrender to this Government of the northwestern posts, and while the Territory of Michigan was in the possession of a Power either hostile or indifferent to the peace of this country, it is matter of history that the western settlements were in a state of continued warfare; from the heights of the Allegany to Natchez, its whole line of frontier was marked by blood and fire. But when the authority of this Government was established there, Indian hostility was neutralized; and, under the cover of profound peace, the western country grew rapidly. Held in check by the barrier which the possession of the settled parts of Michigan enabled this nation to interpose against the English and the Indians of the northwest, the Indians of the peninsula of Michigan and of the northern part of Ohio were deterred, during the early part of the late war, from acts of hostility; but when the authority of this nation was prostrated there, distress and dismay pervaded the whole defenceless line of the most advanced settlements, from Cleveland, on Lake Erie, through Ohio and Indiana. But when again, before the conclusion of the war, this Government had, at an almost infinite expense of money, and by a sacrifice of blood which was above price, reoccupied those positions from which it had been driven, the scene of war was again removed, and the battles of Ohio, Indiana, and Illinois were fought on the borders of Michigan.

The inference your committee would deduce from the historical facts alluded to is, they flatter themselves, manifest. It consists, unquestionably, with the true policy of this Government to throw into the peninsula of Michigan, by every practicable means, a dense population; and it is more especially their true policy to construct over the Black Swamp a permanent, safe, and convenient public road. Such a measure is dictated by good faith; for there can be no doubt but that the measure was contemplated by the parties to the treaty of Brownstown. It is dictated by a wise regard to national economy; for the contemplated road would open an avenue to a fertile and beautiful country—the peninsula of Michigan—a country the soil within which is almost exclusively the property of the nation. It would conduce greatly, too, to the settlement of the intermediate country, which is also the exclusive property of the nation, and the settlement of which must, almost of necessity, be preceded by some extraordinary effort of the National Government. But such a measure is not less imperiously called for as an almost indispensable measure of defence. The prodigious sums of money which were expended in the efforts which the nation made

to reoccupy that Territory would have constructed many such roads—efforts which could never have been called for; for if, in the spirit of the treaty of Brownstown, good roads had, previously to the war, been constructed, if a convenient and practicable communication between Ohio and Michigan had existed, this nation would have been spared the humiliation of witnessing a disgraceful capitulation, and that devoted people would have been saved from the indescribable horrors of Indian devastation.

Every view which your committee have been able to take of the subject referred to them having confirmed them in the very decided opinion to which they have arrived, that a public road ought to be constructed from the Miami to the western line of the Connecticut Western Reserve, it remains for them respectfully to submit their opinion as to the best means by which that desirable object may be effected. They have not been regardless of the diminished amount of the public revenues; they are aware of the strong desire entertained by the House to limit the public expenditures to the smallest practicable sum; and it is with much satisfaction, therefore, that they feel themselves justified in recommending an expedient which they think will be adequate to the exigency, without any specific appropriation of money.

On reference to the stipulations contained in the treaty of Brownstown, it is observable that a mile in width on each side of the contemplated road from the Miami to the Western Reserve is granted, as well as the site for the road itself, to the United States. It seems probable that the framers of that treaty had in view, at the time of the negotiation, the application of the whole of the ceded land, specifically, to the purpose of defraying the expense of making the road. From the best information which your committee have been able to obtain, they entertain the belief that this tract would furnish a fund more than adequate to the exigency, and that no more appropriate application could be made of the land in question.

They, therefore, respectfully recommend the adoption of the following resolution, viz:

Resolved, That the Committee on Roads and Canals be instructed to bring in a bill to authorize the Secretary of the Treasury to contract with any person or persons to construct a permanent and suitable road, to extend from the foot of the rapids of the Miami of the Lake to the western line of the Connecticut Western Reserve, according to the plan contemplated by the treaty of Brownstown, and on such route, passing through the reserve (so called) at Lower Sandusky, as the President may direct, in consideration of the whole of the tracts on each side of the contemplated road which were granted by the treaty of Brownstown, or so much thereof as, in the opinion of the Secretary of the Treasury, may be adequate to the object; and in which bill shall also be inserted, among other things, a provision or provisions that the person or persons so contracted with do complete the said road within a reasonable time, in said bill to be limited; that such person or persons do stipulate to keep said road in good repair for and during a number of years, to be in said bill defined; and also that the person or persons so contracted with do also give bond, with sufficient sureties, for the faithful performance of his or their contract; and also a provision defining a time and manner in which the title to said lands may be conveyed.

All which, together with the documents Nos. 1, 2, 3, and 4, which accompany this report, and which they pray may be taken as part of it, is respectfully submitted.

No. 1.

Whereas a grant of land was made by certain tribes of Indians, at a treaty held at Brownstown, in the Territory of Michigan, on the 25th of November, 1808, for locating a road from the foot of the rapids of the Miami of the Lake to the western line of the Connecticut Reserve; and a road to run southwardly from Lower Sandusky to the boundary line established by the treaty of Greenville: and whereas the sum of six thousand dollars was appropriated by an act of Congress passed December 12, 1811, for the purposes of defraying the expenses of exploring, surveying, and opening the same, which has not been expended agreeably to the provisions of the said act, but from some cause has been turned over to some other appropriation, or yet remains unexpended in the treasury of the United States: therefore,

Resolved by the General Assembly of the State of Ohio, That our Senators and Representatives in Congress be requested to use their influence to have the sum aforesaid laid out on one or both of the before-mentioned roads, as they may think will be most advantageous to the interests of the State, and consistent with the original appropriation.

Resolved, That the Governor of this State be requested to forward one copy of the foregoing preamble and resolution to each of our Senators and Representatives in Congress, and one copy to the Delegate from the Territory of Michigan.

JOSEPH RICHARDSON,
Speaker of the House of Representatives.
ALLEN TRIMBLE,
Speaker of the Senate.

FEBRUARY 22, 1820.

SECRETARY OF STATE'S OFFICE, COLUMBUS, OHIO, *February* 25, 1820.

I certify the foregoing to be a correct copy of the original roll, remaining on file in this office.

JOHN McLENE, *Secretary of State.*

No. 2.

SIR: WASHINGTON CITY, *March* 31, 1820.

In reply to your inquiries relating to the application of certain moneys appropriated to lay out and make certain roads contemplated by the treaty of Brownstown, I have to make the following statement:

On the 27th of August, 1812, Mr. Secretary Gallatin wrote me (then Governor of Ohio) on the subject of that road. A copy of his letter is herewith enclosed, to which I replied, stating to him the only course I could pursue in making the road preparatory to the march of the northwestern army under General Harrison. As it was a state of war, and the road to Sandusky altogether through the Indian country, no contract could be made for opening the road. I ordered out a company of frontier militia, who opened the road, thus coupling the defence of the frontiers with the making of the road: this was done in the autumn of 1812. In January, I received from the treasury of the United States $5,500, of which I expended on the road $4,922 14, before the march of the army alluded to. Having many occasions for disbursing moneys on account of war operations, the residue of the $5,500 was applied to various services, and for which I am accountable to the United States.

I am, very respectfully, your most obedient servant,

R. J. MEIGS, JUN.

JOSEPH NOURSE, Esq., *Register of the Treasury.*

No. 3.

Extract of a letter from Governor Lewis Cass and General Duncan McArthur to the Secretary of War, dated

Miami Rapids, *November* 29, 1817.

It is well known that along the southern margin of this part of Lake Erie is a tract of wet land which always presents serious difficulties to the traveller, and frequently insurmountable obstacles.

From Fort Meigs, for many miles towards Urbana, and nearly the whole distance to Lower Sandusky, it becomes a morass known by the name of the Black Swamp. To reach the Territory of Michigan from any part of the settlements of the State of Ohio, by land, this swamp must be crossed.

No description can convey to a person who is unacquainted with it an adequate idea of the difficulties to be surmounted before a tolerable road can be formed through this country. Little is hazarded in saying that individual enterprise, or the operation of ordinary causes, will not accomplish it for a period which the rapid improvement of the United States, generally, would leave without a parallel. But the country from the extremities of this swamp, northward to Detroit, and southward and eastward to the settlements in Ohio, is level and wet, and a good road through it, to be made at all, must be made at the national expense.

The events of the late war with Great Britain upon this frontier must have satisfied every reflecting person that a good road, at the commencement of that war, passing from the interior of Ohio to Detroit, would have saved to the nation the expenditure of immense sums of money, and would have rendered the reduction of that place at any time easy, and its tenure secure. The supplies of provisions and the munitions of war necessary to the operations of the army upon this frontier were transported at an enormous expense of time and treasure, and the principal obstacles opposed to those operations resulted from the nature of the country, and from its difficulty of access. This tract of country, in its present situation, renders the Territory of Michigan an insulated point upon the map of the nation. Its approach by water is uncertain, temporary, and, for many important purposes, inconvenient. By land it is difficult, tedious, and expensive. In any future war, its means of defence must be derived from the same States which were called upon to furnish them during the past. It is desirable, therefore, that the difficulties which were then experienced should be removed, and that the possession of a good road should enable the General Government at any time to throw into the country a force which would render it safe and secure: such a road would remove the barriers which nature has interposed, and would, in effect, approximate this country to the western portion of the Union, and, connected with the natural advantages it possesses, would insure it a speedy settlement, and an active and enterprising population.

But a road from the interior of Ohio to the lake only would not answer this important purpose. Lake Erie may once more become the theatre of desperate exertion and skill: enterprise and courage may not again be rewarded with victory. But were our naval superiority upon this lake beyond the reach of accident, it should be still recollected that its navigation is more hazardous than that of the ocean, and for a considerable portion of the year closed or impeded by the ice.

It is precisely at this season, with the exception of a short time in the middle of the winter, that the communication by land is most difficult; and the obstacles which are then interposed to traversing the country in any direction are serious and dangerous.

Should circumstances destroy our naval superiority upon the upper lakes, our communication with Detroit and its dependant settlements could be preserved by land only, and our possession of the country would, in a great degree, depend upon the facilities which the roads might offer to the march of troops, and to the transportation of their munitions of war, baggage, and provisions. It is to be hoped that such an occurrence is remote; but the possibility of its happening, and its disastrous consequences should we be found unprepared, furnish powerful motives to provide, as far as human wisdom can do, for the event.

By completing a road from Sandusky to Detroit, considerable progress would be made towards opening a great national communication from the capital to one of the extremities of the Union. The western turnpike from Cumberland to the Ohio, terminating at Wheeling, would leave only the portion of road between that place and Sandusky to be made. Future enterprise and industry, either individual or national, might complete the work, and it would equally promote the varied intercourse of peace and the important operations of war.

This view is prospective; but the time cannot be remote when the policy of connecting the different parts of this vast republic by great permanent roads will be felt and acknowledged; when such a policy shall banish local jealousies and discordant interests, shall furnish new and increased facilities for private industry, and shall add strength and wealth to the resources of the nation.

Forts and military positions along a remote and exposed frontier will furnish little protection unless the communication to it is rendered easy and expeditious. A great leading road, such as the nature of this country requires, and the public good demands, would add more to its permanent security than any other defensive measure which could be adopted.

But there are considerations connected with the necessity of such a road in consequence of the nature of the country, of its importance to the nation for the preservation of a weak and important frontier, and of the improbability that such a road will ever be made unless some portion of the general resources are directed to this object. But, viewed exclusively as a subject affecting the revenue, there can be no doubt but its operation would be favorable.

From the settlements in Ohio to Detroit, nearly the whole country is the property of the United States. Every consideration, either of a fiscal or political nature, demands the immediate sale and settlement of this land, and every measure is important which will facilitate the acquisition of either object. Among these measures the most obvious in itself (and most certain in its result) is the opening of a leading road. In any country this would be important; in this country it is absolutely necessary. Sales will only be made with a view to settlements, and settlement will be aided and encouraged by making roads where the population of the country will long be unable to make them.

There is little difficulty in proposing a plan which would accomplish this object, and, in all probability, increase the actual receipts at the Treasury after the expenditures which may be necessary in effecting it.

Previous to the sale of the public lands, were the site of a permanent well-made road located from the line of the tract recently purchased of the Indians to Detroit, and were the national faith pledged for its completion within a reasonable period, the competition excited among the purchasers to procure the land in the vicinity of this road would add greatly to its value. Any estimate upon this subject must be loose and conjectural; but when it is considered that this road would pass through lands the property of the United States for at least one hundred and fifty miles, a great part of which is fertile and susceptible of compact settlements, and much of which is equal to any land in Ohio, it cannot be doubted but it will enter the market with every prospect of obtaining a price far exceeding that fixed by law. It would not be necessary, in order to secure the desired object, that the work should be actually commenced; every purpose would be answered by determining the site of the road, and delaying its completion till sufficient funds for that purpose were received from the sale of the land.

We have travelled out of the proper object of our mission in bringing this subject to the attention of the Government, but we trust our excuse will be found in its vital importance to this section of our country, and in the consideration that, if the present opportunity passes away without producing any favorable result, we may consider as hopeless every effort to attain it.

Considered as the means of increasing the national strength, and of securing the possession of an important frontier, we are aware that it has no exclusive claim to the attention of the General Government; every section of the Union has an equal right to urge its claims. But there is probably none in which the expenditure of an equal amount would be productive of more important consequences; and certainly there is none which is weaker in itself, or more difficult, from its position, to be defended.

But when it is recollected that this whole road, from the line of the purchase, was made upon the frontier settlements of Ohio to the Detroit river, and will pass through a country the property of the United States, except one Indian reservation, and a few tracts which have been sold or granted at Lower Sandusky, Fort Meigs, and the river Raisin, the effect of such a road upon the sale of the land is a fair object of inquiry; and, if it is believed that the receipts from the sales will be increased by it, or even if such a result is doubtful, the importance and necessity of the measure, connected with other considerations, may fairly justify its adoption.

No. 4.

Extract of a letter addressed to the President, in the winter of 1818–'19, *by the Secretary of Michigan.*

The alleged intention of the Government to diminish the force at the military post at Detroit would seem to imply that the importance of that position is not justly appreciated.

If it be a correct proposition that, in respect to all permanent military arrangements, foreign people are to be considered in the character of *belligerants*, then I think that position, in point of importance, inferior to very few.

It juts far into the enemy's country, commanding the roads which, running parallel with the Thames, or the shore of Lake Erie, little diverging, pass through the rapidly increasing settlements of that part of the province of Upper Canada which extends from the head of Lake Ontario, and subjects the greater part of those settlements to the control of a large force at Detroit. The topography of that country, while it furnishes great facilities for the rapid advance of an American force through it, protects remarkably its retreat.

As a position opposed to an enemy's acting *offensively*, Detroit, in relation to the country opposite, is a *tête du pont*. All the principal roads of the British country, above the lower extremity of Lake Erie, lead to and terminate at or near the settlement of Sandwich; the position at Detroit commands them.

A large force here, also, will always keep in check the Indian tribes which inhabit the *peninsula* of Michigan, and, combined with other means, if it do not make them allies, will at least neutralize their hostility.

On this peninsula there must be full one thousand Indian warriors. Mr. Crooks, Dr. Turner, and other gentlemen, estimate them to be more numerous.

The routes by which these Indians ordinarily, and almost necessarily, communicate with the British, are up the river St. Joseph of Lake Michigan, and down the Huron to the mouth of the Detroit; and, from the northern extremity of it, past the south extreme of Saginaw bay, to the heads of river Rouge, and over to the Huron, coming in at the same point, opposite Malden: a large military force here, consequently, cuts off this communication.

This position, combined with that of Fort Gratiot, commands the straits of St. Clair and Detroit, and not only secures the upper country against the influence of a British naval superiority on Lake Erie, but secures, also, the safety of that avenue through which supplies to the upper posts must, of necessity, pass; for it is firmly believed that, without almost infinite hazard and expense, they cannot pass up the waters of the Mississippi. From Indiana to Chicago they cannot go; for through the intervening wilderness and swamps not even an Indian footpath has been explored; nor, without imminent danger, can they be passed from Fort Wayne; for, Detroit in possession of the enemy, the whole peninsula, being a wilderness, would be an enemy's country.

As a point from which to invade the upper province of Canada, Detroit is then of importance; but, as a shield of defence for the uncovered frontier of Ohio and Indiana, as the only pledge of security for the upper posts, and as a security against Indian hostility, its importance must be manifest.

Yet, without a strong military force, this important barrier may, at any time, be taken by a *coup de main*. Its inhabitants, as yet not probably exceeding about eight thousand, are located in one extended and incurvated line from Lake Huron to Lake Erie, not presenting at any point a very compact settlement. They have in their rear the Indians of the peninsula; on the one flank, a dreary extent of lake and wilderness; on the other, an impervious morass, cutting them off from the population of Ohio; while, in front, good and practicable roads lead to them, up which the concentrating force of the enemy may at any time be brought to bear upon them. How inadequate, therefore, is the country to the object of its own protection! If the Government had not heretofore closed the doors of the country against a greater influx of inhabitants, its situation would be less precarious. Since 1807 the Indian title over a very considerable portion of the country has been extinguished, but, until about the close of 1818, none of it has been brought into market.

To the advantages indicated by this view of the subject, of locating a considerable military force near Detroit, is to be superadded the important one of protecting emigrants now coming in, and for the first time penetrating into the back country, from the individual acts of hostility of wandering Indians. Such occasional acts of hostility are to be expected; they will be excited by interruptions upon their hunting grounds. And still further is to be added the advantage of giving effect to the project of making a road through the Black Swamp. This is a work which, without the national aid, will hardly be effected in very many years. The country between Fort Meigs and Sandusky cannot be settled until the swamp be drained; consequently, individual labor upon the road cannot be relied upon. The State of Ohio can hardly be expected to accomplish it; for, beyond that point, she has no citizens to protect; it forms her boundary in that direction. It must, therefore, be a national work; a work which, had it been effected before the late war, would have saved not only the degradation of a capitulated army, but also many millions of money.

It is very certain that a perfectly good military road may be made over this morass; it is equally certain that the greater part of it may be made capable of producing abundant crops. The very act of making a durable road over it will fit a considerable part of it for cultivation. The deep ditches which should be on each side of the road, leading into the many streams which would intersect that road, would drain a very considerable part of the land bordering it. This swamp is in general sufficiently elevated, consisting of a basin of hard clay, upon which is bedded a thick stratum of the most fertile black loam. The currents of the frequent streams which pass through it are rapid, and the height of their banks indicates that the general surface is not much depressed.

If the object of securing, by means of such a road, to the post of Detroit its military supplies, could be combined with that of inducing the settlement of the intermediate country, the advantage is surely worthy of notice, as it regards either the military or the fiscal concerns of the nation.

16th Congress.] No. 492. [1st Session.

FEES TAXED IN THE SEVERAL COURTS OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FROM TIME TO TIME, DURING THE FIRST SESSION OF THE SIXTEENTH CONGRESS.

IN THE HOUSE OF REPRESENTATIVES, *February* 22, 1819.

On motion by Mr. WHITMAN, *Resolved*, That the judges of the courts of the several districts of the United States be requested to prepare and transmit to the Speaker of the House of Representatives, as early as may be at the next session of Congress, a schedule of fees of office proper to be allowed and taxed for the officers of their courts, respectively, and that the Clerk of this House cause each of said judges to be furnished with a copy of this resolution.

DISTRICT OF MAINE.

SIR: PORTLAND, MAINE, *December*, 1819.

I transmit a schedule of fees of office proper to be allowed and taxed for the officers of the district court for the Maine district, pursuant to a resolution of the House of Representatives of the 22d of February last.

I have the honor to be, sir, &c.

ALBION K. PARRIS,
United States District Judge for Maine district.

The SPEAKER *of the House of Representatives of the United States.*

I have the honor to submit to you the annexed table or rule by which fees are taxed for the district attorney of the United States in the courts of the United States for the Maine district. In submitting this table or rule, permit me to suggest that I consider *the fees sufficiently liberal, applied as they are to all cases, without discrimination*, where the nature of the case admits it: for if, *where the amount* in controversy is *small*, the *fees* appear *too liberal*, in *cases of magnitude*, involving much labor and responsibility, the compensation is *totally inadequate.*

With great respect,

W. P. PREBLE.

Hon. Judge PARRIS.

Table or rule by which fees are taxed for the district attorney of the United States for the Maine district in the district court of Maine.

For drawing and filing in court a libel, information, indictment, claim, or answer, -	$6 00
Drawing and filing interrogatories, -	5 00
Actual travel, out and home, to attend court in any cause, for every ten miles, - -	33
Actual attendance at court in any one cause, for each day, - - - -	33
Drawing a writ and declaration, including writs of summons for defendants, - -	3
For all other services in any one cause, -	6

W. P. PREBLE,
U. S. Attorney for Maine district.

PORTLAND, *October* 1, 1819.

The following statement of fees taxed by the clerk of said district court is respectfully submitted, viz:

For blank writ and summons, - -	80
Entry of suit, &c., viz: including entry for trial, appearance, proclamation, and default, filing pleas, motions, verdict, and other papers in the case, and entering the judgments and orders of court thereon, and recording the case at large in the records of court, - - -	5 00
Each subpœna, - - - -	15
Entering continuance of suit, - -	30
Warrant, citation, capias, monition, or other precept, - - - -	1 00
Warrant of appraisement, and entry of same, and return thereof, - - -	1 50
Original execution, - - -	1 00
Alias, or subsequent execution, - -	75
Opening and certifying a deposition, - -	15
For entry and record of a copyright, -	$0 60
Certified copy of same, - - -	60
All certified copies, per page of ninety words, -	10
Examining a witness and drawing a deposition, per page, - - - -	15
Certifying any exhibit or paper, or for affixing the seal thereto, - - - -	25
Swearing each witness in admiralty causes, -	10
Filing each paper in same, - -	6
Drawing final decree,* - - -	1 50
Taxing, examining costs, and copy thereof,* -	30
And one-half of one per centum on money deposited in court.	

JOHN MUSSEY, JUN., *Clerk.*

To the Hon. ALBION K. PARRIS,
Judge of the United States district court for Maine district.

Fees charged by Thomas G. Thornton, Marshal of Maine.

For service of writs and warrants, for each named, summoned, or attached, - - -	2 00
From the place of service to the place of trial, or place named in the precept, per mile, -	5
For service of subpœna, - - -	50
From the place of service to the court, or place of examination named, per mile, - -	5
For collecting and paying over moneys by virtue of executions, on one hundred dollars, -	4 00
Do., on the next hundred dollars, - -	2 00
Do., on any sum above two hundred dollars, one per cent.	
To return the execution the distance from the residence of the debtor to the court to which the execution is to be returned, per mile, -	5
For advertising in newspapers and posting at or near the place of trial notices of the time and place of trial of libels and informations, and returning the monition to court, not more than	10 00
Proclamation in court of condemned vessels or goods, - - - - -	30
For advertising in newspapers sale of condemned goods, vessels, or merchandise, - -	5 00
Commission on amount of sales, (except of prizes captured by privateers in time of war,) on five hundred dollars or any less sum, two and one-half per cent.	
Commission on any sum over five hundred dollars, one and a quarter per cent.	

*Where the decree or bill of costs is unusually lengthy, a proportionate addition therefor is made.

Travel to return warrant of sale and money into court, per mile, - - - $0 05
For service of the warrant of sale, - - 2 00
For service of venire to draw jurymen, and return the same into court, - - - 2 00
For all services not provided for by the laws of the United States or the laws of Massachusetts, such sums are charged as are considered equitable and just by the judge of the court.

All of which is respectfully submitted.

T. G. THORNTON,
Marshal of Maine.

Hon. A. K. PARRIS,
Judge of the United States district court, Maine.

DISTRICT OF VERMONT.

SIR: WILLIAMSTOWN, *January* 8, 1820.

In pursuance of the resolution of the House of Representatives of February 22, 1819, I have the honor to transmit to you, herewith, a schedule of the fees which I have thought proper to be allowed and taxed for the officers of the United States courts in this district.

In complying with the resolution, I have thought that I could not do better than to bring into one compact view the fees now allowed those officers by various laws, and to suggest such alterations as I thought would be proper.

I hope the course I have pursued will be viewed in the same light by the House of Representatives.

I have the honor to be, very respectfully, your obedient servant,

ELIJAH PAINE,
Judge of the Vermont District.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

Table of fees and emoluments of the marshals, district attorneys, clerks, and other officers of the district and circuit courts of the United States of America within the Vermont district, established by and according to law.

TO THE MARSHAL.

For serving every writ, warrant, attachment, or process issuing out of any of the courts of the United States, - - - $2 00
And in case there be more than one, two dollars for every additional person named therein; and for travel out in serving the same, five cents per mile from the place of service to the court where the writ, &c. is ordered to be returned, computing travel from the residence of the person most remote, adding thereto the travel that may be necessary for serving on the other person or persons named in said writ, &c.
For summoning witnesses and appraisers, each, - 50
And for travel out five cents per mile, in the same manner as in the case of serving writs on two or more persons.
For every commitment or discharge of a prisoner, 50
For every proclamation in the admiralty.
For sales of ships or vessels, or other property, condemned in the admiralty side of the district court, or in the circuit court, and for receiving and paying the money into court, for any sum under $500, 2½ per centum; and for any larger sum, 1¼ per centum upon the excess.
For summoning each grand or other jury, - 4 00
Provided that in no case shall the fees for summoning jurors to any one court exceed - 50 00
For attending circuit court, per day, - - 5 00
For attending district court, per day, - 4 00
For attending district court, per day, when it has the powers and cognizance of a circuit court, - 5 00
In Vermont the district court has not such powers and cognizance.
For travel from his place of abode to either of said courts, per mile, - - - 10
For advertising notice upon monition issued out of the admiralty side of the district court, at the discretion of the court, not exceeding - 10 00
For travel to serve any other writ or process issuing out of the same court, computing from the place of return to the most remote place of service, per mile, - - - 5
For advertising notice of sale to be made by virtue of a venditioni exponas, the actual expense thereof, if allowed by the court.
For taking bail bond for each defendant or debtor, $0 50
For summoning appraisers to appraise real estate levied upon by execution, for each appraiser, - 50
For travel, per mile, to summon such appraisers, computing from the most remote to the place where the appraisers are to serve, - - 5
For attendance on such appraisers, per day, - 34
For all services not herein enumerated, such fees and compensation as are allowed in the supreme court of the State of Vermont, where such services are rendered.
For attendance upon grand and other juries, each, per day, - - - - 2 00
For salary, - - - 200 00

CRIER'S FEES.

For each day's attendance at court, - - 2 00

TO THE DISTRICT ATTORNEY.

For drawing every indictment or information, - 1 00
And if more than one count, such sum as shall be allowed by the courts, respectively.
For term fee in each cause or action, for every term, - - - - 2 00
For attorney's fee in each cause tried, not exceeding - - - - 5 00
For attorney's fee on each motion to chancer any penal bond, motion in arrest, or for new trial, 2 50
For copy of any indictment or information, such sum as shall be allowed by the court.
For drawing interrogatories, - - 5 00
For drawing and exhibiting libel, claim, or answer, or for drawing an information, and exhibiting the same, - - - - 6 00
For all other services in any one case, - 6 00
For each day's necessary attendance on the business of the United States during the sessions of the district or circuit courts, - - 5 00
For travelling from the place of his abode to either of said courts, per mile, - - 10
For his salary, - - - 200 00
For drawing declaration on note, - - 47
For *all other writs, [meaning declarations,] such sum as shall be allowed by the courts, according to their length and difficulty.

TO THE CLERK.

For each writ or mesne process, or subpœna, with the seal of the court affixed, - - 50
For each venire facias for grand or petit juries, for each juror ordered to be summoned one-sixth part of a dollar, adding thereto one-third part of that one-sixth part for each juror.

* It would seem difficult to fix, by law, the exact compensation to the district attorney for drawing all writs, as their length would be very variant, and it is supposed this compensation might with propriety be left to the discretion of the courts.

For travelling from the place of his abode to either of the said courts, per mile, - -	$0 10
For attending either of said courts, per day, -	5 00
For entering each action or prosecution, on the law side, - - - - -	67
For entering each action or prosecution in chancery, - - - - -	1 00
For entering each continuance, - -	21
For entering each discontinuance, - -	34
For entering judgment on an abatement, nonsuit, default, or confession, - - -	34
For entering judgment on demurrer or after verdict, - - - - -	1 34
For drawing and filing bond for plaintiff to prosecute his suit against defendant, - -	50
For recording any judgment in law, or decree in chancery, for every hundred words, -	10
For filing each necessary paper, - -	8
For entering every rule or order of court, -	12
For entering appeal in the district court, -	50
For each writ of execution, with the seal affixed,	58
For each capias or warrant, - - -	1 58
For each habeas corpus, - - - -	1 58
For recording each execution, and officer's return thereon where the same has been levied and extended on real estate, - -	1 34
For affixing the seal of the court to every necessary paper, each, - - - -	25
For each certificate, or any paper filed in court,	22
For filing and safe keeping each affidavit filed in court, - - - - -	75
For taking recognisance in court, for each person recognised, - - - - -	25
For copy of any paper, either on the law or chancery side of the court, for every hundred words,	10
For all copies, and other services, made or done by direction of the court, and not hereinbefore enumerated, such sum or sums as shall be allowed by the courts, respectively, according to their length and difficulty.	
For all moneys deposited in court, one-half of one per centum.	
For swearing each counsellor admitted by the court, recording the same, and issuing copy of the record under seal of the court, -	3 00
For recording each title-page of a book, map, or a chart, - - - - -	60
For copy of the record of the same, and affixing the seal of the court, - - -	60

CLERK'S FEES IN ADMIRALTY.

For drawing every stipulation, process, monition, or subpœna, for every ninety words, -	15
For engrossing each sheet of ninety words, -	10
For entering return of process.	
For filing every libel, claim, pleading, or other paper, - - - - -	6
For copies of the pleadings, interrogatories, depositions, and exhibits, when required, for every ninety words, - - -	10
For entering each proclamation, - -	15
For entering each default, - -	12
For entering every rule of court, - -	15
For examining each witness and drawing his deposition, for every ninety words, - -	15
For certifying each exhibit or writing shown to a witness at his examination, - - -	25
For drawing every decree or decretal order, for every ninety words, - - -	15
For entering the same in the minutes, for every ninety words, - - -	10
For drawing a record, or making a copy of the proceedings, for every ninety words, -	15
For entering a record in the register, or engrossing or copying proceedings or records to be sealed or exemplified, for every ninety words,	10
For every certificate, - - -	20
For entering return of appraisement on sales, for every ninety words, - - -	$0 10
For affixing the seal to any paper, when required,	25
For drawing commission to examine witnesses, for every ninety words, - -	15
And for engrossing the same, if on parchment, including the parchment, - -	20
And, if on paper, for every ninety words, -	10
For swearing each witness in court, - -	10
For every entry or writing not mentioned or described, such allowance shall be taxed as for similar services herein mentioned.	
For all money deposited in court, one-half of one per centum.	

The judge of the Vermont district believes the foregoing table of fees would give a proper and adequate compensation to the several officers if the following alterations were made, which he respectfully takes leave to suggest:

The fee to the attorney for each cause tried is evidently too small; it is therefore proposed that it be $10 instead of $5.	
The fee to the clerk for filing and safe keeping each affidavit is too great, and it is proposed that it should be reduced to 50 cents, instead of 75 cents.	
In some of the States the proceedings in a cause at law, with the judgment, are enrolled by the counsel, and no other record is made of it. In Vermont this is not done; but the clerk makes up what is here called a record of the cause, and it is a work of considerable labor. It is proposed that he should, for making up the record of a cause in law, receive a fee of 10 cents for every hundred words.	
It is thought reasonable that the clerk should, for entering each motion for a new trial, or in arrest of judgment, receive a fee of - -	50
Entering judgment on the same, - -	40
Upon a motion to chancer a penal bond, -	1 34
Upon a motion to redeem mortgaged premises, -	1 34
For recording every certificate which it is the duty of the clerk to record, - -	25
One-half of one per centum is too small a compensation for receiving, giving, and taking receipts and other vouchers, and paying out the moneys deposited in court, as the sums paid are generally small. It is believed that one per centum would be a more adequate compensation; and it is the fee allowed the clerks of the State courts.	
There are some services to be performed by the clerk for which it is difficult to fix an exact and adequate compensation, and it would seem in some measure necessary to leave it in the discretion of the court to allow the compensation for them; such as	
Drawing commissions to take testimony;	
To take accounts between parties;	
To appraise betterments;	
Rules of reference;	
And appointing auditors, and perhaps some other services.	
These papers and others of a like kind will vary much in length, according to the nature of the case and wishes of the parties.	

The district judge thinks it his duty to remark that the compensation of the clerk afforded a pretty good living during the time the embargo and non-intercourse laws were in force, and during the time the laws raising an internal revenue were in force, as the business in the courts in this district was much increased during that time. But, since the repeal of those laws, the whole compensation to the clerk has not annually amounted to more than three hundred dollars.

DISTRICT OF NEW YORK.

SIR: KINDERHOOK, *January* 27, 1820.

With a view to comply with the resolution of the House of Representatives of the 22d of February last, enclosed to me by you under date of the 10th of March, I requested Mr. Graham and Mr. Slosson, two professional gentlemen of respectability, who have done much business in the district court, and are familiar with the practice, to prepare a fee bill proper to be adopted by the court. I now enclose you the result of their labors, which has just been received. I perceive they have not taken into consideration the fees proper to be allowed to the marshal and clerk, which were probably intended to be embraced by the schedule required by the resolution. As soon as I go to New York, and can confer with gentlemen of the bar on the subject, I will supply the deficiency.

I remain, respectfully, your humble servant,

W. P. VAN NESS.

THOMAS DOUGHERTY, Esq., *Clerk of the House of Representatives.*

Cases in admiralty.

ADVOCATE'S FEES.

A retaining fee in each cause, $5; but not to be allowed for more than one advocate.	
Perusing, amending, and signing every libel, claim, plea, exception, interrogatories, decree, (when prepared by the proctor,) appeal, or other special pleading, - -	$3 00
Auguing every plea or exception, and trying every cause, or attending prepared for such argument on trial, $10; but not to be allowed for more than two advocates.	
Every special motion actually made before the court or judge, or attending to oppose such motion, $5; but not to be allowed for more than one advocate.	
Every common motion before the court or judge, or attending to oppose such motion, -	1 00
Arguing before clerk or commissioners upon any matter referred to them, $5; but not to be allowed for more than one advocate.	

PROCTOR'S FEES.

A retaining fee in every cause, -	$5 00
Drawing process, libel, claim, plea, exceptions, interrogatories, special notice, decree, petition, answer, affidavit, or other proceeding, for each sheet containing ninety words, - -	50
Every engrossment thereof to file, for every ninety words, - - - -	25
And for every other necessary copy, -	12½
Attending judge out of term upon petition or special motion, or to settle interrogatories, -	2 00
Attending court in term, to make or oppose a special motion, - - - -	2 00
Attending court upon the hearing or argument of a cause, or prepared for such hearing or argument when the cause is noticed for hearing or argument, - - - -	5 00
Serving every notice, rule, order, petition, interrogatories, or other paper, - -	50
Drawing instructions for examinations either in or out of court, for each sheet containing ninety words, - - -	$0 25
And for copies thereof, - - -	12½
Drawing brief for advocate upon special motion, or petition, or for argument before clerk or commissioners, upon matters referred to them,	2 50
Drawing brief for advocate upon the hearing or argument of a cause actually noticed for hearing at term or before a special court, including abbreviations of the pleadings and evidence, for each sheet containing ninety words, -	25
And for copies thereof, - - -	12½
Attending before clerk or commissioners upon matters referred to them, for each day's actual attendance, - - -	2 00
Attending clerk with the draught of every sentence, decree, or decretal order to have the same settled or entered, - - -	1 00
Copy of costs before decree, - -	50
Copy of costs after decree, - -	1 00
Attending to tax or oppose a taxation of costs, -	1 00
Mileage to attend court or judge upon hearing or special matter, where the attendance shall be in a different county from that in which the proctor resides, for every twenty miles, going and returning, - - -	2 00
And the solicitor is to be allowed, in the taxation of costs, for all disbursements actually and necessarily incurred or paid in the progress of a cause not hereinbefore provided for.	

NEW YORK, *January* 24, 1820.

DEAR SIR:

I send you a fee bill as prepared by Mr. Slosson and myself. I should have attended to it sooner, but have been confined by sickness.

Yours, very respectfully,

CHARLES GRAHAM.

Hon. WM. P. VAN NESS,
Judge of the District Court.

DISTRICT OF NEW JERSEY.

SIR: NEWARK, *December* 6, 1819.

In pursuance of a resolution of the honorable the House of Representatives of the United States, I have the honor to enclose to you, accompanying this, a schedule of fees proper to be allowed and taxed in favor of the officers of the circuit and district courts of the New Jersey district. In performing this duty, I have confined myself to the fees allowed by law, presuming that it was not the intention of the House of Representatives to call on the district judge for an opinion as to what fees ought, in equity and propriety, to be allowed; if, however, I had construed the resolution in this sense, I am not certain that I should have materially altered the schedule of fees, for, considering the distance the officers have to travel to court, no complaint hath arisen on the ground of excessive fees, and I am well satisfied that they are sufficient.

I have the honor to be, with great respect, your very humble servant,

WILLIAM S. PENNINGTON.

The Hon. the SPEAKER *of the House of Representatives.*

A schedule of fees proper to be allowed and taxed in favor of the officers of the circuit and district courts of the New Jersey district.

TO THE DISTRICT ATTORNEY.

In admiralty causes in the district court.

For drawing interrogatories, - - $5 00
For drawing and exhibiting libel claim or answer, 6 00
For all other services in any one cause, - 6 00

In criminal causes.

For every indictment to which the defendant or prisoner pleads guilty, - - - 10 00
For every indictment to which the defendant or prisoner pleads not guilty, and afterwards retracts his plea and pleads guilty, - - 12 00
For every indictment to which the defendant or prisoner pleads not guilty, is tried, and found guilty, - - - - 15 00
This in full of all other fees.

TO THE DISTRICT ATTORNEY AND ALSO ATTORNEYS AT LAW.

In common law causes.

For retaining fee in every cause, - - $1 00

For every declaration, plea, or other pleading, not exceeding three sheets, - - 70
For copy thereof, when necessary, - - 30
For every writ of error, habeas corpus, certiorari, prohibition, scire facias, venire, or distringas, - 60
For every declaration, plea, replication, or other pleadings, exceeding three sheets, for every sheet, 20
[A sheet, under the New Jersey practice act and fee bill, consists of one hundred words.]
For copy thereof, - - - 12
For copy of bond, note of hand, account, or other deed or writing, for every sheet, - - 9
For every special motion not exceeding two in any cause, - - - - 80
For every subpœna, - - - 34
For every ticket for the same, - - 10
For drawing notice of every motion, where notice of the same is necessary, - - 25
For copy and service thereof, - - 20
For attendance on striking a jury, - - 1 00
For drawing notice of trial, - - 25
For copy and service thereof, - - 20
For drawing every breviat, - - 40
For copy thereof, - - - 14
For arguing every special motion, - - 1 25
For arguing demurrer or special verdict, or trying every cause, except a cause in ejectment, - 2 00
For drawing notice of taxing costs, where necessary, 25
For copy and service thereof, - - 20
For drawing every capias ad satisfaciendum, - 50
For drawing execution against goods and chattels, 50
For drawing execution against goods and land, - 70
For term fee, - - - - - 80
[But no more than two term fees to be allowed where judgment entered by default, nor more than three in any cause.]
For drawing declaration in ejectment, - 1 50
For retaining fee in ejectment, - - 1 50
For every attendance before the circuit court in order to make or oppose a motion in error, or an appeal, - - - - 1 00

TO THE DISTRICT CLERK.

In admiralty causes.

For drawing every stipulation process, monition, or subpœna, for each sheet of ninety words, - 15
For engrossing each sheet, - - $0 10
For entering the return of process, - - 15
For filing every libel claim, pleading, or other paper, - - - - 6
For copies of the pleading, interrogatories, depositions, and exhibits, when required, for each sheet of ninety words, - - - 10
For entering each proclamation, - - 15
For entering each default, - - 12
For entering every rule of court, - - 15
For examining each witness, and drawing his deposition, for each sheet of ninety words, - 15
For certifying each exhibit or writing shown to a witness at his examination, - - 25
For drawing every decree or decretal order, for each sheet of ninety words, - - 15
For entering the same in the minutes, each sheet, 10
For drawing a record, or making of the proceedings, for each sheet, - - - 15
[But no pleading, deposition, exhibit, or other writing to be inserted therein verbatim, or *in hæc verba*, shall be computed as any part of such draught.]
For entering a record in the register, or engrossing or copying proceedings or records to be sealed or exemplified, for each sheet, including all the pleadings, depositions, exhibits, and writings inserted therein, - - 10
For every certificate, - - - 20
For entering return of appraisement or sales, for each sheet, - - - - 10
For affixing the seal to any paper, when required, 25
For drawing commission to examine witnesses, for each sheet, - - - - 15
For engrossing the same, if on parchment, including the parchment, for each sheet, - 20
And if on paper, for each sheet, - 10
For swearing each witness in court, - - 10
For every entry or writing not mentioned or described, such allowance to be taxed as for similar services before mentioned.
For all money deposited in court, one-half of one per cent.

In criminal causes.

For entering every indictment, and filing the same, 20
For every process, subpœna, or other writ, - 34
For sealing the same, - - - 14
For every ticket for a subpœna, - - 10
For entering an appearance or default, - 14
For entering a recognisance taken in court, - 20
For discharging by proclamation, and entering the same, - - - - 20
For entering and filing a plea, - - 14
For entering a relinquishment of plea, - 8
For entering an order or rule of court, - 16
For a certified copy thereof, when required, - 12
For calling and swearing every jury, - 40
For swearing each witness, - - 8
For reading every record, deed, or writing given in evidence, - - - - 14
For swearing constable to attend the jury, - 8
For taking and entering a general verdict, - 20
For entering every special verdict, for each sheet of one hundred words, - - - 12
For entering judgment, - - - 12
For copies of writs, indictments, pleadings, special verdicts, and other papers, for each sheet, - 8
But no cost to be allowed where the indictment is quashed, judgment arrested, or defendant acquitted or discharged for want of prosecution.
The foregoing being the fees allowed in the supreme court of the State of New Jersey, one-third is, by act of Congress, to be added to them.

In chancery causes in the circuit court.

For entering action, - - - 20
For entering appearance, - - - 20
For filing every bill, answer, plea, replication, and other pleadings, and every affidavit, petition, report, examination, deposition, or other paper, 12

For copy of the same, for each sheet of one hundred words, - - - -	$0 08
For entering rule to answer, reply, or other rules in a cause, - - - -	20
For copy thereof, - - -	12
For search for any bill, answer, pleading, or other paper, for every year in which such search is made, - - - - -	8
For entry of every dismission, - -	50
For every commission to examine witnesses, -	34
For entering every cause for argument, -	50
For swearing every witness, - -	8
For attending court on argument or hearing, with the bill, answer, pleadings, and other documents and papers filed in the cause, -	50
For reading every bill, answer, or other pleading, document, or paper on argument or hearing, -	20

Money brought into court, and lodged with the clerk, after the rate of one cent a dollar.

The foregoing being the fees allowed by law in the State court, one-third is to be added by act of Congress.

In common law causes.

For drawing every summons, capias, subpœna, or other process, if the clerk shall do it, -	34
For sealing every writ, - - -	14
For entering every action, - -	10
For entering an appearance or default, -	14
For entering the return of a writ, - -	14
For entering every rule of court, - -	16
For a certified copy thereof, when required, -	12
For filing every writ, declaration, pleading, roll, or other paper, - - - -	8
For entering every retraxit, discontinuance, or nonsuit, - - - - -	15
For reading every petition, and entering order thereon, - - - - -	20
For every copy of such order, - -	12
For searching the records, - -	20
For calling and swearing every jury, -	40
For swearing each witness, - -	8
For reading every record, deed, or writing given in evidence, - - - - -	14
For swearing a constable to attend a jury, -	8
For taking a general verdict and entering same, -	20
For entering judgment, - - -	12
For entering special verdict, or demurrer to evidence, for each sheet of one hundred words, -	12
For copies of writs, declarations, pleadings, special verdicts, demurrers to evidence, records, and other papers, for each sheet, - -	8
For entering satisfaction on record, - -	$0 20
For entering confession of lease, entry, and ouster,	20

The foregoing fees being allowed in the supreme court of the State, one-third is to be added by act of Congress.

TO THE COUNSEL.

In common law causes and appeals.

For the trial of a cause, or arguing a demurrer or special verdict, - - - -	3 00

But no costs to be taxed for more than one counsel on a side.

For making or opposing a motion in the case of error or appeal, - - -	1 00

TO THE MARSHAL.

For the service of every writ, warrant, or attachment, or other process, - - - -	2 00
But in case there be more than one person named in such process, then, and in that case, for each person so named, - - - -	2 00
For travelling expenses, per mile, - -	5
For each bail bond, - - -	50
For summoning witnesses and appraisers, each, -	50
For every commitment or discharge of a prisoner,	50
For every proclamation in the admiralty, -	30
For sales of vessels or other property, and for receiving and paying the money, for any sum under five hundred dollars, two and a half per cent.; for any larger sum, one and a quarter per cent. upon the excess.	
For summoning any grand or other jury, -	4 00

Not to exceed $50 at any one court.

For returning every writ, - - -	
For serving every declaration in ejectment, -	2 00

For selling vessels or goods under admiralty process, for any sum under $500, 2½ per cent.
For any larger sum, on the excess 1¼ per cent.
Custody fee of a vessel under admiralty process, 1 50

CRIER.

For every cause that is called, - - 25

JURORS.

For each day's attendance, - - 1 25
For mileage, coming and going, per mile, 5 cents, to be paid by the public.

WITNESSES.

In criminal cases.

The same allowance as to jurors, to be paid in like manner.

In civil cases.

For each day's travel to and from, and attendance at court, 50 cents. [The day's travel to be computed at 20 miles, to be paid by the party.]

Approved:

RICHARD PETERS.

WESTERN DISTRICT OF PENNSYLVANIA.

To the Speaker of the House of Representatives of the United States:

In pursuance of a resolution of the Congress of the United States of the 22d February, 1819, I hereby transmit to you "a schedule of fees of office proper to be allowed and taxed to the officers" of the court of the United States held in this district. You will observe that the district court of the United States for the western district of Pennsylvania possesses circuit court powers. The fees of office hereby transmitted are collected from a view of the acts of Congress now in force, and the acts of the Legislature of Pennsylvania of the 20th April, 1795, and the 28th March, 1814. By the second section of the act of Congress of the 28th February, 1799, the "clerks of the district courts in each State are allowed the same fees as are given in the supreme court of the State in which the court is held, with an addition thereto of one-third of said fees." By the last State fee bill above mentioned, the fees of the State officers are in various cases considerably raised. I have had a view to this circumstance in the bill of fees now reported. For the fees proper to be allowed in the chancery side of this court, I refer you to the report of the honorable Richard Peters, as, from the want of a court of chancery in this State, I am not sufficiently conversant with that subject.

MARSHAL'S FEES.

For all extra services as is usual in other districts in the interior of the United States, per annum, - - - $200 00
For the service of any writ, warrant, attachment, or process issuing out of any court in the United States, - - - 2 00
And in case there be more than one person named in said writ, warrant, attachment, or process, then for each person so named, - 2 00
For his travel in serving each summons, writ, warrant, attachment, or process aforesaid, each mile circular, - - - 6
[This to be computed from the court-house to the place of service, and back to the court-house; and if more persons than one are named therein, the travel shall be computed from the court-house to the nearest party, from thence to the next, and so on to the most remote, and from thence to the court-house again.]
For each bail bond, replevin bond, attachment, stipulation, or other indemnification bond, - $1 00
For summoning witnesses or appraisers, each, - 75
For every commitment or discharge of a prisoner, in civil cases, - - - 1 00
For every proclamation in admiralty, - 50
For sales of vessels or other property, and for receiving and paying the money on ca. sa. or other process, for any sum under $500, 3 per cent.; for any larger sum, 2 per cent. upon the excess.
For summoning each grand or other jury, - 5 00
But in no case shall the fees for summoning jurors to any one court exceed $50, inclusive of circular mileage.
For attending the district court for each day, where such court has the powers and cognizance of a circuit court, - - 5 00
For serving subpœnas, each, - - 30
For circular mileage, per mile, - - 5

For assigning bail bond, or replevin bond, or other indemnification, - - - $0 50
For serving narr. in ejectment, - - 2 00
For copies of narr. in ejectment, each, - 1 50
For copy of summons, each, - - 50
For copy of scire facias, each, - - 75
For advertising expenses where goods or lands are sold in each suit, - - - 5 00
For vendue crier, when sale is actually made in each suit, - - - - 1 50
Where the vendue is continued for more than one day, then for each day thereafter - - 1 50
For summoning jury of inquiry, taking inquisition and return, - - - - 4 00
For executing writs of partition, attesting jury and return, - - - - 5 00
If the marshal be engaged more than one day, for each day's attendance thereafter - - 5 00
For deed on sale of lands, - - 4 00
For acknowledging the same, - - 1 00
For return of non est inventus, tarde venit, or nulla bona, - - - - 50
For levying fines, 4 per cent.
For executing retorno habendo, levari facias, fieri facias, or venditioni exponas, each, - 2 00
For the discharge of every prisoner in criminal cases, - - - - 1 00
For the commitment of any prisoner in criminal cases, to be paid on the discharge of the prisoner, - - - - 1 00
For serving process on indictment or presentment, in every capital case, - - - 4 00
In every other criminal case - 2 00
For each action called in court, for crier, - 25
For executing a death-warrant, - - 25 00
For executing liberari facias, - - 3 00
And where more than one person is to be removed, then for each person more than one - 2 00
For executing every haberi facias possessionem, 3 00
And where more than one person is to be dispossessed in the same process, then for each person more than one - - - - 2 00
For copy of scire facias sur mortgage, - 1 00
For delivering lands to creditor on liberari facias, and making return for any sum under $500, one per cent., and for any larger sum one-half of one per cent.
For keeping goods or chattels on any attachment, fieri facias, or other writ, the fees to be regulated by the court in case of dispute.
For executing fieri facias, if the money be paid without levy, - - - 3 00
For executing fieri facias, if the money be paid to plaintiff after levy and before sale, the one-half of the same commission allowed in other cases, viz: for any sum under $500, one and a half per cent., and for any larger sum one per cent.; but no per centage shall in any case be allowed for more than the real debt.
For making out and furnishing every special jury list, each, - - - - 1 00
For all other services not herein enumerated, except as shall be herein and hereafter provided, such compensation as is allowed in the supreme court of the State where such services are rendered; and where no provision is made for such services, the court shall regulate the same on a reference to charges for similar services in this bill.

CLERK'S FEES.

In civil cases.

For issuing every writ of summons, capias, scire facias, fieri facias, attachment, ca. sa., and habeas corpus, - - - 2 50
For each name of every plaintiff and defendant after the first, - - - 10

For each day's attendance in court, - - 5 00
For every entry or writing not mentioned or described herein, such allowance shall be taxed as for similar services herein mentioned, or regulated by the court, as in other cases.

FEES OF THE DISTRICT ATTORNEY.

For each day which any such attorney shall necessarily attend on business of the United States during the session of any court, - 5 00
For travelling from the place of his abode to such court and back again, per mile circular, - 6
For drawing interrogatories, - - 5 00
For drawing and exhibiting libel, claim, answer, or information in revenue cases, - - 6 00
For all other services in any one cause, - 6 00
For drawing and prosecuting every bill of indictment, information, or presentment, - 6 00
For every additional name in an indictment or presentment, - - - 4 00
For every case of surety of the peace heard and decided before the court, to be paid by the party bound over, or the party making the application, if the decision be against him, - 3 00
For every nolle prosequi, when paid by the defendant or defendants, - - - 3 00
Where two or more persons shall be prosecuted separately for a joint offence, the same fees shall be charged as if they had been prosecuted jointly, provided a prosecution had then commenced against all concerned.
For any other services not herein mentioned, the same fees as are allowed in the highest criminal court in the State.
And where no provision is made by the State laws, the compensation for such services shall be ascertained and regulated by the court, as in other cases.
For all extra services, the further annual sum of $200 as a full compensation.

FEES OF THE ATTORNEYS AND COUNSELLORS.

For issuing præcipe for the commencement of any suit, entering an appearance on the clerk's docket, filing warrant of attorney if required, if the suit be ended before or during the session of the first court, - - - 3 50
For every suit ended after the first court, and before judgment, discontinuance, nonsuit, or non pros., the further sum of - - 3 25

For every suit prosecuted to judgment, discontinuance, nonsuit, or non pros., - $8 00

FEES OF JURORS.

For each grand or other juror, for each day he shall attend in court, - - 1 25
For travelling, at the rate of five cents per mile from their respective places of abode to the place where the court is holden; and the like allowance for attorney, to be charged in the marshal's bill, and paid by the United States as heretofore.
For every inquisition on real estate, each juror, 45
For every inquisition of damages, each juror, - 45
For each day's attendance on view or other service in the country, - - - 1 25
To be charged in the bill of cost.

FEES OF WITNESSES.

For each day's attendance at court, - 1 00
For travelling to and from court, per mile, - 5

CRIER'S FEES.

For each action called in court, to be charged to the unsuccessful party, - - - 25
Each day's attendance in court for the purpose of attending on the court, or other necessary business, to be charged in the marshal's bill, and paid by the United States as heretofore, 2 00

CONSTABLES' FEES,

Appointed by the marshal, not exceeding three.

For each day's attendance in court for the necessary business thereof, to be included in the marshal's bill, and paid by the United States as heretofore, - - $2 00

FEES OF PARTIES.

For each subpœna and subpœna ticket, the same sum paid to the clerk of the court for the same.
Service of each subpœna, - - 30
Travelling expenses in serving the same, counting from the court-house to the nearest witness, thence to the next nearest, and so on to the last, and from thence back to the court-house, circular, per mile, - - - 5
Commissions and interrogatories, the same as lawfully charged by the clerk.
Serving notices to take depositions, each, - 30

SURVEYORS AND ARTISTS,

Appointed by the court to make draughts, &c. per day, - - - - 4 00

FEES OF ELISORS,

Appointed by the court in cases of the affinity, consanguinity, or interest of the marshal.

The same fees as for similar services by the marshal.

PITTSBURG, *December* 21, 1819.

In pursuance of the resolution of your honorable body, above referred to, I have drawn up, and herewith transmit, the above bill of fees. I will not pretend to assert that it is free from many defects, though the experience of thirty years in courts of justice will claim for it some respect. I have omitted to state the fees in the chancery side of the court, for the reasons stated in the first page of the report, and I trust they will be admitted as a sufficient apology for the omission. It will be found that some few innovations have been imbodied in the present bill: these are founded on personal experience, and a correct adjustment of the compensation to the services to be rendered. In some instances the fees have been augmented, and in some lessened. This arose as well from a conviction of the comparative smallness of business in this court, as from the sense of Congress heretofore expressed in adding one-third to the fees of the highest court of the State. For extra service I have advised the addition of $200 per annum to the marshal and district attorney, as well on the ground that the United States pay no costs in ordinary cases, as on the consideration that the same allowance is made by act of Congress to nearly all the marshals and district attorneys in the interior of the Union. I have also allowed $5 per diem to the clerk of the court, as I am entirely satisfied, on a careful view of the acts of Congress, that it is at present lawfully demandable. I have further recommended the same allowance to the marshal, as this is usual in the interior districts of the United States. In the performance of this honorable duty I have exercised my best judgment, and trust my intentions at least will be duly appreciated by yourself and that honorable body in which you so ably, honorably, and impartially preside.

With sentiments of great respect and consideration, I have the honor of subscribing myself yours, sincerely,

JONATHAN K. WALKER.

To the Hon. HENRY CLAY, *Speaker of the House of Representatives U. S.*

DISTRICT OF DELAWARE.

The undersigned, district judge of the United States for the Delaware district, in pursuance of a resolution of the honorable the House of Representatives of the United States of the 22d of February last, prays leave to report the schedule of fees contained on the following sheets, as proper to be allowed and taxed to the several officers of the courts of the United States therein mentioned.

Copy of a summons, subpœna, &c. - - 13
Delivery of a copy of a declaration in ejectment, $1, and same mileage.
In every other action, 33 cents, and same mileage.
Every bail bond, replevin bond, or bond of indemnity, - - - - - 33
Turnkey's fees on every committitur, when the person is actually in jail, - - 50
A copy of a panel, when demanded, - - 7
Assigning every bail bond, - - 25
Summoning the grand jury to attend at one term or special session, $4, and no mileage.
Summoning and qualifying two appraisers, to appraise goods taken in execution, and same mileage, - - - 50
Advertising goods for sale, - $0 67
Dollarage on all sums received on execution, with or without sale, 1½ per centum, and no more.
Executing writ of inquiry of damages and every other writ of inquiry, summoning and attesting the jury, and returning the same, exclusive of mileage, - - - - 3 00
Serving writs of attachment, taking the goods or lands, and making return thereof, $1 50, and same mileage.
Levying an attachment in the hands of garnishees, and summoning them, 40 cents, and same mileage.
Executing a sentence of death, $40, and same mileage, to be paid by the United States.
Every indictment tried or submitted, - - 50
Summoning and returning a petit jury, $4, and no mileage.
Every committitur, to be paid by the party committed, - - - - 50
Serving and returning every subpœna, for a *single* or one witness, 13 cents, and same mileage.
For attending on either the circuit or district court during the sitting thereof, each day, $5, and mileage of 10 cents per mile in going to the place of holding the court, but not on returning.

FEES TO THE CRIER.

In the circuit or district court, as the case may be.

For each day's attendance on either of said courts, $2, and no mileage.

FEES TO THE BAILIFF.

In the circuit or district court, as the case may be.

For each day's attendance on either of said courts, $2, and no mileage.
To attorneys of either of said courts such fees, and no more, as are allowed them in the highest courts of judicature of the State in which either of the said courts may be holden.

All which is humbly submitted.

JOHN FISHER,
District Judge of the United States for the Delaware district.

DOVER, *December* 12, 1819.

DISTRICT OF VIRGINIA.

LOWER DISTRICT OF VIRGINIA, *September* 21, 1819.

In obedience to a resolution of the House of Representatives of the United States of the 22d of February, 1819, the annexed schedule of fees of office at present allowed and taxed for the officers of the courts of the United States for the district of Virginia is respectfully submitted to the House of Representatives as proper to be allowed and taxed for the officers of those courts, respectively.

ST. G. TUCKER,
District Judge of the United States for the District of Virginia.

To the Hon. the SPEAKER *of the House of Representatives.*

For affixing the seal to any paper, when required, 25
For drawing commission to examine witnesses, for each sheet containing ninety words, - 15
And for engrossing the same, if on parchment, including the parchment, - - 20
And if on paper, for each sheet of ninety words, 10
For swearing each witness in court, - - 10
For every entry or writing not mentioned or described, such allowance shall be taxed as for similar services herein mentioned.
On all money deposited in court, one-half of one per centum.

TO THE MARSHAL.

For the service of any writ, warrant, attachment, or process issuing out of any courts of the United States, - - - - - 2 00
And in case there be more than one person named in the said writ, warrant, attachment, or process, then $2 for each person so named.
For his travel out in serving each writ, warrant, attachment, or process aforesaid, 5 cents per mile, to be computed from the place of service to the court where the writ or process shall be returned; and if more persons than one are named therein, the travel shall be computed from the court to the place of service which shall be the most remote, adding thereto the extra travel which shall be necessary to serve it on the other.
For each bail bond, - - - 50
For actually summoning witnesses or appraisers, each, - - - - - 50
For every commitment or discharge of a prisoner, 50
For every proclamation in the admiralty, - 30
For sales of vessels or other property, and for receiving and paying the money, for any sum under $500, $2\frac{1}{2}$ per cent.; for any larger sum, $1\frac{1}{4}$ per cent. upon the excess.
For summoning each grand and other jury, - 4 00
Provided that in no case shall the fees for summoning jurors to any one court exceed $50.
And in those States where jurors, by the laws of the State, are drawn by constables or other officers of corporate towns or places, by lot, the marshal shall receive, for the use of the officers employed in summoning the jurors and returning the venire, the sum of - - 2 00

And for his own trouble in distributing the venire, the sum of - - - -$2 00
For attending the supreme or circuit court, per day, 5 00
And for attending the district court, where such court has the powers and cognizance of a circuit court, per day, - - - 5 00
And for attending the district courts in other cases, $4 per day, and at the rate of 10 cents per mile for his travel from the place of his abode to either of the said courts.
For all other services not herein enumerated, except as shall be hereafter provided, such fees and compensations as are allowed in the supreme court of the State where such services are rendered; and the annual sum of $200 as a full compensation for all extra services.

TO THE ATTORNEYS.

Taxed for their fees in admiralty causes, each case, - - - - -$17 00
Taxed for their fees in all other causes, each case, - - - - 20 00

SIR: CLARKSBURG, *December* 13, 1819.

I have the honor to transmit to you the annexed schedule of fees, proper, in my opinion, to be allowed and taxed for the officers of the court of which I am judge; which has been prepared in obedience to the resolution of the House of Representatives passed on the 22d of February last.

Very respectfully, your most obedient servant,

J. G. JACKSON.

To the Hon. HENRY CLAY, *Speaker of the House of Representatives.*

TO THE MARSHAL.

For the service of any writ, attachment, warrant, or process issuing out of any court of the United States, - - - - - $2 00
And if there be more than one person named therein, $2 for each person so named.
For travelling to serve such process, 5 cents per mile from the court to which the process is returnable to the place of service.
For each bail bond, - - - 62
For summoning a witness or other person, - 50
For committing or discharging a prisoner, - 50
For collecting and paying money on any execution or other process, 5 per cent. on the first $300, and 2 per cent. on all sums above $300.
For summoning and attending a jury upon any inquisition, survey, writ of dower, or partition, and returning such inquisition, - - 6 00
For serving a declaration in ejectment, on each tenant, - - - - 2 00
And the same for travelling as in the case of serving a writ.
For taking a bond for the delivery of property executed, - - - - 62
And in all cases where such bonds are forfeited, the same fees as for collecting and paying money on an execution.

TO THE CLERK.

For filing a bill, answer, replication, or other pleadings in chancery, each, - - 35
For a copy thereof, for every twenty words, - 3
For entering a decree, - - - 24
For drawing up every decree at large, entering the substance of any pleading, evidence, or decree, for every twenty words, - - 3
For filing the depositions in every cause, for each party, - - - - 35
For copy of a deposition, for every twenty words, 3
For taking a bond upon issuing an injunction, - 57
For a dedimus potestatem, - - 47
For recording the report of auditors, - - 94
For making a complete record of every cause, for every twenty words, - - - 3
For taxing the costs in any suit, or for a copy thereof, - - - - 47
For recording any thing not herein particularly mentioned, or for a copy thereof, for every twenty words, - - - 3
For a search for any thing, if above a year's standing, or reading the same if required, if a copy be not taken, - - - 24
For every order to a witness for attendance, to be charged to the party against whom the order goes, - - - - 24
For every writ of capias ad respondendum, - 24
For a copy of such writ, - - - 12
For every writ of execution or scire facias, - 35
For a copy thereof, - - - 19
For recording the return thereof, - - $0 19
For any writ of attachment, - - 35
For recording the return thereof, - - 35
For filing every bail bond, or entering the bail returned, - - - - 24
For docketing every cause, - - 11
For a copy of the return of any writ, - 11
For entering special bail, - - - 24
For entering security for costs, - - 24
For entering the appearance of the defendant where he has no attorney, - - 11
For entering one or more attorneys for each party, - - - - 11
For every declaration or other pleading, or for a copy thereof, - - - 24
For every trial, swearing the jury and witnesses, filing all papers, and recording a general verdict, - - - - 94
And where there is a special verdict or case agreed, - - - - 1 51
For swearing the witnesses in every other cause, 24
For a copy of a special verdict, case agreed, or making up a complete record, for every twenty words, - - - - 3
For entering every judgment, or for a copy thereof, - - - - 24
For every recognisance in court, - - 24
For entering the order or orders in any cause in one court, - - - - 35
For a copy of any order, - - - 24
For recording the report of a jury in the country, surveyor, auditor, or viewers, - - 47
For a copy thereof, - - - 47
For taxing costs to any judgment or decree where costs are recovered, or for a copy of a bill of costs, - - - - 27
For entering an appeal, and bond to prosecute it, 47
For returning a writ of error, supersedeas, certiorari, or habeas corpus, - - 47
For a copy of an account, - - 24
For an attachment on any order for the attendance of a witness, to be charged to the party against whom the attachment shall be issued, - - - - - 24
For a summons for one or more witnesses, - 24

NOTE.—In admiralty and maritime cases I have had no experience or practice, and am incompetent to give any opinion in regard to the fee bill already established.

TO THE ATTORNEY.

For each chancery case, or other case wherein the title or bounds of lands shall or may come in question, - - - - 25 00
In all other suits, except where the United States is a party, - - - - 20 00
In suits where the United States is a party, and the amount claimed is $500 or upwards, - 20 00
And where the sum claimed is less than $500, - 15 00
In all motions, - - - - 10 00

Although the following suggestions may not fall within the contemplation of the resolution, yet, having designated the foregoing fees as proper to be *allowed and taxed*, with reference to an additional allowance for mileage and attendance upon the courts, I further respectfully offer the opinion that, in consequence of the limited jurisdiction of the court, the probable paucity of suits which will be instituted therein, and the remote situation of the respective places where the courts are appointed to be held, there should be paid to the marshal, clerk, and attorney for the district, respectively, $300 per annum for attending the three places of holding courts, and 15 cents per mile for travelling to, and the same for returning from, the said courts, in lieu of the present allowance for mileage and attendance.

All which is respectfully submitted.

J. G. JACKSON.

DECEMBER 13, 1819.

DISTRICT OF NORTH CAROLINA.

SIR: RALEIGH, *December* 4, 1819.

I have the honor to transmit, herewith, a schedule of fees for the officers of the district courts of North Carolina, prepared in pursuance of a resolution of the House of Representatives of the United States passed the 22d February last.

With sentiments of high regard and respect, I am, sir, your most obedient, humble servant,

H. POTTER.

The Hon. the SPEAKER *of the House of Representatives.*

A schedule of the fees of office now charged and taxed by the officers of the district courts of the United States for the district of North Carolina.

TO THE MARSHAL.

For the service of any writ, warrant, attachment, or process issuing out of any court of the United States,	$2 00
And, in case there be more than one person named in the said writ, warrant, attachment, or process, then for each person so named,	2 00
For his travel out in serving each writ, warrant, attachment, or process aforesaid, per mile, (to be computed from the place of service to the court where the writ or process shall be returned; and, if more persons than one are named therein, the travel shall be computed from the court to the place of service which shall be the most remote, adding thereto the extra travel which shall be necessary to serve it on the other,)	5
For each bail bond,	50
For actually summoning witnesses or appraisers, each,	50
For every commitment, or discharge of a prisoner,	50
For every proclamation in the admiralty,	30
For sales of vessels or other property, and for receiving and paying the money, for any sum under $500, 2½ per cent.; for any larger sum, 1¼ per cent. upon the excess.	
For summoning each grand or other jury, (limited to $50 at each court,)	4 00
For attending the circuit court, per day,	5 00
For attending the district courts, per day, (and at the rate of 10 cents per mile for his travel from the place of his abode to either of the said courts,)	4 00
For the custody of all vessels and goods seized by any officer of the revenue, a reasonable compensation to be allowed by the court.	
For selling prize property, and receiving and paying over the proceeds, a commission of one per cent., first deducting all duties, costs, and charges; and in no case of condemnation and sale of any one prize vessel and cargo shall the commissions exceed $250.	
For all other services not enumerated, such fees and compensations as are allowed in the Supreme Court of the State.	

Under this rule, a commission of 2½ per cent. is charged on executions, including all services for levying, receiving, and paying over the money.

A schedule of fees of office proper to be allowed and taxed for the officers of the district courts of the United States for the district of North Carolina.

TO THE MARSHAL.

For the same service,	$2 00
For the same service,	2 00
For the same service, and to be computed in the same manner,	8
For the same service,	50
For the same service,	70
For the same service,	50
For the same service,	30
For sales of vessels or other property, (prize vessels and property, and sales by execution, excepted,) and for receiving and paying the money for any sum under $1,000, 2½ per cent.; for any larger sum, 1¼ per cent. upon the excess.	
For the same service,	4 00
For the same service,	5 00
For the same service, (same mileage pay,)	5 00
For the same service, same compensation.	
For the same service, same compensation.	
For collecting by execution, including all services for levying, receiving, and paying over the money, a commission of 2½ per cent. upon the sums collected.	
For all other services not enumerated, such fees and compensations as are allowed in the supreme or superior court of the State, as the case may be.	

TO THE CLERKS OF THE DISTRICT COURTS.		TO THE CLERKS OF THE DISTRICT COURTS.	
The same fees as are allowed in the supreme court of the State, with the addition thereto of one-third of the said fees; and, in case they perform any duty which is not performed by the clerks of the State, and for which the laws of the State make no provision, the court in which such service shall be performed shall make a reasonable compensation therefor.		For all services not hereinafter enumerated or provided for, a reasonable compensation to be allowed by the court.	
The fees which have been taxed under this rule are the following:			
For every leading process, under seal, returned to the first court, and all subsequent process, appearances, pleas, rules, orders, and other services necessary thereon, until the making up of an issue, inclusive; and also for dismission or final judgment, when either happens, or for confession of judgment, - - -	$2 07	For every leading process, under seal, returned to the first court, and all subsequent process, appearances, pleas, rules, orders, and other services necessary thereon until the making up of an issue, inclusive; and also for dismission, confession of judgment, or entering final judgment, either at the first or at any subsequent court, including all fees for every necessary service thereon, - - -	$3 00
For every continuance or reference of every cause after the second court, including all fees for every necessary service, - -	66⅔	For every continuance or reference of any cause after the first court, including all fees for every necessary service, - - - -	50
For the court at which the cause is determined, including all fees for every necessary service thereon, and entering final judgment, inclusive,	3 00	Provided for above.	
For every subpœna, under seal, provided the party insert no more than four witnesses in the same, - - - - -	74	For the same service, - - -	70
For every execution or order of sale, under seal, when necessarily issued and returned, including all services thereon, with taxing costs and copy, and entering satisfaction, - -	1 24	For the same service, - - -	1 25
For every scire facias against bail, under seal, with making an issue thereon, or entering judgment without plea, including fees for every service necessary thereon, provided that the party cast shall not be subject to this unless the scire facias is requisite, and required by the plaintiff, - - - - -	1 74	For every scire facias against bail, under seal, with making an issue thereon, and entering final judgment, with or without plea, either at the first or at any subsequent court, including fees for every service necessary thereon, -	2 00
For giving a copy of the record of any cause, when demanded by either of the parties, under seal, - - - - -	1 00	For the same service, - - -	2 00
For every order or rule of court made in matters foreign to the suit depending in court, and a copy thereof, when demanded, - -	44	For the same service, - - -	40
For searching a record out of court, - -	16	For the same service, - - -	20
For a commission to take the examination of witnesses in any cause depending, the return thereon entering, and all other services necessary thereon, including the seal, - -	49	For the same service, - - -	70
For a special verdict, demurrer, or motion in arrest of judgment, and argument thereon, -	66⅔	For the same service, - - -	50
For a writ of error, certiorari, or appeal, with a transcript of the record, and all services necessary thereon, - - - -	1 33	For the same service, - - -	2 00
For making out certificates of witnesses and jurymen's attendance, - - - -	11	For the same service, - - -	10
For every security taken to prosecute plaintiff's suit or pay costs, - - - -	33⅓	For the same service, - - -	30
For entering the same with the names of the security in the book to be by him kept for that purpose, - - - - -	33⅓	For the same service, - - -	30
For affixing the seal to any instrument of writing that may require the same, - -	41	For affixing the seal to any instrument of writing that may require the same, other than such as are herein under seal, - - -	25

For an indictment, calling the prisoner to the bar, charging him, receiving and entering his plea at length,	$1 66⅔	For the same services,	$1 00
For every recognisance,	33⅓	For the same service,	30
For each continuance of an indictment,	66⅔	For the same service,	50
For the trial of criminals, entering of final judgment, and issuing a copy of the sentence of the court,	3 00	For the same services,	2 00
For their attendance at court, (by act of Congress,) per day,	5 00	For the clerk's attendance at court, per day,	5 00
In admiralty and maritime causes, (by act of Congress,)		For the same in admiralty and maritime causes,	
For drawing every stipulation process, monition, or subpœna, for each sheet containing ninety words,	15	For the same service,	15
And for engrossing each sheet,	10	For the same service,	10
For entering the return of process,	15	For the same service,	15
For filing every libel claim, pleading or other paper,	6	For the same service,	6
For copies of the pleadings, interrogatories, depositions, and exhibits, when required, for each sheet of ninety words,	10	For the same service,	10
For entering each proclamation,	15	For the same service,	15
For entering each default,	12	For the same service,	12
For entering every rule of court,	15	For the same service,	20
For examining each witness, and drawing his deposition, for each sheet containing ninety words,	15	For the same service,	15
For certifying each exhibit, or writing shown to a witness at his examination,	25	For the same service,	25
For drawing every decree or decretal order, for each sheet containing ninety words,	15	For the same service,	15
And for entering the same on the minutes, for each sheet, as aforesaid,	10	For the same service,	10
For drawing a record, or making a copy of the proceedings, for each sheet containing ninety words,	15	For the same service,	15
But no pleading, deposition, exhibit, or other writing to be inserted therein verbatim, or *in hæc verba*, shall be computed as any part of such draught.			
For entering a record in the register, or engrossing or copying proceedings or records to be sealed or exemplified, for each sheet of ninety words, including all pleadings, depositions, exhibits, and writings inserted therein,	10	For the same service,	10
For entering return of appraisement or sale, for each sheet of ninety words,	10	For the same service,	10
For affixing the seal to any paper when required,	25	For the same service,	25
For drawing commission to examine witnesses, for each sheet of ninety words,	15	For the same service,	15
And for engrossing the same, if on parchment, including the parchment,	20	For the same service,	20
And if on paper, for each sheet of ninety words,	10	For the same service,	10
For swearing each witness in court,	10	For the same service,	10
For every entry or writing not mentioned or described, such allowance shall be taxed as for similar services herein mentioned.		Same service, same allowance.	
On money deposited in court, a commission of one-half of one per cent.		On money deposited in court, a commission of one-half of one per cent. for receiving and depositing the same according to the order of court.	
TO THE ATTORNEY.		TO THE ATTORNEY.	
For each day he shall necessarily attend on business of the United States, during the session of any circuit or district court,	5 00	For the same service,	5 00
For travelling from his place of abode to such court, per mile,	10	For travelling from the place of his abode to the several circuit and district courts, and back again, per mile,	10
For drawing interrogatories $5; for drawing and exhibiting libel claim or answer, $6; and for all other services in any one cause, $6.		A tax fee in every suit instituted by libel, including all services,	17 00
And such fees as are allowed in the supreme court of the State, viz:			
A tax fee as now charged in all suits not criminal, nor of admiralty jurisdiction,	12 50	A tax fee on all indictments and criminal prosecutions,	12 50
A tax fee on indictments and criminal prosecutions,	3 33⅓	A tax fee in all other suits,	12 50

In compliance with the resolution of the House of Representatives of the United States of the 22d February, 1819, I have prepared the above schedule. I have confined myself to the officers of the *district* courts, because such seemed to be the import of the resolution. In forming a list of fees "proper to be allowed" in my opinion, I was led necessarily to the examination of the present fee bill; and, believing that both lists might, by a comparison, be useful in leading to a proper conclusion, I have presented both. It will be seen that in some instances the proposed allowances are greater than those which already exist. In this I have been influenced chiefly by the consideration that the reward of each official act should be increased or diminished according to the aggregate profit, and in the same ratio. I am aware that the fees here submitted would be extravagant for an office abounding with business; but where there is very little to do, nothing but high fees can make the office an object; and if it be no object, an incumbent is to be sought for only among those whom the office may suit, but who are seldom found to suit the office. The small total of business in the district courts of North Carolina is divided and allotted (whether properly or improperly is not for me in this place to say) into three separate courts, far distant from each other, thereby reducing the emolument of each clerk to a mere pittance, and increasing the labor of the marshal and attorney, without an adequate compensation; hence the propriety, as it seems to me, of increasing the fees of these officers.

All which is respectfully submitted.

H. POTTER, *District Judge of the United States for the North Carolina District.*

RALEIGH, *December* 4, 1819.

DISTRICT OF SOUTH CAROLINA.

SIR: SOUTH CAROLINA DISTRICT, *October* 15, 1819.

In pursuance of a resolution of the House of Representatives in Congress assembled, of the 22d February last, I have the honor of transmitting to you, herewith, schedules of the district attorney, (No. 1,) of the marshal, (No. 2,) and of the clerk, (No. 3,) as respects fees of office proper to be allowed and taxed for the courts, and their departments, respectively.

The references in the marshal's schedule are written in my handwriting; the clerk's schedule is all in his handwriting; the district attorney's schedule is in the handwriting of his chief clerk; and they all meet my approbation, as being proper for this district.

I have the honor to be, sir, with great respect, your most obedient servant,

JOHN DRAYTON, *District Judge of South Carolina.*

To the Hon. the SPEAKER *of the House of Representatives in Congress.*

No. 1.

Table of fees established and allowed by an act of the General Assembly of the State of South Carolina, passed the 14th day of February, 1791, to the attorneys of the superior courts of the said State, by which act the fees of the attorney of the United States for the district of South Carolina are regulated and taxed, in conformity with the fourth section of the act of Congress passed 28th February, 1799. (Fourth volume Laws of the United States, page 272, old edition.)

ATTORNEYS OF THE SUPERIOR COURTS OF LAW.

PLAINTIFF'S ATTORNEY.

For filling up writs, signing, attendance to lodge the same with sheriff, in cases where no bail is required, and all incidental charges, when settled before declaration filed, -	$4 29

For drawing commissions to examine witnesses, drawing interrogatories, attending to strike commissioners, and instructions, all incidental charges inclusive, - - -	8 57
For copies of all necessary exhibits, to be filed by defendant, per copy sheet, - -	9

ATTORNEY GENERAL.

Criminal cases.

On papers returned, and no indictment given out, and nolle prosequi entered, - -	5 36

Where an indictment is found,	$8 57
Upon bill of indictment found, and trial before petit jury, and verdict or confession,	15 00

SOLICITOR'S FEES IN EQUITY.

Complainant's solicitor.

For preparing and filing a bill in equity, with all necessary exhibits,	30 00
For drawing interrogatories in chief for complainant's witnesses, and cross-interrogatories, drawing and engrossing commissions, and attending to strike commissioners where necessary, with proper instructions,	15 00
For arguing exceptions on points of law before the master or judge at chambers, when necessary, and attending thereon, including all charges incidental thereto,	8 57
For all other services in the cause, including brief served on judges, except the decree,	12 86
For drawing and engrossing decree, per copy sheet,	9

Defendant's solicitor.

For preparing and filing defendant's answer, and all necessary exhibits,	30 00
For drawing interrogatories in chief for defendant's witnesses, drawing and engrossing cross-interrogatories, commissions, attending to strike commissioners where necessary, with instructions,	15 00
For arguing exceptions on points of law, before the master or judges at chambers, when necessary, including notices, attendances, and all incidental charges relative thereto,	8 57
For all other services in the cause, including serving judges with brief, and except the decree,	12 86
For drawing and engrossing decree, per copy sheet,	9

The act of February, 1791, was passed in sterling money, but by a resolution of the General Assembly of South Carolina, dated 14th December, 1812, the fee bill was reduced to dollars and cents, and ordered to be published with the acts of the session of the Legislature of that year.

The following orders in the circuit and district courts have been made respecting fees:

IN THE CIRCUIT COURT, *June* 22, 1816.

Ordered, That the attorney on record in this court, in appeals and writs of error, shall be allowed $20 as a gross charge, and, in addition thereto, fifteen cents per copy sheet of ninety words, in lieu of all other costs; and that the clerk and marshal be allowed in such cases the fees allowed by law in other suits in the common pleas and equity, with the addition of the fees in the admiralty when the laws respecting the fees in the common pleas do not apply; but this shall not be considered as authorizing an additional charge of per centage when money is paid into their hands.

IN THE DISTRICT COURT, *February* 13, 1818.

Ordered, That the district attorney and other proctors who practise in this court be in future allowed, for writs of subpœna issued by them, the same fees as are allowed in the State court for the like services.

By the fourth section of the act of Congress passed 28th February, 1799, (vol. 4 Laws of the United States, page 272, old edition,) compensation was established and allowed to the attorneys of the United States in the following cases, and which have been accordingly taxed:

For each day which any attorney shall necessarily attend on business of the United States, during the session of any district or circuit court,	$5 00
For travelling from the place of his abode to such court, per mile,	10
For drawing interrogatories,	5 00
For drawing and exhibiting a libel claim or answer,	$6 00
For all other services in any one cause,	6 00

No. 2.

Fees proposed to be allowed to the marshal of the United States for the South Carolina district in lieu of those at present allowed by law, viz:

For the service of any writ, warrant, attachment, or process issuing out of the courts of the United States, for each person named,	$2 00
For the necessary travel in serving such writ, warrant, attachment, or process, for each mile,	10

[Travelling, in South Carolina, is expensive; less than the allowance herein recommended would not defray the ordinary expense of travelling.]

For each bail bond,	50
For every commitment or discharge of a prisoner,	50
For every proclamation in the admiralty,	30

For sales of vessels or other property, and for receiving or paying the money, one and a half per cent. commission.

For collecting money under an execution otherwise than by a sale of property, and paying the same away, one per cent. commission.

For summoning each grand or other jury,	10 00

[The expense to the marshal for summoning the juries for the circuit court at Columbia is never less than *fifty dollars*, and frequently more. The jurors are generally scattered over a wide extent of country, which renders the service arduous and expensive.]

For attending the courts of the United States, per day,	5 00

[This constitutes the chief emolument of the marshal's office in the South Carolina district, and without it the profits of the office would be inconsiderable.]

For his travel to attend said courts, per mile,	10

[Travelling, in South Carolina, is expensive; less than the allowance herein recommended would not defray the ordinary expense of travelling.]

The marshal shall have the custody of all property seized by virtue of a process issuing out of the courts of the United States, and shall be allowed such compensation therefor as the court may judge reasonable.

[Perhaps no sum which could be fixed for this service would be reasonable in all the cases which may arise. It is therefore recommended that the compensation should be left to the discretion of the court, as it now is.]

For any services not herein enumerated, the marshal shall be allowed such compensation as the court shall judge reasonable.

[Such a clause as this is necessary to meet extraordinary services.]

N. B. The crier of the court is allowed by the laws of the United States two dollars per day for his attendance on the court when sitting.

No. 3.

**Fees of the clerk of the district court in admiralty and maritime causes, as established by act of Congress of March* 1, 1793.

For drawing every stipulation, &c., each copy sheet of ninety words,	$0 15
For engrossing each sheet,	10
For entering the return of process,	15
For filing every libel claim or other paper,	6
For copies of any pleadings, each copy sheet of ninety words,	10
For entering each proclamation,	15
For entering each default,	12
For entering every rule of court,	15
For certifying each writing shown to witness,	25
For drawing every decree or decretal order, each sheet,	15

For entering every decree or decretal order in minutes, each sheet,	$0 10
For entering a record in the register, or copying proceedings to be sealed or exemplified, each sheet, &c.	10
For every certificate,	20
For entering return of appraisement or sales, each sheet of ninety words,	10
For affixing seal to any paper,	25
For drawing commission to examine witness, each sheet,	15
For engrossing the same on parchment, each sheet,	20
For engrossing the same on paper, each sheet,	10
For swearing each witness in court,	10
For every entry or writing not mentioned or described, such allowance shall be taxed as for similar services herein mentioned.	
For all money deposited in court, one and a quarter per centum.	

By the act of 28th February, 1799, "To the clerks of circuit and district courts in each State, respectively, *the same fees* as are allowed in the supreme court of the said State, *with an addition thereto of one-third of said fees*, and five dollars per day for his attendance at any circuit or district court, and at the rate of ten cents per mile for his travel from the place of his abode to either of said courts; and in case a clerk of a court of the United States perform any duty which is not performed by the clerks of the State, and for which the laws of the State make no provision, the court in which such service shall be performed shall make a reasonable compensation therefor; and in all cases of admiralty jurisdiction the clerk of the district court shall be allowed the same fees as are prescribed by the second section of an act passed the 1st of March, 1793."

By an act of Congress passed April 18, 1814, "the clerks of the district and circuit courts of the United States shall be entitled to one half of one per centum, and no more, on money deposited in court; any law to the contrary notwithstanding."

In every other respect, the rule appears to be a good one which gave to the clerks the same fees as the State allowed, and one-third in addition; a schedule of such fees is, therefore, herewith sent, (marked ‡,) and also a statement of the fees as allowed by act of Congress, (marked *,) which appears only objectionable in the following particulars;† it is considered that the mileage of the officers is too low, the expenses of travelling being very considerable.

It is further respectfully suggested whether the commission on deposites might not be advantageously altered; that perquisite was reduced during the war from one and a quarter to a half per centum; and it is worthy of observation that the clerks are now required to make out and exhibit abstracts at every stated court, so that the emolument is diminished, while the duty is increased. The clerk of the State court here is allowed one per centum; would it not be fair to allow one per cent. to the clerk on any sum deposited not exceeding $5,000, and a half per cent. on such sums as shall exceed?

In criminal cases and cases in equity the clerk is governed by the rule which allows the same fees as the State law in such cases allows, adding one-third.

‡*Extract from the table of fees established by act of the Legislature of South Carolina.*

TO THE CLERK OF THE SUPERIOR COURTS OF LAW.

For signing writ and affixing seal,	$0 21
For filing declaration, plea, or other pleading,	16

† *Alterations respectfully suggested.*

Taking examinations of each witness, (exclusive of 15 cents per copy sheet of ninety words,)	$3 00
Reference of any matter, and report thereon, (only one report in any cause,)	5 00
Drawing, engrossing, recording, or entering, the same fee, the trouble being precisely the same, per copy sheet, say	15
For copying declaration or other writing, per copy sheet,	$0 09
For entering every special order of court, or copy,	11
For every search in record, where cause is ended,	14
For signing every judgment,	43
For drawing jury for special court,	75
For drawing bailpiece, attending and taking bail,	43
For recording every judgment or other writing, per copy sheet,	9
For every recognisance,	43
For every cause tried, swearing jury, and docketing,	43
For swearing every witness,	11
For every certificate, and signing,	11
For administering every oath,	11
For reading a verdict,	11
For attending at judges' chambers,	43
For making out a license for the admission of an attorney, administering oath, &c.	6 43
For issuing a certiorari or other special writ,	75
For dedimus potestatem, &c.	43
For filing and entering return thereof,	21
For entering decree on summary process and execution,	43

TO THE CLERK OF THE SESSIONS AND PEACE.

On a nolle prosequi,	1 50
For bill found or thrown out,	3 21
For bill found, and trial before petit jury,	4 29
For writ of venire,	32
For writ of habeas corpus or bench warrant,	1 50
For writ of subpœna and ticket,	43
For taking recognisance, &c.	54

Fees in equity.

TO THE MASTER.

For every summons,	37
For copy of charge or discharge,	21
For every affidavit,	32
For every oath administered,	11
For every recognisance,	43
For taking oath of defendant to answer,	1 07
For every attendance summons of either party,	75
For hearing and determining any contested matter,	1 07
For making up and returning every report into court,	3 00
Only one report in each case to be charged.	

TO THE REGISTER.

For affixing seal and signing,	54
For affidavit of service of subpœna, &c.	54
For examining every witness, drawing depositions, exemplifications, orders of court, or copies, per copy sheet,	9
For every search,	14
For entering every cause for hearing,	21
For reading all papers in a suit,	43
For examining decree, affixing seal, &c.,	86
For notification to insert in gazette, by order of court, &c.	32
For affixing seal, and signing every commission to take answers and examine witnesses, &c.	54

TO THE PROCTORS.

There is no law at present regulating the fees of proctors in the court of admiralty; the act of Congress on that subject has been repealed; the following schedule is therefore respectfully submitted:

For drawing and exhibiting a petition to judge, and issuing process or precept,	6 00
For drawing and exhibiting libel or answer, plea or claim,	6 00
For drawing interrogatories,	5 00
For all other services in any one cause,	5 00
For issuing summons, case being disposed of on return of summons,	5 00
For preparing and prosecuting appeal,§	20 00

§ This is now allowed by rule of court.

DISTRICT OF GEORGIA.

SIR: SAVANNAH, *September* 17, 1819.

In complying with the resolution of the House of Representatives passed on the 22d February, 1819, I consider it best to transmit a copy of the fee-bill by which the marshal and clerk of this district are at present governed. In cases at common law and in equity, these officers are allowed one-third more than was, at the passage of the act of Congress making this allowance, (1799,) permitted to be charged by the officers of the State courts. The act of this State regulating the fees of officers was passed, I think, in the year 1797—a period at which money was worth much more than it is at the present day; and if, as I think was the case, the fees at that time were not extravagant, it follows that they are not now an adequate compensation for the discharge of the duties required. This is to be presumed, too, from the circumstance of our Legislature (which has never, I believe, been charged with an excess of liberality in compensating our State officers for their services) having, within the last two years, increased the fees of the officers of the courts fifty per cent.

With this view of the subject, I am of opinion that the fees now charged by the marshal and clerk should be increased in the same proportion as the fees of the State officers have been, with the exception of the marshal's charges on sales. I think that he should be allowed three per cent. on the amount of sales under $1,000, and one and a half per cent. on any excess above that sum. These sales are sometimes made at places remote from the residence of the marshal or his deputies, and it then happens that the travelling expenses amount to more than the commissions.

With regard to the salary and fees of the district attorney, they are, in this State, a mere cipher, as I know from having held the appointment for several years. The salary will scarcely defray the expenses of stationary and postage; and in cases at common law he is allowed $4 on each suit prosecuted to judgment, which he only receives if the money is collected from the defendant; but if the defendant proves insolvent, the officers have hitherto been allowed nothing. So long as this practice is adhered to, I think the attorney should be allowed $8 on each judgment from which the amount recovered may be collected; and that, in *qui tam* actions and proceedings to recover forfeitures or penalties, in which the informer or officers of Government are entitled to a part of the penalty or forfeiture, the attorney should be allowed on such part a commission of two and a half per cent.

I am, very respectfully, your obedient servant,

WILLIAM DAVIES, *District Judge of Georgia.*

The Hon. the SPEAKER *of the House of Representatives of the U. S.*

MARSHAL'S FEES FOR THE DISTRICT OF GEORGIA.

For serving any writ, warrant, attachment, or process, issuing out of any court of the United States, or for serving each copy of said writ,	$2 00
For travel in serving such writ, 5 cents per mile, to be computed from the place of service to the court where the writ or process shall be returned; and if more persons than one are named therein, the travel shall be computed from the court to the place of service which shall be the most remote, adding thereto extra travel, which shall be necessary to serve it on the others.	
For each bail bond,	50
For summoning witnesses or appraisers, each,	50
For every commitment or discharge of prisoners, each,	50
For sales of property, and for receiving and paying the money for any sale under $500, 2½ per cent.; for any larger sum, 1¼ per cent. upon the excess.	
For each execution,	2 00
For each case in admiralty,	4 00
For serving warrant,	2 00
For serving monition,	2 00
For each admiralty case in circuit court,	5 00
For attending circuit court,	5 00
For attending district court,	4 00
For serving each subpœna,	2 00
For summoning grand and petit juries, each venire,	4 00
For commissions on expenditures of courts, &c. 2½ per cent.	

CLERK'S FEES FOR THE CIRCUIT AND DISTRICT COURTS.

For issuing writ, if only one defendant, and 68 cents in addition for every defendant more than one,	$4 00
For filing judgment,	80
For issuing execution,	80
For issuing commission to take testimony,	1 50
For issuing subpœna, 50 cents; ticket, 25 cents,	75
For issuing venire facias,	3 00
For entering satisfaction of record,	50
For copy and certificate of the same,	50
For attendance in court, per diem,	5 00

ADMIRALTY FEES.

For drawing every stipulation process, monition, or subpœna, for each sheet of 90 words,	15
For engrossing each sheet,	$0 10

Notice to creditors to attend meetings, each,	25	
Taking and filing bond,	1 00	1 33⅓
Recording and registering deed of conveyance for property sold and transferred by the sheriff,	1 00	1 33⅓
Entering satisfaction of judgment,	25	
Issuing commission to take examination of witnesses,	1 50	

MARSHAL'S FEES,

Allowed by an act of Congress of February 28, 1799, *vol.* 4, *page* 272, *taken from Graydon's Digest, page* 258.

For service of any writ, warrant, attachment, or process issuing out of any of the courts of the United States, - - - $2 00

In case there be more than one person named in the said writ, warrant, attachment, or process, then for each person so named, - - 2 00

For his travel out in serving each writ, warrant, attachment, or process, per mile, to be computed from the place of service to the court where the writ or process shall be returned, - 5

If more persons than one are named therein, the travel shall be computed from the court to the place of service which shall be the most remote, adding thereto the extra travel which shall be necessary to serve it on the others.

For each bail bond, - - - $0 50

For actually summoning witnesses or appraisers, each, - - - - 50

For every commitment or discharge of prisoner, 50

For every proclamation in the admiralty, - 30

For sales of vessels or other property, and for receiving and paying the money for any sum under $500, 2½ per cent.; for any larger sum, upon the excess, 1¼ per cent.

For summoning each grand and other jury, provided that in no case shall the fees for summoning jurors to any one court exceed $50, - 4 00

For attending the district court, per day, - 5 00

For his travel from the place of his abode to said court, per mile, - - - 10

For all such services not herein mentioned, except as shall hereafter be provided, such fees and compensations as are allowed in the Supreme Court of the United States when such services are rendered.

Criers, when they serve at court, per day, - $2 00
Attendants, for their services for attending grand and other juries, and other necessary duties, per day, $2; but not more than three shall be appointed to a court; allowed 2½ per cent. for paying over moneys to the officers of the court.

I am of opinion that the above fees are reasonable.

D. A. CRALL,
Dist. Judge Louisiana District.

NEW ORLEANS, *December* 8, 1819.

In compliance with a resolution of the House of Representatives of the United States, I have the honor to submit to their consideration the enclosed bill of fees for the officers of the district court of the United States for this district.

D. A. CRALL,
District Judge U. S., Louisiana Dist.

DISTRICT ATTORNEY.

For every indictment, - - - $18 00
In every common law case, where judgment has been obtained, - - - 18 00
In admiralty cases, the same fees as are now allowed under the act of Congress.

D. A. CRALL,
District Judge U. S., Louisiana Dist.

NEW ORLEANS, *December* 8, 1819.

The first column of the following table exhibits the legal fees of the clerk of the supreme court of the State of Louisiana, in civil cases, as contra-distinguished from those in admiralty, wherever the services therein specified are performed; and the second column shows the fees which are thought reasonable and ought to be allowed to the clerk of the United States district court in Louisiana.

By an act of the State Legislature, the clerk of the supreme court is allowed *double* the fees given to the clerks of the *State district* courts; and although, from the nature of the supreme court, a number of the services specified in the first table are not performed by the clerk of that court, yet they are required of the clerks of the several district courts of the State, and of the clerk of this court; and, therefore, according to the principle established by the Legislature, if those services were performed by the clerk of the supreme court, his fees would be such as stated in the first column. Formerly, the clerk of the district court of the United States was allowed, in virtue of an act of Congress, one-third more fees than were given to the clerk of the then superior court of the Territory of Orleans, which was the highest court of judicature in the State. The territorial system of courts having been superseded by those established by the State authority, the supreme court is now the highest court of the State, and, therefore, the fees of that court are taken as a standard in the following table for the fees of the clerk of this court; for if one-third be added to the fees allowed to the clerk of the highest *State* court, it will only be a recognition of the principle established during the Territorial Government, which has ceased to apply since the change to State Government; the Territorial superior court, and the fees incident thereto, having been abolished. All, therefore, that is asked, is, to place the clerk of this court in the same situation he was in before the change of Government, by allowing him one-third more fees than are allowed by the State.

The reason why the clerk of the supreme court is allowed greater fees than those of the other courts of the State is because the former, in its nature, is a court of limited jurisdiction, and, consequently, much less business is transacted there than in those of general jurisdiction; the same facts exist with respect to this court, and, consequently, the same reason for an increase of fees applies to it.

It is thought reasonable that the fees in *admiralty* ought to be equal, for equal services, to those in common law cases. The first column shows the admiralty fees established by the act of Congress of 1793; and the second, such as are thought reasonable to be allowed. From the year 1793 until 1814, the clerk of this court was allowed one and a quarter per cent. commission on all moneys deposited in court; but during the war it was reduced to one-half per cent., in consequence of the number and amount of prizes brought in and condemned; but as that reason no longer applies, it is hoped that the former commission will be allowed. In addition to the reasons assigned for an increase of fees, it is known that the expense of living in New Orleans is proverbially great. Even the stationary and office furniture necessary to a clerk's office cost much more here than, perhaps, in any other section of the Union.

These remarks are respectfully submitted for consideration.

Fees proper to be allowed to the Clerk of the District Court of the United States.—See 2d column.

In common law.		
For endorsing, registering, and filing petition,	$0 25	$0 33⅓
Endorsing, registering, and filing answer,	25	33⅓

Copy of citation of appeal,	-	1 00
Issuing order of sale,	-	1 00
Taxing costs,	-	2 66⅔
Taking and filing bond,	-	2 66⅔
Every entry or writing not mentioned or described, such allowance shall be taxed as for similar services herein mentioned.		

NOTE.—In the second column, and opposite to the fees allowed for each ninety words, I have put such fees as think ought to be charged for each one hundred words, as being more convenient to calculate.

SAMUEL H. HARPER, *Clerk.*

I am of opinion that the clerk's fees ought to be increased; and the addition proposed is deemed to be a reasonable one. The clerk is not permitted to practise, and depends solely for support on his office.

D. A. CRALL, *District Judge U. S. L. D.*

DISTRICT OF INDIANA.

SIR: CORYDON, *November* 8, 1819.

I have the honor herewith, to enclose you a schedule of fees, prepared in conformity to a resolution of the House of Representatives of the United States of February 22, 1819.

I have the honor to be, with great respect, your obedient servant,

B. PARKE.

The Hon. the SPEAKER *of the House of Representatives of the United States.*

A schedule of fees proper to be allowed in the district court of the United States for the Indiana district.

For every capias and seal,	$0 75
For entering action,	21
For filing writ,	14
For drawing bond for costs,	$0 50
For filing declaration or other pleading, each,	14
For copy of declaration or other pleading, per sheet of seventy-two words,	15
For altering declaration in ejectment, and admitting defendant,	37½

*$4 each commission, as in common law.

For discontinuance or retraxit, - - $0 75
For entering order or rule thereon, - - 50
For copy of every rule of court, - - 25
For entering satisfaction on record, - 50
For receiving and entering verdict, - - 37½
For entering judgment, - - - 37½
For an execution, - - - 75
For entering defendant's appearance, - 25
For entering on docket, - - - 25
For receiving and entering the traverse, panel, and swearing jury, - - - 1 00
For each subpœna, - - - 75
For each writ of possession and seal, - 1 00
For each scire facias, - - - 1 00
For each venire facias, - - 75
For every attachment or rule of court to show cause, - - - - 75
For swearing officer to attend jury, - 25
For swearing each witness, - - 21
For swearing plaintiff or defendant on affidavit to continue, - - - 21
For entering report of referees, per sheet of seventy-two words, - - - 15
On confession of judgment, default, joinder, or demurrer, - - - 37½
For entering rule of court for the appointment of referees, - - - 37½
On surrendering principal in court by sureties, 40
For entering every order thereon, or copy thereof, 25
For every issue joined, - - - 37½
For every trial, - - - 75
For issuing commission to take depositions, - 75
For each subpœna in chancery or writ of injunction, or copy thereof, - - - 1 00
For every attachment for contempt, - 75
For every writ of elegit, venditioni exponas, or other special writ, or copy thereof, - 1 00
For recording every official certificate, - 37½
For entering appearance of either party in person or by attorney, - - - 21
For making complete record, or copy thereof, per sheet of seventy-two words, - - 15
For copy of a grant or patent separate from a complete record, - - - 66⅔
For copy of every entry from commissioners' books, - - - - 37½
For copy of every entry from surveyor's books, 21½
For every entry entered on the rule docket or in court, - - - - 37½
For each order to advertise or order of survey, or copy thereof, - - - 57½
For entering decree, or copy thereof, per sheet of seventy-two words, - - 15
For taxing the costs in any action, or copy thereof, - - - - 50
For every order to witness for attendance, or copy thereof, to be charged to the person against whom such order goes, - - 25
For copy of a bond or note for payment of money only, - - - - 66⅔
For copy of bond with condition, - - 75
For endorsement on a subpœna in injunction, - 15
For filing depositions, - - - 37½
For recording any verdict of a jury or matter agreed upon by the parties, per sheet of seventy-two words, - - - 15
For recording the award of auditors, viewers, or report of commissioners, or a copy thereof, per sheet of seventy-two words, - - 15
For recording every paper filed, or copy thereof, per sheet of seventy-two words, - - 15
For recording bond for the conveyance of land, or copy thereof, - - - 75
For filing the papers of each party in the cause, 35
For affixing the seal of office, and certificate accompanying the same, - - 75
For entering special bail, - - 50
For copy of an account not included in a complete record, if it be contained in one page or less, for recording the same, - - 75
For recording of an account of more than one page, for every seventy-two words or figures, $0 15
For copy of complete record, per sheet of seventy-two words, - - - 15
For recording of articles of agreement, or copy thereof, - - - - 75
For each certificate for which no fee is allowed, 50
For copy of witnesses' claim, - - 25
For taking bail in or out of court, - - 50
For discharging special bail, - - 37½
For entering order of defendant into custody, - 25
For drawing injunction bond, - - 75
For entering judgment and fine for contempt, - 50
For each day's attendance at court, - 5 00
For all moneys paid into court, one per cent.

MARSHAL'S FEES.

For serving writ, warrant, attachment, or other process, - - - - 2 00
If more than one named therein, for each person, 2 00
For every bail bond, - - - 1 00
For his travel out in serving each writ, warrant, attachment, or other process, to be computed from the place of service to the court where the writ or process shall be returned, six cents per mile.
If more persons than one are named therein, the travel shall be computed from the court to the place of service, which shall be the most remote, adding thereto the extra travel, which shall be necessary to serve it on the other.
For returning each writ or subpœna, - 12½
For every commitment, - - - 75
For every discharge, - - - 75
For calling each jury, - - - 25
For summoning grand or traverse jury, - 5 00
For attending prisoner before a judge when surrendered by his bail, and receiving such prisoner into custody, - - - 1 00
For summoning jury to try the right of property, 3 00
For serving every rule of court, - - 50
For mileage thereon, per mile, - - 6
For calling each witness, - - 12½
For calling action, - - - 12½
For dieting prisoner, per day, - - 31¼
For proceeding to sell on any execution, if the property be actually sold, the commission to the marshal shall be five per centum on the first five hundred dollars, and two per centum on all sums above that; and half of such commission when the money is paid to the marshal without seizure, or when the lands or goods seized or taken shall not be sold; which commission shall come off the debtor; and no other fee or reward shall be allowed upon any execution, except for the expense of receiving and keeping the property.
For making deed on the sale of real property, - 5 00
For serving writ of possession without the aid of the posse, - - - 3 00
For serving same with the aid of the posse, - 6 00
For all moneys disbursed on the part of the Government, three per cent.
For each mile in travelling to and from court, - 5
For each day's attendance at court, - 5 00

JURORS' AND WITNESSES' FEES.

For each mile in travelling to and from court, - 5
For each day at court, - - - 1 50

FEES OF ATTORNEY FOR THE DISTRICT.

For each mile in travelling to and from court, - 5
For each action, information, bill or plaint, or indictment, - - - 10 00
For attending the taking depositions on the part of the United States, per day, - - 5 00
For every action in court, whether at law or in equity, - - - - 10 00

CRIER'S FEES.

For each day's attendance in court, - 2 50

DISTRICT OF MISSISSIPPI.

SIR: NATCHEZ, MISSISSIPPI, *January* 6, 1820.

In obedience to the resolution of the House of Representatives of the 22d of February last, I have the honor herewith to enclose you a schedule of fees proper to be allowed and taxed for the officers of the district court of this district. It may not be improper to remark that, in making out the list, I have had regard to the fees allowed in the State courts.

Circumstances which I could not control have prevented me from making this communication as early as I had designed.

I have the honor to be, very respectfully, your obedient servant,

W. B. SHIELDS.

THOMAS DOUGHERTY, Esq., *Clerk of the House of Representatives.*

A list of fees which are deemed proper to be taxed in the district court of the United States for the district of Mississippi.

CLERK'S FEES.

In chancery.

Entering each action,	$0 50
Entering appearance,	50
Filing each paper,	25
Copies, per sheet of 100 words,	40
Entering each rule,	50
Entering each continuance,	50
Entering dismission, discontinuance, or non pros.,	50
Setting cause for hearing,	50
Each writ in equity,	3 00
Enrolling or recording decree, per 100 words,	50
Each injunction bond,	1 50
Entering each motion,	50
Administering each oath,	50
Certificate,	50
Affixing seal,	1 00
Taxing costs and copy,	1 50
Reading papers when required, per page,	12½

In civil cases at common law.

Each writ other than those specified,	2 50
Entering and return,	50
Docketing every cause, to be charged but once,	50
Filing each paper,	25
Entering appearance,	50
Every motion or order in court,	50
Declaration in ejectment,	5 00
Entering nonsuit, discontinuance, or non pros.,	1 00
Order and copy of rule of reference,	2 00
Swearing each witness,	2 00
Entering each continuance,	1 00
Venire facias in each cause tried by jury,	50
Scire facias, (except against jurors when excused,)	4 00
Scire facias against defaulting jurors,	3 00
Swearing and empannelling each jury,	1 00
Receiving and entering verdict,	50
Entering every judgment in court,	75
Copies thereof, per 100 words,	40
All other copies, per 100 words,	40

Commitment or discharge of a prisoner,	1 00
Every proclamation in the admiralty,	50
Attending district court, per day,	5 00
Travelling to court, per mile,	12½
Levying execution,	2 00
Entering and return of the same,	50
Assignment of bail bond,	50
Executing venire facias, to be taxed in each cause tried,	50
Summoning a special jury,	10 00
Summoning a panel,	10 00
Executing writ of possession and return,	3 00
Deed to purchasers of real estate,	5 00
Attending prisoner on habeas corpus, each day,	3 00
Serving declaration in ejectment, and copy thereof,	4 00
Travelling, to be computed from place of service to court-house, adding extra distance, if more than one be named in the process, per mile,	12½
Making the money on all executions, if it do not exceed $100, 5 per cent.; and on all sums above $100, and not exceeding $1,000, 2½ per cent.; and in larger sums, 1½ per cent. on the excess.	
For extra services, per annum,	500 00

16th Congress.] No. 493. [2d Session.

APPROVAL OF THE CONSTITUTION, AND ADMISSION OF MISSOURI INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 23, 1820.

Mr. LOWNDES, from the committee to whom had been referred the constitution of the State of Missouri, reported:

That they have not supposed themselves bound to inquire whether the provisions of the constitution referred to them be wise or liberal. The grave and difficult question as to the restraints which should be imposed upon the power of Missouri to form a constitution for itself was decided by the act of the last session; and the committee have had only to examine whether the provisions of that act have been complied with. In the opinion of the committee, they have been. The propositions, too, which were offered in the same act to the free acceptance or rejection of the people of Missouri, have all been accepted by them. But there remains a question too important to be overlooked.

We know that cases must often arise in which there may be doubt whether the laws or constitution of a State do not transcend the line (sometimes the obscure line) which separates the powers of the different Governments of our complex system. It appears to the committee that, in general, it must be unwise in Congress to anticipate judicial decision by the exposition of an equivocal phrase, and that it would be yet more objectionable, by deciding on the powers of a State just emerged from Territorial dependance, that it should give the weight of its authority to an opinion which might condemn the laws and constitutions of old as well as sovereign States. The committee are not unaware that a part of the twenty-sixth section of the third article of the constitution of Missouri, by which the Legislature of the State has been directed to pass laws "to prevent free negroes and mulattoes from coming to and settling in the State," has been construed to apply to such of that class as are citizens of the United States, and that their exclusion has been deemed repugnant to the federal constitution. The words which are objected to are to be found in the laws of at least one of the middle States, (Delaware;) and a careful examination of the clause might perhaps countenance the opinion that it applies to the large class of free negroes and mulattoes who cannot be considered as citizens of any State. But, of all the articles in our constitution, there is probably not one more difficult to construe well than that which gives to the citizens of each State the privileges and immunities of citizens of the several States; there is not one an attention to whose spirit is more necessary to the convenient and beneficial connexion of the States; nor one of which too large a construction would more completely break down their defensive power, and lead more directly to their consolidation. This much, indeed, seems to be settled by the established constitutions of States in every section of our Union—that a State has a right to discriminate between the white and the black man, both in respect to political and civil privileges, though both be citizens of another State; to give to the one, for instance, the right of voting and of serving on juries, which it refuses to the other. How far this discrimination may be carried is obviously a matter of nice and difficult inquiry. The committee do not propose to engage in it; they believe it best, whenever a case occurs which must *necessarily* involve the decision of it, that it should be committed to judicial cognizance.

In this view (which narrows their inquiries and duties) the committee are confirmed by a consideration of the embarrassments and disasters which a different course of proceeding might sometimes produce. When a people are authorized to form a State, and do so, the trammels of their Territorial condition fall off. They have performed the act which makes them sovereign and independent. If they pass an unconstitutional law, and we leave it, as we should that of another State, to the decision of a judicial tribunal, the illegal act is divested of its force by the operation of a system with which we are familiar; the control of the General Government is exercised in each particular case in support of individual right; and the State retains the condition which it has just acquired and would not easily renounce. But a decision by Congress against the constitutionality of a law passed by a State of which it had authorized the establishment could not operate directly by vacating the law, nor is it believed that it could reduce the State to the dependance of a Territory. In these circumstances, to refuse admission into the Union to such a State is to refuse to extend over it that judicial authority which might vacate the obnoxious law, and to expose all the interests of the Government within the territory of that State to a Legislature and Judiciary, the only checks on which have been abandoned. On the other hand, if Congress shall determine neither to expound clauses which are obscure, nor to decide constitutional questions which must be difficult and perplexing, equally interesting to old States, whom our construction could not, as to the new, whom it ought not to coerce, the rights and duties of Missouri will be left to the determination of the same temperate and impartial tribunal which has decided the conflicting claims, and received the confidence of the other States.

The committee recommend the adoption of the following resolution:

Resolution declaring the admission of the State of Missouri into the Union.

Whereas, in pursuance of an act of Congress passed on the 6th day of March, 1820, entitled "An act to authorize the people of the Missouri Territory to form a constitution and State Government, and for the admission of such State into the Union on an equal footing with the original States, and to prohibit slavery in certain Territories," the people of the said Territory did, on the 19th of July, 1820, by a convention called for that purpose, form for themselves a constitution and State Government, which constitution and State Government so formed is republican, and in conformity to the provisions of the said act:

Be it therefore resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the State of Missouri shall be, and is hereby declared to be, one of the United States of America, and is admitted into the Union on an equal footing with the original States in all respects whatever.

16th Congress.] No. 494. [2d Session.

CITY OF WASHINGTON: FIRE ENGINES AND APPARATUS.

COMMUNICATED TO THE SENATE, DECEMBER 13, 1820.

To the Senate of the United States: DECEMBER 12, 1820.

In compliance with a resolution of the Senate of the 6th December, requesting that the agent employed under the act entitled "An act authorizing the purchase of fire engines, and building houses for the safe keeping of the same," should report, in the manner stated in the said resolution, his conduct in execution of the said act, I now transmit to the Senate a report from the agent, which communicates all the information which has been desired.

JAMES MONROE.

SIR: WASHINGTON, *December* 11, 1820.

In obedience to a resolution of the Senate of the United States requesting the President of the United States to cause the agent employed under the act entitled "An act authorizing the purchase of fire engines, and for building houses for the safe keeping of the same," to inform the Senate if said act is carried into complete effect; if not, to what degree, and why not *fully;* and also if a warrant has been issued from the Treasury Department for the sum appropriated, and, if so, *when* issued; I have the honor to state that, in proceeding to carry into effect the act referred to, I caused notices to be inserted at Baltimore, Philadelphia, New York, and Boston, inviting proposals for furnishing the engines; that, in consequence of proposals received, among others, from Messrs. Perkins & Bacon, of Philadelphia, I was induced to go in person to that place, in order to investigate more particularly the character of the engines executed by them, (which were professed to be of an improved kind,) and to endeavor to procure more favorable terms than had been offered; that eventually I did contract with the persons above named for furnishing the engines at a reduction of one hundred and fifty dollars on each from their first proposals; that, under date of October 22, 1819, I was advised of the completion of one of the engines, and that the other would be shortly completed. I thereupon applied for and obtained a warrant, dated the 4th of November, 1819, for the sum appropriated by the act referred to, which sum was deposited to my credit in the Patriotic Bank of this city. On the 15th of December, one, and on the 3d of January following, the other engine arrived here.

In procuring the rivet-hose and its appendages, I have not been so successful. I could not learn that this article was manufactured anywhere except by the original patentees, Messrs. Sellers & Pennock, of Philadelphia. Upon inquiry of them, I was satisfied that, taking into view the great reduction in the price of materials and labor, their demands were exorbitantly high, and spent considerable time in attempting, by direct negotiation, as well as through a friend at Philadelphia, and their agent (Dr. Ott) at this place, to reduce them to reasonable terms; but without much prospect of success. At length I received a proposition from Dr. Ott to furnish the articles above eight per cent. lower than the manufacturers' prices, and, on the 1st day of June last, entered into a written contract with him in conformity thereto; and, upon his giving security, advanced the estimated amount of the articles. The death of Dr. Ott, happening shortly afterwards, produced some unexpected difficulties, which my subsequent correspondence with Messrs. Sellers & Pennock (copies of which are annexed) will explain. I have only to add, under this head, that, the articles having arrived here, I am assured it is in the contemplation of Dr. Ott's administrators to reclaim them; in which event, they would be immediately turned over to me. It is hoped the decision of this point will not be much longer delayed.

The annexed abstract (marked A) exhibits the expenditures already incurred, amounting to $2,590 49, which, deducted from the appropriation, leaves the sum of $1,909 51 applicable to the erection of engine-houses. By the terms of the law, these houses are to be located, one near the Capitol, the other near the President's house. They ought to be placed in situations the most accessible and conspicuous, and, therefore, should be erected in a style corresponding with the buildings to which they would appear as appendages. It is very obvious that the sum in hand would go but a little way towards accomplishing this object; it was, therefore, thought advisable to construct a temporary house out of refuse lumber at the Capitol for one engine, and to deposite the other in the offices attached to the President's house, until some further provision was made.

I have the honor to be, most respectfully, your obedient servant,

SAMUEL LANE, *Commissioner of Public Buildings.*

To the PRESIDENT OF THE UNITED STATES.

RESPECTED FRIEND: PHILADELPHIA, 1*st of 8th Month*, 1820.

On hearing of the lamented death of Dr. Ott, we wrote thee, enclosing an order given us by him for fire apparatus for the Capitol and President's house, requesting thy authority for proceeding to complete the order. Not having heard from thee, we are apprehensive our letter must have miscarried; we therefore beg leave to repeat the substance of it. Dr. Ott, in his late visit to this city, contracted with us to furnish the following apparatus: 600 feet engine hose, per foot 65 cents; 100 feet to be in sections of 25 feet, the remainder 50 feet sections; 14 connecting screws, each $4 25; 2 pairs wrenches, $1; 2 hose carriages, made to carry 500 feet—one marked "Capitol U. S.," the other, "President's house," each $225; repairing anvil and compressor, $2; 2 elbow pipes, each $5. They are in considerable forwardness: the hose-carriages are now nearly completed; the hose is finished; the connecting screws are ready to be attached, and all the other articles (elbow pipes excepted, which can be prepared without delay) are made. We would be obliged by thy advising us whether these articles are to be transmitted to thee when in a condition to be shipped, and whether payment therefor will be assumed by thee, as we should not like to refer for payment to Dr. Ott's estate, presuming there will be the usual delay of one year in the settlement of it. When Dr. Ott was in the city, he was much inclined to adopt connecting boxes in lieu of swivel screws. He was to have written us in relation to them. On this subject we wish thee would confer with our mutual friend A. Coyle, who is apprized of the advantages of the connecting boxes.

We remain thy friends,

Colonel LANE. SELLERS & PENNOCK.

GENTLEMEN: WASHINGTON, *August* 3, 1820.

Your letter of the 1st instant is received. I had contracted with the late Dr. Ott for the delivery of the articles you mention, but at prices somewhat lower than those quoted by you. I advanced the estimated amount of the articles; of course, I cannot pay for them again, but must look to the administrators of the doctor's estate for a performance of the contract. I need not add that the articles would be received if in conformity with the contract. I was to pay freight. There is no question about the solvency of the doctor's estate.

Your very obedient servant,

S. LANE, *Commissioner of Public Buildings.*

Messrs. SELLERS & PENNOCK.

RESPECTED FRIEND: PHILADELPHIA, *25th of 9th Month*, 1820.

We have shipped by the Hilan, Captain John Hand, the fire apparatus ordered by the late Dr. Ott, (under insurance,) to the care of our mutual friend Andrew Coyle, of your city, who is authorized by us to deliver the same, and receive payment therefor, according to the annexed invoice, adding freight (which will be $30) and such other charges as may be incidental to their transmission.

We remain thy friends,

Colonel S. LANE. SELLERS & PENNOCK.

GENTLEMEN: WASHINGTON, *September* 28, 1820.

In my letter of the 3d of August I informed you of having advanced to Dr. Ott the estimated amount of the articles which he ordered of you, and that I could not pay for them again. From your now advising that these articles are shipped, to be delivered to me upon paying for them, I am apprehensive that my letter has miscarried, and hasten to inform you of its purport, that you may give such further orders as to you may seem best. The articles cannot be received upon the condition mentioned.

Your obedient servant,

S. LANE, *Commissioner of Public Buildings.*

Messrs. SELLERS & PENNOCK.

A.

Abstract of disbursements made by Samuel Lane, Commissioner of Public Buildings, on account of fire engines.

Date.	Vouchers.	To whom paid.	On what account paid.	Amount.
Dec. 15, 1819,	1	Joseph Hand, -	For freight of one engine from Philadelphia, - $20 00 For wharfage, - - - - - 1 00	$21 00
Dec. 16, 1819,	2	Thomas McNew,	For hauling do. from Georgetown to the Capitol, -	2 00
Jan. 3, 1820,	3	Moses Hawkins,	For freight of one large and three small engines, -	26 00
Jan. 7, 1820,	4	William Smith,	For hauling three engines from navy yard to President's house, - - - - -	2 00
Jan. 31, 1820,	5	Perkins & Bacon,	For two first class fire engines, with pipes, hose, &c. complete, at $600, - - - $1,200 00 For two forcing pumps, with carriages, hose, &c. at $80, - - - - 160 00 For one domestic engine, with pipes, &c. at - 50 00 Insurance on $1,410, at 1¼ per cent. $17 62; two policies, $2, - - - - 19 62	1,429 62
May 8, 1820,	6	David Stewart, -	One large bell, and fixing the same, $8 25; pair of strong lamps, and fixing same, $13; ropes with tugs, and covering same with leather, $13 62, for engine, - -	34 87
June 1, 1820,	7	David Ott, -	Advanced upon his contract for hose, &c. (O. Carr security,)	1,075 00
				$2,590 49

Errors excepted.

SAMUEL LANE, *Commissioner of Public Buildings.*

WASHINGTON, *December* 11, 1820.

16th CONGRESS.] No. 495. [2d SESSION.

EXTENSION OF A PATENT RIGHT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 15, 1820.

Mr. MALLARY, from the select committee to whom was referred the petition of Benjamin Tyler and John Tyler, reported:

That, on the 20th February, 1800, Benjamin Tyler, of Claremont, in the State of New Hampshire, obtained a patent for a new and useful improvement of water wheels, to be used in mills of different descriptions. Soon after, an assignment was duly made to the petitioners, except to four counties in the State of Vermont.

Immediately after the date of the patent and assignment, the proprietors, with a view to give the invention an early introduction, and prove its utility, put it in operation in different parts of the United States. This was attended with great expense, and from which immediate remuneration was not expected.

Soon after the improvement was known, the right of the petitioners was repeatedly violated. The proprietors considered it necessary to maintain their claim by a suit at law. An action was accordingly instituted before the circuit court of the United States in 1804. This produced a powerful combination of mill owners to defend the suit, and destroy the validity of the patent. After a full investigation of its merits at the trial of the suit, a verdict was returned in favor of the petitioners. This verdict was afterwards set aside by the Supreme Court of the United States, in 1810, in consequence of the assignment of the patentee not being for the whole of his interest; four counties only of the whole United States being excepted.

It appears that the expenditures of the petitioners in attempting to support their rights have never been remunerated by the profits of the invention.

It appears that, during the existence of the suit above mentioned, the reputation of the patent was very greatly injured in public estimation by the false representations of those who had an interest in its destruction.

The petitioners have presented a mass of testimony from different parts of the Union, which proves, undeniably, the great value and importance of the invention.

As an excuse to the petitioners for urging this claim at this late period, the committee consider it proper to mention that they presented their petition to Congress for relief in 1811, when a report favorable to their pretensions was made, and upon which there was no decision of the House. [See vol. 2, page 146.]

In 1816, the subject was again considered by a different committee; a favorable report was made, a bill was presented, twice read, and met with no other consideration, so far as can be ascertained by the committee. [See No. 393, page 278.]

Considering the importance to the public and to individuals that the encouragements intended by the constitution should be effectually secured to inventors and discoverers; that the improvement in question is of great public utility; that the petitioners have been deprived of the advantages and emoluments to which they were justly entitled, from no improper conduct of their own, but from circumstances over which they had no control, the committee consider the prayer of said petitioners reasonable, and ought to be granted.

16th Congress.] No. 496. [2d Session.

ENCOURAGEMENT OF THE FINE ARTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 24, 1821.

Mr. Wood, from the Committee on the Public Buildings, to whom was referred the petition of Julia Plantou, of the city of Philadelphia, reported:

That the petitioner states that, having from early life an ardent attachment to the art of painting, she was encouraged by the approbation of intelligent gentlemen, on whose judgment she relied, to cultivate her talents for this branch of the fine arts; that, for this purpose, she visited Europe to inspect the works of the great masters of the art, in order to improve her taste and talents, and to render them worthy of the consideration of her enlightened countrymen; that, while there, she spared no pains in her improvement, under the direction of the first artists of the age.

Anxious that her own country should reap the fruits of her improvement, and desirous to commemorate some of its distinguished events, she selected as the most interesting subject of her pencil the concluding scene of the late war, and has, with great labor and assiduity, accomplished an emblematical representation of the treaty of Ghent, which she now offers to the acceptance of Congress, and prays for such remuneration for her performance as the design and execution may, in their estimation, be worth.

The committee are not insensible of the importance of the fine arts in the scale of social improvement, or of the claim those who cultivate them have upon the public munificence; they derive much pleasure from contemplating the progress of improvements in the United States, and are happy to perceive the cultivation of the arts that contribute to the embellishment of society, as well as such as are essential to its wellbeing.

It must be admitted that the fine arts not only serve to amuse and please as the evanescent exertions of rare and extraordinary genius, but they elevate the mind, purify the moral feelings, create a relish for pure and refined pleasures, and diffuse a taste for kindred arts and improvements; they serve to commemorate important eras in the history of nations, to preserve the memory of distinguished citizens, and to inspire succeeding ages with an emulation of their virtues; they, in effect, connect the past with the present, and thus invigorate public spirit, keep alive a sense of national honor, and contribute to promote the national glory.

The committee cannot behold without the most pleasing emotions a female fellow-citizen, prompted by the ardor of genius, abandoning all the pleasurable amusements of her sex, and braving the dangers of the ocean in search of the aid and instruction in foreign regions which her native soil did not afford; and would most cheerfully recommend her productions to the patronage of Congress did they conceive it compatible with the powers of Congress to afford it, or consistent with the duty they owe their country.

Such a course is, indeed, not without precedent, but the committee are not able to perceive by what article of the constitution it can be sustained.

A Government without restriction doubtless possesses powers commensurate with every public improvement that can contribute to the welfare or glory of a nation; but the Government of the United States is restricted to the objects enumerated in the constitution, and the committee cannot discover that the encouragement of the fine arts is among the number.

Independently of this difficulty, the committee conceive that the pressure of the times and the exhausted state of the treasury imperiously require that the public buildings should be completed before any further appropriation is made for their embellishment.

The committee, therefore, recommend the following resolution:

Resolved, That the prayer of the petitioner ought not to be granted.

16th Congress.] No. 497. [2d Session.

OCCUPATION OF COLUMBIA RIVER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 25, 1821.

Mr. Floyd, from the committee to whom was referred the resolution of the 19th of December, 1820, to inquire into the situation of the settlements upon the Pacific ocean, and the expediency of occupying the Columbia river, reported:

That they have carefully examined the subject referred to them, and, from every consideration which they have been able to bestow upon it, believe, from the usage of all nations, previous and subsequent to the discovery of America, the title of the United States to a very large portion of the coast of the Pacific ocean to be well founded; nor have they been able to ascertain that any other Government than Spain has made claim to any part of it from Cape Horn to the sixtieth degree of north latitude.

When this continent was first made known to Europe by the bold and enterprising genius of Christopher Columbus, it seemed for a long time conceded that the Spanish monarchy, which alone could be prevailed upon to listen to his plans and propositions, was most entitled to the benefits resulting from the successful issue of his undertaking. Though Ferdinand and Isabella, who at that time filled the throne of that country, did not rest their title upon the tacit consent of other nations, or even upon their armies or fleet, (which was, at that period, formidable and well provided,) but, instructed by the example of the Portuguese, who had obtained a grant for all countries east of the Azores, from pole to pole, they obtained a similar grant from the Roman Pontiff of all the territories they wished to occupy west of the same point, as the superstition of the times conferred on him a right of dominion over all the kingdoms of the earth. Thus, in virtue of his power, as the vicar and representative of Jesus Christ, did Alexander VI., in 1493, grant to the Crown of Spain, in full right, all the countries inhabited by infidels which they had or should discover.

Enormous as the power was which the Popes then exercised, it was recognised and submitted to by the monarchs of that day, and considered as having vested in Spain a title which they deemed completely valid, and authorized her to extend her discoveries and establish her dominion over a great portion of the new world. The Spanish Crown, as well as individuals, the subjects of that Power, continued to fit out ships for voyages of discovery, and, in the space of a few years, had visited various parts of the coast of America, from the Gulf of Mexico to many degrees south of the equinoctial line, taking possession, according to the custom of that day, in the name of the Spanish King. Nor was their zeal for discovery confined to the Atlantic shore alone; parties, under daring and enterprising leaders, penetrated far into the interior of the continent, and even to the shores of the Pacific ocean, wresting by violence the rich empires of Peru and Mexico from the peaceful and legitimate sovereigns who reigned over them, and annexed them to the Crown of Spain by the triple title of conquest, discovery, and the grant of the Pope.

So well satisfied do the rest of Europe seem to have been of the rights of Spain, derived from such high authority, that they permitted her to progress unmolested in her career of discovery and conquest for many years, until she had acquired the undisputed possession of most of the Atlantic coast of South America, and the whole shore of the Pacific as high as the northern extremity of California, and, as they affirmed after they came in possession of Louisiana, to a point far to the northward of that.

Though discoveries were frequently made of countries among the most beautiful and fertile, where nature seemed to invite the industry of man to the enjoyment of luxuriant abundance, yet none seemed to arrest the attention of either Government or people but those which contained the precious metals. This morbid thirst for gold may be the cause why no settlements were made north of California, as no metal of that description is believed to be found in that region.

About this time it became the interest of the British Crown to think differently on the subject of religion from the see of Rome, and, separating entirely from it, assumed the right of annexing to their Crown all the territories discovered by their subjects, and of bestowing them by charter upon individuals. To this end, grants were issued by Elizabeth in the years 1578 and 1584—the one to Sir Humphrey Gilbert, the other to Sir Walter Raleigh, which were limited to a certain number of leagues; but those issued in 1606, 1608, and 1611, by James I., in the charters for Virginia, were declared to embrace the whole extent of country from thirty-four to forty-five degrees of north latitude, extending from sea to sea, always excepting the territories of any Christian prince or people.

It is believed that when these charters were granted by the monarchs of England, they were not well apprized of the extent of country they were giving away; but, from their reservations in regard to the title of Christian princes or people, they were apprized of the title of Spain upon the Western ocean, though not informed of its extent; as it is evident, from the words *Christian* and *infidel* often occurring, both in the charters of the monarchs and the bulls of the Pope, the legitimate sovereigns, as well as people of this country, in that day, were considered as possessing no rights. With whatever care they avoided collisions with each other respecting territory, which might produce a war with a Power equally skilled in the military art with themselves, they were not scrupulous in dispossessing the natives of both Americas of their country, all of whom were as brave, as generous, and magnanimous as themselves, and some of whom as far advanced in civilization and the arts of peace, though not professing to be Christians, or skilled in war.

The opinion of Europe undergoing another change upon the subject of discoveries in unknown regions, they were now reduced to a more definite and reasonable extent; consequently, in a few years, a third mode of obtaining territory came to be admitted by all as the basis on which they could safely rely for a just decision of their claims, should difficulties present themselves; and one which, to a moderate extent, gave to all nations the benefit of their own labors. By this rule, too, all the territory thus acquired was vested in the state rather than the Crown, which Spanish jurisprudence, under the authority of the Pope, seemed to consider.

Hence, the Power which discovered a country was entitled to the whole extent of soil watered by the springs of the principal river or watercourse passing through it, provided there was settlement made, or possession taken, with the usual formalities, in the name and on the behalf of the Government to whom the individual owed allegiance, though the tacit consent of all seemed to yield the sovereignty from sea to sea, where no settlement or express possession was had of an intermediate country; and such right was held good to the whole extent, but not wholly confirmed until another settlement was made at a distinct point upon the same territory beyond the water of the first, or so distant as not manifestly to encroach upon the establishments of the coast: other Powers, though, might avail themselves of the failure of the first to occupy another principal stream, or distant point, and become thereby vested with a full right of sovereignty. This seems to have been the condition of America until the close of the

war of 1812; since which time all treaties have yielded to the different Powers, in full right, all they claimed, either by settlement, or from the failure of others to occupy the principal streams when they might do so. There is now no longer territory to be obtained by settlement or discovery; and if there should be any difficulty, it will be where the different limits of the different Powers shall be fixed.

Impressed with a belief that, under this mode, valuable possessions might be added to the French monarchy, it is presumed Sieurs Joliet and Marquette penetrated the unknown wilderness from Canada, and discovered the Mississippi so long ago as the year 1673, and explored it down to the Arkansas. Perhaps encouraged by their success, a few years after Hennepin visited those regions, and pursued that river to its mouth. His representations, with other considerations, two years after, induced M. de la Salle and M. Tonti to descend that river with a considerable force to the Gulf of Mexico, and they are believed to have built the fort during that trip; the bricks and other remains of which are now to be seen on the first high ground on the west side of the Mississippi below the mouth of the White river.

After this period (in 1685) M. de la Salle, being on his return from France, landed on the west side of the Rio Colorado, in the bay of St. Bernard, and planted a considerable colony there, taking possession, in due and solemn form, in the name of the French King. Such were the discoveries which gave to France the country called Louisiana, from the Rio Grande del Norte, being the next great river to the west of that settlement, along the mountains of Mexico and New Spain, west, as the western limits, and California as the eastern boundary. That France, and all other nations interested in its boundary, considered it in the same light, is ascertained in various ways, to the conviction of the most incredulous.

In consequence of these settlements and discoveries of the French, Louis XIV. granted, by letters patent, in the year 1712, to Anthony Crozat, the exclusive commerce of that country, and defines its boundary, declaring that it comprehends all lands, coasts, and islands situated in the Gulf of Mexico, between California on the east, and Old and New Mexico on the west. The French title to these boundaries is further established by the Chevalier de Champigny, who lived in the country, and declares Louisiana to extend to the Rio Grande del Norte and the mountains of Mexico. This appears to be the opinion of other writers, who, it is presumed, had the most intimate knowledge of the subject, and, among them, we find that intelligent statesman the Count de Vergennes, in a work entitled "An Historical and Political Memoir of Louisiana," where he says "it is bounded by Florida on the east, and by Mexico on the west." The same extent is assigned to it by Don Antonio de Alcedo, an officer of high rank in the service of Spain, in a work entitled "Diccionario Geografico Historico de las Indias Occidentales ó America." Don Thomas Lopez, geographer to the King of Spain, in a map published in 1762, is of the same opinion, which is supported by the opinion of De Lisle, of the Royal Academy of Paris, in the year 1782.

Upon the testimony of so many respectable writers, many of whom were in the employment of both France and Spain, not to mention the authority of Du Pratz, it is believed the United States may with safety rely, they having, by the treaty of Paris of 1803, become possessed of the French title. If, however, there exists any obscurity in the boundary of that province, Spain, with whom it is supposed the title conflicts, has no right to claim any benefit arising from it, as all the writers and geographers above referred to agree in fixing Mexico, New Spain, the Rio Grande del Norte, and the mountains of Mexico, as the true boundary anterior to the treaty of 1763. If she, then, by treaty, obtained from France that country, with these limits, as asserted by France, and different ones not being stipulated for by her, she cannot now, with any shadow of justice, propose others. Moreover, Spain, by the treaty of St. Ildefonso, retroceded this same country to France, with the same extent of boundary it had when originally in her possession, thereby confirming to France, without doubt, all she originally claimed, particularly as no notice is there taken of the invalidity of the original French title to the full extent of their claim; at all events, it is believed, if there was difficulty in regard to it, during this last transfer would have been the time to adjust it; or, by the law of nations, it is thought, as well as candor and good faith, she has not, or ought not to be permitted to insist upon other boundaries. That law in one place declares that "if the party making them [meaning grants or cessions] fails to express himself clearly and plainly, it is the worse for him: he cannot be allowed to introduce subsequently restrictions which he has not expressed."

It is proper, before this part of the subject is passed over, to remark that, from the examination of the best records of the times, from the discovery of America until the year 1763, the bull of the Pope rather gave a title to the country the coast of which had been examined by the Spaniards, than confirmed, beyond the participation of other nations, the hemisphere west of the Azores; but, where an extensive coast had been discovered by them, and no settlement attempted previous to 1763, that coast, and its extended interior, has been considered the property of the nation so discovering it; or, discovering the interior, the unoccupied coast becomes a part.

Great Britain, as was her interest, maintained for a long time the old notion of a right to grant by charter all the countries from sea to sea, where it did not interfere with the territory of any Christian prince or people; and her obstinate adherence to that system is considered as largely contributing to the production of the war of 1755, when she was opposed by France and Spain, as granting away almost all Mexico and the French possessions, both claiming much of the intermediate country and the coast of the Pacific. Great Britain, at the close of that war, abandoned her pretensions, and gave manifestation of her sincerity by revoking the first charter granted to Georgia; and in the second, in 1764, limited it to the Mississippi; and agreed, in 1763, to limit her whole territory to that river in the west.

Where territory has been acquired, as already shown, upon any coast, and the same coast is actually settled or occupied by another Power, at such a distance as not manifestly to encroach upon the first, the point equidistant from either is considered as the utmost limits of each. This principle, it is believed, was fixed and settled by all the most important treaties which have engaged the Powers of Europe in affairs appertaining in any way to possessions in this country, and, it is believed, was acted upon and sanctioned not only by the treaty of 1763, but, in some measure, by that of Utrecht, in 1713.

Spain, by virtue of her original discovery and actual settlement in Mexico, together with her title to Louisiana, claimed the Pacific coast of North America, as high up as the sixtieth degree of north latitude; and, to enforce her claim, in the year 1789 sent a ship of war up the coast to capture or drive from those waters several English vessels fitted out in the East Indies by English merchants, upon their own authority, and at their own risk, to trade with the natives in that quarter. This service was performed by Martinez, of His Catholic Majesty's navy, and, in the year 1790, became the subject of a message from the British King to his Parliament. Although much debate ensued, and some resentment was expressed towards Spain for her treatment of the British subjects who were made prisoners, yet no claim was alleged on the part of England to territory there. Great Britain, in the course of that transaction, seems to have recognised the claim of Spain, and was willing to treat for the enjoyment of privileges on that coast, which she obtained, and was, by stipulations, invested with the further right to fish even as low down as the Gulf of California.

The Spanish monarch, being in possession of the French title, regardless of that which the United States had obtained according to the mode last adopted, felt great confidence in his negotiations with the British Government

in the year 1790. But the territory, the title to which gave that confidence, has since, by the treaty of Paris, come into the possession of the United States; and it is believed the treaty of St. Ildefonso confirmed to France the full extent of boundary originally claimed, Spain taking no notice of the original error, if any existed.

Under this view of the case, the United States being possessed of the title of France, and, by a just application of the law of nations, that of Spain too, (if she ever had any,) leaves them the undisputed sovereignty of that coast from the sixtieth degree of north latitude down to the thirty-sixth, which is believed to be the situation of the mountains of Mexico alluded to in all the authors and charts before referred to. If, however, there should remain a doubt, that doubt is relieved by a reference to the subordinate principle recognised by the treaties of Utrecht and of Paris in 1763. When we know that all the formalities deemed necessary in the possession of a newly discovered country have been complied with on the part of the United States; that in the year 1785-'6 an establishment was made at the mouth of Columbia river by Mr. Hendricks, the full and entire benefit of whose courage, enterprise, and success results to this Union; and that at a later day, in 1805, Messrs. Lewis and Clark, in executing the desires of this Government, again visited the Columbia and the Western ocean, twelve miles from which they built Fort Clotsop, yet to be seen—these establishments, made by the United States not so near the settlements of California as manifestly to encroach upon them, entitle them to the whole country north of Columbia. And in applying the principle known to govern in such cases, the point equidistant from the Spanish actual settlements and the mouth of that river is the true point at which a line drawn, separating the two countries, should commence. The actual settlements of Spain are believed to have been, at that time, upon the Colorado of California, in latitude 32° north; but even supposing the point to be the extreme south of the claim of the United States, which is believed to be 36 degrees, then the line of separation would fall at 41 degrees. And if any doubt arose as to the claim of the United States to the full extent of the Spanish title, to the north of Fort Clotsop, as high as 60 degrees of latitude, there could remain no doubt as far as the equidistant point, which would be at the completion of the fifty-third degree of latitude, leaving us twelve degrees of coast on that ocean.

From every information which can be obtained worthy to be relied upon, our coast on the Pacific, for years past, has been the theatre of much individual enterprise, stimulated by the rich returns of numerous whale ships, and the great profit of the fur trade, together with the flattering accounts of Messrs. Lewis and Clark relative to the resources of the interior, though no regular trade or well-organized system of commerce existed until the year 1810, in the course of which year a vessel was fitted out in the city of New York, well supplied with provisions and seed of every description necessary in a permanent occupation of the coast, which they contemplated. This little colony consisted of a hundred and twenty men when it arrived in the Columbia; and, after ascertaining its soundings, they removed some miles above Fort Clotsop, and built the town of Astoria, where a portion of them cultivated the soil, whilst the others engaged in the fur trade with the natives. The soil was found to be rich, and well adapted to the culture of all the useful vegetables found in any part of the United States, as turnips, potatoes, onions, rye, wheat, melons of various kinds, cucumbers, and every species of pease. In the course of a year or two, it was believed their interest would be promoted by cultivating and securing the friendship and confidence of the tribes inhabiting the waters of that great river; to which end the town of Astoria was maintained by about thirty men, whilst the rest established themselves at five other points, to become fixed stations, to raise their own vegetables, trade with the natives, and receive supplies of merchandise from the general depot at Astoria, and return to it the fruits of their labor. One of these subordinate establishments appears to have been at the mouth of Lewis's river; one at Lantou; a third on the Columbia, six hundred miles from the ocean, at the confluence of the Wantana river; a fourth on the east fork of Lewis's river; and the fifth on the Multnomah. Thus situated, this enterprising little colony succeeded well in all their undertakings, nor met with but one misfortune, which seemed to partake largely of that kind which had for a long time, so certainly and so unseen, been inflicted upon our western inhabitants: this was the loss of the Tonquin, a vessel they had taken from New York, whilst trading down the coast, where, in time past, she had been, in common with the ships of some European Powers, enjoying the friendship and confidence of the natives. This confidence had, by some means, been destroyed; and, whilst they induced many of the ship's company to go on shore, many of their own number went on board the ship, and, suddenly attacking the crew, the whole were destroyed, as well as the vessel. This, though a great affliction to the survivors on the Columbia, did not dishearten them, as other vessels were expected soon to arrive, and, with these expectations, they continued their trade, which, becoming profitable, they were the less inclined to abandon. But the operations of the war of 1812, which took place between the United States and Great Britain, were destined to mar their prosperity. That Government, it appears, despatched a vessel of war, called the Racoon, to destroy or possess Astoria, which, by the assistance of the Indians, influenced by the Northwest and Hudson's Bay Companies of fur traders, they were easily enabled to do; and have, from that period to the present time, continued to reside at it, as well as on the river above, though a messenger or agent was sent by the authority of the United States to receive, and did receive, that post from them at the close of the late war.

From every reflection which the committee have been able to bestow upon the facts connected with this subject, they are inclined to believe the Columbia, in a commercial point of view, a position of the utmost importance. The fisheries on that coast, its open sea, and its position in regard to China, which offers the best market for the vast quantities of furs taken in those regions, and our increasing trade throughout that ocean, seem to demand imme diate attention.

The fur of every country which has produced it has been ever esteemed one of its most valuable commodities, and has long held a rank among the most profitable articles of commerce. It was much sought for even in the days of Tatila, a Visigoth, who reigned in Italy about the year 522, at which time they drew their supplies from the Suethons, who inhabited that part of Europe called Sweden. The Welch set a high value on them as early as the time of Howel Dda, in 940, and, from its being first an article of dress used only by the poorer class of the community, it, by gradually extending itself, came to be one of luxury of the highest value, in which kings and princes vied with each other in their costly magnificence and display; their clothes were not only fashioned of them, but even their tents were lined with the finest varieties. Such was the display of the great Cham of Tartary, when he was visited in his tent by Marco Polo, about the year 1252. It had become so much in use, and so high in price, that Edward III. in the year 1337, deemed it expedient to prohibit its use to any but those who could afford to spend a hundred pounds a year without detriment to their property. At that day, having exhausted those parts of Europe which had supplied them, the price increasing with a growing demand, they were obliged to seek them elsewhere, and procured their supplies from the north of Asia. This for a long time poured into the adjoining parts of Europe immense sums, as it was in that direction they were brought to market. This trade, so valuable to that part of the world, had no competition; nor were other sources of supply even known until Francis I. of France, in the year 1514, sent Jacques Curtis, of St. Maloes, to make discoveries in this country. That gentleman entered the St. Lawrence, and exchanged his merchandise for fur, which was the commencement of a feeble trade, that was continued until the year 1608, when Samuel Champlain went some distance up that river, and laid the foundation of the town of Quebec as a trading establishment, and commenced a system, which, however, did

not greatly flourish until about the year 1640. But very soon after that country came into the possession of England, this trade was cherished and greatly increased; and the dominion of the Hudson's bay enabled her not only to supply Russia itself, and all Europe, but even to send it to Turkey, and round the Cape of Good Hope, to distant China. That trade, which had destroyed all competition, and, in the hands of well-regulated companies, was capable of enriching an empire, had yielded a part of its profits to the skill and industry of individuals upon our western shore. That skill and that industry have withered, not for the want of fostering care, but justice and protection.

The fur trade of Canada has long been conducted by well-organized companies; and, although they encounter infinite difficulties, yet the great profit of their business enables them to overcome them, and to divide a considerable per centage. All those articles intended as supplies for the Indians are shipped at Montreal, and carried far into the interior, through lakes, and rivers, and difficult streams, until they arrive even in the vicinity of the Rocky Mountains. The increasing wealth derived from this source induced a large increase of capital and corresponding exertions to obtain a more extensive knowledge of the rivers and lakes through which their merchandise was to be carried, and a more extensive acquaintance with the natives among whom they were eventually to be disposed of for furs, the produce of the labor of the savage. With views of this kind, small parties have been despatched at different times, from the year 1774 until the year 1793, to examine the rivers of the west: at the period last mentioned, one of those parties, under the direction of Alexander Mackenzie, penetrated even to the Western ocean, thereby greatly adding to their stock of useful knowledge in that branch of commerce, which they have not failed duly to appreciate. Notwithstanding the great difficulties which the British furriers encounter from the embarrassment of their commerce by their different systems of exclusive privilege, these companies find it a source of vast profit, far exceeding any thing known in the United States; this, too, when the merchandise is so much advanced in price, from the distance and the numerous obstructions. The enhanced value of the articles, and their difficulties in transporting them, may be fully understood when it is known that the tract of transport is equal to three or four thousand miles, through more than sixty lakes, some of them very considerable in extent, and numerous rivers; and the means of transportation are bark canoes. Furthermore, these waters are interrupted in at least a hundred places by falls and rapids, along which the trader has to carry his merchandise on his back, and over a hundred and thirty carrying places, from twenty or thirty yards in extent to thirteen miles, where both canoe and cargo have to be conveyed by the same means.

These are some of the obstructions which the Northwest Company encounter; yet their exports from Quebec alone are valued at more than a million of dollars annually, without reference to those brought to the United States, and shipped from New York and Philadelphia direct to China, rather than incur the cost and delay in procuring them a passage to London, and thence to India, in the ships of the East India Company. Indeed, it appears that many of the goods of that company destined for this trade, particularly on the coast of the Pacific, are shipped to Boston, and immediately reshipped in American vessels for the benefit of drawback. These vessels are sometimes employed to make a voyage for them from the mouth of Columbia to Canton. To illustrate more fully the increasing value of this trade, it is only necessary to observe that, from Quebec, in 1803, there were exported the skins of six hundred and fifty thousand seven hundred and twenty-nine quadrupeds, ninety-three thousand seven hundred and seventy-eight of which were of the beaver. Since that time they have extended their trade beyond the Rocky Mountains, and have, as has already been observed, established themselves at the mouth of Columbia: the amount of their exports from that port cannot be ascertained, but it is thought to be of great value. The Hudson's Bay Company is believed to be considerable, and, from a state of former depression, is fast becoming the rival of the other; but for several years past they have withdrawn their traders from the west side of the Rocky Mountains. They have fewer difficulties to overcome in arriving at the highest point of navigation than the Northwest Company: their route is through the Hudson's bay, the Nelson river, to Lake Winnipeg; thence, by passing other lakes, they ascend the Red river to their establishment, which is within ninety miles of the Missouri river, at a point called the Mandan villages. This river takes its rise in the Rocky Mountains, in about the forty-third degree of latitude, and observes a course north and northeast towards Hudson's bay, until it arrives at the Mandan villages, a distance of nearly twelve hundred miles, when it turns short to the south, without any apparent cause, and joins the Mississippi; the water running to the Hudson's bay at that point approaching within one mile, and no hill or high ground to separate them of any magnitude. Yet, notwithstanding the many advantages which the Hudson's Bay Company possessed over the Northwest Company, the Earl of Selkirk, the patron of the former, and a man of uncommon enterprise, was exceedingly desirous to obtain the privilege of supplying his establishments upon the Red river by ascending the Mississippi to the St. Peter's; thence to its source in Stone lake; then, by a short portage through open woods and a level country, to his stations; or, taking the route by the Missouri to the Mandan villages, thence by a portage of ninety miles to his place of destination. The exports of this company, for a short time past, have been very little less than those of the Northwest Company.

The committee, from carefully examining all the facts connected with the subject referred to them, are well persuaded that the situation of the United States is such as to enable them to possess all the benefits derived from this trade, which, in the hands of others, amounts to millions; many of whose trading establishments east of the Rocky Mountains are within the acknowledged limits of this republic, as fixed by the convention of London of the 20th of October, 1818; and it is believed that no Power, with the exception of Spain, has any just claim to territory west of them or on the Pacific. The dependance for subsistence of many of those establishments is upon the buffalo beef hunted by the Assinboin Indians, who inhabit the country between the river of that name and the Missouri; their hunting ground is far within our boundary. To succeed in procuring to the people of the United States all the wealth flowing from this source, it is only necessary to occupy with a small trading guard the most northeastern point upon the Missouri river, and confine the foreigners to their own territory, at the same time occupying with a similar guard the mouth of the Columbia. The great profit derived from this trade by the Canadian companies, when we know the distance and obstructions in their rivers, and in the various streams they ascend in carrying it on, the advance of price consequent upon it becomes rather a matter of amazement than otherwise, and inclines us to examine our own rivers with a view to the same object. Instead, however, of those formidable obstructions, we find a smooth and deep river running through a boundless extent of the most fertile soil on this continent, containing within its limits all those valuable furs which have greatly enriched others; a certain, safe, and easy navigation, with a portage of only two hundred miles, uniting it with another river equally smooth, deep, and certain, running to the great Western ocean. Thus are those two great oceans separated by a single portage of two hundred miles! The practicability of a speedy, safe, and easy communication with the Pacific is no longer a matter of doubt or conjecture: from information not to be doubted, the Rocky Mountains at this time, in several places, are so smooth and open, that the labor of ten men for twenty days would enable a wagon with its usual freight to pass with great facility from the navigable water of the Missouri to that of the Columbia. The actual distance from river to river several hundred miles from their source, that is, from the great falls of Missouri to the fork of Clark's river, is one hundred and forty-nine miles; the distance, therefore, of two hundred miles is to good navigation on the Columbia, which is the only river of any magnitude upon that whole coast north of the Colorado of California, though there are several good harbors secure and safe for vessels of any size.

The region of country from the ocean to the head of tide water, which is about two hundred miles, is heavily timbered with a great variety of wood well calculated for ship-building and every species of cabinet or carpenter's work. Though there is a heavily timbered country thence for two hundred miles farther, yet it is of a smaller growth, and quality not so durable; at that point commences the plain country, when the soil becomes more thin and almost without wood, until it arrives at the table lands below the mountain. Though the soil of this region is not so good as in any other part of this great valley, yet it produces grass of the finest quality, and is emphatically called the region favorable to the production of the horse; this noble animal, so far surpassing all others in usefulness, courage, and swiftness, is here produced in greater perfection than even in Andalusia or Virginia. But, independent of all the wealth which may be derived from the fur trade of that river and the Missouri, the security, too, which the peace of this country would find in the influence which the American traders would obtain over the native, is the increasing commerce in the Western ocean. There is no employment so well calculated to make good seamen as the whale fisheries, which are known to be more profitable on this coast than any other; at the same time the oil is far preferable to that taken on any other coast, being clear and transparent as rock water. Whilst so many of our citizens are industriously engaged in the various branches of trade in those seas, more valuable to this country, it is believed, than any other; whilst all nations who have claims upon that coast, and some who have none, are anxious to occupy some position upon it, even at a vast expense, to enable them to participate in its benefits, we have neglected to extend to it any portion of our care, though it appears, from the best information, that there is at this time eight millions of property owned by citizens of this republic in the Pacific ocean.

Russia, whose dominions on the Asiatic coast occupy nearly the same position upon that side which ours do on this, has long been well informed of the great and increasing value of that commerce; and whilst she has been nowhere visible, not even to the Powers of Europe, only as she has of late taken part in a few memorable enterprises, she has been felt everywhere. No labor, care, or expense is avoided, to make tributary the four quarters of the globe; forts, magazines, towns, cities, and trade seem to rise on that coast as if by magic; with an army of a million of men, she sits not only in proud security as it regards Europe, and menaces the Turk, the Persian, the Japanese, and Chinese, but even the King of Spain's dominions in North America are equally easy of access, and equally exposed to her fearful weight of power. Her watchfulness is ever in advance in discerning the most practicable avenues to profitable commerce. In the midst of all her busy arrangements, she has not neglected the opportunity of possessing herself of two important stations on the American shore of the Pacific—the one at a place called New Archangel, in about 59° of north latitude; the other at Bodiga bay, in latitude 38° 34′. At the former of these military positions, for the protection of her commerce, it is presumed, she has incurred much expense, and built a fort of great strength, situated upon one of the best harbors on the coast, standing upon a point of land projecting into the little bay, giving something the appearance of a conical island in the centre of it; this fort is well supplied at all times with provisions and military stores, mounting a hundred and twenty cannon, carrying balls from eighteen to twenty-four pounds weight. That at Bodiga is well constructed and supplied with cannon, and has a good harbor; at this point they have ammunition and merchandise in abundance, and find the Indian trade at this post as well as at New Archangel very considerable. Besides the fine condition of this fort and its defences, they have many field-pieces, some of brass, of the finest construction, in good order, and well mounted. All these supplies have been conveyed to those places through immense oceans, round Cape Horn, which would have appalled any but Russian policy and perseverance. The light articles destined for this trade are transported from St. Petersburg in sledges, which will perform in three months that which would require two summers of water conveyance to effect; their communications are open to Kamtschatka, to Fort St. Peter and St. Paul, by Ohotsk, in the Pacific, where they have the finest harbor in the world; the distance is estimated at ten thousand miles. The nation which can encounter such journeys as these, often through seas of ice and storms of snow so terrible as to obscure an object beyond the distance of a few paces, to prosecute any branch of commerce, must be well and fully informed of its value. That the objects she has in view may not by any event be taken from her grasp, after encountering such vast difficulties, she has found it expedient to occupy one of the Sandwich islands, which not only enables her effectually to maintain her positions, but to command the whole northern part of the Pacific ocean. These islands, lying just within the tropics, in the direct course from the lower coast of North America to Canton, are well supplied not only with all the fruits of that climate, but with every vegetable and animal known in this country.

It is worthy of remark, that, among other advantages which the Russian position on the opposite coast possesses is, that a voyage from Kamtschatka to Japan can be made in an open boat, as it is a continued chain of islands from the Ohotsk sea until it arrives at its place of destination.

Your committee are well persuaded that, by a little care and small expense, the citizens of this republic might reap all the benefits of this trade, not only profitable now, but, from every view of the subject, there is a strong probability that it will increase for many years.

Were an establishment made at the mouth of Columbia, which should be allowed to take with them their women and children, there could be no doubt of success, as so many years of experience of the English fur companies has amply shown that this mode has the most powerful effect in separating the minds of the men from pursuits which often, in frontier countries, lead to strife, as it gives them a local interest and feeling, and makes them even more vigilant and prudent in the discharge of all their duties. It is believed that population could be easily acquired from China, by which the arts of peace would at once acquire strength and influence, and make visible to the aborigines the manner in which their wants could be supplied. The coast of the Pacific is, in its climate, more mild than any part of the continent in the same parallel, and many vegetables on that shore grow in great abundance in the native forests, which are likewise natives of China.

It is known that, when the Spanish Government, in 1789, sent their ships of war up the coast to capture the British vessels which were intruding, they found seventy Chinese, whom the English had procured to emigrate, that they might be employed in the mechanic arts; and though the people of that country evince no disposition to emigrate to the territory of adjoining princes, it is believed they would willingly, nay, gladly, embrace the opportunity of a home in America, where they have no prejudices, no fears, no restraint in opinion, labor, or religion.

The committee cannot doubt that an establishment made on the Pacific would essentially benefit the natives, whilst it would give this country the advantage of all its own treasures, which otherwise must be lost forever, or rather never enjoyed, and, from all that can be ascertained relative to its present and increasing value, of more profit to this country than the mines of Potosi.

From the best information which can be had, it appears that the Indian trade on the Missouri, below the Mandan villages, is worth about $120,000, and that on the Mississippi is valued at $250,000, making the sum of $370,000 annually. They have reflected upon this trade, and that prosecuted by the whalers on that coast, and are irresistibly drawn to the conclusion that they are the most valuable to this nation, and demand its care and attention in a high degree. This trade, unlike any other, originates its own capital, and may fairly be said to bring into the United States $370,000 every year where not one dollar previously existed, and adds that much to the wealth of the community as decidedly as though it had been fished from the bottom of the rivers in gold and silver, as it is in

the market of China, or any other market, capable of purchasing as much; and if, with that amount in furs, a vessel should sail from the mouth of Columbia to Canton, which is a voyage of from fifty to seventy days, she would return with that in exchange which would sell for perhaps double that amount, thereby contributing to the comfort, enjoyment, and accommodation of the community $740,000, which is the result, not of a profitable voyage, but of a creative trade.

It is believed that a shipment of tobacco, flour, or cotton, bears no comparison, in point of profit, with this, as they are properly the rough manufactures of the country, and the result of considerable capital; and the cargo brought back in return for them, in European or other fabrics, is only an increased value they receive by being exported and returned to us in that shape. Hence, the exportation of $370,000 worth of tobacco or cotton, should it return to us $740,000 in European silks and cloth, is still the original cargo of tobacco or cotton, as nothing but these have been paid for them; but, in the first instance, he who manufactures either the tobacco, flour, or cotton, is compelled to take into consideration the capital employed, and then the balance is his gain; but, in the fur trade and the whale fisheries, there is in the one little capital, in the other none.

Under the strongest belief that, by a new organization of the system of Indian trade, comprehending a settlement on the Columbia river, great benefits would result to the citizens of this republic, whilst the aborigines would be better protected and provided for by instructing them in agriculture and the minor branches of the mechanic arts, the committee ask leave to report a bill.

16th Congress.] No. 498. [2d Session.

LOTTERIES IN THE DISTRICT OF COLUMBIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 26TH OF JANUARY, 1821.

Mr. Mercer made the following report:

The Committee on the District of Columbia, to whom was referred a resolution of the House of Representatives, instructing them to inquire into, and report to the House, "the number of lotteries which have been instituted in the District, by virtue of an act which passed the 15th of May, 1820, 'to incorporate the inhabitants of the city of Washington, and to repeal all acts heretofore passed for that purpose;' the objects for which the moneys are to be raised; the amount of each scheme, and the total nominal value of the tickets offered for sale; the rate of reduction proposed to be made from the prizes; and the gross amount of the proceeds of the said lotteries which will come into the hands of the managers; and, also, whether the condition of the said act of incorporation has been complied with, so far as it respects the authority to raise money by lotteries;" have, accordingly, had the said resolution under consideration, and respectfully report:

That, under the act of incorporation referred to in the said resolution, one lottery only has been authorized by the corporation of the city of Washington; but the committee, presuming it to have been the purpose of the resolution of the House of Representatives to ascertain how the power to raise money by lottery has been hitherto exerted by the corporation, have extended their inquiry to the lotteries authorized by an amendment of the former charter of the corporation.

The terms of that amendment, which, as far back as the 6th of May, 1812, vested in the city corporation the power of raising money by lottery, are, in substantial import, the same with those of the renewed charter, except that in the latter the duration of this power is limited to ten years. In both it is subjected to the control of the President of the United States; and every resolution adopted by the corporation, in pursuance of this power, has been subsequently approved by the President.

The first resolution of the Boards of Aldermen and Common Council of the city, in which its legislative power is vested by its charter, authorized the raising of $10,000 by lottery, "for building, establishing, and endowing two public school-houses on the Lancasterian system," and received the approbation of Mr. Madison on the 23d of November, 1812.

Seven other resolutions, each giving power to raise by lottery a like amount, have emanated from the same authority since the above period: one of these resolutions having been approved in every subsequent year, except the year 1813; and the last on the 31st of October, 1820.

The three resolutions next following the first add to the objects of public utility sought to be provided for by that resolution a penitentiary and a city-hall.

In pursuance of these resolutions, the managers in whom the corporation vested the power of carrying their purpose into effect have contracted at different periods for the drawing of five lotteries, or classes of a lottery. The first of these authorized the sale of tickets to the amount of $150,000; and for this the corporation was, by the contract of the managers with the lottery agent, to receive $10,000: but the managers have stated to the committee that, owing to a misunderstanding between themselves and the agent for that class, they have as yet received no part of that sum.

From the second and third classes, anthorizing the sale of a number of tickets of the value of $300,000, the managers have realized $20,000; being $10,000 for each class.

From the fourth class, which is now drawing, and the tickets of which amount in gross value to $210,000, the managers will have received in the course of the ensuing month $6,666 67; and from the fifth class, the tickets of which are computed at $400,000, they expect to realize the further sum of $13,333 33, being, in all, $80,000 from the authority granted by the resolutions of eight years.

Copies of the schemes of these lotteries have been submitted to the committee by the mayor of the city of Washington, through whom the preceding facts have been collected. In all of them the rate of reduction from the prizes is fifteen per centum.

The committee, having reported all the facts called for by the resolution of the House of Representatives, are required to pronounce an opinion on the question, "whether the condition of the act of corporation of the city of Washington has been complied with, so far as it respects the authority to raise money by lotteries."

As this question is likely to be involved in a judicial inquiry now pending in one or more of the courts of the United States, the committee hope to be excused by the House for forbearing to express any opinion upon it. They

have annexed to this report the original correspondence through which the preceding facts have been collected, together with a copy of one of the contracts between the managers appointed by the city corporation and the contractor for drawing one of the lotteries authorized by a resolution of the corporation; and such extracts from the old and new charters of the city of Washington as may serve to illustrate the nature and extent of the authority vested in the corporation to raise money by lottery: in relation to all which they respectfully submit the following resolution to the House of Representatives:

Resolved, That it is inexpedient for the House of Representatives to express any opinion on the question whether the condition of the act of incorporation of the city of Washington has been complied with by the corporation, so far as regards the authority to raise money by lottery.

SIR: WASHINGTON, MAYOR'S OFFICE, *January* 16, 1821.

Your note of the 12th instant has been received, enclosing a resolution passed by the House of Representatives of the United States on the subject of the city lotteries. I am now collecting the information you require, and the moment it is obtained I shall transmit or wait on you with the same.

I have the honor to be, sir, your obedient servant,

SAMUEL N. SMALLWOOD.

Hon. CHARLES F. MERCER, *Chairman District Committee.*

SIR: WASHINGTON, MAYOR'S OFFICE, *January* 16, 1821.

In compliance with your note of the 12th instant, submitting to me a resolution of the House of Representatives of the 8th instant, relative to the city lotteries heretofore authorized by Congress, I transmit letters, with other documents, from the register of this city and the president of the board of managers of said lotteries, which contain the information desired. As to the purposes for which the moneys are to be raised, I reply, that a penitentiary, two Lancasterian school-houses, and a city-hall, are to be built out of those funds. The latter has been commenced on a magnificent scale, and is progressing with great rapidity, and, if not impeded by the acts and proceedings of the different States, as it respects our lotteries, we shall, in a few years, accomplish these desirable objects, and thereby improve and embellish the metropolis of the Union to a considerable extent, which, in a national point of view, is the property of the nation; therefore it is reasonable to conclude, for reasons obvious to all, that it would be the pride and interest of every man in the country to aid the inhabitants of this city in beautifying and adorning the metropolis of their Union. I beg you will excuse this small digression from the subject of your call.

I have the honor to be, sir, your obedient servant,

SAMUEL N. SMALLWOOD.

Hon. CHARLES F. MERCER, *Chairman District Committee.*

SIR: WASHINGTON, REGISTER'S OFFICE, *January* 15, 1821.

In compliance with your request, I herewith transmit to you a copy of the first resolution of the corporation authorizing the raising of $10,000 by lottery; and an abstract of all the succeeding resolutions.

First resolution.—*Resolved by the Board of Aldermen and Board of Common Council of the city of Washington*, That it is expedient to raise, by lottery, the sum of ten thousand dollars (clear of expenses) for the following object, to the accomplishment of which the ordinary funds of the city are inadequate, viz:

For building, establishing, and endowing two public school-houses on the Lancasterian system, (one in the eastern, and one in the western section of the city,) the sum of ten thousand dollars.

Resolved, That the Mayor be, and he is hereby, requested to present the foregoing resolution to the President of the United States, and respectfully solicit his approbation thereto.

Approved: November 23, 1812. JAMES MADISON.

Second resolution, authorizing the raising of ten thousand dollars for a penitentiary.

Approved: August 3, 1814. JAMES MADISON.

Third resolution, authorizing the raising of ten thousand dollars for a town-house or city-hall.

Approved: May 10, 1815. JAMES MADISON.

Fourth resolution, authorizing the raising of ten thousand dollars for two public school-houses, a penitentiary, and a city-hall.

Approved: April 20, 1816. JAMES MADISON.

Fifth resolution, authorizing the raising of ten thousand dollars for same.

Approved: April 5, 1817. JAMES MONROE.

Sixth resolution, authorizing the raising of ten thousand dollars for same.

Approved: October 19, 1818. JAMES MONROE.

Seventh resolution, authorizing the raising of ten thousand dollars for same.

Approved: October 29, 1819. JAMES MONROE.

Eighth resolution, authorizing the raising of ten thousand dollars for same.

Approved: October 31, 1820. JAMES MONROE.

I am, respectfully, your obedient servant,

WILLIAM HEWITT, *Register of the City of Washington.*

ROGER C. WEIGHTMAN, Esq.

Extracts from the old and new charters of the city of Washington, illustrative of its power to raise money by lottery.

That the said corporation shall have full power and authority to authorize, with the approbation of the President of the United States, the drawing of lotteries for the erection of bridges, and effecting any important improvements in the city which the ordinary revenue thereof will not accomplish, for the term of ten years: *Provided*, That the amount so authorized to be raised in each year shall not exceed the sum of ten thousand dollars, clear of expenses.

The said corporation shall also have power and authority to provide for the establishment and superintendence of public schools, and to endow the same; to establish and erect hospitals or pest-houses, watch and work-houses, houses of correction, penitentiary, and other public buildings, and to pass all laws which shall be deemed necessary and proper for carrying into execution the powers vested by this act in the said corporation or its officers. [Pamphlet copy, page 87 of the acts of the 1st sess. 16th Congress.]

By an act to amend the charter of the city of Washington, which passed May 6, 1812, the corporation was vested with full power to authorize the drawing of lotteries, for effecting any important improvement in the city which the ordinary funds or revenue thereof will not accomplish: *Provided*, That the amount to be raised in each year shall not exceed the sum of ten thousand dollars: *And provided, also*, That the object for which the money is intended to be raised shall be first submitted to the President of the United States, and shall be approved of by him; and to pass all laws which shall be deemed necessary and proper for carrying into execution the foregoing powers, and all other powers vested in the corporation or any of its officers, either by this act or any former one. [Vol. 11, Laws of the United States, page 153.]

SIR: WASHINGTON, *January* 14, 1821.

I have this moment received your communication of this morning, enclosing a resolution of the House of Representatives, and a letter of the chairman of the Committee on the District of Columbia, on the subject of the lotteries authorized by the charter of this city, and, by direction of the board of managers of the lotteries, have the honor to state that the corporation has, by authority of the late and present charter, authorized, up to this period, the raising by lottery of $80,000, for the erection of two Lancasterian school-houses, a penitentiary, and a city-hall, as will more fully appear by the enclosed letter from the register of the city.

That the board of managers have, by authority of the resolutions of the corporation, contracted for five classes of lotteries; that the first class amounted, in gross, to $150,000, for which the managers were to receive $10,000, but that, owing to a misunderstanding between them and the contractor for that class, they have not, as yet, received a cent; that, from the second and third classes, amounting in gross to $300,000 each, the managers have realized $20,000, being $10,000 for each scheme; that, from the fourth class, now drawing, amounting in gross to $210,000, the managers have received, and will receive in the course of the month of February ensuing, $6,666 67; that, from the fifth class, amounting in gross to $400,000, the managers expect to realize $13,333 33; that 15 per cent. has been the uniform deduction from all prizes, as will appear by the enclosed schemes.

I am sir, very respectfully, your obedient servant,

R. C. WEIGHTMAN, *President of the Managers.*

SAMUEL N. SMALLWOOD, Esq., *Mayor.*

Scheme of first class national lottery.

1	prize of	$30,000	$30,000
1	do.	20,000	20,000
2	do.	10,000	20,000
3	do.	5,000	15,000
5	do.	1,000	5,000
6	do.	500	3,000
20	do.	100	2,000
100	do.	50	5,000
2,000	do.	25	50,000
2,138	prizes.		$150,000
3,862	blanks.		

6,000 tickets at $25 is $150,000.
Subject to a deduction of 15 per cent.

Scheme of third class national lottery.

1	prize of	$50,000	$50,000
1	do.	25,000	25,000
1	do.	10,000	10,000
4	do.	5,000	20,000
70	do.	1,000	70,000
50	do.	100	5,000
10,000	do.	12	120,000
10,127	prizes.		$300,000
19,873	blanks.		

30,000 tickets at $10 is $300,000.
Subject to a deduction of 15 per cent.

Contract for the fifth class of a lottery.

Memorandum of an agreement made this 7th day of October, 1820, between Roger C. Weightman, president of the board of managers of the lotteries authorized by a law of the corporation of the city of Washington, entitled "An act authorizing a lottery or lotteries in the city of Washington, for the purposes therein mentioned," by and with the advice and consent of a majority of the said managers, of the one part, and David Gillespie, of the city of New York, of the other part, viz:

The said Roger C. Weightman, as president, hath agreed to sell to the said David Gillespie the right and privilege of a lottery, for the purpose of raising $13,333 33, clear of expenses, as authorized in and by the said act of the corporation of Washington, he conforming, in all respects, to the provisions and true intent and meaning of the said act; that the said David Gillespie shall not publish the scheme of the said lottery until the same shall be submitted to and approved by the said managers, or a majority of them, nor until he shall execute and deliver a bond to the said managers, with sufficient security, in the penal sum of $20,000, to be approved of by the said managers, or a majority of them, conditioned for the true and faithful discharge of his duty in selling the tickets, the payment of the prizes, and for conducting the said lottery fairly and honestly, according to the true intent and meaning of this agreement, and of the said law of the corporation of Washington; that the said David Gillespie is to be at the entire expense of the said lottery, and shall, before the commencement of the drawing thereof, pay to the president of the said board of managers the sum of $13,333 33, being the full consideration for the said lottery to the said managers; that the said managers, or a committee of them, or such other person or persons as they may appoint, shall have the privilege at all times of examining into the state of the said lottery, which shall be drawn in the city of Washington, in the presence of at least three of the said managers, and shall be concluded within one year from the commencement of the drawing, and the prizes paid within the time limited in the said act of the corporation; that the scheme of the said lottery shall not exceed, in the gross amount, the sum of $400,000.

And it is the understanding of the parties that the said David Gillespie shall have the refusal of the lotteries for raising the balance of the money authorized by the said act of the corporation of Washington, paying at the rate of $3,333 33 for every $100,000 of the gross amount.

In witness whereof, the said parties have hereto subscribed their names, the day and year first above written.

DAVID GILLESPIE,
R. C. WEIGHTMAN, *President.*

16th Congress.] No. 499. [2d Session.

COMPENSATION OF THE OFFICERS OF CONGRESS AND OF THE EXECUTIVE DEPARTMENTS.

COMMUNICATED TO THE SENATE, JANUARY 31, 1821.

Mr. DANA, from the committee appointed to inquire into the propriety of reducing the allowances authorized by law for the two Houses of Congress and for the Executive Departments, submitted the following report:

That they have made inquiry, according to the resolution for their appointment, and do not consider it advisable, at the present time, to propose any reduction of legal allowances in the cases to them referred. The following resolution is accordingly submitted:

Resolved, That it is not expedient, at the present time, to reduce the compensations allowed by law for the respective Houses of Congress, and for the principal and other officers in the Executive Departments.

Statement of compensations allowed to officers and attendants of the Senate in the years 1800, 1808, 1816, *and* 1820.

Officers.	Years.			
	1800.	1808.	1816.	1820.
Secretary of the Senate,	$2,050	$2,000	$3,000	$3,000
Principal clerk,	1,139	1,300	1,800	1,800
Engrossing clerk,	826	1,000	1,500	1,500
Engrossing clerk,	-	1,000	1,500	1,500
Doorkeeper and sergeant-at-arms,	800	950	1,500	1,500
Assistant doorkeeper,	750	900	1,450	1,450
One attendant,	150	200	400	400
One attendant,	150	200	400	400
One attendant,	150	200	400	400
	$6,015	$7,750	$11,950	$11,950

The foregoing statement exhibits the *regular* compensations, fixed by law, of the officers of the Senate. In addition thereto, they received the following allowances by *special* acts or resolutions:

THE SECRETARY.

1799, March 2, by act,	$200
1800, by resolution,	300
1804, by resolution,	300
	$800

THE PRINCIPAL CLERK.

1796, by resolution,	$100
1798, May 14, by act,	100
1799, March 2, by act,	100
1799, by resolution,	100
1800, by resolution,	200
1803, by resolution,	200
1804, by resolution,	200
	$1,000

ENGROSSING CLERK.

1796, by resolution,	$100
1798, May 14, by act,	100
1799, by resolution,	100
1799, March 2, by act,	100
1800, by resolution,	200
1803, by resolution,	200
1804, by resolution,	200
	$1,000

DOORKEEPER AND SERGEANT-AT-ARMS.

1798, May 14, by act,	$100
1799, by resolution,	100
1799, February 25, by act,	500
1799, March 2, by act,	100
1803, by resolution,	200
1804, by resolution,	200
1806, by resolution,	135
	$1,335

ASSISTANT DOORKEEPER.

1798, May 14, by act,	-	$100
1799, March 2, by act,	-	100
1803, by resolution,	-	200
1804, by resolution,	-	200
		$600

Until the year 1813, the doorkeeper was allowed, by a resolution of the Senate, twenty-eight dollars per week for an assistant and two horses. He has, since that time, been authorized to employ an assistant and two horses, the expense of which, after being allowed by the Committee of Accounts, has been paid out of the contingent fund.

Statement of the entire compensations received by the officers and attendants of the Senate, and by the chaplain and librarian, in the years 1800, 1808, 1816, *and* 1820.

TREASURY DEPARTMENT, REGISTER'S OFFICE, *January* 30, 1821.
Stated from the records. JOSEPH NOURSE, *Register.*

*For the year 1821, will only be $29,310, from the time limited for the employment of certain clerks having expired 31st December, 1820.

16th Congress.] No. 500. [2d Session.

RIGHT OF A STATE TO TAX A BRANCH OF THE BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, FEBRUARY 1, 1821.

SIR: COLUMBUS, *January* 22, 1821.

I have the honor to transmit to you the enclosed report and resolutions on the subject of certain proceedings of the Bank of the United States, and to request that you will lay the same before the Senate, over which you preside.

With great respect, I am, sir, your obedient servant,

ETHAN A. BROWN.

To the PRESIDENT *of the Senate of the United States.*

Report of the Joint Committee of both Houses of the General Assembly of the State of Ohio on the communication of the Auditor of State upon the subject of the proceedings of the Bank of the United States against the officers of state in the United States circuit court.

From the papers submitted to the committee, it appears that, in the month of September, 1819, the Bank of the United States exhibited a bill in chancery before the circuit court of the United States, then sitting at Chilicothe, against Ralph Osborn, auditor of the State of Ohio, and obtained in that court an order of injunction against him, prohibiting him, as auditor, from performing the duties enjoined upon him by the "Act to levy and collect a tax from all banks and individuals, and companies and associations of individuals, that may transact banking business in this State without being authorized to do so by the laws thereof."

It further appears that the auditor, not being satisfied, before the time appointed by law for him to act, that an injunction had been ordered, issued his warrant in conformity to the law under which the tax imposed by law was collected and paid into the State treasury.

It further appears that the circuit court of the United States, at their last term, adjudged that this act of official duty was a contempt of court; for committing which, they awarded a writ of attachment against the auditor, returnable to January term next.

It appears, also, that, at the September term last, upon the application of the Bank of the United States, an order was made allowing them to file an amended and supplemental bill making Samuel Sullivan, the treasurer of state, a defendant, "*as present treasurer of Ohio, and in his private and individual character;*" and also making Hiram Mirick Currey, late treasurer, and John L. Harper, the officer that collected the tax, defendants; upon the filing of which amended and supplementary bill, a further order of injunction was made, prohibiting the treasurer of state from "negotiating, delivering over, or in any manner parting with or disposing of" the money collected for tax, and paid into the State treasury according to law. And it further appears that, besides these proceedings, an action of trespass, at the suit of the Bank of the United States, was commenced, and made returnable to the last September term of the same circuit court, against Ralph Osborn, John L. Harper, Thomas Orr, James McCollister, John C. Wright, and Charles Hammond, in which the plaintiffs have filed a declaration charging, among other things, the taking and carrying away the same sum of money in the proceedings in chancery specified, under color and pretence of the law of Ohio.

Whatever attempt may be made to characterize this proceeding as a controversy between individuals, it is evident that its practical effect is to make the State a defendant before the circuit court of the United States. In every thing but the name, the State is the actual defendant. No other interest but that of the State is involved. In every stage of the inquiry, the rights, interests, and powers of the State only are presented for adjudication. The final process must operate directly upon the State, and, if effectual, must derange totally the official accounts both in the auditor's and treasurer's departments; for, if there be a specific decree, as prayed for in the supplemental bill, a specific execution may be sent into the State treasury to carry that decree specifically into effect.

Nor is it only in its practical effect that the real character of this proceeding is to be perceived. It is distinctly avowed in the body of the bill, both by naming the General Assembly of Ohio as the offending party, and by calling on the court to restrain the auditor of state from performing official acts in his official character; and, in fact, it would seem, from the foundation upon which the injunction was allowed, both on the first and second applications, that the court must have regarded it as, substantially, a proceeding against the State.

All judicial proceedings are founded upon facts established judicially. The transactions of individuals are verified by testimony judicially taken; but the proceedings of States and Governments are regarded as of public notoriety, to be received upon the evidence of general history. When an individual applies for an injunction against another individual, his application is never regarded unless the matter alleged in his petition be established by his own affidavit, or that of others. The court never restrain an individual in the exercise of his supposed rights, upon the naked suggestion of another. The law of Virginia, of Kentucky, and of Ohio alike requires that, before any injunction shall be granted, the judge or court granting it shall be satisfied, by affidavit at the foot of the bill, or by other means, that the allegations in the bill are true. The practice of the federal court and federal judges in Ohio has been to require proof. No injunction has been granted upon mere suggestion until that against Ralph Osborn, auditor of state. No other injunction has been granted upon mere suggestion but that against Samuel Sullivan, treasurer of state. Both these injunctions were granted instantly, upon application by bill alone, without any proof being offered or required that one single allegation contained in the bill was true. This departure from the common course of proceeding can be accounted for and vindicated but upon one ground—that the party substantially a defendant was a sovereign State, all of whose proceedings were matters of public notoriety, of which the court was informed without proof in the ordinary mode.

By the original provisions of the constitution of the United States, the federal judiciary were empowered to take cognizance of controversies between a State and citizens of another State; but by the same instrument this jurisdiction was vested exclusively in the Supreme Court. A State never could be held to answer or be made amenable before a circuit court of the United States. By the eleventh amendment to the constitution, this power to call a State to answer before the Supreme Court, at the suit of a citizen, was wholly taken from the federal judiciary. It is perfectly clear that, before this amendment to the constitution was made, the circuit court of the United States could not have entertained jurisdiction of a suit in equity, enjoining the State officers from executing the State laws, in a case of the direct action of the State sovereignty, like that for the collection of taxes. The principal,

and not the ministerial, agent is always the proper defendant in such a suit. That principal being directly and personally amenable in the Supreme Court, his case could not be drawn to a tribunal that had no jurisdiction over the principal, by instituting a suit against the agent alone. The State, before the amendment, could be sued in equity before the Supreme Court of the United States, and could, in a proper case, be there enjoined. In that court only could a State be prohibited from carrying her laws into operation. For that very reason her officer could not be enjoined in a circuit court. It would be to subject the interest and rights of the State to the decision of a tribunal that had no jurisdiction to decide upon them, and where the State could not be admitted a defendant to defend them. It is, therefore, a strange doctrine to maintain that an amendment to the constitution, expressly forbidding the judges so to construe the constitution as to call States before the supreme courts as defendants, at the suit of individuals, is to operate as vesting the circuit courts with power to do that indirectly which they never had any direct power to do. The amendment was intended to protect the States from a direct responsibility, upon process before the Supreme Court, the only tribunal before which they were then liable to be called to answer. By the construction now attempted, this amendment is made to vest the circuit court with a jurisdiction equally effective against the State, though indirect in its form of proceeding. It effects nothing but the degradation and humiliation of the States. Instead of the distinction of being called to defend its rights before the highest judicial tribunal of the nation, the State is reduced to the level of the most ordinary citizen, and made answerable in an inferior tribunal. Instead of enjoying the privilege of managing directly its own interests, and absolutely controlling its own defence, the State must submit to the consequence of blending its interests with the timidity or treachery of others, and must be concluded in a decision made by a case which it is in the power of others to manage as they please. The committee are persuaded that such was not the object of the amendment, and that such is not the correct construction of the constitution.

It is asserted that this is an individual proceeding against the persons named as defendants; that although the State cannot be sued, yet persons remain responsible, and may be made subject to every proper process. It has heretofore been deemed a sound maxim in ethics, that whatever could not be lawfully done directly, could not be justly effected by indirect means. If this maxim be regarded, (as the State never could be directly proceeded against in the circuit court without a violation of the constitution,) every indirect mode of proceeding ought to be considered inadmissible; but, in fact, and substantially, this is not a proceeding against individuals.

A court of chancery proceeds against the person and against the subject: in technical language, *in personam* and *in rem*. The proceeding in this case is not against Ralph Osborn and Samuel Sullivan for any matter in which they have an individual or personal concern; it is only in the performance of official duties that the process of the court interferes to control them. It was not for himself, or upon his individual account, that Ralph Osborn issued his warrant to collect a tax from the Bank of the United States; it was for the State, and in his character as auditor, that he acted: it is not in the transaction of individual business, or upon his own contracts, that Samuel Sullivan is forbidden to *dispose of, or part with*, particular funds. He is inhibited from paying away money received by him as treasurer, held by him as such, and for the disbursement of which he is officially responsible to the State.

A State, in the abstract, is an intangible entity, like a corporation; in substance, it is a community of individuals; it can only act by individual agents, and its power of action is completely destroyed when these agents are restrained from acting. It is solemn trifling to admit that a State cannot be sued in the circuit court, and, at the same time, insist that every agent that the State employs may be controlled and restrained from performing his official functions by the same circuit court.

The auditor of state is a ministerial agent in the Executive Department of the Government; it is his duty to superintend the collection of the revenue; he acts directly for the whole people upon each; in every one of his official acts he exercises a portion of the sovereign power; and when he is restrained from acting officially, it is the sovereign power of the State that is restrained.

Injunctions to stay proceedings in the courts of law are founded upon a different principle; they act upon the party and not upon the court, and call in question the conduct of the party, not the justice or integrity of the judges. The people, too frequently called the Government, never intend that one individual shall use their power to do injustice to another. Courts of chancery are instituted, not to control the courts of law, but to control individuals who may have obtained unconscionable advantages in the law courts. The proceedings of the chancery courts is the act of the people; but it does not operate upon the people themselves in and through the courts of law; it only withdraws the subject from the judgment of the people in their law court, to their judgment in their court of chancery, upon the principle that adequate justice cannot be administered elsewhere.

This injunction operates through the auditor upon the whole people of the State. He is their agent; his acts are their acts; he proceeds under their direction, and for their sole benefit. They are responsible for his errors, and are bound to protect him from unjust responsibility.

If the injunction was intended, and did in fact operate upon Ralph Osborn alone, his resignation or removal from office would render it unavailing. His successor in office would be at liberty to act notwithstanding the injunction. But that this was not the intention, and is understood not to be the effect of this injunction, is placed beyond all doubt. The bill prayed not only that Ralph Osborn, *auditor of state*, but that all others whom it concerned, should be enjoined, and so the order of injunction was made. The court have judicially declared that this order did not extend to Ralph Osborn and his agent alone, but to all who might act upon the subject. By resigning his office after notice of an application for the injunction, Ralph Osborn would have ceased to have any concern in the subject of it. Yet we are distinctly given to understand that his successor in office was enjoined, as well as every other agent or officer whom the law might appoint, to perform any duty connected with the collection prohibited. This fact alone would seem decisive that the proceeding is not personal against Ralph Osborn, but is direct against the auditor of state.

It is charged in the supplemental bill that the money collected was delivered to Hiram Mirick Currey to keep upon deposite, and by him delivered to Samuel Sullivan to keep in like manner; it is also charged that at the time of receiving the money Currey was treasurer of the State of Ohio, and at the time of delivering it to Sullivan he was the successor of Currey; and the bill prays that Currey as late treasurer, and Sullivan as present treasurer, and also in their individual capacities, may be made defendants; the bill also prays that Sullivan may be enjoined from disposing of the specific moneys received by him upon account of the tax. This injunction, too, is granted upon the suggestions contained in the bill, without any evidence that the money was paid to Sullivan as alleged.

This proceeding is not merely personal against the treasurer, it is direct against the subject; and that subject is money in the State treasury received by the treasurer as revenue of the State, receipted for as such, and as such carried into his official accounts. But this is not a proceeding against the State, because the complainants allege that the "nature and character of the whole transaction forbid the supposition that the money was received by the defendants in the capacity of treasurer." Thus the court are called to determine the whole transaction to be illegal, and then to invest themselves with jurisdiction to reach the specific funds, by shutting their eyes to the real facts of the case, and supposing a state of things that never did exist.

When a State was liable to be sued before the Supreme Court, the process issued against the State, and the court directed a service to be made upon the Governor for the time being. If the proceedings in the present case are correct, it is now sufficient to issue process against the person who may happen to be treasurer, and name him both as treasurer and as an individual, and, upon such process, at the mere suggestion of a complainant, prohibit him from using, for the benefit of the State, any moneys paid to him officially which it may be alleged were collected illegally. In due season a decree may be passed for the specific restitution of the money thus claimed, and this decree will bind the treasurer that may be in office when it is pronounced, and subject him to the responsibilities of a defendant. If he refuse to pay the money, the court may attach him for a contempt; if he does pay it without a legislative appropriation, he is liable upon his bond, and subject to impeachment. Such might have been the consequence of a judgment against a State in the Supreme Court; and it was, no doubt, an apprehension of such a result that induced the amendment to the constitution forbidding the federal courts to call a State before them as a defendant at the suit of an individual.

It is evident that the principle of the proceeding secures to the federal tribunals every power supposed to be taken from them by the amendment. If the auditor of state can be enjoined from acting officially; if the treasurer can be decreed to pay back money received as revenue, upon the doctrine that the court consider them wrongdoers, there is no case of the exercise of State power that may not be completely controlled. The Legislature levy a tax: the federal court are called upon, and, upon motion, adjudge it to be contrary to the constitution of the United States; they regard the collector as a wrongdoer, and enjoin him from collecting it; the tax is collected and paid into the State treasury; the federal court are applied to; they pronounce the tax unconstitutional; the collection a trespass; the State treasurer a baillee for the claimant, and decree a restitution of the amount. The Legislature of the State enact a law for the punishment of crimes: an individual is convicted under its provisions, and imprisoned in the penitentiary; he complains that the law under which he is convicted is repugnant to the constitution of the United States; he calls upon the federal court for redress; the court decide the law to be unconstitutional, the conviction illegal, the keeper of the penitentiary a trespasser, and order the prisoner to be discharged. In such a proceeding they keep the State entirely out of view, and regard it as a mere personal matter; they shut their eyes to the real state of facts, and assert "that the nature and character of the whole transaction forbid the supposition" that the State could have had any agency or concern in the imprisonment. In this manner the States may be placed at the foot of the federal judiciary, as well in its administration of criminal justice as in its fiscal concerns.

In granting an injunction against the auditor of state, in the first instance, and in awarding an attachment against him for disobedience to that injunction, the federal circuit court in Ohio have unequivocally asserted a jurisdiction over the State and its officers in the collection of revenue. The circumstances under which the attachment was ordered admonish us that the jurisdiction thus asserted will be without reluctance enforced. The auditor will be fined or imprisoned, or both, for executing his official duty; and the State must either acquiesce in the correctness of the proceeding, and avert the consequence by retracing their steps, or, regarding it as an encroachment upon their just authority, must prepare to take such a stand against it as the constitution and a just regard to their rights may warrant.

The committee conceive that the proceeding in this case, by bill in chancery and injunction, against the auditor and treasurer, is, to every substantial purpose, a process against the State. The auditor and treasurer are defendants in name and in form only, and can only be made and regarded as defendants to evade the provisions of the constitution. From the view they have taken of the subject, the conclusion seems inevitable that the federal court have asserted a jurisdiction which a just construction of the constitution does not warrant; and the committee conceive that to acquiesce in such an encroachment upon the privileges and authority of the State, without an effort to defend them, would be an act of treachery to the State itself, and to all the States that compose the American Union.

The committee are aware of the doctrine that the federal courts are exclusively vested with jurisdiction to declare, in the last resort, the true interpretation of the constitution of the United States. To this doctrine, in the latitude contended for, they never can give their assent.

Every court of justice, where they have jurisdiction over the parties to the suit and the subject of controversy, are, of necessity, invested with power to decide every question upon which the rights of the parties depend; and their decision is conclusive unless a superior court be invested with jurisdiction to review it. On this subject the powers of the federal and of the State judiciary are precisely the same. These powers are not founded upon any express constitutional provision, but result from the very nature of written constitutions and judicial duty.

Among other things, the constitution of the United States declares that "no State shall pass any bill of attainder, *ex post facto* law, or law impairing the obligation of contracts." A defendant, prosecuted for a crime before a State court, may insist that the law upon which he is accused is *ex post facto*. If the State court decide in his favor, it is conclusive; because there is no law authorizing the federal court to review it. If the decision be against him, it is, for the same reason, conclusive. No person can be criminally prosecuted before the federal courts for the violation of a State law. No appeal or writ of error from the decision of a State court, in a State prosecution, lies to the federal court. The interpretation of that provision of the constitution of the United States which declares that no State shall pass an *ex post facto* law is now exclusively vested in the State courts. Nor can the federal courts ever be vested, under the constitution, as it now stands, with effective jurisdiction to interpret and enforce this provision. They cannot be empowered to take the administration of criminal justice from before the State courts, in the incipient stages of a prosecution; and a writ of error after judgment would clearly be a *suit at law*, in which the State must be defendant, and would come directly within the terms of the amendment.

In this case, then, the federal courts cannot now pronounce an effective judicial decision. They cannot possess themselves of jurisdiction over the parties upon whom any decision they might make could operate. Yet, individuals may contrive some feigned action, or make some feigned issue, and present to the federal court for decision a case, calling upon them, and thus empowering them to decide that, upon a particular state of facts, the operation of a State law would be *ex post facto*, within the meaning of the provision of the constitution of the United States. A decision thus obtained would be entitled to respect as the opinion of eminent men, but never could be regarded as a judicial declaration of the law of the land.

By an express provision of the constitution of the United States, a provision introduced purposely to effect that object, the States, in any controversies they may have with individuals, are placed beyond the jurisdiction of the federal courts. It would seem incontrovertible that the amendatory article placed the States and the United States in a relation to each other different from that in which they stood under the original constitution—different in this: that, in all cases where the States could not be called to answer in the federal courts, these courts ceased to be a constitutional tribunal to investigate and determine their power and authority under the constitution of the United States. The duty of the courts to declare the law terminated with their authority to execute it.

The committee conceive that such is the true, and that such is the settled construction of the constitution; settled by an authority paramount to all others, and from which there can be no appeal—the authority of the people themselves.

So early as the year 1798, the States and the people were called to declare their opinions upon the question involving the relative rights and powers of the Government of the United States and of the Governments of the separate States. In the month of November of that year, the State of Kentucky resolved:

"That the several States composing the United States of America are not united on the principle of unlimited submission to their General Government; but that, by compact, under the style and title of a constitution for the United States, and amendments thereto, they constituted a General Government for special purposes, delegated to that Government certain definite powers, reserving to each State itself the residuary mass of right to their own self-government; and that, whensoever the General Government assumes undelegated powers, its acts are unauthoritative, void, and of no force; that to this compact each State acceded as a State, and is an integral party, its co-States forming, as to itself, the other party; that the Government created by this compact was not made the exclusive or final judge of the extent of the powers delegated to itself, since that would have made its discretion, and not the constitution, the measure of its power; but that, as in all other cases of compact among parties having no common judge, each party has an equal right to judge for itself, as well of infractions as of the mode and measure of redress."

In the month of December of the same year, (1798,) the Legislature of Virginia resolved:

"That this Assembly doth explicitly and peremptorily declare that it views the powers of the Federal Government as resulting from the compact to which the States are parties, as limited by the plain sense and intention of the instrument constituting that compact, as no further valid than they are authorized by the grants enumerated in that compact; and that, in case of deliberate, palpable, and dangerous exercise of other powers not granted by the said compact, the States who are parties thereto have the right, and are in duty bound, to interpose for arresting the progress of the evil, and for maintaining, within their respective limits, the authorities, rights, and liberties appertaining to them."

It cannot be forgotten that these resolves, and others connected with them, were occasioned by the acts of Congress commonly called the alien and sedition laws, and by certain decisions in the federal circuit courts, recognising the obligatory force of the common law, as applicable to the federal jurisprudence.

The resolutions of Virginia were submitted to the Legislatures of the different States; Delaware, Rhode Island, Massachusetts, the Senate of New York, Connecticut, New Hampshire, and Vermont, returned answers to them, strongly reprobating their principle, and all but Delaware and Connecticut asserting that the federal judiciary were exclusively the expositors of the federal constitution. In the Virginia Legislature, these answers were submitted to a committee, of which Mr. Madison was chairman, and in January, 1800, this committee made a report, which has ever since been considered the true text book of republican principles.

In that report, the claim that the federal judiciary are the exclusive expositors of the federal constitution is taken up and examined. The committee say:

"But it is objected that the judicial authority is to be regarded as the sole expositor of the constitution, in the last resort; and it may be asked for what reason the declaration by the General Assembly, supposing it to be theoretically true, could be required at the present day, and in so solemn a manner?

"On this objection it might be observed, first, that there may be instances of usurped power, which the forms of the constitution would never draw within the control of the judicial department; secondly, that if the decision of the judiciary be raised above the authority of the sovereign parties to the constitution, the decisions of the other departments, not carried by the forms of the constitution before the judiciary, must be equally authoritative and final with the decisions of that department; but the proper answer to the objection is, that the resolution of the General Assembly relates to those great and extraordinary cases in which all the forms of the constitution may prove ineffectual against infractions dangerous to the essential rights of the parties to it. The resolution supposes that dangerous powers not delegated may not only be usurped and executed by the other departments, but that the *judicial departments also may exercise or sanction dangerous powers beyond the grant of the constitution; and, consequently, that the ultimate right of the parties to the constitution, to judge whether the compact has been dangerously violated, must extend to violations by one delegated authority as well as by another, by the judiciary as well as by the executive or legislative.*"

"However true, therefore, it may be, that the judicial department is, in all questions submitted to it by the forms of the constitution, to decide in the last resort, this resort must necessarily be deemed the last in relation to the authorities of the other departments of the Government; not in relation to the rights of the parties to the constitutional compact, from which the judicial as well as the other departments hold their delegated trusts. On any other hypothesis, the delegation of judicial power would annul the authority delegating it; and the concurrence of this department with the others in usurped powers might subvert forever, and beyond the possible reach of any rightful remedy, the very constitution which all were instituted to preserve."

The resolutions of Kentucky and Virginia, and of Massachusetts, Rhode Island, the Senate of New York, New Hampshire, and Vermont, in reply, and the answer to these replies by the Legislature of Virginia, were a direct and constitutional appeal to the States and to the people upon the great question at issue. The appeal was decided by the presidential and other elections of 1800. The States and the people recognised and affirmed the doctrines of Kentucky and Virginia, by effecting a total change in the administration of the Federal Government. In the pardon of Callender, convicted under the sedition law, and in the remittance of his fine, the new administration unequivocally recognised the decision and the authority of the States and of the people. Thus has the question, whether the federal courts are the sole expositors of the constitution of the United States in the last resort, or whether the States, "as in all other cases of compact among parties having no common judge," have an equal right to interpret that constitution for themselves, where their sovereign rights are involved, been decided against the pretension of the federal judges, by the people themselves, the true source of all legitimate powers.

In the opinion of the committee, the high authority of this precedent, as well as the clear right of the case, imposes a duty upon the State, from which it cannot shrink without dishonor. So long as one single constitutional effort can be made to save them, the State ought not to surrender its rights to the encroaching pretensions of the circuit court.

But justice should ever be held sacred. Pride and resentment are alike poor apologies for perseverance in error. If it were admitted that the proceedings of the federal court against the State, through its officers, are not warranted by the constitution, still, if the State has commenced in error, it should abandon the controversy. Before, therefore, we determine upon the course we ought to pursue, it is necessary to review and examine the ground upon which we stand.

The Bank of the United States established an office of discount and deposite at Cincinnati, in this State, which commenced banking in the spring of the year 1817. The Legislature met in December following, and upon the 13th day of December a resolution was proposed in the House of Representatives, and adopted, appointing a committee to inquire into the expediency of taxing such branches as were or might be established within this State. The committee reported against the expediency of levying such a tax; but the House of Representatives reversed

their report by a majority of 37 to 22. A substitute for their report was then offered, asserting the right of the State to levy such a tax, and the expediency of doing it at that time. The constitutional right of the State to levy such a tax was carried by 48 to 12, and the expediency of proceeding to levy the tax by 33 to 27. A bill assessing a tax was reported to the House, and passed to be engrossed for a third reading and final passage, and, upon the third reading, was postponed to the second Monday of December, 1818.

After this solemn assertion of the right to tax, and when a bill for that purpose was pending before the House of Representatives, the bank proceeded to organize a second office of discount and deposite at Chilicothe, in this State, which commenced banking in the spring of the year 1818. In January, 1819, the Legislature enacted the law levying the tax, and postponed its execution until the September following, that the bank might have abundant time so to arrange their business as not to come within the provisions of the taxing law.

At the period of adopting these measures, the constitutional right of the State to levy the tax was doubted by none but those interested in the bank, or those who expected to derive pecuniary advantages for themselves or their friends by the location of branches. It seemed impossible that a rational, disinterested, and independent mind could doubt. During the existence of the old Bank of the United States, the State of Georgia had asserted this right of taxation, and actually collected the tax. The bank brought a suit to recover back the money in the federal circuit court of Georgia. This suit was brought before the Supreme Court, upon a question not directly involving the power of taxation. The Supreme Court decided the point before them in favor of the bank, but upon such grounds that the suit was abandoned, and the tax submitted to. When the charter of the present bank was enacted, it was known that the States claimed, and had practically asserted, the power of taxing it; yet no exemption from the operation of the power is stipulated by Congress. The natural inference from the silence of the charter upon this point would seem to be, that the power of the States was recognised, and that Congress were not disposed to interfere with it.

The constitution of the United States had distinctly expressed in what cases the taxing power of the States should be restrained. No maxim of legal construction is better settled, and more universally acknowledged, than that express limitations of power, either in constitutions or in statutes, are distinct admissions that the power exists, and may be exercised in every other case than those expressly limited. With a knowledge of these facts and doctrines in their minds, that a confidence in the power of the State to levy this tax should be almost universal, is what every intelligent man would expect.

But, after the law was enacted that levied the tax, and before the time of its taking effect, the Supreme Court of the United States, in the case of Maryland and McCulloch, decided that the States were debarred, by the constitution of the United States, from assessing or levying any such tax. And upon the promulgation of this decision it is maintained that it became the duty of the State and its officers to acquiesce, and treat the act of the Legislature as a dead letter. The committee have considered this position, and are not satisfied that it is a correct one.

It has been already shown that, since the eleventh amendment to the constitution, the separate States, as parties to the compact of Union, are not subject to the jurisdiction of the federal courts upon questions involving their power and authority as sovereign States. Not being subject to their jurisdiction, no State can be concluded by the opinions of these tribunals. But these are questions in respect to which there is no common judge, and, therefore, the State has a right to judge for itself. If, by the management of a party, and through the inadvertence or connivance of a State, a case be made, presenting to the Supreme Court of the United States for decision important and interesting questions of State power and State authority, upon no just principle ought the States to be concluded by any decision had upon such a case. The committee are clearly of opinion that such is the true character of the case passed upon the world by the title of McCulloch *vs.* Maryland.

It was once remarked, by a most profound politician, that *words are things;* and the observation is most unquestionably a correct one. This case, dignified with the important and high-sounding title of "*McCulloch* vs. *the State of Maryland*," when looked into, is found to be an ordinary *qui tam* action of debt, brought by a common informer, of the name of John James; and it is, throughout, an agreed case, made expressly for the purpose of obtaining the opinion of the Supreme Court of the United States upon the question whether the States could constitutionally levy a tax upon the Bank of the United States. This agreed case was manufactured in the summer of the year 1818, and passed through the county court of Baltimore county and the court of appeals of the State of Maryland in the same season, so as to be got upon the docket of the Supreme Court of the United States for adjudication at their February term, 1819. It is only by the management and concurrence of parties that causes can be thus expeditiously brought to a final hearing in the Supreme Court.

It must be remembered that, through the extravagant and fraudulent speculations of those intrusted with conducting the concerns of the bank, it stood, at the close of the year 1818, upon the very brink of destruction. At this critical juncture of its affairs, it was a manœuvre of consummate policy to draw from the Supreme Court of the United States a decision that the institution itself was constitutionally created, and that it was exempt from the taxing power of the States. This decision served to prop its sinking credit; and if it inflicted a dangerous wound upon the authority of the States, both with the bank and with John James this might be but a minor consideration. It is truly an alarming circumstance if it be in the power of an aspiring corporation and an unknown and obscure individual thus to elicit opinions compromitting the vital interests of the States that compose the American Union.

It is not, however, either in theory or in practice, the necessary consequence of a decision of the Supreme Court, that all who claim rights of the same nature with those decided by the court are required to acquiesce. There are cases in which the decisions of that tribunal have been followed by no effective consequence.

In the case of Marbury *vs.* Madison, the Supreme Court of the United States decided that William Marbury was entitled to his commission as a justice of the peace for the District of Columbia; that the withholding of this commission by President Jefferson was violative of the legal vested right of Mr. Marbury. Notwithstanding this decision, Mr. Marbury never did obtain his commission; the person appointed in his place continued to act; his acts were admitted to be valid; and President Jefferson retained his standing in the estimation of the American people. The decision of the Supreme Court proved to be totally impotent and unavailing.

So in the case of Fletcher *vs.* Peck, the Supreme Court decided that the Yazoo purchasers from the State of Georgia were entitled to the lands. But the decision availed them nothing, unless as a make-weight in effecting a compromise.

These two cases are evidence that, in great questions of political rights and political powers, a decision of the Supreme Court of the United States is not conclusive of the rights decided by it. If the United States stand justified in withholding a commission when the court adjudged it to be the party's right; if the United States might, without reprehension, retain possession of the Yazoo lands after the Supreme Court decided that they were the property of the purchasers from Georgia, surely the State of Ohio ought not to be condemned because she did not abandon her solemn legislative acts as a dead letter upon the promulgation of an opinion of that tribunal.

This opinion is now before us, and the committee conceive that it is the duty of this General Assembly calmly to examine the principles and reasoning upon which it is founded. Much deference is due to the respectable indi-

viduals by whom it was formed, and more to the high station they occupy in the Government. Although their opinion is not admitted to have the force of absolute authority, yet a course of proceeding pronounced by such eminent statesmen and lawyers, to be unconstitutional, ought not to be lightly and unadvisedly adopted.

It is not perceived that the power of the State to tax the officers of the Bank of the United States established within their jurisdiction is necessarily connected with the question whether Congress have, or have not, the constitutional power to create a corporation. This power may safely be admitted, if, at the time of making this admission, we clearly comprehend the principles upon which the corporation is to be instituted.

"A corporation," says Chief Justice Marshall, in the case of Dartmouth College, "is an artificial being; invisible, intangible, and existing only in contemplation of law. Being the mere creature of law, it possesses only those properties which the charter of its creation confers upon it, either expressly, or as incidental to its very existence. These are such as are supposed best calculated to effect the objects for which it was created. Among the most important are immortality, and, if the expression may be allowed, individuality—properties by which a perpetual succession of many persons are considered as the same, and may act as a single individual. They enable a corporation to manage its own affairs, and to hold property without the perplexing intricacies, the hazardous and endless necessity of perpetual conveyances for the purpose of transmitting it from hand to hand. It is chiefly for the purpose of clothing bodies of men, in succession, with these qualities and capacities, that corporations are invented and are in use. By these means a perpetual succession of individuals are capable of acting for the promotion of the particular object, like one immortal being. But this being does not share in the civil government of the country, unless that be the purpose for which it was created. Its immortality no more confers on it political power, or a political character, than immortality would confer such power or character upon a natural person. It is no more a state instrument than a natural person exercising the same powers would be."

To this definition of a corporation, the committee see no reason to object; and when the true character of a private banking company is correctly understood, there seems to be no cogent reason why it may not be incorporated by Congress upon the principles here defined.

Banking, where the capital is owned by an association of individuals, is a private trade, carried on by the individuals constituting the company for their own profit. A mercantile company trade in produce and merchandise; a banking company trade in money, promissory notes, and bills of exchange. Both may carry on their trade without a charter of incorporation; the trade of both may be regulated by the law of the State in which they are located; and a charter of incorporation may be conferred upon either, without changing the character of their business, or clothing them with any portion of political power.

It is competent for the Government of the United States to make contracts with an association of individuals as well as with a single person. The Secretary of the Treasury may be authorized to employ an unincorporated banking company to take charge of, and transmit from place to place, the public revenue. For the performance of this service he may stipulate a compensation, but he cannot be authorized to barter a privilege inconsistent with the laws of the State where the company is located, by way of compensation for services to be performed. If such banking association be prohibited by the laws of the State, a contract with the General Government cannot suspend the operation of those laws. If such banking association be subject to State taxation, they cannot be exempted from their responsibility by a contract with the United States. But a capacity to transact its associate concerns in a legal and artificial name; a capacity to exist by perpetual succession, notwithstanding the natural death of the individuals; a capacity to sue, and a liability to be sued, without abatement, by the death of any one of the parties; an exemption from personal responsibility for the company debts, and conferring a separate character upon the company funds, so as to preserve them distinct from the individual property of the members of the company, are not privileges incompatible with State laws. And if investing a private company with these privileges may conduce to the public convenience and the public safety, in making contracts to receive and transmit the public moneys, conceding that Congress are empowered, under the constitution, to confer these privileges, as a consideration for the performance of the services agreed upon, and for the purposes of public good, cannot possibly compromit the safety of the States. If their charter of incorporation confer upon the Bank of the United States no other privileges than are here enumerated, it is manifest that, in every other respect, their property and business stand upon the same footing with that of other individuals.

It was in this light that a charter incorporating a bank was contemplated by the first founders of the Bank of the United States. The power of establishing themselves where they pleased, without respect to the State authority, was not claimed by the old bank, nor did they arrogate to themselves any federal character, or any privilege which did not appertain to them as individual citizens. No new or extended privileges are conferred by its charter upon the present institution. It is created a private corporation of trade, "as much so as if the franchises were invested in a single person." But it has received its chartered privileges from the Government of the United States, and therefore it is that it is exempt from State taxation.

If the committee have been able to understand the opinion of the Supreme Court, this consequence is deduced from the five following propositions:

1. The Government of the Union, though limited in its powers, is supreme within its sphere of action.
2. It is of the very essence of supremacy to remove all obstacles to its action within its own sphere, and so to modify every power vested in subordinate Governments as to exempt its own operations from their influence.
3. A power to create implies a power to preserve.
4. A power to destroy, if wielded by a different hand, is hostile to, and incompatible with, these powers to create and to preserve.
5. Where this repugnancy exists, that authority which is supreme must control, not yield to, that over which it is supreme.

These propositions are plausible and imposing, but, when carefully examined, and applied to the subject under consideration, it is conceived that no one of them can be sustained to the extent here laid down.

At the threshold of the inquiry, we demand what is meant by the assertion that "the Government of the Union is supreme within its sphere of action?" If this observation is applied to a subject where no question of conflicting power arises, its truth may be safely admitted; and the proposition is equally applicable to the States. In the same sense, each State is equally "supreme within its sphere of action." In regulating our foreign trade, the Government of the Union is supreme; and in establishing the modes of conveyance, and the canons of descent, each State is equally supreme. But this proves nothing upon either side, when the relative powers and authorities of the General and State Governments are drawn into discussion.

The power to establish light-houses, beacons, buoys, and public piers, is within the sphere of action of the Government of the Union; but, in practice, this power has never been considered supreme. It has always been exercised with the assent of the States, and within cessions of territory made by them.

The Cumberland road was laid out and constructed by the Government of the Union; consequently, the power to do it is considered within their sphere of action. Yet this power was not claimed as supreme; it was only exercised with the assent and approbation of the States through which the road was made.

Murder is an offence against all government; yet the Government of the United States cannot punish murder unless it be committed in the army or navy, upon the high seas, or within their forts and arsenals, or other places where they exercise exclusive jurisdiction. Except in the cases specified, the murder of an officer of the United States cannot be distinguished from an ordinary homicide. A judge of the federal courts, a marshal, a collector of the revenue, a postmaster, a member of either House of Congress, the President or Vice President, may be murdered, and, if the respective States refuse to interpose their authority to punish the perpetrator, he must escape with impunity. This Government, though supreme within its sphere of action, cannot protect the lives of its public functionaries by the punishment of those who may assail them. It can assert no jurisdiction, unless violence be offered to them in their official characters, and in the performance of official duties.

It may be answered to this that the punishment of murder is not within their sphere of action. True. But how futile is it to talk of a Government being supreme, which is not invested with this the most common and ordinary mode of preserving its existence. It is supreme over individuals in cases entirely subject to federal cognizance. But is it supreme over the States? It cannot coerce them either to elect Senators in Congress, or electors of President and Vice President. A combination between one-half of the States, comprising one-third of the people only, possesses the power of disorganizing the Federal Government, in all its majesty of supremacy, without a single act of violence. It is expressly inhibited by the constitution, from which this supremacy is derived, from calling the States as defendants before its courts. It cannot save from punishment one single citizen whom the State authorities have condemned. It is neither supreme to save, nor to punish. In what, then, does this supremacy consist, in which the separate States are not also supreme? In one thing only, and that is, the exercise by the federal courts of appellate jurisdiction in cases, and between parties, made subject to their jurisdiction by the constitution. But the States, as parties, are not subject to their jurisdiction, but are expressly exempt from it; and, therefore, over the States, and upon questions involving the extent of their powers and authority, the Government of the Union is not supreme. It cannot, according to the hypothesis of the second proposition, remove all obstacles to its action, and so modify the powers of the State Governments as to exempt its own operations from their influence.

Is this second proposition sustainable upon any acknowledged principle of constitutional law? It is certainly a doctrine of portentous import when connected, as it necessarily must be, with the proposition that precedes it: it claims, as an attribute of the Government of the Union, a power to *modify* every power vested in the State Governments, so as to remove all obstacles to its own action, and exempt its own operations from their influence.

According to this doctrine, the States are not co-parties to the compact of union, as asserted in 1798, by the States of Kentucky and Virginia, and established in 1800 by the American people. The rights, powers, and authorities of the States are not immutably established by constitutional provisions; but are subject to modification, in order to give scope for the action of the Government of the Union.

The two propositions stand in a perfectly natural and logical connexion, though not thus arranged in the opinion:

"The Government of the Union, though limited in its powers, is supreme within its sphere of action."

"It is of the very essence of supremacy to *remove* all obstacles to its action within its own sphere, and so to *modify* every power vested in *subordinate* Governments as to exempt its own operations from their influence."

Therefore, we may very properly add the consequent—it is competent for the Government of the Union to remove all obstacles to its action, by so modifying the powers of the State Governments as to exempt its own operations from their influence. If the postulates be admitted, this consequent is inevitable.

This result will hardly be contended for in explicit terms; it asserts a supremacy nowhere recognised in the constitution. The powers retained by the States cannot be *modified* by the Government of the Union. To modify, is to change, or give a new shape to, the power modified; and if the Government of the Union can give a new character to the powers reserved by the States, for the purpose of removing obstacles to their own power of action, there must soon be an end to the State Governments. The Government of the Union asserts an exclusive authority in itself to determine its own sphere of action. On this point it is as supreme as upon any other. So soon as it has resolved that the exercise of any power appertains to it, that power assumes the character of supremacy, and removes by modification—puts down before its march—every power previously supposed to be vested in the States that may present any obstacle to its action. Thus, the Government of the Union may, and undoubtedly will, progressively draw all the powers of government into the vortex of its own authority. Against these doctrines the committee conceive that it is the duty of the States to enter their most solemn protest.

The committee do not admit that supremacy is an attribute either of the Government of the Union or of the State Governments. Supremacy is an attribute of the people, and an attribute of the laws. In relation to the Governments, the people are supreme; and the laws supreme over individuals. Government is but the medium through which the supreme power acts: the Government of the Union is the medium through which the American people act upon particular subjects that concern their interest and their welfare; the Governments of the States are the medium through which the same people act upon other subjects, equally interesting and important to them. These two mediums of action are only brought into collision by the usurpations of one or the other. Neither is invested with power to render its encroachments permanent, by a modification of the powers of the other. While moving within its proper limits, neither can present an obstacle to the action of the other: both must proceed harmoniously. In respect to each other, neither is supreme, neither subordinate. The Government of the Union and the Governments of the separate States are alike the property and the agencies of the whole American people. This principle is the base and bond of the American Union.

The third proposition is, "that a power to create implies a power to preserve."

As applicable to the Government of the Union, and the incorporation of the Bank of the United States, this proposition, in the broad sense of its expression, is considered totally inadmissible.

The committee have already attempted to demonstrate that the Bank of the United States is a mere private corporation of trade. Their charter confers upon them neither political character nor political power; it gives them corporate capacity, and nothing more. The provision that the bank may establish branches in the States and Territories, when fairly construed, can only be regarded as giving corporate capacity to do so; and this is the only provision of the charter that, by any colorable interpretation, can be understood to vest them with a semblance of political power.

The legal faculty and capacity conferred by the charter, if constitutionally created, are preserved in existence by the very law that originates them. They become private vested rights, and are preserved by the same universal law that protects individual rights and individual contracts.

But the trade and business of the bank, and the franchises conferred to aid in carrying them on, are separate and distinct matters. To lend money and drive a trade in bills of exchange and gold and silver bullion are not corporate franchises. These trades exist independent of the charter, and may be pursued by individuals without an act of incorporation. It is not the business itself, but the particular method of conducting it, that is created by the act of Congress incorporating the Bank of the United States.

Natural persons are clothed with an original, inherent capacity to make contracts, and to acquire property. In a corporation this capacity is artificial. In other respects, natural persons, and corporations or legal persons, stand upon the same principles. The power of making contracts, enjoyed by individuals, is subject to the regulations of law; the property acquired by individuals is liable to taxation for the support of those laws that originate and protect it. Private corporations of trade, upon every maxim of justice and common sense, are subjected to the same regulations and exactions.

The employments, professions, business, and trade of natural persons may be taxed as such; and laws for this purpose are not considered as violative of individual rights, or as incompatible with the existence and preservation of trade, business, and employments. No just principle is perceived upon which these laws should receive a different interpretation in their application to the trade and business of a private corporation.

According to the definition of a corporation heretofore given, the corporate franchises of the Bank of the United States invest the stockholders with immortality and individuality; with a capacity to act like one immortal being, to perpetuate their existence, to manage their own affairs, to hold property, and transmit it from hand to hand as a natural person could. These franchises are conferred by the Government of the Union to enable the company to conduct the business of lending money, and the trade in bills of exchange and gold and silver bullion, with convenience and security; but the business and trade to be conducted are not corporate franchises, and are not created by the act of Congress. A tax assessed upon the business of the company does not touch their corporate franchises, however it may affect their convenience or their profit. This power to preserve, as asserted by the court, and applied to the subject before them, is not asserted for maintaining and preserving the corporate franchises of the bank, but for the purpose of giving to these corporate franchises action and employment everywhere, independent of State laws, and beyond the control of State legislation. When fairly traced to its consequences, the doctrine asserted amounts to this: that a corporation created by the Government of the Union is clothed with supreme authority to conduct its business, without respect to the existing laws of the States, and free from any apprehension of those that may be enacted.

A most serious objection to this doctrine is, that it asserts the power to preserve, not as pertaining to the Government of the Union, to be employed or not at the discretion of Congress, but as incidental to the charter, and to be secured to the company by the judicial power alone.

The committee conceive that the power to create a corporation, and the power to preserve it by special privileges and exemptions, are powers of the same class and description; both are legislative powers, to be conferred or withheld at the discretion of the Legislature; and where a charter of incorporation stipulates no special privileges and exemptions, none can be supposed to exist. "Being the mere creature of law, it possesses only those properties conferred upon it, either expressly, or as incidental to its very existence."

Had Congress intended to exempt the bank from the taxing power of the State as a means of preserving its existence, a provision for that purpose should have been introduced into the charter. The power to make this provision would have been examined before the charter was created, and the intention of Congress would have been manifested. The people and the States would have been apprized of the pretensions of the bank before it got foothold among them, and before it had established a moneyed influence to support itself. Every privilege claimed by the company, when inserted in the charter, has received the sanction of the legislative authority, and is open to the examination of all. But to invest them with unknown and latent privileges to any extent that the Supreme Court may deem convenient, to preserve, not only their corporate franchises, but the most beneficial use of them, is undoubtedly a new doctrine as applied to corporations, and as dangerous as it is novel.

This company have claimed that the States cannot tax their corporate operations, or the profits arising from them; and the Supreme Court have sustained their claim as a privilege necessary to preserve their existence. By their charter, they are authorized to employ officers, clerks, and *servants*. Should the company claim to send slaves into Ohio, and employ them in their branches as *servants*, the committee would conceive the claim as well founded, and as likely to be sustained, as the exemption from taxation. It stands upon the same principle. If the States may control the company in the employment of *servants*, they may embarrass its operations, and impede a free and unrestrained exercise and enjoyment of their corporate faculties. By the laws of Ohio, a promise to pay the debt of another is not obligatory unless made in writing; but the charter of this company is silent as to the mode of binding parties that contract with them; they may claim that this law of contracts applies to individuals only, and cannot touch them without narrowing the beneficial use of the faculty conferred upon them by Congress. Who shall say that this claim may not be sustained? In short, who can undertake, with any hope of success, to enumerate the privileges and exemptions to which, upon this doctrine, the bank are entitled?

It is important to glance at the train of implications with which this doctrine is connected. The power to create the bank implies the power to preserve it. This power to create is itself derived by implication. It is found among the subsidiary powers as incident to the choice of means for the administration of the Government. This implied power to create is made the foundation for further implication; it implies the power to preserve; and again, of necessity, the power to preserve implies a choice in selecting the means of preservation; and upon the doctrine of the court, all these powers are supreme, to the operations of which the constitutions and laws of the States can oppose no obstacle. It is certainly difficult to see the point where these implications terminate, or to name the power which they leave to the States unimpaired.

The Government of the Union have no authority, by the express provisions of the constitution, to interfere with the law of contracts. They have found authority to institute a bank, or, in other words, to create a private corporation of trade; and with the power to create, they have possessed themselves of power to preserve, not the corporation they have created, but the business in which the corporation have engaged. This business extends over the whole region of contract, either direct, in negotiating loans of money, and purchasing and selling bills of exchange and gold and silver bullion, or indirect, in receiving and disposing of merchandise and real estate, pledged or mortgaged for debts previously contracted. From the aid of this corporation the States may withdraw their law of conveyances; or, as applied to their dealings, the States may introduce provisions regulating contracts, which the corporation may deem obstructions to the enjoyment of their corporate trade. From this doctrine, that the power to create implies the power to preserve, Congress may derive a power to frame a new law of contracts, and devise a new system of conveyances, suitable to the beneficial enjoyment of the trade of this corporation; and this new system, in the supremacy of its action, may disregard both fundamental laws and established maxims of jurisprudence.

The Government of the Union was not instituted to protect individual rights or to redress individual wrongs; but this power to preserve the trade, business, and property of a corporation, created by themselves, invests them with power to frame a code of criminal law for the punishment of those who violate the property of the bank, and thus draw into the federal courts the ordinary administration of criminal justice. This is already attempted in the provision for punishing those who counterfeit the notes of the bank, and, upon the doctrine asserted, may be extended to cases of larceny, burglary, or robbery upon their corporate property. No doctrine has ever yet been advanced that draws to the Government of the Union such a host of powers—none that contains such potency for "rending into shreds" the authority of the States.

Those who claim for the Government of the Union the power of creating corporations hold that "one may be created in relation to the collection of the taxes, or to the trade with foreign countries, *or between the States*, or with the Indian tribes; because it is the province of the General Government to regulate those objects, and because it is incident to a *general* sovereign or legislative power to regulate a thing to employ all the means which relate to its regulation to the best advantage." The power to create all these corporations, upon the principle asserted, implies the power to preserve them; and the power to preserve implies a power in the Government of the Union to bargain with companies for monopolies of trade and exemptions from taxation; to place such companies above the power of the States, as means employed by themselves, which they have a right to use to the best advantage.

In the discussion of this subject, an extraordinary and the most miraculous efficacy is given to the terms "*employment of means;*" and it is worthy of remark, that no effort is made to explain their true import, or the sense in which they are used. We are told that the collection of taxes, and the safe-keeping and transmission of money from place to place, are an end or object of Government, and that the bank is a convenient means of obtaining this end. But it is not the charter or corporate franchise that is used or employed for this purpose; it is the individuals that compose the company, as an aggregate body, that are thus used; and the corporate franchise bestowed upon them by the Government is conferred to enable them to transact their own business, and perform this service for the Government, with greater security and convenience. At this moment the Government of the Union employs the Franklin Bank of Columbus to receive and pay out the public moneys; and, while thus employed, this bank is used as a means of Government, but being thus used is not supposed to invest it with any privilege peculiar to the public functionaries.

The Government and all its machinery and officers are but the means of the people for attaining the great ends declared in the preamble to the constitution. Every person employed under the constitution, from the President of the United States to the post-boy that carries the mail, partakes of this character of means. The law that the President is bound to see faithfully executed, and the horse that the post-boy rides, are alike, in a certain sense, means of the Government; but, in respect to privileges and exemptions, no man ever supposed them to stand upon the same footing. Those who hold offices directly under the Government may be regarded as principal means; those who are employed by contract, as incidental or subsidiary. The first class compose, as it were, a part of the Government direct, are intrusted with the exercise of some portion of political power, and are clothed with privileges and exemptions attached to their official stations. Those engaged by contract to perform services have no official character, and, consequently, cannot claim the exemptions attached to public office. Thus, a deputy postmaster is an officer under the Government, invested with privileges, and subject to disabilities attached to his office; but a contractor to carry the mail has no such character; yet both are means used by Government, under the constitutional authority "to establish post offices and post roads."

The Bank of the United States is not *a mean* of the Government of the Union in the same sense with the mint and the post office, but in the same sense with contractors to supply public stores, or to carry the mail. The director, assayer, chief coiner, engraver, treasurer, melter, and refiner of the mint are public officers; so are the Postmaster General and deputy postmasters. They cannot hold their offices and seats in Congress at the same time; they are appointed to and take an oath of office. But the workmen employed in the mint, like contractors to carry the mail, and the drivers and riders they employ, are not public officers; nevertheless, they are necessary means in the employment of the Government. The stockholders in the Bank of the United States and the president and directors of that institution are not public officers. Even the directors appointed by the Government are destitute of public character. They are eligible to seats in Congress, which is conclusive evidence upon this point; and it is a monstrous doctrine to maintain that corporations created by the Government of the Union, in point of privilege and exemption, are principal means of Government, not to be distinguished from the officers of the mint and the post office, while all the members and officers of such corporations are eligible to seats both in the Congress of the Union and the Legislatures of the several States. By this doctrine, the great principle of separating the departments of Government is completely broken down. Collectors of revenue, officers of the customs, Indian agents, and receivers of public moneys, under the Government of the Union, may become legislators and judges in their own case, both in the General and State Governments. This consequence alone would seem sufficient to expose the unsoundness of the doctrine asserted.

It is singular that, in the very elaborate opinion which the committee have been engaged in examining, no definition should be given of the true character of the bank, but that, like the terms "employment of means," it should be left to doubtful and various interpretations. It is a public institution, or a private corporation of trade. If the former, with the privileges of office, the corporators must be subject to the disabilities of office. If the latter, like any other individual or bank employed by the Government of the Union, its trade and business must be regulated by State laws, and subject to State exactions. In support of their position that it is a private corporation of trade, the committee can adduce a judicial opinion delivered in the Supreme Court itself: "For instance, [says Mr. Justice Story,] a bank, created by the Government for its own uses, whose stock is exclusively owned by the Government, is, in the strictest sense, a public corporation. So is a hospital, created and endowed by the Government for general charity. *But a bank whose stock is owned by private persons is a private corporation, although it is erected by the Government, and its objects and operations partake of a public nature.* The same doctrine may be affirmed of insurance, canal, bridge, and turnpike companies. In all these cases, the uses may, in a certain sense, be called public, *but the corporations are private; as much so, indeed, as if the franchise were vested in a single person.*"

We have seen that, by the employment of natural persons or State banks to perform those services stipulated to be performed by the Bank of the United States, they become, to a certain extent, *means employed* by the Government, and yet have never been regarded as public officers, privileged from the operation of State laws. May we not, therefore, paraphrase the language of the chief justice, and ask, "If, then, a natural person or State bank employed by the Government of the Union to receive, keep, and pay out public moneys, would not become a public officer, or be considered as a member of the civil Government, how is it that this artificial being, created by law for the purpose of being employed by the same Government for the same purposes, should become a part of the civil Government of the country? Is it because its existence, its capacities, its powers, are given by law? Because the Government has given it the power to take and to hold property, in a particular form, and for particular purposes, has the Government a consequent right (as over all members of the civil Government it must have) substantially to change that form, or to vary the purposes to which the property is to be applied? *This principle has never been asserted or recognised, and is supported by no authority.*"

Thus reasoned the judges of the Supreme Court upon the 2d February, 1819. The case of McCulloch *vs.* Maryland had not then been argued or decided. And the doctrine that the Government, by chartering a private corporation of trade, placed the association upon the same foundation with the mint and the post office, had then never been recognised in a court of law, and was "*supported by no authority.*" If the public character of the Bank of the United States stands upon other foundation than that expressly negatived in these quotations, the committee have been unable to discover it: it is not explained or developed in the opinion that places them on a

level with the mint and the post office, and gives to their trade in bills of exchange and gold and silver bullion the same character as to the process of the federal courts.

When the committee deny that "a power to create implies a power to preserve," they are to be understood as denying the application of this principle only to the case of creating corporations. A power to create a public office necessarily implies a power to preserve that office; but a power to bestow a corporate franchise to carry on a private trade is totally different from creating a public office. A distinction between the corporate franchise, and the business to be conducted under it, must be always borne in mind; the power that creates a corporate franchise for private purposes not only can preserve such franchise, but cannot new model or impair it: its corporate character and existence are as secure as the existence and personal rights of a natural person; but its trade and business, like the employments of natural persons, remain subject to regulation by the local authorities where it seeks to locate them. Thus a power in the States to tax, or even to prohibit a trade in bills of exchange and gold and silver bullion, is not a power to destroy the corporate franchises of the Bank of the United States. These corporate franchises remain, notwithstanding the exercise of this power, just as the existence and rights of an individual remain, though his business is taxed, or he is forbidden to engage in certain employments. The Government of the Union has conferred upon the bank certain capacities for engaging in trade, but it has not, and cannot confer an absolute right and power to drive this trade, in contempt of State laws. It is made capable, but not sovereign; its capacity must be examined, not with a single eye to the supremacy of the power that created it, but with a whole view of what that power could confer, and what it has conferred.

If the committee have succeeded in showing that the power which created the Bank of the United States is not supreme, in the sense of the first two propositions, but is limited in its powers and means of preserving the bank, so as to render the third proposition untenable, the fourth and fifth propositions, which are founded upon, and consequences derived from, the other three, must necessarily be given up. As applied to the question under discussion, however, it has been shown that a power to tax their trade is not a power to *destroy* the corporation. It is not perceived how a power to diminish the profits of labor and capital, by exacting a portion of their proceeds for the support of Government, can be construed into a power to destroy human life and annihilate capital. The power of taxing the bank is denied, because it might be so used as to prevent the corporation from driving a profitable trade; and this is deemed a power to destroy the charter, which did not originate the trade, but merely created a facility for conducting it. But what is most singular is this: that, after arriving at this conclusion, an admission is made that at once demolishes the whole doctrine upon which it is founded.

It is conceded that each State may tax the stock owned by its citizens in this bank. Then it is not a public institution, exempt from State taxation, upon the great principle that the States cannot tax the offices, institutions, and operations of the Government of the Union. It is not that the States have no power to tax the bank; but that this power exists only over its capital, and does not extend to its operations. What, then, becomes of all the labored doctrines of the opinion? The Government of the Union, though supreme within its sphere of action, removing all obstacles, and so modifying all powers vested in subordinate Governments as to exempt its own operations from their influence, cannot, after all, preserve what it can create. Those who advance this pretension are compelled to admit, that, upon their own principles, a power to destroy may be wielded by the State Governments.

In its utmost extent, a State tax upon the operations of the bank can produce no other injury than a suspension of its business. By ceasing to trade, a tax upon business can always be avoided. Not so a tax upon capital. Should the States of Pennsylvania, New York, and Massachusetts combine to tax the stock in the Bank of the United States owned by their citizens, to an amount that must consume the annual profits and encroach upon the capital advanced, the destruction of the bank must be inevitable; for this tax upon capital may be exacted, whether it be productive or not. The power of the States to tax the business of the bank is denied upon the broad ground that the power to levy such a tax is tantamount to a power to destroy the bank, and is incompatible with a power in the Government of the Union to create it. Yet this power to tax the capital, though incontestably of greater potency to destroy the institution, is admitted to exist. Between the point decided and the point conceded there is a palpable contradiction, to which sound argument and just conclusions are never subject.

Another very absurd consequence results from the decision and admission, when connected together as they are in the opinion under consideration. A State tax upon the stock or actual capital invested by its citizens in the bank cannot reach or affect the stock owned by foreigners or by the other States; but a tax upon the business operates alike upon all the stockholders. Should Massachusetts tax the stock of her citizens, stock in the bank must be worth less in Massachusetts than elsewhere. Should all the States tax the stock owned by their citizens, stock held by foreigners must be most valuable. Should one State tax the stock so as to exhaust the capital, the citizens of that State must sell out to citizens of other States or to foreigners. Should all the States assess such a tax, the whole stock must be transferred to foreigners, or the bank annihilated. One consequence, therefore, of this admission, may be to throw the institution into the hands of foreigners, when our Government will exhibit the strange spectacle of a company of foreign bankers regarded as a national institution, and, as such, protected by the constitution of the Union from any of the burdens to which citizens are subject.

It may be said that this admission was unwarily made, and, upon further consideration, would be retracted as inconsistent with what had been previously decided. But the committee conceive that this explanation is quite unsatisfactory. It has been already stated that the constitution does, in express terms, declare what subjects shall be exempt from the taxing power of the States. It was felt that indirectly to exempt other subjects was unwarrantable, upon all established principles of interpreting laws and constitutions. This argument was pressed; and, to escape its force, the admission was made, so that evidently it is part of the decision, and, as such, sweeps away the grand pillar upon which the whole decision rested.

If the committee have taken a correct view of the subject, it would seem manifest that, in denying to the States a power to tax private corporations of trade incorporated by the Government of the Union, where no doubt exists of the power to create the incorporation, it becomes necessary to maintain many doctrines of very doubtful character and dangerous tendency; while conceding to them this power involves nothing either doubtful or dangerous. It strips such corporations of all pretensions to be regarded as instruments of Government, in the same sense as the mint and the post office; but it preserves untouched their corporate franchises, and concedes to them every right and privilege which a natural person is entitled to claim. It presents no obstruction to the legitimate action of the Government of the Union, but places it, in the establishment of private corporations of trade, upon the same foundation as in erecting light-houses and constructing roads.

It is in nothing derogatory to this corporation called the Bank of the United States, nor to the Government of the Union that created it, to place its trade upon the same footing with that of a private citizen employed by the Government. The contractor to transport the mail must use horses and carriages; without them, he cannot comply with his contract. They are means or instruments employed by Government, but they are subject to State taxation, as other property of the same description. This has been a universal practice, and has never been deemed any obstruction to the action of the Government of the Union. The States cannot tax the transportation

of the mail without obstructing the action of the Government; but were an association incorporated to transport the mail all over the Union, with capacity to trade in live stock and agricultural products, there can be no doubt but that their private trade and property would be subject to State taxation.

The committee have not deemed it necessary to examine any argument founded upon a supposed abuse of power by the States. As between States, every argument of this sort is inadmissible, because it may be urged with equal force against the exercise of any power by either, and concludes to the destruction of all authority. There can be no doubt but the States will at all times be ready to encourage rather than repress the introduction and employment of capital within their dominion, where it may probably be of any general advantage. Of this the State authorities are much more competent judges than capitalists or their agents at a distance can be. It must always be unwise to force capital into a country against the sense of those who administer the Government. That the bank has sustained great losses by sending branches into this State, is now notorious; that their trade and loans have been highly injurious to all the best interests of the State, cannot be disputed. This loss on the one hand, and injury on the other, would have been avoided, had the bank consulted the authorities of the State instead of holding counsel with money-jobbers and speculators.

The committee have carefully examined the subject, and, without pretending to present it in all the views of which it is susceptible, have urged only those which appear to them most prominent. The result of their deliberations is, that the Bank of the United States is, in their opinion, a mere private corporation of trade, and, as such, its trade and business must be subject to the taxing power of the State.

In considering what course the committee should recommend as proper to be adopted at this time, one point of difficulty has presented itself. It is urged by many that the tax levied and collected is enormous in amount, and therefore unequal and unjust. It is readily admitted that this allegation is not entirely unfounded, and all must agree that it does not comport with the character of a State to afford any color to accuse her of injustice. Even in the assertion of a right, it is highly derogatory for a State to act oppressively; and all injustice is oppression. It cannot be doubted but that the tax was levied as a penalty, and that it was not supposed the Bank would venture to incur it. It was an act of temerity in them to do so; and although in this view the tax was justly, and in the opinion of the committee, legally collected, yet, under all the circumstances of the case, the committee conceive that the State ought to be satisfied with effecting the objects for which the law was enacted.

At this time the bank can have little object in continuing its branches, except to maintain the point of right, which may not be definitively settled by the controversy. The State, having refused to use the money collected, has no interest but that of character and an assertion of the right. If an accommodation can be effected without prejudice to the rights upon either side, it would seem to be desirable to all parties. With this view, as well as with a view to remove all improper impressions, the committee recommend that a proposition of compromise be made by law, making provision that, upon the bank discontinuing the suits now prosecuted against the public officers, and giving assurance that the branches shall be withdrawn, and only an agency left to settle its business and collect its debts, the amount collected for tax shall be paid, without interest.

But the committee conceive that the General Assembly ought not to stop here. The reputation of the State has been assailed throughout the United States; and the nature of the controversy, and her true course of conduct, have alike been very much misunderstood. It behooves the General Assembly, even if a compromise be effected, to take measures for vindicating the character of the State, and also for awakening the attention of the separate States to the consequences that may result from the doctrines of the federal courts upon the questions that have arisen. And, besides, as it is possible that the proposition of compromise may not be accepted, it is the duty of the General Assembly to take ulterior measures for asserting and maintaining the rights of the State by all constitutional means within their power.

In general, partial legislation is objectionable; but this is no ordinary case, and may therefore call for and warrant extraordinary measures. Since the exemptions claimed by the bank are sustained upon the proposition that the power that created it must have the power to preserve it, there would seem to be a strict propriety in putting the creating power to the exercise of this preserving power, and thus ascertaining distinctly whether the executive and legislative departments of the Government of the Union will recognise, sustain, and enforce the doctrine of the judicial department.

For this purpose the committee recommend that provision be made by law forbidding the keepers of our jails from receiving into their custody any person committed at the suit of the Bank of the United States, or for any injury done to them; prohibiting our judicial officers from taking acknowledgments of conveyances, where the bank is a party, or when made for their use, and our recorders from receiving or recording such conveyances; forbidding our courts, justices of the peace, judges, and grand juries, from taking any cognizance of any wrong alleged to have been committed upon any species of property owned by the bank, or upon any of its corporate rights or privileges; and prohibiting our notaries public from protesting any notes or bills held by the bank or their agents, or made payable to them.

The adoption of these measures will leave the bank exclusively to the protection of the Federal Government, and its constitutional power to preserve it in the sense maintained by the Supreme Court may thus be fairly, peaceably, and constitutionally tested. Congress must be called on to provide a criminal code to punish wrongs committed upon it, and to devise a system of conveyances to enable it to receive and transmit estates; and, being thus called on to act, the National Legislature must be drawn to the serious consideration of a subject which the committee believe demands much more attention than it has excited. The measures proposed are peaceable and constitutional; conceived in no spirit of hostility to the Government of the Union, but intended to bring fairly before the nation great and important questions, which must one day be discussed, and which may now be very safely investigated.

The committee conclude by recommending the adoption of the following resolutions:

Resolved by the General Assembly of the State of Ohio, That, in respect to the powers of the Governments of the several States that compose the American Union, and the powers of the Federal Government, this General Assembly do recognise and approve the doctrines asserted by the Legislatures of Kentucky and Virginia in their resolutions of November and December, 1798, and January, 1800, and do consider that their principles have been recognised and adopted by a majority of the American people.

Resolved, further, That this General Assembly do protest against the doctrines of the federal circuit court sitting in this State, avowed and maintained in their proceedings against the officers of state upon account of their official acts, as being in direct violation of the eleventh amendment to the constitution of the United States.

Resolved, further, That this General Assembly do assert, and will maintain, by all legal and constitutional means, the right of the States to tax the business and property of any private corporation of trade, incorporated by the Congress of the United States, and located to transact its corporate business within any State.

Resolved, further, That the Bank of the United States is a private corporation of trade, the capital and business of which may be legally taxed in any State where they may be found.

Resolved, further, That this General Assembly do protest against the doctrine that the political rights of the separate States that compose the American Union, and their powers as sovereign States, may be settled and determined in the Supreme Court of the United States, so as to conclude and bind them in cases contrived between individuals, and where they are, no one of them, parties direct.

Resolved, further, That the Governor transmit to the Governors of the several States a copy of the foregoing report and resolutions, to be laid before their respective Legislatures, with a request from this General Assembly that the Legislature of each State may express their opinion upon the matters therein contained.

Resolved, further, That the Governor transmit a copy of the foregoing report and resolutions to the President of the United States, and to the President of the Senate and Speaker of the House of Representatives of the United States, to be laid before their respective Houses, that the principles upon which this State has, and does proceed, may be fairly and distinctly understood.

HOUSE OF REPRESENTATIVES, *December* 28, 1820.

The foregoing report approved, and resolutions adopted.

Attest: WM. DOHERTY, *Clerk House of Representatives.*

IN SENATE, *January* 3, 1821.

Report and resolutions concurred in.

Attest: RICHARD COLLINS, *Clerk of the Senate.*

16th CONGRESS.] No. 501. [2d SESSION.

PUNISHMENT FOR PIRACY.

COMMUNICATED TO THE SENATE, ON THE 9TH OF FEBRUARY, 1821.

Mr. SMITH, from the Committee on the Judiciary, to whom was referred the resolution "to inquire into the propriety of so modifying the law punishing piracy as to authorize the President of the United States, in such cases as he may deem expedient, to commute capital punishments for confinement in penitentiary houses," made the following report:

The object of the resolution is to alter the criminal code of the United States so far as to place within the power of the President of the United States the complete control over the punishment now affixed by law to the crime of piracy, and to soften it down from death to the less rigorous punishment of confinement in penitentiary houses.

As we have drawn most of our impressions of the utility and efficacy of penitentiaries from the practical operations of this system in the several States where it has been adopted, it may not be thought improper to give the result of certain official inquiries into the condition, usefulness, and advantages of some of these institutions in States where much zeal and diligence had been displayed to cherish them.

Some time in the year 1817 the grand jury of Philadelphia visited the penitentiary in that city, upon which they made the following presentment:

"That, while they notice with pleasure the high degree of order and cleanliness, they are compelled by a sense of duty to present, as an evil of considerable magnitude, the present very crowded state of the penitentiary; the number of prisoners of all classes continues to increase, so that from twenty to forty are lodged in rooms eighteen feet square. So many are thus crowded together, that the institution already begins to assume the character of a European prison *and a seminary for every vice*, in which the unfortunate being who commits the first offence, and knows none of the arts of methodized villany, can scarcely avoid the contamination which leads to extreme depravity." The same grand jury further stated "that, of four hundred and fifty-one convicts now in the penitentiary of Pennsylvania, one hundred and sixty-one have been confined there before." It is believed that no institution of this character ever received more attention as respects its comforts and means for promoting the reformation of offenders.

The commissioners appointed to examine into the state of the New York prison, not long since, in their report say: "It has for some time past not only failed of effecting the object chiefly in view, but has subjected the treasury to a series of disbursements too oppressive to be continued if they can in any way be prevented."

The commissioners of the prison of Massachusetts, in a report, complain "that the prison is so crowded as to defeat the object for which the institution was created." These commissioners, after enumerating what they consider to be the advantages arising to the commonwealth, say: "But there appears great reason to suppose that the advantage first mentioned is more than counterbalanced by the greater hardihood and more settled corruption which a promiscuous association among the convicts must produce, particularly the young."

These appear to be fair and impartial representations made by men whose duty it was to represent things as they were, in order to bring to the public view their true character; and if this is the state and effect of those prisons, after twenty years of experience and prudent management, upon convicts whose offences are not of the most atrocious class, but little hope can be entertained that pirates can be reformed by such means.

In the catalogue of human offences, if there is any one supremely distinguished for its enormity over others, it is piracy. It can only be committed by those whose hearts have become base by habitual depravity. It is called by jurists an offence against the universal laws of society. A pirate is *hostis humani generis*. He is at war with his species, and has renounced the protection of all civilized Governments, and abandoned himself again to the savage state of nature. His flag consists of a "black field, with a death's head, a battleaxe, and an hourglass." These are the ensigns of his profession. He does not select the enemies of his native country as the only objects of his conquest, but attacks indiscriminately the defenceless of every nation; prowls every ocean in quest of plunder; and

murders or jeopardizes the lives of all who fall within his power, without regard to nation, to age, or to sex. With such a blood-stained front, a pirate can have no claim to the clemency of a Government, the protection of which he has voluntarily renounced, and against which he has so highly offended.

Our general policy and political institutions are administered so mildly, that we seem to have forgotten the protection due to the public; and call that punishment which the law prescribes for offences, however enormous they may be against the public safety and public morals, cruel and degrading to our national character. The laws punishing piracy with death have had from the legislative department all the consideration due to so important a subject at a time when no undue influence could interpose.

The executive clemency has more than sufficient range for its exercise, without the aid sought for by this resolution. Whatever may be the public feeling against a pirate previous to his trial and conviction, as soon as that takes place that feeling subsides and becomes enlisted on the part of the criminal. There is not a favorable trait in his case but what is brought up and mingled with as many circumstances of pity and compassion as his counsel can condense in a petition, which every body subscribes without any knowledge of the facts; and this is presented to the Executive, upon which alone he is to judge the case. All the atrocious circumstances are kept out of view. There is no one hardy enough to tell that this criminal and his associates had boarded a defenceless ship, and, after plundering all that was valuable, had, with the most unrelenting cruelty, butchered the whole crew and passengers; or crowded them into a small boat, in the midst of the sea, without provisions or clothing, and set them adrift, where their destruction was inevitable; or, the better to secure their purpose, had shut all, both male and female, under deck, and sunk the ship, to elude detection, or to indulge an insatiable thirst for cruelty.

The object of capital punishment is to prevent the offender from committing further offences, or to deter others from doing so by the example. If it be commuted for temporary confinement, it can effect neither to any valuable purpose. The temptation is so strong, and detection so difficult and so rare, that but few, it is feared, can be deterred. The punishment of death is inflicted upon pirates by all civilized nations, notwithstanding which it is a growing evil; every sea is now crowded with them, which, instead of diminishing, ought to increase the reasons for inflicting capital punishment.

The committee are of opinion that capital punishment is the appropriate punishment for piracy, and that it would be inexpedient to commute it for confinement in penitentiary houses.

16th Congress.] No. 502. [2d Session.

ADMISSION OF MISSOURI INTO THE UNION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 10TH OF FEBRUARY, 1821.

Mr. Clay made the following report:

The select committee, to whom was referred the resolution from the Senate declaring the admission of the State of Missouri into the Union, have, according to order, had the same under consideration, and beg leave to submit to the House the following report:

That they have entered upon the discharge of the duty assigned them by the House with the most anxious desire to arrive at a conclusion which would give general satisfaction; that, in the prosecution of this purpose, it seemed to them to be useful to ascertain, in the first place, by a full and frank comparison of opinions among themselves, whether any, and what, conditions ought to be prescribed to the admission of Missouri into the Union; that, on making this comparison, the opinion appeared to be nearly unanimous in the committee that no other conditions ought now to be required than those which were specified in the act of the last session of Congress providing for the admission of Missouri into the Union; and that, considering all the circumstances attending that act, the settlement which it made of the question of restriction ought not to be disturbed; that this opinion limited their subsequent inquiry to the consideration of the single question whether the constitution which Missouri has formed for herself contained any thing in it which furnished a valid objection to her incorporation in the Union; and, on that question, they thought that there was no other provision in that constitution to which Congress could, of right, take exception, but that which makes it the duty of the Legislature of Missouri to pass laws to prevent free negroes and mulattoes from going to and settling in the said State. In regard to that clause, the same diversity of opinion existed among the members of the committee which had been previously manifested in the House: one portion believing it liable to an interpretation repugnant to the constitution of the United States; and the other thinking it not exposed to that objection; or that, if it were, the exceptionable interpretation was superseded by the paramount authority of the federal constitution.

With these conflicting opinions, the committee thought it best that, without either side abandoning its opinion, an endeavor should be made to frame an amendment to the Senate's resolution, which, compromitting neither, should contain an adequate security against any violation of the privileges and immunities of citizens of other States in Missouri; and a majority of the committee thinking that such security could not be sufficiently afforded without some previous act to be done by the Legislature of Missouri, the amendment was finally agreed upon, which they now beg leave to report.

According to this amendment, Missouri is to be admitted into the Union upon the fundamental condition that she shall never pass any law preventing any description of persons from going to and settling in the said State, who now are, or hereafter may become, citizens of any of the States in this Union; and upon the Legislature of the said State signifying its assent to that condition, by a solemn public act, which is to be communicated to the President of the United States, he is to proclaim the fact, and thereupon the admission of the said State into the Union is to be complete, without any further or other proceeding on the part of Congress. To prevent, however, this amendment from being considered as impairing any right which may appertain to Missouri, in common with other States, to exclude from her jurisdiction persons under peculiar circumstances, (such as paupers, vagabonds, &c.,)

a further proviso is added, declaring that nothing in the said amendment is to be construed to take from Missouri, when admitted into the Union, the exercise of any right or power which the original States may constitutionally exert.

The modification which the committee thus respectfully recommend of the Senate's resolution is the result of a spirit of concord, under the guidance of which they have anxiously sought, without the sacrifice of principle on either side, to reconcile the variant opinions among them. There cannot be a doubt but that Missouri, solicitous as she must be to participate in all the high advantages of our excellent Union, will eagerly seize the opportunity of testifying her attachment to the federal constitution, by giving the solemn pledge which she is asked to make, to respect the privileges and immunities which it secures to citizens of other States—a pledge become necessary, in the opinion of a large and respectable portion of the House, by the terms which she has employed in a clause of her constitution. Nor will there be a doubt of the sincerity or efficacy of such a pledge. On the other hand, if, by postponing for a short period her admission into the Union, (a circumstance every day less and less important, in consequence of the lapse of the time allotted to this session,) those who thought her invested with a perfect right to be admitted without delay are not fully gratified, they will be consoled by the reflection that the amendment requires only the performance of a precise and simple act, which cannot be mistaken by the highly responsible officer to whom the judgment of its execution is confided. And the whole House must be gratified with any proper disposition of the subject which will henceforth free the public deliberations from the agitation and disturbance to which it is but too likely always to give rise. And your committee believe that all must ardently unite in wishing an amicable termination of a question, which, if it be longer kept open, cannot fail to produce, and possibly to perpetuate, prejudices and animosities among a people, to whom the conservation of their moral ties should be even dearer, if possible, than that of their political bond. Sharing as the committee do largely in this sentiment, they respectfully submit to the House the amendment which they propose, in the hope that it will be received and considered in the same spirit in which it has been devised.

16th Congress.] No. 503. [2d Session.

WEIGHTS AND MEASURES.

COMMUNICATED TO THE SENATE, FEBRUARY 22, 1821.

The Secretary of State, to whom, by a resolution of the Senate of the 3d of March, 1817, it was referred to prepare and report to the Senate "a statement relative to the regulations and standards for weights and measures in the several States, and relative to proceedings in foreign countries for establishing uniformity in weights and measures, together with such propositions relative thereto as may be proper to be adopted in the United States," respectfully submits to the Senate the following report:

The resolution of the Senate embraces three distinct objects of attention, which it is proposed to consider in the following order:

1. The proceedings in foreign countries for establishing uniformity in weights and measures.
2. The regulations and standards for weights and measures in the several States of the Union.
3. Such propositions relative to the uniformity of weights and measures as may be proper to be adopted in the United States.

The term *uniformity*, as applied to weights and measures, is susceptible of various constructions and modifications; some of which would restrict, while others would enlarge, the objects in contemplation by the resolution of the Senate.

Uniformity in weights and measures may have reference—

1. To the weights and measures themselves.
2. To the objects of admeasurement and weight.
3. To *time*, or the duration of their establishment.
4. To *place*, or the extent of country over which, including the persons by whom, they are used.
5. To numbers, or the modes of numeration, multiplication, and division of their parts and units.
6. To their *nomenclature*, or the denominations by which they are called.
7. To their connexion with *coins* and *moneys of account*.

In reference to the weights and measures themselves, there may be—

A uniformity of identity, or

A uniformity of proportion.

By a uniformity of *identity*, is meant a system founded on the principle of applying only one unit of weights to all weighable articles, and one unit of measures of capacity to all substances thus measured, liquid or dry.

By a uniformity of *proportion*, is understood a system admitting more than one unit of weights, and more than one of measures of capacity, but in which all the weights and measures of capacity are in a uniform proportion with one another.

Our present existing weights and measures are, or originally were, founded upon the uniformity of proportion. The new French metrology is founded upon the uniformity of identity.

And, in reference to each of these circumstances, and to each in combination with all or either of the others, uniformity may be more or less extensive, partial, or complete.

Measures and weights are the instruments used by man for the comparison of quantities and proportions of things.

In the order of human existence upon earth, the objects which successively present themselves are—man; natural, domestic, civil society; government; and law. The want, at least, of measures of length, is founded in the physical organization of individual man, and precedes the institution of society. Were there but one man upon

earth, a solitary savage, ranging the forests and supporting his existence by a continual conflict with the wants of his nature and the rigor of the elements, the necessities for which he would be called to provide would be *food*, *raiment*, *shelter*. To provide for the wants of food and raiment, the first occupation of his life would be the chase of those animals, the flesh of which serves him for food, and the skins of which are adaptable to his person for raiment. In adapting the raiment to his body, he would find at once, in his own person, the want and the supply of a standard measure of length, and of the proportions and subdivisions of that standard.

But, to the continued existence of the human species, two persons of different sexes are required. Their union constitutes natural society, and their permanent cohabitation, by mutual consent, forms the origin of domestic society. Permanent cohabitation requires a common place of abode, and leads to the construction of edifices where the associated parties and their progeny may abide. To the construction of a dwelling-place, superficial measure becomes essential, and the dimensions of the building still bear a natural proportion to those of its destined inhabitants. Vessels of capacity are soon found indispensable for the supply of water; and the range of excursion around the dwelling could scarcely fail to suggest the use of a measure of itinerary distance.

Measures of *length*, therefore, are the wants of individual man, independent of and preceding the existence of society. Measures of surface, of distance, and of capacity, arise immediately from domestic society. They are wants proceeding rather from social than from individual existence. With regard to the first—*linear* measure: nature, in creating the want, and in furnishing to man, within himself, the means of its supply, has established a system of numbers and of proportions between the man, the measure, and the objects measured. Linear measure requires only a change of direction to become a measure of circumference; but is not thereby, without calculation, a measure of surface. Itinerary measure, as it needs nothing more than the prolongation or repetition of linear measure, would seem, at the first view, to be the same; yet this is evidently not the progress of nature. As the want of it originates in a different stage of human existence, it will not naturally occur to man to use the same measure, or the same scale of proportions and numbers, to clothe his body and to mark the distance of his walks. On the contrary, for the measurement of all objects which he can lift and handle, the fathom, the arm, the cubit, the hand's breadth, the span, and the fingers, are the instruments proposed to him by nature; while the pace and the foot are those which she gives him for the measurement of itinerary distance. These natural standards are never, in any stage of society, lost to individual man. There are probably few persons living who do not occasionally use their own arms, hands, and fingers to measure objects which they handle, and their own pace to measure a distance upon the ground.

Here, then, is a source of *diversity* to the standards even of linear measure, flowing from the difference of the relations between man and physical nature. It would be as inconvenient and unnatural to the organization of the human body to measure a bow and arrow, for instance, the first furniture of solitary man, by his foot or pace, as to measure the distance of a day's journey, or a morning's walk to the hunting ground, by his arm or hand.

Measures of capacity are rendered necessary by the nature of fluids, which can be held together in definite quantities only by vessels of substance more compact than their own. They are also necessary for the admeasurement of those substances which nature produces in multitudes too great for numeration, and too minute for linear measure. Of this character are all the grains and seeds, which, from the time when man becomes a tiller of the ground, furnish the principal materials of his subsistence. But nature has not furnished him with the means of supplying this want in his own person. For this measure he is obliged to look abroad into the nature of things; and his first measure of capacity will most probably be found in the egg of a large bird, the shell of a cetaceous fish, or the horn of a beast. The want of a *common* standard not being yet felt, these measures will be of various dimensions; nor is it to be expected that the thought will ever occur to the man of nature of establishing a proportion between his cubit and his cup, of graduating his pitcher by the size of his foot, or equalizing its parts by the number of his fingers.

Measures of length, once acquired, may be, and naturally are, applied to the admeasurement of objects of surface and solidity; and hence arise new diversities from the nature of things. The connexion of linear measure with *numbers*, necessarily, and in the first instance, imports only the first arithmetical rule of numeration or addition. The mensuration of surfaces and of solids requires the further aid of multiplication and division. Mere numbers and mere linear measure may be reckoned by addition alone; but their application to the surface can be computed only by multiplication. The elementary principle of decimal arithmetic is then supplied by nature to man within himself in the number of his fingers. Whatever standard of linear measure he may assume in order to measure the surface or the solid, it will be natural to him to stop in the process of addition when he has counted the tale equal to that of his fingers. Then turning his line in the other direction, and stopping at the same term, he finds the square of his number a hundred; and, applying it again to the solid, he finds its cube a thousand.

But while decimal arithmetic thus, for the purposes of *computation*, shoots spontaneously from the nature of man and of things, it is not equally adapted to the numeration, the multiplication, or the division of material substances, either in his own person or in external nature. The proportions of the human body, and of its members, are in other than decimal numbers. The first unit of measures for the use of the hand is the *cubit*, or extent from the tip of the elbow to the end of the middle finger; the motives for choosing which are, that it presents more definite terminations at both ends than any of the other superior limbs, and gives a measure easily handled and carried about the person. By doubling this measure is given the ell, or arm, including the hand, and half the width of the body, to the middle of the breast; and, by doubling that, the fathom, or extent from the extremity of one middle finger to that of the other, with expanded arms—an exact equivalent to the stature of man, or extension from the crown of the head to the sole of the foot. For subdivisions and smaller measures, the span is found equal to half the cubit, the palm to one-third of the span, and the finger to one-fourth of the palm. The cubit is thus, for the mensuration of matter, naturally divided into 24 equal parts, with subdivisions of which 2, 3, and 4 are the factors; while, for the mensuration of distance, the foot will be found at once equal to one-fifth of the pace, and one-sixth of the fathom.

Nor are the diversities of nature, in the organization of external matter, better suited to the exclusive use of decimal arithmetic. In the three modes of its extension, to which the same linear measure may be applied, length, breadth, and thickness, the proportions of surface and solidity are not the same with those of length: that which is decimal to the line is centesimal to the surface, and millesimal to the cube. Geometrical progression forms the rule of numbers for the surface and the solid, and their adaptation to decimal numbers is among the profoundest mysteries of mathematical science—a mystery which had been impenetrable to Pythagoras, Archimedes, and Ptolemy; which remained unrevealed even to Copernicus, Galileo, and Kepler; and the discovery and exposition of which were reserved to immortalize the name of Napier. To the mensuration of the surface and the solid, the number 10 is of little more use than any other. The numbers of each of the two or three modes of extension must be multiplied together to yield the surface or the solid contents; and, unless the object to be measured is a perfect square, or cube of equal dimensions at all its sides, decimal arithmetic is utterly incompetent to the purpose of their admeasurement.

Linear measure, to whatever modification of matter applied, extends in a straight line; but the modifications of matter, as produced by nature, are in forms innumerable, of which the defining outward line is almost invariably a curve. If decimal arithmetic is incompetent even to give the dimensions of those artificial forms the square and the cube, still more incompetent is it to give the circumference, the area, and the contents of the circle and the sphere.

There are three several modes by which the quantities of material substances may be estimated and compared—by number, by the space which they occupy, and by their apparent specific gravity. We have seen the origin and character of mensuration by space and number, and that, in the order of human existence, one is the result of a necessity incidental to individual man preceding the social union, and the other immediately springing from that union. The union of the sexes constitutes natural society; their permanent cohabitation is the foundation of domestic society, and leads to that of government, arising from the relations between the parents and the offspring which their union produces. The relations between husband and wife import domestic society, consent, and the sacred obligation of promises. Those between parent and child import subordination and government; on the one side authority, on the other obedience. In the first years of infancy, the authority of the parent is absolute; and has, therefore, in the laws of nature, been tempered by parental affection. As the child advances to mature age, the relations of power and subjection gradually subside, and finally are dissolved in that honor and reverence of the child for the parent which can terminate only with life. When the child goes forth into the world to make a settlement for himself, and found a new family, civil society commences; government is instituted; the tillage of the ground, the discovery and use of metals, exchanges, traffic by barter, a *common* standard of measures, and mensuration by *weight*, or apparent specific gravity, all arise from the multiplying relations between man and man, now superadded to those between man and things.

The difference between the specific gravities of different substances is so great that it could not, for any length of time, escape observation; but nature has not furnished man, within himself, with any standard for this mode of estimating equivalents. Specific gravity, as an object of mensuration, is in its nature *proportional*. It is not, like measures of length and capacity, a comparison between different definite portions of space, but a comparison between different properties of matter. It is not the simple relation between the extension of one substance and the extension of another, but the complicated relation of extension and gravitation in one substance to the extension and gravitation of another. This distinction is of great and insuperable influence upon the principle of *uniformity*, as applicable to a system of weights and measures. *Extension* and *gravitation* neither have, nor admit of, one common standard. *Diversity* is the law of their nature; and the only *uniformity* which human ingenuity can establish between them is a uniformity of proportion, and not a uniformity of identity.

The necessity for the use of *weights* is not in the organization of individual man. It is not essential even to the condition or the comforts of domestic society. It presupposes the discovery of the properties of the balance, and originates in the exchanges of traffic, after the institution of civil society. It results from the experience that the comparison of the articles of exchange, which serve for the subsistence or the enjoyment of life, by their relative extension, is not sufficient as a criterion of their value. The first use of the balance and of weights implies two substances, each of which is the test and the standard of the other. It is natural that these substances should be the articles the most essential to subsistence. They will be borrowed from the harvest and the vintage; they will be corn and wine. The discovery of the metals, and their extraction from the bowels of the earth, must, in the annals of human nature, be subsequent, but proximate, to the first use of weights; and, when discovered, the only mode of ascertaining their definite quantities will be soon perceived to be their weight. That they should, themselves, immediately become the common standards of exchanges, or otherwise of value and of weights, is perfectly in the order of nature; but their proportions to one another, or to the other objects by which they are to be estimated, will not be the same as standards of weight and as standards of value. Gold, silver, copper, and iron, when balanced each by the other in weight, will present masses very different from each other in value. They give rise to another complication and another diversity of weights and measures, equally inaccessible to the uniformity of identity and to the computations of decimal arithmetic.

Of the metals, that which, by the adaptation of its properties to the various uses of society, and to the purposes of traffic, by the quantities in which nature has disclosed it to the possession of man, intermediate between her profuse bounties of the coarser, and her parsimonious dispensation of the finer metals, holds a middle station between them, wins its way as the common, and at last as the only standard of value. It becomes the universal medium of exchanges. Its quantities, ascertained by weight, become themselves the standards of weights. Civil government is called in as the guardian and voucher of its purity. The civil authority stamps its image, to authenticate its weight and alloy; and silver becomes at once a weight, money, and coin.

With civil society, too, originates the necessity for common and uniform standards of measures. Of the different measures of extension necessary for individual man and for domestic society, although the want will be common to all, and frequently recurring, yet the standards will not be uniform, either with reference to time or to persons. The standard of linear measure for each individual being in himself, those of no two individuals will be the same. At different times, the same individual will use different measures, according to the several purposes for which they will be wanted. In domestic society, the measures adaptable to the persons of the husband, of the wife, and of the children, are not the same; nor will the idea of reducing them all to one common standard press itself upon their wants until the multiplication of families gives rise to the intercourse, exchanges, and government of civil society. Common standards will then be assumed from the person of some distinguished individual; but accidental circumstances, rather than any law of nature, will determine whether identity or proportion will be the character of their uniformity. If, pursuing the first and original dictate of nature, the cubit should be assumed as the standard of linear measure for the use of the hand, and the pace for the measure of motion, or linear measure upon earth, there will be two units of long measure—one for the measure of matter, and another for the measure of motion. Nor will they be reducible to one, because neither the cubit nor the pace is an aliquot part or a multiple of the other. But, should the discovery have been made that the *foot* is at once an aliquot part of the pace, for the mensuration of motion, and of the ell and fathom for the mensuration of matter, the foot will be made the common standard measure for both; and, thenceforth, there will be only one standard unit of long measure, and its uniformity will be that of identity.

Thus, in tracing the theoretic history of weights and measures to their original elements in the nature and the necessities of man, we have found linear measure with individual existence; superficial, capacious, itinerary measure, and decimal arithmetic, with domestic society; weights and common standards with civil society; money, coins, and all the elements of uniform metrology, with civil government and law, arising in successive and parallel progression together.

When weights and measures present themselves to the contemplation of the legislator, and call for the interposition of law, the first and most prominent idea which occurs to him is that of *uniformity*. His first object is to embody them into a system, and his first wish to reduce them to one universal common standard. His purposes are uniformity, permanency, and universality; one standard to be the same for all persons and all purposes, and to continue

the same forever. These purposes, however, require powers which no legislator has hitherto been found to possess. The power of the legislator is limited by the extent of his territories and the numbers of his people. His principle of universality, therefore, cannot be made, by the mere agency of his power, to extend beyond the inhabitants of his own possessions. The power of the legislator is limited over time. He is liable to change his own purposes. He is not infallible; he is liable to mistake the means of effecting his own objects. He is not immortal; his successor accedes to his power, with different views, different opinions, and perhaps different principles. The legislator has no power over the properties of matter. He cannot give a new constitution to nature. He cannot repeal her law of universal mutability. He cannot square the circle. He cannot reduce extension and gravity to one common measure. He cannot divide or multiply the parts of the surface, the cube, or the sphere, by the uniform and exclusive number 10. The power of the legislator is limited over the will and actions of his subjects. His conflict with them is desperate when he counteracts their settled habits, their established usages, their domestic and individual economy, their ignorance, their prejudices, and their wants; all which is unavoidable in the attempt radically to change or to originate a totally new system of weights and measures.

In the origin of the different measures and weights, at different stages of man's individual and social existence; in the different modes by which nature has bounded the extension of matter; in the incommensurable properties of the straight and the curve line; in the different properties of matter, number, extension, and gravity, of which measures and weights are the test, nature has planted sources of diversity which the legislator would in vain overlook, which he would in vain attempt to control. To these sources of diversity in the nature of things must be added all those arising from the nature and history of man. In the first use of weights and measures, neither universality nor permanency is essential to the uniformity of the standards. Every individual may have standards of his own, and may change them as convenience or humor may dictate. Even in civil society, it is not *necessary* to the purposes of traffic that the standards of the buyer and seller should be the same. It suffices if the proportions between the standards of both parties are mutually understood. In the progress of society, the use of weights and measures having preceded legislation, if the families descended from one should, as they naturally may, have the same standards, other families will have others. Until regulated by law, their diversities will be numberless, their changes continual.

These diversities are still further multiplied by the abuses incident to the poverty, imperfections, and deceptions of human language. So arbitrary and so irrational is the dominion of usage over the speech of man, that, instead of appropriating a specific name to every distinct thing, he is impelled, by an irresistible propensity, sometimes to give different names to the same thing, but far more frequently to give the same name to different things. Weights and measures are, in their nature, relative. When man first borrows from his own person a standard measure of length, his first error is to give to the measure the name of the limb from which it is assumed. He calls the *measure* a cubit, a span, a hand, a finger, or a foot, improperly applying to it the name of those respective parts of his body. When he has discovered the properties of the balance, he either confounds with it the name of the weight which he puts in it to balance the article which he would measure, or he gives to the definite mass which he assumes for his standard the indefinite and general name of *the weight*. Such was the original meaning of the weight which we call a *pound*. But, as different families assume different masses of gravity for their unit of weight, the pound of one bears the same name, and is a very different thing from the pound of another. When nations fall into the use of different weights or measures for the estimation of different objects, they commit the still grosser mistake of calling several different weights or measures by the same name; and when Governments degrade themselves by debasing their coins, (as, unfortunately, all Governments have done,) they add the crime of fraud to that of injustice, by retaining the name of things which they have destroyed or changed. Even things which nature has discriminated so clearly that they cannot be mistaken, the antipathy of mankind to new words will misrepresent and confound. It suffers not even numbers to retain their essentially definite character. It calls sixteen a dozen; it makes a hundred and twelve a hundred, and twenty-eight twenty-five. Of all the tangles of confusion to be unravelled by the regulation of weights and measures, these abuses of language in their nomenclature are, perhaps, the most inextricable; so that, when law comes to establish its principles of permanency, uniformity, and universality, it has to contend, not only with the diversities arising from the nature of things and of man, but with those, infinitely more numerous, which proceed from existing usages and delusive language; with the partial standards and misapplied names which have crept in with the lapse of time, beginning with individuals or families, and spreading, more or less extensively, to villages and communities.

In this conflict between the dominion of usage and of law, the last and greatest dangers to the principle of uniformity proceed from the laws themselves. The legislator, having no distinct idea of the uniformity of which the subject is susceptible, not considering how far it should be extended, or where it finds its boundary in the nature of things and of man, enacts laws inadequate to their purpose, inconsistent with one another; sometimes stubbornly resisting, at others weakly yielding to, inveterate usages or abuses; and finishes by increasing the diversities which it was his intention to abolish, and by loading his statute book only with the impotence of authority and the uniformity of confusion.

This inquiry into the theory of weights and measures, as resulting from the natural history of man, was deemed necessary as preliminary to that statement of the proceedings of foreign countries for establishing uniformity in weights and measures called for by the resolution of the Senate.

It presents to view certain principles believed to be essential to the subject, upon which the historical statement required will shed continual illustration, and which it will be advisable to bear in mind, when the propositions supposed to be proper for the adoption of the United States are to be considered.

In this review, civil society has been considered as originating in a single family. It can never originate in any other manner. But Governments and national communities may originate, either by the multiplication of families from one; or in compact, by the voluntary association of many families; or in force, by conquest. In the nations formed by the reunion of many families, each family will have its standard measures and weights already settled, and common standards for the whole can be established only by the means of *law*. It is a consideration from which many important consequences result, that the proper province of law, in relation to weights and measures, is not to create, but to regulate. It finds them already existing with diversities innumerable, arising not only from all the causes which have been enumerated, but from all the frauds to which these diversities give continual occasion and temptation.

There are two nations of antiquity from whom almost all the civil, political, and religious institutions of modern Europe, and of her descendants in this hemisphere, are derived—the Hebrews and the Greeks. They both, at certain periods, not very distant from each other, issued from Egypt; and both nearly at the time of the first invention of alphabetical writing. The earliest existing records of history are of them, and in their respective languages. They exhibit examples of national communities and Governments originating in two of the different modes noticed in the preceding remarks. The Hebrews sprung from a single family, of which Abraham and Sarah were the first founders. The Greeks were a confederated nation, formed by the voluntary association of many families. To

their historical records, therefore, we must appeal for the actual origin of our own existing weights and measures; and, beginning with the most ancient of them, the Hebrews, it is presumed that the Scriptures may be cited in the character of historical documents. We there find that all the human inhabitants of this globe sprung from one created pair; that the necessity of raiment adapted to the organization of their bodies, and of the tillage of the ground for their subsistence, arose by their fall from innocence; that their eldest son was a tiller of the ground, and built a city, and their second son a keeper of sheep; that, at no distant period from the creation, instruments of brass and iron were invented. Of the origin of weights and measures, no direct mention is made; but the Hebrew historian, Josephus, asserts that they were invented by Cain, the tiller of the ground, and the first builder of a city. As the duration of human life was tenfold longer before the flood than in later ages, the multiplication of the species was proportionally rapid; and the inventions and discoveries of many ages were included within the life of every individual. In the early stages of man's existence upon earth, direct revelations from the Creator were also frequent, and imparted knowledge unattainable but in a series of centuries to the merely natural energies of the human mind. The division of numbers by decimal arithmetic, and the use of the *cubit* as a standard measure of length, are distinctly proved to have been established before the general deluge. The division of time into days, months, and years was settled. The ages of the patriarchs are noted in units, tens, and hundreds of years; and Noah, we are told, built, by Divine instruction, his ark three hundred *cubits* long, fifty cubits broad, and thirty cubits in height.

After the general deluge, the dispersion of the human species and the confusion of languages which ensued must have destroyed whatever uniformity of weights and measures might have existed while the whole earth was of one language and of one speech. After noticing this great and miraculous event, the historical part of the Bible is chiefly confined to the family of Abraham, originally a Chaldean, said to have been very rich in cattle, in silver, and in gold. In his time we find mention made of *measures* of meal. Abimelech gives him a thousand pieces of silver. He himself gives to Hagar a *bottle* of water, and buys of Ephron, the Hittite, the field of Machpelah, for which he pays him, by *weight*, four hundred shekels of silver, current money with the merchant. At this period, therefore, we find established measures of length, of land, and of capacity, liquid and dry, weights, coined money, and decimal arithmetic. The elements for a system of metrology are complete; but the only uniformity observable in them is, the identity of weights and coin, and the decimal numbers.

In the *law* given from Sinai—the law, not of a human legislator, but of God—there are two precepts respecting weights and measures. The first, (Leviticus xix, 35, 36,) "Ye shall do no unrighteousness in judgment, in meteyard, [measure of length,] in weight, or in measure [of capacity.] Just balances, just weights, a just ephah, and a just hin, shall ye have." The second, (Deuteronomy, xxv, 13, 14, 15,) "Thou shalt not have in thy bag *divers* weights, a great and a small. Thou shalt not have in thine house divers measures, a great and a small. But thou shalt have a perfect and just weight, a perfect and just measure shalt thou have." The weights and measures are prescribed as already existing and known, and were all probably the same as those of the Egyptians. The first of these injunctions is addressed in the plural to the whole nation, and the second in the singular to every individual. The first has reference to the standards which were to be kept in the ark of the covenant, or the sanctuary; and the second to the copies of them, kept by every family for their own use. The first, therefore, only commands that the standards should be *just;* and that, in all transactions for which weights and measures might be used, the principle of righteousness should be observed. The second requires that the copies of the standards used by individuals should be uniform, not divers; and not only just, but perfect, with reference to the standards.

The long measures were the *cubit*, with its subdivisions of two *spans*, six palms or hand-breadths, and twenty-four digits or fingers. It had no division in decimal parts, and was not employed for itinerary measure; that was reckoned by paces, Sabbath day's journeys, and day's journeys. The measures of capacity were the ephah for the dry, and the *hin* for liquid measure; the primitive standard from nature of which was an egg-shell; six of these constituted the *log*, a measure little less than our *pint*. The largest measure of capacity, the *homer*, was common both to liquid and dry substances; and its contents nearly corresponded with our wine hogshead and with the Winchester quarter. The intermediate measures were different, and differently subdivided. They combined the decimal and duodecimal divisions; the latter of which may, perhaps, have arisen from the accidental number of the tribes of Israel. Thus, in liquids, the bath was a tenth part of the homer, the hin a sixth part of the bath, and the log a twelfth part of the hin; while, for dry measure, the ephah was a tenth part of the homer, the seah a third, and the omer a tenth part of the ephah, and the cab a sixth part of the seah. The weights and coins were the shekel, of twenty gerahs; the maneh, which for weight was of sixty, and in money of fifty shekels; and the kinchar or talent, of three thousand shekels in both. The ephah had also been formed by the process of cubing an Egyptian measure of length, called the *ardob*. The original weight of the shekel was the same as one-half of our avoirdupois ounce, the most ancient of weights traceable in human history.

And thus, the earliest and most venerable of historical records extant, in perfect coincidence with speculative theory, prove that the natural standards of weights and measures are not the same; that even the natural standards of cloth and of long measure are two, both derived from the stature and proportions of man, but one from his hand and arm, the other from his leg and foot; that the natural standards of measures of capacity and of weights are different from those of linear measure, and different from each other, the essential character of the weight being compact solidity, and that of the vessel bounded vacuity; that the natural standards of weights are two, one of which is the same with metallic money; and that decimal arithmetic, as founded in nature, is peculiarly applicable to the standard *units* of weights and measures, but not to their subdivisions or fractional parts, nor to the objects of admeasurement and weight.

With all these diversities, the only commands of the law for observing uniformity were, that the weights and the measures should be just, perfect, and not divers, a *great* and a *small*. But this last prohibition was merely an ordinance against fraud. It was a precept to the individual, and not to the nation. It forbade the iniquitous practice of using a large weight or measure for buying, and a small one for selling the same article; and, to remove the opportunity for temptation, it enjoined upon the individual not to have divers weights and measures, great and small, of the same denomination, in his bag when at market, or in his house when at home. But it was never understood to forbid that there should be measures of different dimensions bearing the same name; and it appears, from the sacred history, that there actually were three different measures called a cubit, of about the relative proportion of seventeen, twenty-one, and thirty-five of our inches to each other. They were distinguished by the several denominations of the cubit of a man, the cubit of the king, and the cubit of the sanctuary.

In the vision of the prophet Ezekiel, during the Babylonian captivity—that vision which, under the resurrection of dead bones, shadowed forth the restoration and union of the houses of Ephraim and of Judah—with the reproaches of former violence and spoil, injustice and exactions, are mingled the exhortations of future righteousness, particularly with reference to weights and measures; and there is a special command that the measures of capacity, liquid and dry, should be the same.

"Thus saith the Lord God, Let it suffice you, O princes of Israel, remove violence and spoil, and execute judgment and justice; take away your exactions from my people, saith the Lord God. Ye shall have just balances,

and a just ephah, and a just bath. The ephah and the bath shall be one measure, that the bath may contain the tenth part of an homer, and the ephah the tenth part of an homer; the measure thereof shall be after the homer. And the shekel shall be twenty gerahs; twenty shekels, five and twenty shekels, fifteen shekels, shall be your maneh. This is the oblation that ye shall offer; the sixth part of an ephah of an homer of wheat; and ye shall give the sixth part of an ephah of an homer of barley. Concerning the ordinance of oil, ye shall offer the tenth part of a bath out of the cor, which is an homer of ten baths; for ten baths are an homer."

Here we see combined the uniformity of identity and the uniformity of proportion. The homer was a dry, and the cor a liquid, measure of capacity; they were of the same contents; the ephah and the bath were their corresponding tenth parts, also of the same capacity. But the oblation of wheat and barley was to be a *sixth* part of the ephah, and the oblation of oil a tenth part of the bath. The oblations were uniform, but the measures were proportional, and that proportion was compounded of the different weight and value of the respective articles.

In the same vision of Ezekiel, the directions are given for the building of the new temple after the restoration of the captivity; and all the dimensions of the temple are prescribed by a measuring reed of six cubits long by the cubit and a hand-breadth. "And these (says he) are the measures of the altar after the cubits; *the cubit is a cubit and an hand-breadth.*" (Ch. xliii, 13.)

The book of Job is a story of a man supposed not to have been descended from Abraham, and certainly not belonging to any of the tribes of Israel. It has reference to other manners, other customs, opinions, and laws, than those of the Hebrews. But it bears evidence of the primitive custom of paying silver by weight, while gold and jewels were valued by tale; and of that system of proportional uniformity which combines gravity and extension for the mensuration of fluids. Speaking of wisdom, it says, (ch. xxviii, v. 15, 17,) "It cannot be gotten for gold, neither *shall silver be weighed* for the price thereof. The gold and the chrystal cannot equal it; and the exchange of it shall not be for jewels of fine gold." And afterwards, in the same chapter, that "God maketh the weight for the winds, *and weigheth the waters by measure.*"

The cubit was also a primitive measure of length among the Greeks; but, at the institution of the Olympic games by Hercules, his foot is said to have been substituted as the unit of measure for the footrace. Six hundred of these feet constituted the stadium or length of the course or stand, which thenceforth became the standard itinerary measure of the nation. It was afterwards by the Romans combined with the pace, a thousand of which constituted the mile. The foot and the mile, or thousand paces, are our standard measures of length at this day.

The foot has over the cubit the advantage of being a common aliquot part both of the pace and the fathom. It is also definite at both extremities, and affords the natural means of reducing the two standard measures of length to one. Its adoption was therefore a great and important advance towards uniformity; and this may account for the universal abandonment, by all the modern nations of Europe, of that primitive antediluvian standard measure, the *cubit.*

Of the Greek weights and measures of capacity, the origin is not distinctly known; but that whatever uniformity ever existed in the system was a uniformity of proportion, and not of identity, is certain. They had weights corresponding to our avoirdupois and troy pounds, and measures answering to our wine and ale gallons; not, indeed, in the same proportions, but in the proportions to each other of the weight of wine and oil.

It has been observed that the process of weighing implies two substances, each of which is the standard and test of the other; that, in the order of human existence, the use of weights precedes the weighing of metals, but that when the metals and their uses to the purposes of life are discovered, their value can at first be estimated only by weight, whereby they soon become standards both of weight and of value for all other things. This theory is confirmed by the history of the Greek no less than by that of the Hebrew weights and measures. The term *talent*, in its primitive meaning in the Greek language, signified a *balance;* and it was at once the largest weight and the highest denomination of money among the Greeks. Its subdivisions, the *mina* and the *drachma*, were at once weights and money, and the *drachma* was the unit of all the silver coins. But the money which was a weight, though substituted for many purposes instead of the more ancient weight by which it had itself been tried, never excluded it from use. It had not the fortune of the *foot*, to banish from the use of mankind its predecessor. They had the weight for money, and the weight for measure.

As there are thus in nature two standards of weight, there are also two measures of capacity. From the names of the Greek measures of capacity, they were originally assumed from cockle and other shells of fish. But as these give no scales of proportion for subdivisions, when reduced to a system, their capacity was determined by the two modifications of matter—extension and weight. Like the Hebrews, they had measures for liquid and dry substances, which were the same, but with different multiples and subdivisions. Their measures of wine and oil were determined by the *weight* of their contents; their measures of water and of grain, by vessels of capacity cubed from measures of length.

The weights and measures of the Romans were all derived from those of the Greeks. The identity of one of their standard units of weight with money and coin was the same. *Aes*, brass, was their original money: and as its payment was by weight, the term pound, *libra*, was the balance; and *money* was the weight of brass in the balance. The general term soon came to be applied to a definite weight: and when afterwards silver came to be coined, the *sestertius*, which signified two and a half, and the *denarius*, or piece of *ten*, meant the pieces of silver of value equal, respectively, to two and a half and to ten of the original brass weights of the balance. The sestertius was the unit of money, and the denarius of silver coins.

The Romans had also two pound weights, which were termed the metrical and the scale pound. "The scale pound," says Galen, "determines the *weight* of bodies; the metrical pound, the contents or quantity of *space* which they fill."

Their measures of capacity for wet or dry substances were in like manner, in part, the same, but with different multiples and subdivisions. Like them, they were formed of the two different processes of cubing the foot, and of testing wine and oil by weight. The *amphora*, or largest measure of liquids, weighed eighty pounds of water, and was formed by cubing, or, as they called it, squaring their foot measure: it was for that reason called a *quadrantal.* But their *congius*, or unit of liquid measure, was any vessel containing ten metrical *pounds weight* of wine. The Silian law, enacted nearly three centuries before the Christian era, expressly declares that the quadrantal contains eighty *pounds* of wine, the *congius* ten pounds; that the *sextarius* contains the sixth *part* of a congius, and is a measure both for liquid and dry substances; that forty-eight sextarii make a quadrantal of wine, and sixteen *libræ* a modius. The money pound, or *pondo*, and the metrical pound, or *libra*, were in the proportion to each other of 84 to 100, nearly the same as that between our troy and avoirdupois weights. [Arbuthnot on Coins, Weights, and Measures, p. 23.] There is a standard congius of the age of Vespasian still extant at Rome; and the inscription upon it marks that it contains ten pounds of wine.

Among the nations of modern Europe there are two, who, by their genius, their learning, their industry, and their ardent and successful cultivation of the arts and sciences, are scarcely less distinguished than the Hebrews, from whom they have received most of their religious, or the Greeks, from whom they have derived many of their

civil and political institutions. From these two nations the inhabitants of these United States are chiefly descended; and from one of them we have all our existing weights and measures. Both of them, for a series of ages, have been engaged in the pursuit of a uniform system of weights and measures. To this the wishes of their philanthropists, the hopes of their patriots, the researches of their philosophers, and the energy of their legislators, have been aiming with efforts so stupendous, and with perseverance so untiring, that, to any person who shall examine them, it may well be a subject of astonishment to find that they are both yet entangled in the pursuit at this hour, and that it may be doubted whether all their latest and greatest exertions have not hitherto tended to increase diversity instead of producing uniformity.

It was observed at the introduction of these remarks that one of the primary elements of uniformity, as applied to a system of weights and measures, has reference to the *persons* by whom they are used; and it has since been noticed that the power of the legislator is restricted to the inhabitants of his own dominions. Now, the perfection of uniformity with respect to the persons to whose use a system of metrology is adapted consists in its embracing, at least in its aptitude, the whole human race. In the abstract, that system which would be most useful for one nation would be the best for all. But this uniformity cannot be obtained by legislation. It must be imposed by conquest, or adopted by consent. When, therefore, two populous and commercial nations are at the same time forming and maturing a system of weights and measures on the principle of uniformity, unless the system proves to be the same, the result, as respects all their relations with each other, must be, not uniformity, but new and increased diversity. This consideration is of momentous importance to the people of this Union. Since the establishment of our national independence, we have partaken of that ardent spirit of reform, and that impatient longing for uniformity, which have so signally animated the two nations from whom we descended. The Congress of the United States have been as earnestly employed in the search of a uniform system of weights and measures as the British Parliament. Have either of them considered how that very principle of uniformity would be effected by any the slightest change, sanctioned by either, in the existing system, now common to both? If uniformity be their object, is it not necessary to contemplate it in all its aspects? And while squaring the circle to draw a straight line from a curve, and fixing mutability to find a standard pendulum, is it not worth their while to inquire whether an imperceptible improvement in the uniformity of things would not be dearly purchased by the loss of millions in the uniformity of persons?

It is presumed that the intentions of the Senate, in requiring a statement of the proceedings in foreign countries for establishing uniformity in weights and measures, will be fulfilled by confining this part of the inquiry to the proceedings of the two nations above mentioned. It appears that a reformation of the weights and measures of Spain is among the objects now under the consideration of the Cortes of that kingdom: and, as weights and measures are the necessary and universal instruments of commerce, no change can be effected in the system of any one nation without sensibly affecting, though in very different degrees, all those with whom they entertain any relations of trade. But the results of this inquiry, newly instituted in Spain, have not yet been made known. France and Great Britain are the only nations of modern Europe who have taken much interest in the organization of a new system, or attempted a reform for the avowed purpose of uniformity. The proceedings in those two countries have been numerous, elaborate, persevering, and, in France especially, comprehensive, profound, and systematic. In both, the phenomenon is still exhibited, that, after many centuries of study, of invention of laws, and of penalties, almost every village in the country is in the habitual use of different weights and measures; which diversity is infinitely multiplied by the fact that in each country, although the quantities of the weights and measures are thus different, their denominations are few in number, and the same names, as foot, pound, ounce, bushel, pint, &c. are applied in different places, and often in the same place, to quantities altogether diverse.

During the conquering period of the French Revolution, the new system of French weights and measures was introduced into those countries which were united to the empire. Since the severance of those countries from France, it has been discarded, excepting in the kingdom of the Netherlands, where, by two ordinances of the King, it has been confirmed, with certain exceptions and modifications, particularly with regard to the coins.

In England, from the earliest records of parliamentary history, the statute books are filled with ineffectual attempts of the Legislature to establish uniformity. Of the origin of their weights and measures, the historical traces are faint and indistinct; but they have had, from time immemorial, the pound, ounce, foot, inch, and mile, derived from the Romans, and through them from the Greeks, and the *yard* or *girth*, a measure of Saxon origin, derived, like those of the Hebrews and the Greeks, from the human body, but, as a natural standard, different from theirs, being taken, not from the length or members, but from the circumference of the body. The yard of the Saxons evidently belongs to a primitive system of measures different from that of the Greeks, of which the foot, and from that of the Hebrews, Egyptians, and antediluvians, of which the cubit was the standard. It affords, therefore, another demonstration how invariably nature first points to the human body and its proportions for the original standards of linear measure; but the *yard* being for all purposes of use a measure corresponding with the *ulna*, or ell, of the Roman system, became, when superadded to it, a source of diversity, and an obstacle to uniformity in the system. The yard, therefore, very soon after the Roman Conquest, is said to have lost its original character of girth; to have been adjusted as a standard by the arm of King Henry the First; and to have been found or made a multiple of the foot, thereby adapting it to the remainder of the system; and this may perhaps be the cause of the difference of the present English foot from that of the Romans, by whom, as a measure, it was introduced. The ell measure has, however, in England, retained its place as a standard for measuring cloth; but, in the ancient statutes, which for centuries after the Conquest were enacted in the degenerate Latin of the age, the term *ulna*, or ell, is always used to designate the yard. Historical traditions allege that, a full century before the Conquest, a law of Edgar prescribed that there should be the same weights and the same measures throughout the realm; but that it was never observed. The system which had been introduced by the Romans, however uniform in its origin, must have undergone various changes in the different Governments of the Saxon heptarchy. When those kingdoms were united in one, it was natural that laws of uniformity should be prescribed by the prince, and as natural that usages of diversity should be persisted in by the people. Canute the Dane, William the Conqueror, and Richard the First, princes among those of most extensive and commanding authority, are said to have made laws of the like import and the same inefficacy. The Norman Conquest made no changes in any of the established weights and measures. The very words of a law of William the Conqueror are cited by modern writers on the English weights and measures; their import is: "We ordain and command that the weights and measures throughout the realm be as our worthy predecessors have established." (Wilkins, Legg, Saxon, Folkes, cited by Clark, page 150.)

One of the principal objects of the Great Charter was the establishment of uniformity of weights and measures; but it was a uniformity of *existing* weights and measures; and a uniformity, not of identity, but of proportion. The words of the 25th chapter of the Great Charter of the year 1225 (9 Henry III.) are, in the English translation of the statutes, "one measure of wine shall be through our realm, and one measure of ale, and one measure of corn, that is to say, the *quarter* of London; and one breadth of dyed cloth, that is to say, two yards [ulnæ] within the lists; and it shall be of weights as it is of measures." The London quarter, therefore, and the *yard* or *ulna*, were

existing, known, established measures; and the one measure of corn was the London quarter. The one measure of ale was a gallon, of the same contents for liquid measure as the half-peck was for dry; but the one measure of wine was a gallon, not of the same cubical contents as the half-peck and ale gallon, but which, when filled with wine, was of the same weight as the half-peck or corn gallon when filled with wheat; and the expressions "it shall be of weights as it is of measures" mean that there shall be the same proportion between the money weight and the merchant's weight as between the wine measure and the corn measure.

The Great Charter, which now appears as the first legislative act in the English Statutes at Large, is not the Magna Charta extorted by the barons from John, at Runnimede, but a repetition of it by Henry III. in the year 1225, as confirmed by his son, Edward I., in the year 1300. It is properly an act of this late date, though inserted in the book as of 9 Henry III., or 1225.

In several of the subsequent confirmations of this charter, which, for successive ages, attest at once how apt it was to be forgotten by power, and how present it always was to the memory of the people, the real meaning of this 25th chapter appears to have been misunderstood. It has been supposed to have prescribed the uniformity of identity, and not the uniformity of proportion; that, by enjoining one measure of wine, and one measure of ale, and one measure of corn, its intention was that all these measures should be the same; that there should be only one unit measure of capacity for liquid and dry substances, and one unit of weights.

But this neither was, nor could be, the meaning of the statute. Had it been the intention of the legislator, he would have said there shall be one and the same measure for wine, corn, and ale; and the reference to the London quarter could not have been made, for neither wine nor ale was ever measured by the quarter; and, instead of saying "it shall be of weights as it is of measures," it would have said there shall be but one set of weights for whatever is to be weighed.

The object of the whole statute was, not to innovate, but to fix existing rights and usages, and to guard against fraud and oppression. It says that the measure of corn shall be the London quarter; that cloth shall be two yards within the lists. But it neither defines the contents of the quarter, nor the length of the yard; it refers to both as fixed and settled quantities. To have prescribed that there should be but one unit of weights, and one measure of wine, ale, and corn, would have been a great and violent innovation upon all the existing habits and usages of the people. The chapter is not intended for a *general* regulation of weights and measures. It refers specifically and exclusively to the measure of three articles, wine, ale, corn, and to the width of cloths. Its intention was to provide that the measure of corn, of ale, and of wine, should *not* be the same; that is, that the wine measure should not be used for ale and corn, nor the ale measure for wine.

That such was, and must have been, the meaning of the statute, is further proved by the statute of 1266, (51 Henry III.) and by the treatise upon weights and measures published in the statute books as of the 31st Edward I., or 1304; the first, an act of the same Henry III., whose Great Charter is that inserted among the laws, and the second, an act of the same Edward I., whose confirmation of the Great Charter is the existing statute.

The act of 51 Henry III. (1266) is called the assize of bread and of ale. It purports to be an exemplification, given at the request of the bakers of the town of Coventry, of certain ordinances of the assize of bread and ale, and of the making of money and measures, made in the times of the King's progenitors, some time Kings of England. It presents an established scale, then of ancient standing, between the prices of wheat and of bread, providing that when the *quarter* of wheat is sold at twelve pence, the farthing loaf of the best white bread shall weigh six pounds sixteen shillings. It then graduates the weight of bread according to the price of wheat; and for every six pence added to the quarter of wheat, reduces, though not in exact proportions, the weight of the farthing loaf, till, when the wheat is at twenty shillings a quarter, it directs the weight of the loaf to be six shillings and three pence. It regulates, in like manner, the price of the gallon of ale by the price of wheat, barley, and oats; and, finally, declares that, "by the consent of *the whole realm* of England, the *measure* of the King was made; that is to say, that an English *penny*, called a sterling, round, and without any clipping, shall weigh thirty-two wheat corns, in the midst of the ear, and twenty pence do make an ounce, and twelve ounces one pound, and eight pounds do make a gallon of *wine*, and eight gallons of *wine* do make a London bushel, which is the eighth part of a quarter."

Henry III. was the eighth King of the Norman race, and this statute was passed exactly two hundred years after the Conquest. It is merely an exemplification, word for word, embracing several ordinances of his progenitors, Kings of England, and it unfolds a system of uniformity for weights, coins, and measures of capacity, very ingeniously imagined and skilfully combined.

It shows, first, that the money weight was identical with the silver coins; and it establishes a uniformity of proportion between the money weight and the merchant's weight, exactly corresponding to that between the measure of wine and the measure of grain.

It makes wheat and silver money, the two weights of the balance, the natural tests and standards of each other; that is, it makes wheat the standard for the weight of silver money, and silver money the standard for the weight of wheat.

It combines a uniformity of proportion between the weight and the measure of wheat and of wine; so that the measure of wheat should at the same time be a certain weight of wheat, and the measure of wine at the same time a certain weight of wine, so that the article whether bought and sold by weight or by measure, the result was the same. To this, with regard to wheat, it gave the further advantage of an abridged process for buying or selling it by the number of its kernels. Under this system, wheat was bought and sold by a combination of every property of its nature, with reference to quantity; that is, by number, weight, and measure. The statute also fixed its proportional weight and value with reference to the weight and value of the silver coin for which it was to be exchanged in trade. If, as the most eminent of the modern economists maintain, the value of every thing in trade is regulated by the proportional value of money and of wheat, then the system of weights and measures contained in this statute is not only accounted for as originating in the nature of things, but it may be doubted whether any other system is reconcileable to nature. It was with reference to this system that, in the introduction to this report, it was observed that our own weights and measures were originally founded upon a uniformity of proportion, and not upon a uniformity of identity. In the system which allows only one unit of weights and one unit of measures of capacity, all the advantages of the uniformity of proportion are lost. The litre of the French system is a weight for nothing but distilled water at a given temperature.

But with this statute of 1266, and with the admirable system of proportional uniformity in weights and measures of which it gives the elements, it has fared still worse than with the twenty-fifth chapter of Magna Charta. The most valuable and important feature of uniformity in the system, the identity of the nummulary weight and of the standard silver coin, that feature which is believed to be of more influence upon the happiness and upon the morals of nations than any other principle of uniformity of which weights and measures are susceptible, was first defaced by Edward I. himself. It was utterly annihilated by his successors. The consequence of which has been that the object and scope of the statute of 1266 have been misunderstood by subsequent Parliaments; that laws have been enacted professedly in conformity to this statute, but entirely subversive of it; and that anomalies have crept into

the weights and measures of England and of this Union which it appears to be impossible to trace to any other source.

The only notice which most of the modern writers upon English weights and measures have taken of this statute has been to censure it for taking kernels of wheat as the natural standard of weights, with the very obvious remark that the wheat of different seasons and of different fields, and often even of the same field and the same season, is different. But the statute is chargeable with no such uncertainty. The statute merely describes how the standard measure of the exchequer, by the consent of the whole realm of England, was made. The article for which of all others the measure was most wanted was wheat; and a measure was wanted which should give it, as far as was practicable, in number, weight, and measure. It took, therefore, thirty-two kernels of *average* wheat from the middle of the ear, and found them equal in weight to the silver penny sterling new from the mint, round and without clipping. It then drops the numeration of wheat, but proceeds to declare that twenty such pence make an ounce, twelve ounces one pound, and eight pounds a gallon of *wine*, and eight *gallons of wine* a London bushel, which is the eighth part of a quarter. It must be observed here that it was not the *measure* but the *weight* of wine which was used to form the standard bushel. It was not eight wine gallons, but eight gallons of wine. The bushel, therefore, filled with wheat, was a measure which in the scales would exactly balance a keg containing eight gallons of wine, deducting the tare of both the vessels. Now, the eighth part of this bushel, or the ale gallon, would be a vessel not of the same cubic contents as the wine gallon, but of the same proportion to it as the weight of wheat bears to the weight of wine; the proportion between the commercial and nummulary weights of the Greeks; the proportion between our avoirdupois and troy pounds.

But neither the present avoirdupois nor troy weights were then the standard weights of England. The keystone to the whole fabric of the system of 1266 was the *weight* of the silver penny *sterling*. This penny was the two hundred and fortieth part of the tower pound, the sterling or easterling pound which had been used at the mint for centuries before the Conquest, and which continued to be used for the coinage of money till the eighteenth year of Henry VIII., (1527,) when the troy pound was substituted in its stead. The tower or easterling pound weighed three quarters of an ounce troy less than the troy pound, and was consequently in the proportion to it of 15 to 16. Its penny, or two hundred and fortieth part, weighed, therefore, twenty-two and a half grains troy; and that was the weight of the thirty-two kernels of wheat from the middle of the ear, which, according to the statute of 1266, had been taken to form the standard measure of wheat for the whole realm of England. It is also to be remembered that the eight twelve-ounce pounds of wheat, which made the gallon of wine, produced a measure which contained nearly ten of the same pounds of wine. The commercial pound, by which wine and most other articles were weighed, was then of fifteen ounces. This is apparent from the treatise of weights and measures of 1304, which repeats the composition of measures declared in the statute of 1266, with a variation of expressions entirely decisive of its meaning. It says that, "by the ordinance of the whole realm of England, the measure of the King was made; that is to say, that the penny called sterling, round and without clipping, shall weigh thirty-two grains of wheat in the middle of the ear. And the ounce shall weigh twenty pence, and twelve ounces make the *London* pound, and eight pounds of *wheat* make a gallon, and eight gallons make the London bushel." It then proceeds to enumerate a multitude of other articles, sold by weight or by numbers, such as lead, wool, cheese, spices, hides, and various kinds of fish; and, after mentioning nominal hundreds, consisting of 108 and 120, finally adds, "It is to be known that every pound of money and of medicines consists only of twenty shillings weight, but the pound of *all* other things consists of twenty-five shillings. The ounce of medicines consists of twenty pence, and the pound contains twelve ounces; but in other things the pound contains fifteen ounces, and in both cases the ounce is of the weight of twenty pence."

Wine and wheat, therefore, were both among the articles of which the pound consisted of fifteen ounces. By the statute of 1266, the gallon of wine contained eight such pounds of wine. By the statute of 1304, the gallon (for ale) contained eight such pounds of wheat; and the weight of wine contained in eight such wine gallons, and the weight of wheat contained in eight such corn or ale gallons, were equally the measure of the bushel.

The wine, to which the statute of 1266 and many subsequent English statutes exclusively refer, was the wine of Gascoigne, a province at that and for a long period under the dominion of the English Kings; the same sort of wine which now goes under the denomination of Claret or Bordeaux. Its specific gravity is to that of distilled water as 9,935 to 10,000, and its weight is of 250 grains troy weight to the cubic inch.

With these data, we are enabled accurately to ascertain the dimensions and contents of the bushel, the ale gallon, and wine gallon of 1266. The silver penny, called the sterling, to which thirty-two kernels of wheat were equiponderant, was equal to twenty-two and a half grains troy. Its pound of twelve ounces was equivalent to fifty-four hundred grains troy. The pound of fifteen ounces, by which wheat and wine were weighed, was equal to six thousand seven hundred and fifty grains troy. Eight such pounds were equal to 54,000 grains troy, which, divided by 250, the number of grains troy weighed by a cubic inch of Bordeaux wine, gives a wine gallon of 216 cubic inches.

There is no standard wine gallon of that age extant in England; but the weights and measures of England were established by law in Ireland as early as the year 1351; and, by the act called Poyning's law, of 10 Henry VII., (1493,) all the then existing statutes of England relating to weights and measures were made applicable to Ireland. The changes since effected in England have not extended to Ireland, at least in relation to the measure of wine. The standard Irish wine gallon at this day is of 217.6 cubic inches—a difference almost imperceptible in the quantity of the gallon from the legal standard of 1266, and the cause of which must have been this: there was another law, probably of date more ancient than the year 1266, in which the measure of the wine gallon was fixed by a different process.

A statute of the year 1423, the second of Henry VI., chap. ii, declares that "*in old time* it was ordained and lawfully used that tuns, pipes, tertians, hogsheads of Gascoigne wine, barrels of herring and of eels, and butts of salmon, coming by way of merchandise into the land, out of strange countries, and also made in the same land, should be of certain measure; that is to say, the tun of wine, 252 gallons; the pipe, 126 gallons; the tertian, 84 gallons; the hogshead, 63 gallons; the barrel of herring and of eels, 30 gallons, fully packed; the butt of salmon, 84 gallons, fully packed, &c.; but that, of late, by device and subtlety, such vessels have been of much less measure, to the great deceit and loss of the King and his people, whereof special remedy was prayed in the Parliament." It then proceeds to re-enact that no man shall make in England vessels for those purposes, or bring wine, &c. into England in vessels of other dimensions than those thus prescribed, upon penalty of forfeiture.

The ordinance of *old time*, referred to in this act, is not now among the Statutes at Large, and is, therefore, probably of more ancient date than the Magna Charta of 1225. As it regulated the size of casks, which, in the nature of the thing, were to be made in the country whence the wine was imported, it seems likely to have originated when Gascoigne was under English dominion, and when the law of Bordeaux could be accommodated to the assize of the English tun. This assize of the tun is, in its nature, connected with the trade of the cooper, with the assize of hoops and staves, with the art of the shipbuilder, and with the whole science of hydraulics and of navigation. The measure and form of the tun must be accommodated to the character of the substance which it is to contain,

and to the convenience and safety of its conveyance by sea. It must be adapted for stowage to the necessary form of the ship, to the volatile property of fluids, to the concussions of tempestuous elements. It is in the composition of the tun that the natural connexion between the weight of water and cubic linear measure first presents itself. The burden of the ship is the weight of tonnage which it can bear afloat upon the waves; that weight is equal to the weight of water which it displaces. The measure of the ship must be taken by the builder in linear measure. Now, 80 of the old easterling tower pounds make 432,000 grains troy weight, which, divided again by 250, the number of troy grains to a cubic inch of Bordeaux wine, give 1,728 cubic inches, precisely the dimensions of an English cubic foot; one-eighth part of which makes, again, the gallon of 216 cubic inches; and here we discover again the quadrantal or amphora of the Romans, the cubic foot containing 80 pounds of wine.

That the assize of the tun, which in 1423 was *of old time*, was equally well known and established in 1353, appears from a statute of that date, (27 Edward III., chap. viii,) directing that all wines, red and white, should be gauged by the King's gaugers, and that, in case less should be found in the tun or pipe than ought to be of right *after the assize of the tun*, the value of as much as lacked should be allowed and deducted in payment.

The casks of Bordeaux wine were then, and still are, made for stowage in such manner that four hogsheads occupy one ton of shipping. The ton was of thirty-two cubic feet by measure, and of 2,016 English pounds, of fifteen ounces to the pound, in weight—equal to 2,560 of the easterling tower pound.

In comparing together the wine gallon as prescribed by the statute of 1266 and that derived from the assize of the tun, we find the former in the ascending ratio, beginning with the kernel of wheat and multiplying; the latter is found in the descending ratio, beginning at the tun and dividing. In one process, the gallon is formed by weight; in the other, by measure. The hogshead of wine was the measure corresponding to the quarter of wheat, but there was a difference of eight pounds in their weight. The hogshead of wine weighed 504, and the quarter of wheat 512 pounds of fifteen ounces. The wine gallon of 216 cubic inches, prescribed by the statute of 1266, was thus an exact eighth part of the English cubic foot of 1,728 inches. The wine gallon, therefore, is the *congius* of the Romans, weighing ten nummulary and eight commercial pounds, and measuring exactly the eighth part of a cubic foot.

But the gallon of 216 cubic inches, the eighth part of the cubic foot, was derived originally from a measure of *water*, and was an aliquot part of the ton of shipping. The wine gallon of 1266 was made of eight easterling pounds of wheat, and therefore contained of water eight corresponding commercial pounds. But if the gallon of water, weighing eight pounds, was of 216 solid inches, the gallon of Gascoigne wine, to be of the same weight, would be of 217.6 solid inches, the precise contents of the standard Irish gallon to this day; and the specific gravity of that wine being to that of wheat as 143 to 175, the corn gallon, balanced by this Irish gallon of 217.6 inches, must be of 266.17 cubic inches. The Romford corn gallon of the year 1228, examined by the committee of the House of Commons in 1758, was found to be of 266.25 cubic inches. The Irish wine gallon and the Romford corn gallon of 1228 were both made, with an accuracy which all the refinements of art of the present age could scarcely surpass, from the standard measure made, as the statute of 1266 declares, by the consent of the whole realm, and precisely in the manner therein described.

But as the hogshead, measuring eight cubic feet, was required by the assize of the tun to contain only sixty-three gallons of wine, it followed, of course, that the gallon thus composed was of 219.43 cubic inches; and as the weight of eight such gallons of wine was to form the bushel, the proportion of the weight of wine being to that of wheat as 143 to 175, the bushel would be of 2148.25 cubic inches, which is within two inches of the Winchester bushel.

This system of weights and measures has been by many of the modern English writers on the subject supposed to have been *established* by the statute of 1266. But, upon the face of the statute itself, it is a mere exemplification of ancient ordinances. The coincidences in its composition with those of the ancient Romans, proved by the letter of the Silian law, and by the still existing congius of Vespasian; with those of the Greeks, as described by Galen, and as shown by the proportions between their scale weight and their metrical weight; and with that of the Hebrews, as described in the prophecy of Ezekiel, show that its origin is traceable to Egypt and Babylon, and there vanishes in the darkness of antiquity. As founded upon the identity of nummulary weights and silver coins, and upon the relative proportion between the gravity and extension of the first articles of human traffic, corn and wine, it is supposed to have originated in the nature and relations of social man and of things.

It has been said that the first inroad upon this system in England was made by Edward I, himself, by destroying the identity between the money weight and the silver coin. From the time of the Norman Conquest, and long before, (that is, for a space of more than three centuries,) the tower easterling or sterling pound had been coined into twenty shillings, or two hundred and forty of those silver *pennies*, each of which weighed thirty-two kernels of wheat from the middle of the ear. Edward I., in the year 1328, coined the same pound into two hundred and forty-three pennies of the same standard alloy. From the moment of that coinage, the penny called a sterling, however round, however unclipped, had lost the *sterling* weight, though it still retained the name. This debasement of the coin, once commenced, was repeated by successive sovereigns, till, in the reign of Edward III., the pound was coined into twenty-five shillings, or three hundred pennies. The silver penny then weighed only $25\frac{3}{5}$ kernels of that wheat of which the penny of 1266 weighed 32. It is probable that, in reducing the weight of their coins, none of those sovereigns were aware that they were taking away the standard of all the weights and of all the vessels of measure, liquid and dry, throughout the kingdom; but so it was. It destroyed all the symmetry of the system. It has been further affected by the introduction of the troy and avoirdupois weights.

The standard measures of the exchequer had been made by the rules set forth in the statutes of 1266 and 1304. These standards were kept in the royal exchequer. In process of time, the standards themselves fell into decay and called for renovation. In the year 1494, shortly after the termination of the long and sanguinary wars between the houses of York and Lancaster, Henry VII., in the tenth year of his reign, undertook to furnish forty-three of the principal cities of the kingdom with new copies of all the standard weights and measures then in the exchequer. They were accordingly made and delivered to the representatives in Parliament of the respective counties; but it was soon discovered that they were all defective, and not made according to the laws of the land. From what cause this had arisen does not appear; but that the laws of the land to which they referred, namely, the statutes of 1266 and 1304, were and continued to be entirely misunderstood, is abundantly apparent from the statute which was made the very next session of Parliament (1496) to remedy the evil.

This act, after reciting the extraordinary attention of the King in having made at his great charge and cost, and having distributed, all those county standards of weights and measures, according to the old standards in the treasury; and after stating the disappointment which had ensued upon the discovery of more diligent examination that they were all defective, and not made according to the old laws and statutes, proceeds to ordain that the measure of a bushel contain eight gallons of wheat, that every gallon contain eight pounds of wheat, troy weight, and every pound contain twelve ounces of troy weight, and every ounce contain twenty *sterlings*, and every sterling be of the weight of thirty-two corns of wheat that grew in the midst of the ear of wheat, *according to the old laws of the land:* and the new standard gallon, after the said assize, was to be made to remain in the King's trea-

sury forever. All the weights and measures, which had been sent by the act of the former year throughout England, were directed to be returned; others, conformable to the new standard, were to be made from them and sent back; after which, all weights and measures were to be made conformably to them.

It is from the terms of this statute that many of the English writers have concluded that the kernel of wheat was the original standard of English weights. It is by this statute made the standard of troy weight; but it was not so according to the *old laws of the land*. It was not so in the measure declared in 1266 and 1304 to have been made by the consent of the whole realm of England. To prove this, it is only necessary to compare the statutes together.

The first two declare that an English *penny, called a sterling*, round, and without any clipping, will weigh thirty-two corns of wheat from the midst of the ear. That penny was the two hundred and fortieth part of the old tower pound, and was one-sixteenth lighter than troy weight. The weight of that penny in 1266 is therefore now known, but appears not to have been known to the Parliament of 1496; for the tower pound was then coined into thirty-seven shillings and six pence sterling, and, consequently, the penny called a sterling, instead of *then* weighing thirty-two grains of the wheat, which it weighed in 1304, would have weighed only seventeen of the same grains.

The term *penny*, therefore, is dropped in the act of 1496, but the term *sterling* is retained, and improperly applied to the penny*weight* troy. The penny of 1266 was both weight and coin. In 1496, the penny had ceased to be a coin, and the penny sterling, which was yet money, weighed little more than half what it had weighed till after 1304. The pennyweight troy was never called *a sterling* anywhere, or at any time, but in this act of 1496. It was neither the weight of the old tower standard, nor was it the penny sterling of Henry VII.'s own coinage.

The statute of 1496 inverts the order of the old statutes; it is not a *composition*, but an *analysis* of measures. It begins with the bushel, and descends to the kernel. The act of 1266, to make the weight, number, and measure of corn, money, and wine, begins with the kernel, and ascends by steps to the weight of coin; thence to the measure of wine, by the weight of corn; thence to the measure of corn, by the weight of wine. The mere process of the composition establishes the proportional measures. The statute of 1496 destroys the proportion altogether. It says that every gallon shall contain eight pounds of wheat, *troy weight*, and every pound twelve ounces of troy weight. It substitutes, therefore, instead of the *weight* of the gallon of wine, prescribed by the statute of 1266, the *measure* of the wine gallon, for the eighth part of the bushel. The gallon established by this act of 1496 is the gallon of two hundred and twenty-four cubic inches—the Guildhall gallon, which, in 1688, was found by the commissioners of the excise to be of that capacity. It contains eight pounds troy weight of wheat, and, consequently, eight pounds avoirdupois of Bordeaux wine, of 250 grains troy to the cubic inch. Its bushel would contain seventeen hundred and ninety-two cubic inches; but if such a bushel ever was made, as the act required, it never was used as a standard. It must have been found to fall too far short of the old standards still existing; and the real standard bushels of Henry VII., in the exchequer, instead of being made according to the process prescribed in his law of 1496, must have been copied from the older standard bushels then existing.

The gallon of two hundred and thirty-one inches was also a gallon made under the statute of 1496. But the wheat is of that kind thirty-two grains of which equipoise the penny of the old tower pound; while the wheat that forms the gallon of two hundred and twenty-four inches is that of which thirty-two kernels weigh a pennyweight troy. The weight of the corn in both gallons would be the same; but that, of which each kernel upon the average would be one-sixteenth heavier than those of the other, would, by the combined proportion of gravity and numbers, occupy one thirty-second less of space. This is precisely the difference between the gallons of two hundred and twenty-four and two hundred and thirty-one solid inches.

The debasement of the coin had destroyed its original identity with the money weight. The substitution of *troy* weight, instead of the old easterling pound, for the composition of the gallon, destroyed the coincidence between the water gallon derived from the tun, the eighth part of the cubic foot, and the wine gallon containing eight money pounds of wheat. The wine gallon of two hundred and twenty-four, or two hundred and thirty-one cubic inches, no longer bore the same proportion to the cubic foot of water; one consequence of which was, that the hogshead of Bordeaux wine, which the law required to contain sixty-three gallons, no longer contained that number of English gallons; but, from that day to this, has contained from fifty-nine to sixty-one. It still contains at least sixty-three Irish gallons.

The act of 12 Henry VII., (1496,) intended, upon the face of it, to be a mere repetition of the statutes of 1266 and 1304, was thus a total subversion of them. It was founded upon two mistakes: the first, a supposition that the penny sterling, described in those statutes, was the pennyweight troy; and the second, a belief that it was the *measure* and not the *weight* of eight gallons of wine which constituted the bushel. The causes of these mistakes were, first, that, in the lapse of two centuries, a great portion of which had been a period of calamity and civil war, the successive debasements of the coin had reduced the penny sterling to about half its weight as it was when made the standard of comparison with thirty-two kernels of wheat; and finding that the penny sterling of their own time, if used to make the new standard bushel, would reduce its size by nearly one-half, which had perhaps been the mistake upon which the act of 1494 had been made, they must hastily have concluded that it was the pennyweight troy which was intended by the old statutes. The second was a misapplication of the term *gallon*, which, in its original meaning, and in its popular signification to this day, is exclusively a measure of liquids, and not of dry substances. In the statute of 1266, it is expressly called the gallon of *wine*. In the act of 1304, it was called the gallon, without addition, but meaning the same wine gallon. The measure for corn was the bushel; and its subdivisions were the peck, pottle, and pint. The eighth part of the *measure* of a bushel was first called a *gallon*, because it was used as the measure of the ordinary liquids brewed from grain, beer and ale. There never was properly any corn gallon; and the term was misapplied even to denote the measure of beer. Being a vessel of different dimensions, it ought to have had a different name; and that alone would have prevented them from ever being mistaken the one for the other.

The Parliament of 1496 were seduced by those expressions, so often re-echoed from year to year, and from century to century, that there should be but one weight and one measure throughout the land. They mistook the uniformity of proportion for the uniformity of identity. They construed the threefold "one measure of wine, and one measure of ale, and one measure of corn," ordained in Magna Charta, as if it meant that those three one measures should be the same. That these mistakes should be made, is not surprising when we consider that, in 1496, the art of printing was but in the cradle; that no collection of the statutes had ever been printed; that the languages in which the statutes of 1266 and 1304 had been enacted (the Norman French, and the barbarous Latin of the thirteenth century) were no longer in use, at least in Parliament; that the very records, by which the weight of the penny sterling in 1266 might have been ascertained, were perhaps not known to exist. But it is not so easy to explain how they could mistake the penny of the old easterling pound, which was still, and continued for forty years after to be used at the mint for coining money, for the penny troy weight.

We have seen that, in 1304, the easterling pound of 12 ounces was the money pound, and that the corresponding commercial weight was a pound of 15 of the same ounces. These were the result of a rough and inaccurately settled proportion between the specific gravity of wheat and wine, or wheat and water. Mr. Jefferson has justly remarked that the difference between the specific gravity of wine and of water is so small that it may safely, as between buyer and seller, be disregarded. And it was disregarded by those two acts of Parliament, one of which made the wine gallon an eighth part of the cubic foot of water, while the other made it equiponderant to eight easterling pounds of wheat. So the proportion of the two pounds of twelve and fifteen of the same ounces was, upon a rough estimate, that the proportional weight of wheat and wine was as 4 to 5, or as 14 to 17½; and it was afterwards assumed as of 14 to 17. But if trade, and even legislation, may safely neglect small quantities, nature is no such accountant of more or less. It has been shown that the water gallon, of eight easterling twelve-ounce pounds of wheat, corresponds with the gallon of two hundred and sixteen cubic inches, the eighth part of the cubic foot; but that, when a Bordeaux *wine* gallon is to be made, containing the same eight pounds of wheat, it produces a gallon, not of 216, but of 217.6 cubic inches. In the mode of forming the gallon and bushel, described in the act of 1266, it is not the loose calculations of man, but the unerring hand of nature, that establishes the proportions. The vessel that would hold eight money pounds of wheat was the wine gallon. The vessel that would balance, filled with wheat, eight gallons of that wine, was the bushel. Then, if a half-peck of this bushel was taken for a beer gallon, its proportion to the wine gallon would not be of 15 to 12, nor of 17 to 14, but of 175 to 143.

When the avoirdupois or the troy weights were first introduced into England, has been a subject of controversy among the English writers, and is not ascertained. The names of both indicate a French origin; but that no new weight or measure was brought in by the Norman conqueror is certain, and the statute of weights and measures of 1304 proves that neither of them was *then* recognised by law. One of the most learned writers upon the coins [Clarke] says that troy weights were first established by this statute of Henry VII. of 1496; that it was owing to the *intercursus magnus*, or great treaty of commerce concluded between England and Flanders the year before; that the Flemish pound was adopted as a compliment to the Duchess of Burgundy, and for the mutual convenience of all their payments, which would then be adjusted by the same pound.

This conjecture is ingenious, but not well founded. The statute of 1496 did, in fact, legitimate troy weight for the composition of the gallon and the bushel, but it professed and intended to introduce no new weight or measure. Its purpose was to re-enact the composition of weights and measures of 1266. It was a legislative error, intended to correct another error committed at the last preceding session of Parliament, in 1494, before the *intercursus magnus* was concluded. Instead of correcting the error, it rendered it irreparable. It was so far from correcting the error, that, although a standard wine gallon was made under this statute, which was the Guildhall wine gallon of two hundred and twenty-four inches, there never was a standard bushel made by the rule prescribed in this statute; and if there had been, its cubic contents would have been not one inch more or less than 1,792.

The troy weight was never used by Henry VII. at the mint at all. He made a wine gallon by it, because the difference between a gallon of 217.6 inches, which was the old standard, and one of 224, which was made by his troy weights, was not large enough to make its incorrectness apparent. It was scarcely the difference of a small wine glass upon a gallon; and, as it was a difference of excess over the contents of the old standard, it might naturally be attributed to the decays or inaccuracy of that. He ordained that a bushel should be made by it; but a bushel made from the *measure* of his wine gallon, a bushel of 1,792 inches, would have contained at least 330 inches, nearly 12 pounds in weight less than any of the old standards. This would have been found a difference utterly intolerable. It would have been necessary to recall and break up the new standards a second time, and to acknowledge a second error greater than the first. So the statute, so far as related to the composition of the bushel, was suffered to slumber upon the rolls; the old standard bushels were still retained; and new ones were also made, not by the troy, but by the avoirdupois pound of wheat: and hence it is that standard bushels of Henry VII. exist at the exchequer, one of 2,124 inches, which is the old standard, and one of 2,146 inches, which is the Winchester bushel, and, at the same time, corn gallons of 272 inches.

That the troy weight was not introduced into England by Henry VII. is further proved by two statutes—one of 1414, 2 Henry V. ch. iv, and one of 1423, 2 Henry VI. st. 2, ch. iv: in the first of which it is ordained that the goldsmiths should give no silver worse than of the allay of the English sterling, and that they take for a pound of *troy* gilt but 46*s.* 8*d.* at the most; and, in the second, that silver not coined, in plate, piece, or in mass, being of as good allay as the sterling, should not be sold for more than 30*s.* the pound troy, besides the fashion, because the same was of no more value at the coin than 32*s.* The tower easterling pound was at that time coined into 30*s.*, and the value of the troy pound of the same allay was, of course, 32.

From these two statutes it is apparent that, nearly a century before Henry VII., the troy pound was used by the goldsmiths, who were the bankers of that age, and were foreigners, for weighing bullion and plate; and that the proportion of the troy pound to the tower money pound was as 16 to 15.

That the troy pound, though adopted by Henry VII. for the composition of the bushel and gallon, was not introduced by him at the mint, appears equally clear. About the middle of the last century, Martin Folkes published his tables of English coins, in which he cited a verdict remaining in the exchequer, dated 30th October, 1527, 18 Henry VIII., in which are the following words: "And whereas, heretofore, the merchant paid for coynage of every *pound towre* of fyne gold, weighing xi. oz. quarter troye, 2*s.* 6*d*: Nowe it is determined by the King's highness, and his said councelle, that the aforesaid pounde towre shall be no more used and occupied; but all manner of golde and sylver shall be wayed by the pounde troye, which maketh xii. oz. troye, which excedith the pounde towre in weight three quarters of the ounce."—(*Clarke*, p. 15.)

A French record of much earlier date, from the register of the Chamber of Accounts at Paris, cited also by Folkes, shows that, early in the fourteenth century, there were among the weights in common use in France two marks, of different gravity—one of troy, and the other of *Rochelle*, in the same proportion to each other, and that the last was called the mark *of England*.

The Rochelle and easterling pound was therefore the same; and that was the pound, eight of which in spring water were contained in the eighth part of the cubic foot, and formed the gallon of 216 cubic inches.

This proportion, as has been observed, was totally destroyed by the substitution of the troy pound by Henry VII., in 1496, instead of the Rochelle pound, for the composition of the bushel and gallon.

As, by the treatise of weights and measures of 1304, only two weights are mentioned, by which it asserts that all things were weighed, this tower pound of 12 ounces, and the corresponding commercial pound of 15 of the same ounces, it is clear that the troy weight was then unknown, or at least not used in England. But this reign of Edward I. was also the period when the foreign commerce of England began to flourish. In 1296, the famous mercantile society called the Merchant Adventurers had its first origin; and another society of natives of Lombardy, the great merchants of that age, about the same time established themselves in England, under the protection of a special charter of privileges from Edward. These Lombards soon became the goldsmiths and bankers in England.

(*Hume*, vol. ii, p. 330, ch. 13.) In the year 1354, the balance of exports above the imports was of more than 250,000 pounds; and as the balances of that age could be paid for only in specie, whenever the balance was in favor of England it must have brought much foreign money into the kingdom. The pound of the goldsmiths and bankers was the troy weight, and by them, there can be little doubt, it was first introduced. The pound of 15 ounces troy must have been introduced at the same time, by an accommodation of that weight to the old English rule—that when bullion and drugs were weighed by a pound of 12 ounces, all other things were weighed by a pound of 15 of the same ounces. This pound of 15 ounces, or 7,200 grains troy, has never been recognised in England by law; but, in many parts of England, it has been used under the name of the merchant's weight; and 8 such pounds of wheat form precisely the gallon of 280 cubic inches, of which the standard quart in the exchequer is the fourth part.

The time and occasion of the introduction of the avoirdupois pound into England is no better known than that of the troy weight. But it may be inferred, from the ancient statutes, that it was brought in by the same foreign merchants with the troy, and as the corresponding weight to that as the weight for bullion and pharmacy. The first time that the term *avoirdupois* is used in the English statute book is in the 9th of Edward III. stat. 1, ch. i, (1335,) the very statute which authorizes merchant *strangers* to buy or sell corn, wine, *avoirdupois*, flesh, fish, and all other provisions and victuals, wool, cloths, wares, merchandises, and all other vendible articles, in any part of England.

Eighteen years afterwards, in the celebrated statute staple of 1353, (27 Edward III. ch. x,) is the following provision: "Forasmuch as we have heard that some merchants purchase *avoirdupois*, woollens, and other merchandises, by one weight, and sell by another, and also make deceivable diminutions upon the weight, and also use false measures and yards, to the great deceit of us and of all the commonalty and of honest merchants: we therefore will and establish that one weight, one measure, and one yard, be throughout the land, as well without the staple as within; and that woollens, and all manner of *avoirdupois*, shall be weighed by balances," &c.

In these two statutes, the term *avoirdupois* manifestly refers not to the weight, but to the article weighed. It means all *weighable* articles, in contradistinction to articles sold by measure or by tale; and the *one weight* meant by the statute staple is the easterling pound of fifteen ounces mentioned in the statute of weights and measures of 1304. Money and bullion were not included among these *weighable* articles, because they had a special weight of their own, and because money was current by *tale*. Grain and liquids were not weighable articles, because they were bought and sold by measure. Hence arose naturally the practice of calling all articles bought and sold by weight in the traffic of these merchant strangers, articles *having weight*, or weighable.

That this is the meaning of the term *avoirdupois* is also demonstrated by an act of 1429, (8 Henry VI. ch. v,) which, reciting these regulations of Edward III., expressly says that they require woollens, and all manner of *weighable* things, [*toutz manerz des choses poisablez*,] bought or sold, to be weighed by even balance, with weights sealed according to the standard of the exchequer.

The terms *avoirdupois* and *choses poisablez* were therefore synonymous. But the merchant strangers had a weight of their own—the corresponding commercial weight proportional to their pound troy. This was the weight now called the avoirdupois pound of sixteen ounces, but the ounce of which was not the same as that of the troy weight. The standard easterling pound of fifteen ounces at the exchequer weighed 6,750 grains troy. The avoirdupois pound of the merchant strangers weighed 7,000. The difference between them was but of about half an ounce; and one sees instantly what temptations and opportunities this slight difference furnished to those unprincipled merchants, of whom the statute staple complains, of buying by their own foreign larger weight, and selling by the weight of the exchequer.

The statute staple of 1353, and the act of 2 Henry VI., (1423,) are both evidences of the conflict between the mint and exchequer easterling pounds on one side, and the troy and avoirdupois weights of the merchant strangers on the other. In this struggle the latter ultimately prevailed, and completely rooted out the old English weights. The troy weight being adopted by Henry VII. in 1496, for the composition of the bushel and gallon, and by Henry VIII. in 1527, for making money at the mint, the avoirdupois pound came in at the corresponding commercial pound; and a statute of 24 Henry VIII., ch. iii, (1532,) directs that beef, pork, mutton, and veal shall be sold by weight *called* haverdupois; the very use of which expression, *called* haverdupois, indicates that it was a denomination, as applied to the weight, of recent origin, and that the weight itself had not been long in general use for any purpose.

A statute of the preceding year (23 Henry VIII., ch. iv, 1531, s. 13,) had directed that every cooper should make every barrel for ale "*according to the assize specified in the treatise called Compositio Mensurarum;* [the statute of 1304;] that is to say, every barrel for ale shall contain thirty-two gallons of the said assize, or above, of the which eight gallons make the common bushel, to be used in this realm of England," &c.

By this statute, the ale gallon was expressly declared to be the eighth part of the *measure* of the bushel. Now, it has been proved that, by the *Compositio Mensurarum*, the bushel was a measure containing of wheat the *weight* of eight gallons of wine. The eighth part of this *measure*, therefore, being the ale gallon, *must* bear the same proportion to the wine gallon as the specific gravity of wheat bears to that of wine; and the wine gallon of 231 inches having been made by the rule of the *Compositio Mensurarum*, but by the troy weight of the statute of 1496, that is to say, weighing eight troy pounds of the wheat thirty-two kernels of which were equiponderant to the penny sterling of 1266, the bushel, to balance eight such gallons of wine, must, of necessity, contain sixty-four avoirdupois pounds of wheat, and measure 2,256 cubic inches. The eighth part of this measure is the gallon of 282 inches, which is to this day the standard ale and beer gallon of the British exchequer and of these United States.

And thus we have seen that all the varieties of standard gallons and bushels which have been found, from the Irish gallon of 217.6 cubic inches, to the ale gallon of 282, and from the ordained, but never made, bushel of 1,792 inches prescribed by Henry VII.'s act of 1496, to the bushel of 2,256 inches, of which the ale gallon is the eighth part, are distinctly traceable to the inconsistency of human laws, and the consistency of the laws of nature.

The statute of 1496 changed the contents of both the gallons and of the bushel without intending it. For, although the bushel of 1,792 inches was never made, or at least never deposited as a standard at the exchequer, yet new standard bushels were made from the new wine gallon, by the rule of the Compositio Mensurarum, and they produced the bushel of 2,224 of Henry VII. still extant at the exchequer.

The *Winchester* bushel of the exchequer, however, was not thus made. It was found in the year 1696 to contain 2145.6 cubic inches of spring water. Its ale gallon, therefore, by the statute of 1531, and the Compositio Mensurarum, would have been of 268.2, and its wine gallon of 219.2 cubic inches. Its difference from the proportions of the Irish wine gallon and the Romford corn gallon is so slight that there can be no doubt it was copied from a model made by the statute of 1266.

That the capacity of the wine gallon, although it was very essentially changed, was not intended or understood to be changed by the statute of 1496, is proved by the statute of 28 Henry VIII., ch. xiv, (1536,) which re-enacts the old statutes requiring that the tun of wine should contain 252 gallons, and all other casks of the same proportion, including the hogshead of sixty-three gallons. Now, the hogshead which contained sixty-three gallons of 217.6 cubic inches could contain no more than sixty-one and a quarter gallons of 224 inches, nor more than fifty-

nine and one-third gallons of 231 inches. The ordinary Bordeaux hogshead contains from fifty-nine to sixty gallons; and the size of this cask, being formed of a certain number of staves of settled dimensions, and made by the coopers in particular forms, has passed down from age to age without alteration; while the laws of England and those of several of the United States have required that it should contain sixty-three gallons of 231 cubic inches, because five hundred years ago the laws required it to contain sixty-three gallons of 219.5 inches.

In the reign of Elizabeth, the change which had been effected in the wine gallon by the act of 1496 was discovered in its effects upon another branch of trade; but the cause of the change appears not to have been perceived. The statute of 13 Elizabeth, ch. xi, (1570,) recites that the people employed in the herring fishery "had, time out of mind, used to pack their herring in barrels containing *about* thirty-two gallons of usual *wine* measure, which assize had always been gauged and allowed in the city of London; yet the measure had lately been quarrelled at by certain informers for not containing thirty-two gallons by the old measure of standard, *which they never did*, though peradventure *the extremity of old statutes in words, by some men's construction*, might be stretched to require so much." It then enacts "that thirty-two gallons wine measure, which is *about* twenty-eight gallons by old standard, shall be the lawful assize of herring barrels, any old statute to the contrary notwithstanding." This was cutting the Gordian knot. The wine gallon here referred to was the gallon of 231 inches made by the troy weight of wheat of Henry VII. The *old standard* is the corn gallon of 1266, which, according to the Romford quart, examined by the committee of the House of Commons in 1758, was of 264.8, or, according to the Romford gallon, was of 266.25 cubic inches. Now, twenty-eight gallons of 264 inches are of precisely the same capacity as thirty-two gallons of 231. But, as the wine gallon at Guildhall, though it showed 231 inches by the gauge, did, in fact, contain seven inches less, and as the herring barrels were gauged according to the Guildhall gallon, they would have fallen short nearly one gallon in the barrel of twenty-eight gallons by the *old standard;* and the act, the object of which was to rescue the herring fishers from the fangs of informers, is cautious not to tie them down to too close a measure. The old statutes, the construction of which the act professes to consider as doubtful, are not named; but the act of 23 Henry VIII. (1531) *must* have been that upon which the informers had quarrelled at the assize of the barrels used by the herring fishers.

That act requires that the coopers should make barrels of thirty-two gallons for ale, according to the assize of the Compositio Mensurarum—gallons, eight of which make the common bushel. Now, the act of 1496 had expressly directed that *every* gallon should contain eight pounds of wheat *troy* weight, and that the bushel should contain eight such gallons of wheat. But this law, so far as it prescribed a new bushel, had never been executed: the old standard bushels remained. So that the statute for the coopers of 1531 was on the side of the informers, and the statute of weights and measures of 1496 was on the side of the herring fishers. Parliament found no expedient for the difficulty but to declare the usual existing size of the herring barrels lawful, and to set all the old statutes aside with a *non obstante*.

If the Parliament of 1496, contrary to their avowed intention, did actually change the capacity of the wine and corn gallons, and did ordain a much greater change of the capacity of the bushel, these varieties effected by the law, while they were unknown to the legislators, were still less likely to come to the general knowledge of the people. The eagle eyes of informers would occasionally discover that the measures of the people fell short of the standards of the law; but the people took the standards as they came, and used the measures which they and their forefathers, time out of mind, had employed.

The Restoration of 1660, after the convulsions of a civil war, formed a new era, not only in the political history of England, but in that of their vessels of capacity. It was then that a new system of taxation commenced by the excise upon liquors. About the same time also commenced a new era in the philosophical and scientific pursuits of the English nation, by the establishment of the Royal Society. Both these events were destined to have an important influence upon the history of English weights and measures.

The excise was a duty levied by the gallon upon malt liquors and upon wines. The malt liquors were measured by the standard gallon at the Treasury, made according to the cooperage act of 1531, by the rule of the *Compositio Mensurarum*, applied to the troy weight wine gallon of the statute of 1496. This gallon, therefore, was neither the wine gallon of 1496, nor the eighth part of the old standard bushel, nor of the Winchester bushel, but the gallon which, if filled with wheat of the troy weight specified in the statute of 1496, would balance the wine gallon of 231 inches; it was, therefore, a gallon of 282 cubic inches. The wine was measured by the gauge of the wine gallon at Guildhall.

Taxation and philosophy now began to speculate at the same time upon the weights and measures of England. In 1685, the weight of a cubic foot of spring water was found, by an experiment made at Oxford, to be precisely 1,000 ounces avoirdupois; and, in 1696, the Winchester bushel was found to be of 2145.6 cubic inches, and to contain also 1,000 ounces avoirdupois weight of wheat. Yet so totally lost were all the traces of the old easterling pounds of 12 and 15 ounces, that this coincidence between the cubic foot of water and the 1,000 ounces avoirdupois gave an erroneous direction to further inquiry; for the real original connexion between the cubic foot and the English bushel was not formed by avoirdupois weights and water, but by the easterling pound of 12 and 15 ounces and Gascoigne wine. It was the principle of the quadrantal and congius of the Romans, applied to the foot and the nummulary pound of the Greeks; the measure which, by containing eight pounds of wheat, was intended to contain, at the same time, ten of the same pounds of wine.

In the year 1688, the commissioners of the excise instituted an inquiry why beer and ale were always gauged at 282 cubical inches for the gallon, and other excisable liquors by the wine gallon of 231 inches. They addressed a memorial to the Lords of the Treasury stating these facts, and that, being informed the true standard wine gallon ought to contain only 224 cubical inches, they had applied to the auditor and chamberlains of the *exchequer*, who, upon examination of the standard measures in their custody, had found three standard gallons, one of Henry VII., and two of 1601, which an able artist employed by them had found to contain each 272 cubical inches; that, finding no wine gallon at the exchequer, they had applied to the Guildhall of the city of London, where they were informed the true standard of the wine gallon was, and they had found, by the said artist, that the same contained 224 cubical inches only; and they added, that the gallons of other parts of the kingdom used for wine had been made and taken from the Guildhall gallon.

In consequence of this memorial, the Lords of the Treasury, the 21st of May, 1688, directed an authority to be drawn for gauging according to the Guildhall gallon, which was accordingly done; but the authority does not appear to have been signed. The ale gallon at the Treasury was of 282 inches; but the order of the Lords of the Treasury, for the benefit of the revenue, would have reduced the gallon, both for malt liquors and wine, to the Guildhall gallon of 224. The merchants immediately took the alarm, and petitioned that they might be allowed to *sell* by the same gauge (of 224 inches to the gallon) by which they were to be required to pay the customs and excise. The commissioners of the customs not agreeing with those of the excise on the proposal for a new gauge, the opinion of Sir Thomas Powis, the attorney general, was taken upon it, who advised against any departure from the usage of gauging, because the Guildhall gallon was not recognised as a legal standard, and because, by any of those at the exchequer, the King would *be vastly a loser*.

Sir Thomas Powis then refers to the old statutes prescribing that eight pounds should make a gallon, and particularly to that of 1496, requiring that the eight pounds should be of wheat; *and as* there was to be *one measure throughout the kingdom*, which could not be unless it was adjusted by some one thing, and that seemed to be intended wheat, therefore *he did not know* how 231 cubical inches came to be taken up, but did not think it safe to depart from *the usage;* and therefore the proposal was dropped.

Sir Thomas Powis's *reasoning* upon the statute of 1496 was perfectly correct. That statute, as well as many others, does ordain one measure throughout the kingdom; it does ordain that *every gallon* shall contain 8 pounds, troy weight, of wheat, of thirty-two kernels to the pennyweight troy, which it strangely calls a sterling. Sir Thomas did not know how 231 inches came to be taken up, because he did not know that the statute of 1496 had substituted the troy for the old easterling weight in the composition of the gallon. It was that change that brought up the 231 inches; for, if eight easterling twelve-ounce pounds of wheat filled a gallon of 217.6 inches, eight troy pounds of the same wheat must of necessity fill a gallon of 231.

The Guildhall wine gallon contained also eight troy pounds of wheat; but it was wheat thirty-two kernels of which weighed a pennyweight troy. Every kernel, on the average, was $\frac{1}{15}$ heavier than that which had been used for the composition of the gallon and bushel of 1266. The average kernel being specifically heavier, a pound weight of it occupied less space; on the other hand, the corn of lighter kernel would require a greater number of kernels to make up the same weight. The gallon of 1496 was to contain 61,440 kernels, weighing, in the aggregate, eight pounds troy; and they would fill a space of 224 cubic inches. To make the same weight, 8 pounds troy would take 65,280 kernels of the wheat of 1266; but these 65,280 kernels would fill a space of 231 cubic inches. The difference between the two was a compound of the increase of numbers and the diminution of weight.

The advice of Sir Thomas Powis was, however, followed without further inquiry, and the use of the gauging rods was continued. But, in 1700, the same inconsistency of the statutes which, in the reign of Elizabeth, had bred the quarrel between the informers and the herring barrels, generated a lawsuit between commerce and revenue. It has been seen that, by a statute of 2 Henry VI., ch. xi, confirmed by subsequent acts of 1483 (1 Richard III., ch. xiii) and of 1536, (28 Henry VIII., ch. xiv,) it had been ordained that every *butt* or pipe of wine imported should contain 126 gallons. The original statutes had reference to the Gascoigne or Bordeaux wines, the casks of which were proportioned to the ton of 32 cubic feet. When, afterwards, the importation of Spanish wines became frequent, they were brought in casks of different dimensions from the assize; and the statute of Richard III., reciting that their butts had theretofore often been of 140 or 132 gallons, and complaining that they had been of late fraudulently reduced to 120 gallons or less, prescribed that they should thenceforth be of at least 126 gallons. The old fashion of 140 gallons or more to the *butt* of Malmsey and other Spanish wines was then restored; and, as the law was satisfied if the butts were of 126 gallons or more, their size beyond the usual dimensions of the Gascoigne standard remained unnoticed till the fiscal officer became interested in their contents. When customs and excise came to call for their share of the Malmsey, the merchants for some years paid upon the butt as if it had contained only the 126 gallons required by the law. But this calculation could not long suit the revenue. An action was brought by the officers of the customs against Mr. Thomas Barker, an importing merchant, for the duties upon sixty butts of Alicante wine, for which he had paid as if containing 126 gallons, but which, in fact, contained 150 gallons each. The Crown officers showed that the butt was to contain, by law, 126 gallons; and Mr. Leader, the city gauger, Mr. Flamstead, and other skilful gaugers, all agreed that a wine gallon ought to contain 231 cubical inches, and no more; that there was such a gallon, kept from time out of mind, at Guildhall; (they were in this mistaken, for it contained only 224 inches;) and that the wine gallon was less than the corn gallon, which was of 272, and the ale gallon, which was of 282 cubical inches.

The defendant insisted that the laws had directed that a standard should be kept at the Treasury; that there was one there containing 282 cubic inches; that by that measure he had paid the duty; that the Guildhall gallon was no legal standard; and merchants, masters of ships, and vintners, of twenty, thirty, forty years' experience, all testified that Spanish wine always came in butts of 140 or 150 gallons or more. Whether Mr. Thomas Barker, when he came to *sell* his wine, retained his contempt for the Guildhall gallon, is not upon the record.

After a trial of five hours, the Attorney General made it a drawn battle; agreed to withdraw a juror; and advised to leave the remedy to Parliament: and this was the immediate occasion of the statute of 5 Anne, ch. xxvii, sec. 17, by which the capacity of the wine gallon is fixed, and has ever since remained, at 231 cubical inches. This act declares that any round vessel, commonly called a cylinder, having an even bottom, and being seven inches diameter throughout, and six inches deep from the top of the inside to the bottom, or any vessel containing 231 cubical inches and no more, shall be deemed and taken to be a lawful wine gallon; and it is thereby declared that 252 gallons, consisting each of 231 cubical inches, shall be deemed a tun of wine, and that 126 such gallons shall be deemed a butt or pipe of wine, and that 63 such gallons shall be deemed a hogshead of wine.
